FUUTA JALOO AND FUUTA TOORO
A comparative study of two Pulaar dialects

ABSTRACT

The present thesis takes the form of a descriptive analysis of the two dialects of Pulaar/Fulfulde, as found in Fuuta Jaloo (Republic of Guinea) and Fuuta Tooro (Republic of Senegal).

The work is in six major parts. The first part is devoted to the phonology and the orthography (Chapter 1). The second part deals with the nominal system: General introduction (Chapter 2), distribution of classes in the two dialects (Chapter 3), Numerals (Chapter 4), noun substitutes and specifiers (Chapter 5). The third part is concerned with the verbal system; Chapter 6 deals with an introductory survey of the verbal piece. Chapter 7 concentrates on the tenses of the indicative mood whereas Chapter 8 takes a look at the tenses of the subjunctive mood and the forms of the imperative. In Chapters 9, 10 and 11 various patterns related to the verbal system are discussed and compared. Derivative infixes (Chapter 9), past anterior affix (Chapter 10), subject and object pronouns (Chapter 11).

In the fourth part an attempt is made to examine verbo-nominals (Chapter 12). The fifth part deals with the other parts of speech, which include adverbs and prepositions (Chapter 13), ideophones and onomatopes (Chapter 14). Concluding remarks are made in the sixth and final part (Chapter 15). The latter Chapter makes a summary of the previous findings which allow us to reach the conclusion that there are many similarities between the dialects of Fuuta Jaloo and Fuuta Tooro; that, in spite of the differences, there is a very high degree of mutual intelligibility between the Pulaar of Fuuta Jaloo and the Pulaar/Tukuloor of Fuuta Tooro, such that these are without doubt two closely related dialects of the same language.

ACKNOWLEDGEMENTS

A great many people have contributed towards making this thesis possible. I would like to thank as many of them as I can.

Most of all, I appreciate my family's unwavering support and I would like to extend a special thank you to my mother for her example of devotion, courage and creativity.

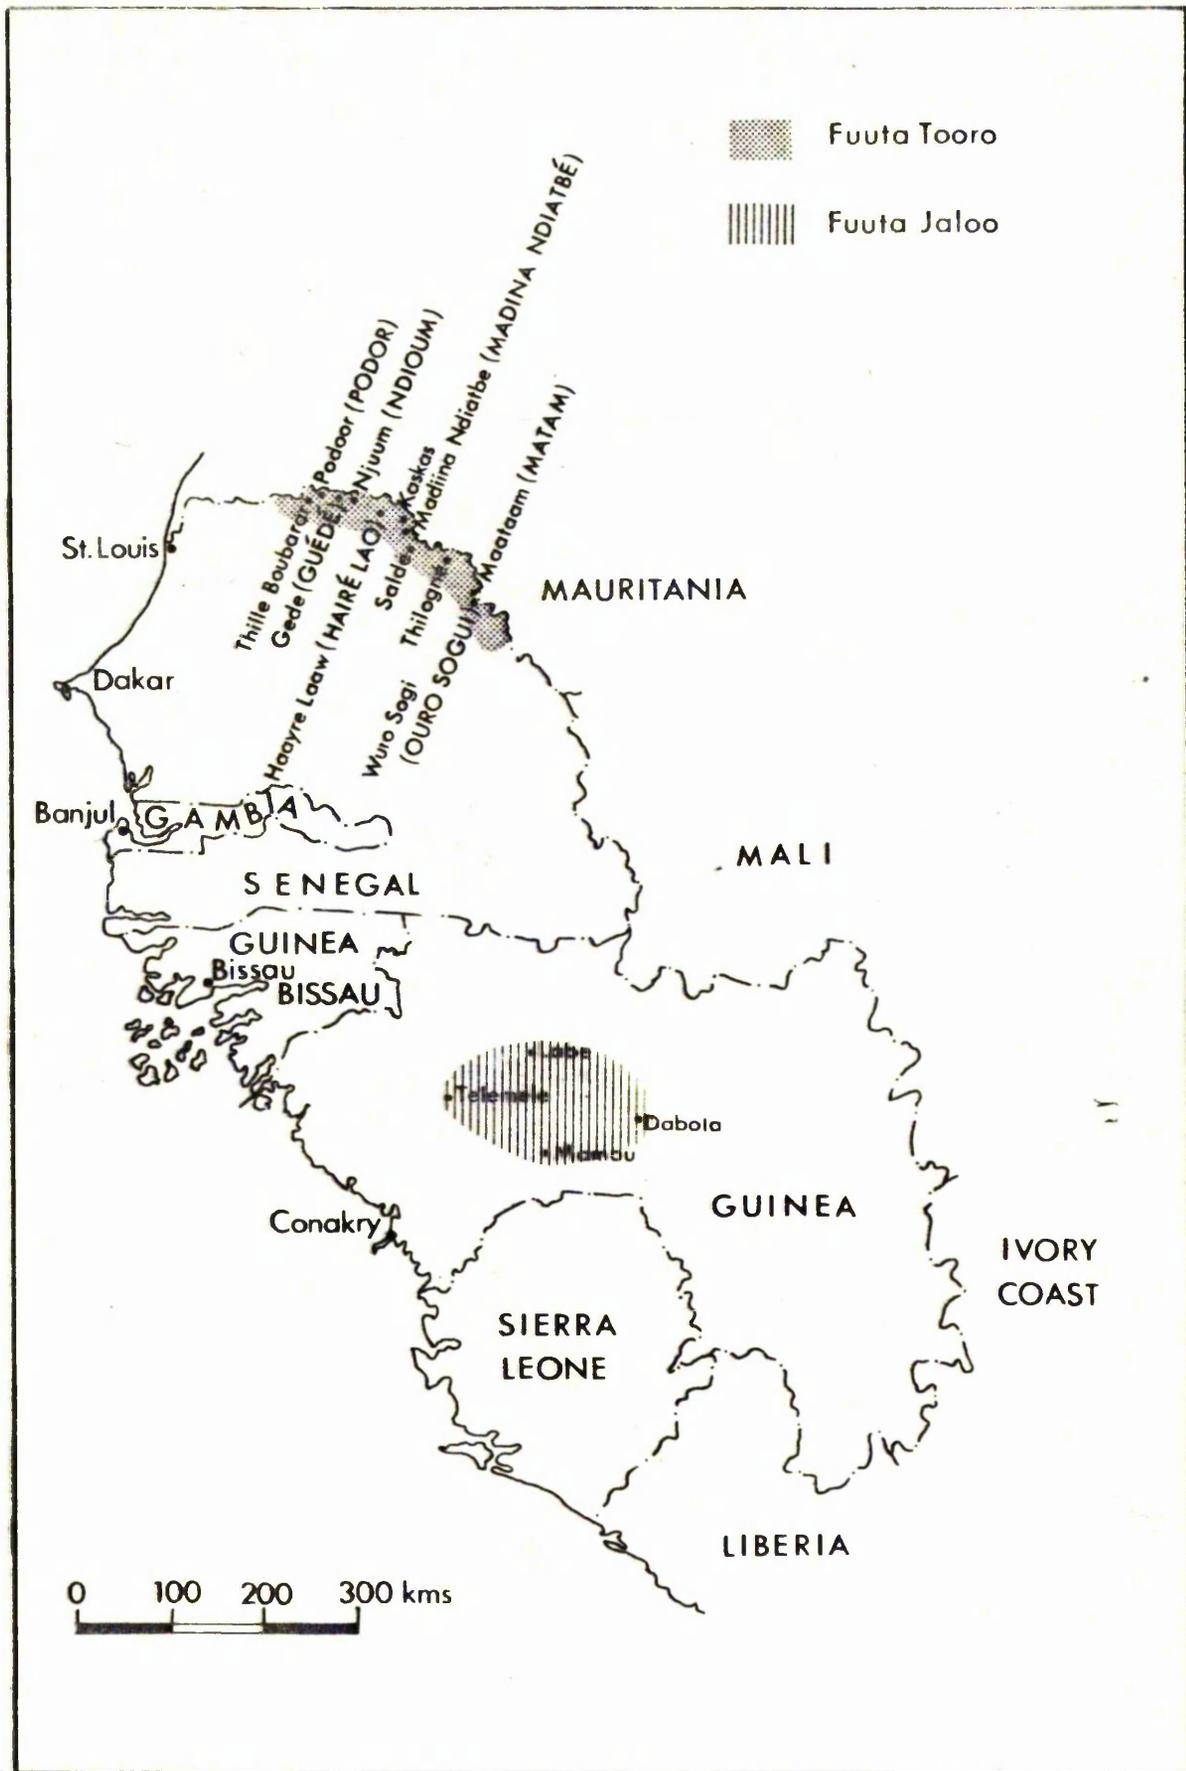

I would like to express my great appreciation of all the encouragement and advice I have received from Professor Jack Carnochan, My supervisor. He has extended himself beyond the call of duty and made many valuable suggestions concerning the grammatical analyses and style of writing. He has paid particular attention to assisting me to develop my critical eye.

I would also like to thank Professor Arnott (D.W.) for being so closely associated with the early, and none the less important, stages of the thesis.

I am particularly indebted to the great many informants who kindly agreed to being interviewed and assisted me at various stages (some of their names are found in the introduction).

I gratefully acknowledge the financial assistance of the International African Institute, the Senegalese Government and the Central Research Fund (University of London). I owe a great deal more to the International African Institute and to its Director, Dr. David Dalby, for the excellent co-operation and facilities provided throughout this research. Finally, I would like to thank Julia Hoyte who has had the trying task of typing the first draft of the thesis, with so much patience and understanding.

Futa Tooro and Futa Jaloo Pulaar dialects.

INTRODUCTION

0.1. This thesis aims to describe and compare the phonological and the grammatical features of the Pulaar of Fuuta Jaloo and the Pulaar/Tukuloor of Fuuta Tooro. The two dialects are commonly referred to by their speakers as Pulaar Fuuta Jaloo and Pulaar Fuuta Tooro or Tukuloor. No attempt will therefore be made to deal, even in outline, with other varieties of the language that may be encountered in the two areas of Fuuta Jaloo and Fuuta Tooro.

0.2. The material for the present thesis was gathered from both written and oral sources.

0.3. A list of the written sources is provided in the selected bibliography.

0.4. The major part of the material for the present study was gathered from oral sources.

0.5. The chief informants for Fuuta Jaloo were members of my family, being native speakers of the dialect, and from other native speakers. I was also able to make use of recordings made in Fuuta Jaloo by Professor Arnott. The major part of the material for Fuuta Tooro was gathered by me during field work from August to November, 1977. The names of the places visited, together with those of a selected sample of informants, are as follows:

A) Department of Podoor

(i) Madiina Njatbe.

Samba Musaa Paam (Naalanke), Fisherman.

Musaa Gay, Administrative Officer.

Alasaan Buubu Soo, Farmer.

Basiiru Janxaa, Blacksmith.

Saydu Nuuru Taal, School Teacher.

Iburaahiima Aadama, President of the local Cooperative.

Songs and stories were also recorded from the following children, in the same village:

Kadijata Gay, 14 years of age

Musaa Gay, 13 years of age

Umar Gay, 10 years of age

(ii) Haayre Laaw

An interpreter at the District Office.

B) Department of Maataam

(i) Wuroossoogi

Yero Baydi Sangoot, retired weaver.

(ii) Maataam

Abdul Samba Tagurla, Shoemaker.

Haamidu Joop, Trader.

Cerno Yaaya Aamadu Abdul, Religious Leader.

Barka Baa, Male Nurse.

Recordings were also obtained from the National Archives Office, in Senegal, for the following areas:

(i) Gede (Department of Podoor)

Samba Demmba Baa, Fisherman.

(ii) Njuum

El Hajji Muhammadu Abdul Nyaagaan, Religious Leader.

0.6. I obtained further information on both dialects, from my own speech, since I am a native speaker of the Fuuta Jaloo dialect and I am fluent in that of Fuuta Tooro.

0.7. Finally, it is important to make a few comments on the terms used in reference to the people in question and their language and dialects.

The terms used in this thesis for the two dialects are those used by the speakers themselves. English, French and German scholars have up to now used other terms, e.g. Fula, Fulani, Peul, Ful, to refer to the language and the people; but with the spread of education in Africa and the increasing use of the language, such 'foreign' terms are no longer appropriate, nor indeed acceptable. There is no single term acceptable throughout the whole area, to cover the language, as 'Fulfulde' used in eastern dialects (From Mali eastwards) is unknown in the western area (Mauritania, Senegal, Republic of Guinea, the Gambia, Sierra Leone); just as Pulaar/Tukuloor of the areas under consideration in this thesis is unknown in eastern dialects. The native speakers of Pulaar in Fuuta Jaloo call themselves Fulbe Fuuta (singular: Pullo Fuuta), and the speakers of Pulaar/Tukuloor in Fuuta Tooro call themselves Haalpulaar 'en (i.e. speakers of Pulaar) or Tukuloor. These terms will be used in this thesis.

On the other hand, it is well to underline that the Haalpulaar 'en or Tukuloor do not regard themselves as Fulbe, even though Pulaar is now their first language. It is alleged that they borrowed this language and they are proud to say that they are the keepers of the "pure" language.

PART ICHAPTER 1

OUTLINE OF THE PHONOLOGY AND ORTHOGRAPHY OF
THE TWO DIALECTS

- 1.1. This Chapter is concerned with an introductory analysis of the main phonological features together with the orthography of the Pulaar/Fulfulde language, as illustrated from the dialects of Fuuta Jaloo and Fuuta Tooro.
- 1.2. The individual features described here have been arranged as follows:
- A. Phonology and Orthography
 - B. Consonants
 - C. Vowels
 - D. Intonation
 - E. Final glottality
- A. Phonology and Orthography
- 1.3. The consonants and vowels used by the two dialects are listed under sections B and C of this Chapter.
- 1.4. The system of transcription follows, with a few exceptions (cf.1.6.), the orthography recommended for the language at the UNESCO 'Meeting of Experts for the Unification of Alphabets of the National Languages', held in Bamako (Mali), in 1966.
- 1.5. In this orthography, the symbol is doubled in instances where single consonants are long, except for nasal compounds and the diagraph ny. In the latter two cases, it is the first element only which is doubled. (cf.1.8. for illustrations).
- 1.6. I have preferred to use ng and ɲng instead of ng and nng which were recommended by the Bamako Conference since the orthography

provides a separate symbol for the velar nasal.

- 1.7. I have included z, g, sh, x in this table, although these consonants do not occur in the indigenous vocabulary of the Pulaar language. They were adopted by the Bamako Conference to cover the occurrence of the relevant articulations in words borrowed from languages such as Wolof (sene-Gambia), Susu (Republic of Guinea) and Arabic. Such loan-words are pronounced with such articulations by Moslem intellectuals, but the phonemes, z, g, sh, x tend to be replaced by j, k, s, k respectively, in ordinary speech.

CONSONANTS

| | Bi-labial | Labio-dental | Alveolar | Palato-alveolar & Palatal | Velar | Uvular | Glottal |
|--|-----------|--------------|----------|------------------------------|--------|--------|---------|
| PLOSIVE VOICELESS VOICED | p b | | t d | | k g | q | |
| NASAL | m | | n | ny | ŋ | | |
| NASAL-COMPOUNDS | mb | | nd | nj | ŋg | | |
| LATERAL NON-FRICATIVE | | | l | | | | |
| ROLLED | | | r | | | | |
| FRICATIVE + AFFRICATE VOICELESS VOICED | | f | s z | sh c j | x | | h |
| SEMI-VOWEL | w | | | y . | w | | |
| GLOTTALIZED | b | | d | y | | | ʔ |

1.8. Illustrations of the consonants listed in the above table.

| | | | |
|----|-----------------------|---------|----------------------------------|
| p | Pade "shoes" | pp | tappude "to hit" |
| b | Barme "cooking-pot" | bb | debbo "woman" |
| t | tuuba "trousers" | tt | tuttude "to spit" |
| d | darnde "standing" | dd | addude "to bring" |
| k | koyngal "foot" | kk | okkude "to give" |
| g | gaarawol "thread" | gg | giggol "love, liking" |
| q | qur'aan "Coran" | qq | (no example found) |
| m | mawdo "old man" | mm | mummunte "animal" |
| n | nano "the left" | nn | nannude "to cause to hear" |
| ny | nyale "heifer" | nny | hennyude "to make room for" |
| ɲ | ɲari "beauty" | ɲɲ | banne "side" |
| mb | mbeewa "goat" | mmb | dammbugal "door" |
| nd | ndoondi "ashes" | nnd | anndude "to know" |
| nj | njaareendi "sand" | n nj | (no example found) |
| ɳg | ɳgesa "field" | ɳg | janngude "to read" |
| l | ligge "work" | ll | wallude "to help" |
| r | rawaandu "dog" | rr | lorrude "to bother" |
| f | faamu "understanding" | ff | (no example found) |
| s | suudu "hut" | ss | (no example found) |
| z | zamaanu "generation" | zz | (no example found) |
| sh | shari'a "Law" | shsh | (no example found) |
| c | cellal "health" | cc | accude "to give up" |
| j | jalo "hoe" | jj | wujjude "to steal" |
| x | xaalis "money" | xx | (no example found) |
| h | horde "calabash" | hh | (no example found) |
| w | waare "beard" | ww | awwalu "tradition" |
| y | yawaare "contempt" | yy | layya "sacrificial ram" (Arabic) |
| b | baawo "back" | bb | habbude "to tie up" |
| y | yoyre "cleverness" | feyyude | "to go past" |
| ' | 'iwde "to come from" | | (no example found) |

B. Consonants

1.9. In considering the Pulaar/Fulfulde language in general, as spoken from the Atlantic to beyond Lake Chad, one almost constant feature is the regular use of certain initial consonant changes helping to mark morphological distinctions between grammatically related sets of words, such as the singular and plural forms of nouns, and of verbs. Such related changes are not found for all the consonants. This applies to the Fuuta Tooro dialect but not to Fuuta Jaloo, where the distribution is quite different. The latter dialect seems to have simplified the phonology of the morphological processes, partially with regard to initial consonants.

On the other hand, such sets of consonants related through different grammatical forms can comprise two or three items; sets with three consonants are as follows:

w-, b-, mb-,
 r-, d-, nd-,
 w-, g-, ng-,
 y-, j-, nj-,
 'l-, g-, ng-, (cf.1.14 for illustrations)

sets with two consonants are as follows:

1) Voiced

b-, mb-,
 d-, nd-,
 g-, ng-,
 j-, nj-,

2) Voiceless

f- p-
 s- c-
 h- k-

(cf.1.16 for illustrations)

Group 2:

It comprises individual consonants from the above sets, but which are in no relationship at all.

f-, d-, nd-, nj-, k-, g-, ng-, h-
(cf. 1.20 for illustrations)

Group 3:

It includes those consonants which do not occur in any dialect yet examined, with any such relationship.

m-, b-, t-, n-, l-, d-, ny-, y-, ŋ-
(cf. 1.19 for illustrations)

I. Initial consonant alternations

- 1.10. In general, in many Pulaar/Fulfulde dialects, related grammatical forms of stems (for nouns) and radicals (for verbs) show initial consonant alternations, w/b/mb, r/d/nd, w/g/ng, y/j/nj, ' /g/ng. Some items show all three of these sets; some show only two (the last two forms of each set). There are further sets of two forms, which are as follows: f/p, s/c, h/k.

The system of initial consonant alternations in stems and radicals is a typical feature of Pulaar/Fulfulde morphology, but with different detailed arrangements from one dialect to another.

- 1.11. The alternating sets mentioned under 1.9. can be divided into three sub-categories, where the letters S and R represent nominal stems and verbal radicals:

S1/R1: w-, r-, w-, y-, ' -, f-, s-, h-
S2/R2: b-, d-, g-, j-, g-, p-, c-, k-
S3/R3: mb-, nd-, ng-, nj-, ng-,

It will be noted that the majority of consonants in the three sub-categories are respectively fricative, plosive and nasal compound.

- 1.12. S1/S2/S3 and R1/R2/R3 are grammatically relatable forms. For instance, in the Fuuta Tooro verbal system, where R1 occurs in the singular, R3 occurs in the corresponding plural form and R2 is used in the past participle; in the non-personal noun system S1/S2/S3 are respectively used in the singular, plural and diminutive plural:

R1. o warii "he has killed"
 R2. bardo "the one who has killed"
 R3. be mbarii "they have killed"

S1. rawaandu "a dog"
 S2. dawaadi "dogs"
 S3. ndawalon "little dogs"

- 1.13. It should be pointed out that the order of occurrence of individual sets of consonants varies according to whether the initial consonant is part of a nominal stem or a verbal radical, or whether it belongs to a personal or a non-personal stem. The following order of occurrence of initial consonants is found with non-personal nouns and verbal. The order of occurrence for personal nouns is described later (f. 1.18).

| S1/R1 | | S2/R2 | S3/R3 |
|----------------------|-----------------|-------|-------|
| w (before any vowel) | alternates with | b | mb |
| w (before o or u) | " " | g | ng |
| r (before any vowel) | " " | d | nd |
| y (before any vowel) | " " | j | nj |
| ' (before any vowel) | " " | g | ng |
| f (before any vowel) | " " | p | p |
| s (before any vowel) | " " | c | c |
| h (before any vowel) | " " | k | k |

1.14. The following illustrations are taken from Fuuta Tooro since, as will be shown soon (f. 1.17.) initial consonant alternations operate only partially in Fuuta Jaloo.

(i) Nominal stems (non-personal)

| | S1 Singular | S2 Plural | S3 Diminutive Plural | Meaning |
|---|----------------|--------------|----------------------------|-----------|
| w | wojere | boje | mbojon | hare |
| W | wudere | gude | ngudon | cloth |
| r | rawaandu | dawaadi | ndawalon | dog |
| y | yeendu | jeeli | njeelon | ant-eater |
| ' | 'abbere | gabbe | ngabbon | grain |
| f | fowru | pobbi | pobbon | hyena |
| s | sawru | cabbi | cabbon | stick |
| h | hinere | kine | kinon | nose |

(ii) Verbal radicals

| | R1 Singular | R2 Past Participle Singular | R3 Plural | Meaning |
|---|----------------|--------------------------------------|--------------|-------------------|
| w | wari | bardo | mbari | kill |
| w | wujji | gujjudo | ngujji | steal |
| r | roni | dondo | ndoni | inherit |
| y | yari | jardo | njari | drink |
| ' | 'ami | gamdo | ngami | dance |
| f | faami | paamdo | paami | understand |
| s | sumi | cumdo | cumi | burn |
| h | hiiri | kiirdo | kiiri | spend the evening |

1.15. In the above illustrations, it will be noted that the

fricative/plosive occurrence is in terms of singular/plural relationships between the same nouns. This is not so for verbal radicals. In the latter case the singular/plural relationships between the same radicals involves a voiced fricative/nasal relationship between initial-consonants.

The fricative/plosive relationship is between singular verbs and their past participle singular counterparts.

- 1.16. Voiceless consonants are not nasalised in Pulaar; this is the reason why in the cases of f, s and h the members of the last two categories S2/R2 and S3/R3 are identical and are both plosives. On the other hand, in cases where a stem or a radical has a plosive initial consonant which is not grammatically related to any fricative consonant, then S1/S2, R1/R2 remain plosives.

(i) stems (Fuuta Tooro non-personal)

| | S1 Singular | S2 Plural | S3 Diminutive Plural | Meaning |
|---|----------------|--------------|----------------------------|-------------|
| f | fowru | pobbi | pobbon | hyena |
| s | saare | ca'e | ca'on | village |
| h | hoore | ko'e | ko'on | head |
| b | bolol | boli | mbolon | path |
| d | doomburu | doombi | ndoombon | mouse |
| g | gawri | gaweeje | ngawon | guinea-corn |
| j | jalo | jale | njalon | hoe |

(ii) Radicals (Fuuta Tooro)

| | R1 Singular | R2 Past Participle Sing. | R3 Plural | Meaning |
|--|----------------|-----------------------------------|--------------|---------|
|--|----------------|-----------------------------------|--------------|---------|

(ii) continued

| | | | | |
|---|-------|---------|--------|-----------|
| f | fusi | pusdo | pusi | break |
| s | saami | caamdo | caami | fall |
| h | huli | kuldo | kuli | be afraid |
| b | betti | bettudo | mbetti | surprise |
| d | dogi | dogdo | ndogi | run away |
| g | golli | golludo | ngolli | work |
| j | jali | jaldo | njali | laugh |

1.17. The reasons why it is said that initial consonant alternations occur only partially in Futa Jalloo are as follows:

(i) Nominal stems:

Initial consonant alternations occur only in fricative and plosive relationships. There is no nasal counterpart. All the latter cases occur with plosive initial consonants, e.g.

wojere/boje/bojoy "hare"
 rawaandu/dawaadi/dawaloy "dog"
 wudere/gude/gudoy "cloth"
 'abbere/gabbe/gabbooy "grain"

(ii) Verbal radicals:

Initial consonant alternations do not operate at all in the verbal system of Futa Jalloo. It is the same initial consonant used in the singular of the verb that is found in all the corresponding remaining forms, e.g.

o wujji "he stole"
 be wujji "they stole"
 wujjudo "the one who stole"
 o wari "he killed"
 be wari "they killed"
 wardo "the one who killed"
 o roni "he inherited"
 be roni "they inherited"
 ronudo "the one who inherited"

1.18. Within the nominal system of both dialects, the order of occurrence of initial consonants depends upon whether individual nouns are personal or non-personal. In the latter case the order of occurrence is as described in 1.14 (i) - But in the former case the order is reversed and it is plosives that occur in the singular, whereas fricatives are found in the plural, e.g.

| | |
|-------------|-----------------|
| Pullo/Fulbe | 'A Pullo/Fulbe' |
| Debbo/rɛwɓe | 'woman/women' |
| gujjo/wuyɓe | 'thief/thieves' |
| gorko/worɓe | 'man/men' |

1.19. Not all consonants enter into the system of initial consonant alternation. All the consonants listed under group 3, section 1.9. are invariable consonants which are outside this system, e.g.

| | Singular | Plural | Meaning |
|----|-----------|----------|------------------------------|
| t | taalol | taali | tale |
| m | maccudo | maccube | slave |
| n | nagge | na'i | cow |
| ny | nyiiwa | nyiiibi | elephant |
| ɲ | ɲawre | ɲawe | gap left by missing tooth |
| l | laawol | laabi | road, path |
| ɓ | ɓoggol | ɓoggi | rope |
| d | dadol | dadi | root |
| y | yiiwoonde | yiiwooje | storm |

1.20. There are a number of words in which initial consonants which are generally part of the alternation pattern do not change. Such consonants have already been mentioned previously (cf. 1.9. group 3) and are illustrated as follows:

| | Singular | Plural | Meaning |
|----|-----------|------------|--------------------|
| p | puccu | pucci | horse |
| k | kammu | kammuuji | sky |
| b | beretewal | bereteeje | suitcase FT |
| d | dabare | dabareeji | poison |
| g | goobu | goobuuji | dyeing FT |
| mb | mbaacu | mbaaci | insect FT |
| nd | nduɲngu | nduɲnguuji | wet season |
| nj | njarki | njarkiiji | nickname for hyena |
| ng | ngawri | ngawriiji | guinea-corn |
| f | fuune | fuuneeji | albino FT |
| h | hawsaajo | hawsaabe | Hawsa man |

II. Stems or radicals and endings

1.21. Within the morphology of the two dialects in question, stems and radicals can be extended by endings to form nouns and verbs of different semantic ranges. The ways in which stems and radicals meet various endings are phonologically regular and are dealt with below, in four cases.

(i) Case 1. (CVC- +CV)

1.22. The stem or radical consists of CVC- structure and the ending is -CV. In Fuuta Tooro, the second and third consonants keep their separate identities; they are pronounced as a sequence.

CVC- +CV gives CVCCV, e.g.

saw- +ru gives sawru "stick"

ber- + nde gives bernde "chest"

hor- +de gives horde "calabash"

saf- +de gives safde "draw water from a well"

sek- +de gives sekde "be angry"

war- +de gives warde "kill"

As far as Fuuta Jaloo is concerned, the present case applies only with nouns. Corresponding verbs to the three above forms are saf-u-de, sek-u-de, war-u-de.

(ii) Case 2 (CVCC+ CV)

- 1.23. Where the stem or the radical is of CVCC- structure and the ending is - CV, a vowel is introduced between the third and the fourth consonants, as three consonants are not pronounced in sequence.

CVCC- +CV gives CVCCVCV, e.g.

ranw- +de gives ranw-u-de "to be white"

sulm- +de gives sulm-u-de "to wash" (face)

dept- +re gives dept-e-re "book"

(iii) Case 3 (CVC+ CV, where the second consonant is h, -y or -')

- 1.24. Where the final consonant of a stem or a radical is -h, -y or -', this consonant disappears in the nouns or verbs and the preceding vowel is lengthened.

CVh- +CV gives CVVCV, e.g. yah- +de gives yaade "go"

CVY- +CV gives CVVCV, e.g. fiy- +de gives fiide "beat"

CV'- +CV gives CVVCV, e.g. wi' +de gives wiide "say"

(iv) Case 4 (assimilation)

- 1.25. The final consonant of the stem or radical harmonizes with the initial consonant of the suffix; this may be called assimilation. It is relevant, at this juncture, to devote some space to the description of the various cases of assimilation.

1) It occurs when a bilabial precedes another bilabial.

ko heɓ-ma? (lit. what happened - you) gives ko hemmaa
 "what happened to you?"

but ko heɓ-i Aali? "What happened to Aali?"

2) t, d, ^ɗ harmonize with the following t, d, or n, e.g.
 t/d fot- +de gives fodde "be equal"

juut- +de gives juudde "be tall" (but omo juut-i
 "he is tall")

t/d pot- +do gives poddo "the one who is equal".

juut- +do gives juuddo "the one who is tall".

t/n wadat- +noodo gives wadannoodo "the one who was doing".

coodat- +noodo gives coodannoodo "the one who was buying".

d/d cood- +daa gives cooddaa "you bought".

d/n cood- +noodo gives coonnoodo "the one who had bought"

d/d wad- +de gives wadde "do"

d/n bad- +noodo gives bannoodo "the one who had done".

d/t wad- +tude gives wattude "do again".

3) Another assimilation occurs when d harmonizes with g.

A somewhat similar pattern occurs to d before b and l, e.g.

d/g cood- +gu gives coggu (from Codgu*) "price"

d/b wood- +be gives wobbe "others".

It is well to note that in the last two examples the vowel
 shortens with the combination.

d/l bad- +le gives balle "different types of help".

4) Where there are such palatal consonants as ny,
 j, y, the palatization continues into the second
 consonant, e.g.

ko ndany-daa gives ko ndan-y-aa "what do you have?".

sony-de gives sonje "to sow".

(Case 4 is limited to Fuuta Tooro; Fuuta Jaloo inserts
 the vowel u between the palatal consonants, and the second
 consonant).

C. Vowels

Pulaar has five short vowels and five long vowels, i.e.

Short vowels:

| | | |
|---|---|---|
| i | | u |
| | e | o |
| | a | |

Long vowels:

| | | |
|----|----|----|
| ii | | uu |
| | ee | oo |
| | aa | |

1.26. Examples of vowels:

| | | | | | |
|---|---------|---------------|----|---------|-----------------------------|
| i | idaade | "to be first" | ii | iidude | "to make a noise" (engine). |
| e | eggude | "to move" | ee | eeraade | "to shout" |
| a | abbere | "grain" | aa | aada | "tradition" |
| o | ommbude | "to close" | oo | ool | "yellow" |
| u | uddude | "to close" | uu | uurde | "to have a nice smell" |

1.27. Diphthongs

| | | | | |
|----|----|----|----|----|
| iw | ew | aw | ow | |
| | ey | ay | oy | uy |

1.28. Although these give phonetic diphthongs in pronunciation, the w/y behave like consonants in the phonology of the language, e.g.

rewbe "the ones who followed, or women"

rewii "he has followed".

D. Intonation

- 1.29. At this juncture it is relevant to say that Pulaar/Fulfulde is not a tone language. It is an intonational language. This means that intonation patterns depend less on individual words and complexes than the types of sentences, the tenses involved, the polarity etc.,
- 1.30. This thesis does not claim to make an exhaustive account of intonation patterns in Pulaar/Fulfulde. This study will be devoted to a general description of intonation as it affects sentences, nouns and ideophones.

In general the high pitch is on the penultimate syllable, but in particular cases it is on the final syllable or elsewhere. I shall illustrate this with the following cases: (the high pitch syllable is underlined)

1) Different types of tenses

(i) Penultimate

- 0 looti (-) "he washed" (active)
 0 lootii (-) "he had a wash" (middle)
 0 lootaa (-) "he was washed" (passive)

(ii) Final

- 0 lootii (_ _ -) "he has washed" (active)
 0 lootay (_ _ -) "he will wash" (middle)

(iii) Elsewhere

- Janngo o lootata (- _ _ - _ _) "he will wash tomorrow" (active)
Janngo o loototoo (- _ _ - _ _) "he will have a wash tomorrow" (middle)

2) Polarity

(i) Penultimate

- 0 lootu (_ - _) "he did wash" (emphatic past active)

(ii) Final

- 0 lootaa (_ _ -) "he did not wash" (emphatic negative active)

3) Different types of sentences(i) Positive sentence

O looti (_ - _) " he washed"

O fini (_ - _) " he woke up"

(ii) Interrogative sentences

O looti? (_ - ✓) " he washed?"

O fini? (_ - ✓) " he woke up?"

In the above examples the high pitch syllable could be said to carry the main stress in the sentence.

E. Final glottality

1.35. There is a final glottal stop, or final glottality in pausal position with some items but never with others. A full phonetic examination of this has still to be done.

1.36. Final glottality can be heard with almost all nouns and adjectives,

| | |
|--------|----------------|
| Pullo' | "A Pullo" |
| Fulbe' | "Fulbe people" |
| Debbo' | "A woman" |
| Rewbe' | "women" |
| Horde' | "calabash" |

It does, however, not occur with a certain group, such as monee "annoyance" (verbal noun), where there is a final long vowel.

1.37. Final glottality occurs with all the concordant forms of independant and possessive pronouns and possessive suffixes, the latter being found in Fuuta Tooro alone (cf. Chapter 5, section C), e.g.

(i) Independent pronouns

| | |
|--------|---------------|
| kanko' | (class 1 0) |
| kambe' | (class 2 be) |
| kayre' | (class 3 nde) |
| kayri' | (class 4 ndi) |

(ii) Possessive pronouns

| | |
|--------|-----------------------|
| makko' | "his" (class 1 0) |
| mabbe' | "theirs" (class 2 be) |
| mayre' | "its" (class 3 nde) |
| mayri' | "its" (class 4 ndi) |

(iii) Possessive suffixes (Fuuta Tooro only)

| | |
|---------|-----------------------|
| - iiko' | "his" (class 1 0) |
| - iibe' | "theirs" (class 2 be) |
| - iire' | "its" (class 3 nde) |

1.38. But it does not occur with non-concordant forms of the above pronouns, except for the first and second persons singular of independent pronouns.

(i) Independent pronouns

| | |
|-------------|-----------------|
| enen/enen | (1 plur. incl.) |
| memen/menen | (1 plur. excl.) |
| onon/onon | (2 plur.) |

but

| | |
|------------|---------|
| min'/miin' | (1 sg.) |
| an'/aan' | (2 sg.) |

(ii) Possessive pronouns

| | |
|--------------------------|---------------------|
| an/am | "my" |
| maada ; ma'a/maada ; maa | "your" (2. sg.) |
| meeden/meeden | "our" (1 pl. incl.) |

(iii) Possessive suffixes

- am "my"
- e "your"
- imen "our" (1pl. excl.)

1.39. On the other hand final glottality does not occur with demonstratives, referentials, definitives and interrogatives, e.g.

(i) Near demonstratives

| | | |
|-------|--------------|--------------|
| o'o | "this one" | (class 1 0) |
| be'e | "these ones" | (class 2 be) |
| nde'e | "this one" | (class nde) |

(ii) Referentials

| | | |
|-------------------------|--|---------------|
| o _n /oon | (gorko o _n /oon "the man") | (class 1, 0) |
| be _n /been | (yimbe be _n /been "the people") | (class 2 be) |
| nde _n /ndeen | (horde nde _n /ndeen "the calabash") | (class 3 nde) |

(iii) Interrogatives

| | | |
|-------|--------------|-------------|
| hombo | "which, who" | (class 1 0) |
| hombe | "which, who" | (class 2 e) |

(for complete tables of all the above-mentioned pronouns, please see Chapter 5).

1.40 In the verbal system, final glottality is a feature of the following tenses, when, of course, the verb word is in pausal position. Examples of 3rd singular sentences are given, but it occurs with all persons, singular and plural.

1) Stative and continuous tenses(i) Stative

Umaar no looti' "Umaar has washed" (active)
 Umaar no lootii' "Umaar has had a wash" (middle)
 Umaar no lootaa' "Umaar has been washed" (passive)

(ii) Continuous 1

Umaar no lootaa' "Umaar is washing" (active)
 Umaar no lootoo' "Umaar is having a wash" (middle)
 Umaar no lootee' "Umaar is being washed" (passive)

(iii) Continuous 2 (Fuuta Jaloo only)

Umaar no lootude' "Umaar is washing" (active)
 Umaar no lootade' "Umaar is having a wash" (middle)
 Umaar no looteede' "Umaar is being washed" (passive)

2) Relative tenses, e.g.

(i) Relative past

0 looti' "he washed" (active)
 0 lootii' "he had a wash" (middle)
 0 lootaa' "he was washed" (passive)

(ii) Relative future

0 lootata' "he will wash" (active)
 0 loototoo' "he will have a wash" (middle)
 0 lootetee' "he will be washed" (passive)

3) Secondary subjunctive

0 lootaa' "he is to wash" (active)
 0 lootoo' "he is to have a wash" (middle)

1.41. Final glottality, however, does not occur with the following tenses:

1) General Past

- 0 lootii "he has washed" (active)
 0 lootama "he has been washed" (passive)

2) Emphatic Past

- 0 looti "he did have a wash" (middle)
 0 loota "he was washed" (passive)

3) General Future

- 0 loototo "he will have a wash" (middle)
 0 lootete "he will be washed" (passive)

4) Vague Future

- Ma o looto "he will have a wash" (middle)
 Ma o loote "he will be washed" (passive)

5) Negative Tenses

- 0 lootaki "he has not had a wash" (negative past mid.)
 0 lootaka "he has not been washed" (negative past
 pass.)
 0 lootataa "he will not wash" (negative future
 active)

6) Primary Subjunctive

- yo o looto "let him have a wash" (middle)
 yo o loote "let him be washed" (passive)

1.42. Final glottality is also a feature of concordant object pronouns, e.g.

- o lootii mo' "he has washed him"
 o yi'ii be/nde /ngu ' "he has seen them/it"

but it does not occur with non-concordant object pronouns,
except for the long-vowelled second person singular *maa*,
e.g.

0 lootii laŋ/kam "he has washed me" (1 sing.)
0 lootii ma "he has washed you" (2 sing.)

but

0 lootaa maa' "he is to wash you"

1.43. This glottality is not a phonemic matter, as it is a
feature of pause, and it is not heard when the item is no
longer pausal, e.g.

Umaar lootii Mhammadu "Umaar washed M." (Rel. Part
active)
0 lootaa haa o laabi "he was washed clean" (Rel.
Past middle)

PART II: NOMINAL SYSTEM

CHAPTER 2. NOMINAL CLASS SYSTEM - GENERAL

- 2.1. The Pulaar/Fulfulde language is characterised by a class system similar to that found in many West African and Bantu languages.
- 2.2. Linguists and learners of the language have been conscious of its complexity, particularly the nominal class system: There seems to be much redundant morphology that bears little informational load: "la classification nominale apparait comme un mécanisme aussi encombrant que vain" (1)
- 2.3. The object of this chapter is to outline the main features of the nominal class system in the two dialects of Fuuta Jaloo and Fuuta Tooro with a view to arriving at simple ways of describing their morphological complexities.
- 2.4. The analysis will be made in the following order:
- I Principal features of the class system in the two dialects.
 - II Proposed groupings of the classes.
 - III Adjectives.
 - IV Other types of nominals.

I. Principal features of the class system in the two dialects

- 2.5. A class is defined as a pattern of agreement. In the particular case of Pulaar/Fulfulde, the agreement is between the noun-suffix and other elements: "Le nom foul se compose d'une racine et d'un suffixe qui sont en

(1) Manessy, M. in Martinet, A., 1967

relation étroite avec le pronom personnel qui désigne ce nom. Il résulte de ce mode de formation que tous les noms ayant le même pronom personnel constituent une classe" (2). Adjectives, including adjectival participles, numerals and pronouns agree in terms of class elements with the nominals they qualify and verbs in general will agree in number with their subjects.

- 2.6. In the Fuuta Jaloo examples below rawaandu "dog", nagge "cow", ngaari "bull" and puccu "horse" are assigned to different classes on the basis of their agreement, e.g.

| | | | |
|----------|--------------------------|----------------|-------------------------|
| Mi addii | rawaa-ndu ⁽³⁾ | balee-ru nduŋ, | habbu ndu wata ndu dogu |
| " | nagg-e | bale-we ŋgen | " ŋge " ŋge " |
| " | ngaa-ri | balee-ri ndiŋ | " ndi " ndi " |
| " | pucc-u | bale-wu ŋguŋ | " ŋgu " ŋgu " |

word-for-word translation:

| | | | | | | | | |
|----------------|-------|-------|------|-----|----|-----|----|-----|
| I have brought | dog | black | the, | tie | it | not | it | run |
| " | cow | " | " | " | " | " | " | " |
| " | bull | " | " | " | " | " | " | " |
| " | horse | " | " | " | " | " | " | " |

approximate translation:

| | | | | | |
|----------------|------------------|-----------|------------|---------|----------|
| I have brought | the black dog, | tie it up | to prevent | it from | escaping |
| " | the black cow, | " " " " | " " " | " " " | " |
| " | the black bull, | " " " " | " " " | " " " | " |
| " | the black horse, | " " " " | " " " | " " " | " |

(2) Gaden, H.1913, p 17

(3) A hyphen is used here to indicate the junction of the nominal stem and the suffix, although nominals will normally be written as one word.

Table 1: List of classes found in Fuuta Jaloo and Fuuta Tooro

| Class no. | Class Name | | Examples |
|-----------|---------------------------|--------------|---------------------------------|
| | FUUTA JALOO | FUUTO TOORO | |
| | PERSONAL | | |
| 1 | o | o | debbo "woman" |
| 2 | be | be | rewbe "women" |
| | NON-PERSONAL | | |
| 3 | nde | nde | wudere "cloth" |
| 4 | ndi | ndi | ngaari "bull" |
| 5 | ndu | ndu | sawru "stick" |
| 6 | nge | nge | nagge "cow" |
| 7 | ngo | ngo | jawo "bracelet" |
| 8 | ngu | ngu | puccu "horse" |
| IX | ngii | NON-EXISTANT | balii "sheep" |
| 10 | ngal | ngal | Leggal "piece of wood" |
| 11 | ngol | ngol | laawol "path" |
| 12 | mba | ba | ngesa "farm" |
| 13 | ka | ka | laana "canoe" |
| 14 | ki | ki | wonki "soul" |
| 15 | ko | ko | haako "leaves" |
| XVI | kol | NON-EXISTANT | nyalahol "calf" |
| 17 | dan | dam | njaran "drink" |
| 18 | duŋ | ɗum | godduŋ "something" |
| 19 | de | de | gude "cloths" |
| 20 | di | di | pucci "horse" |
| | PERSONAL AND NON-PERSONAL | | |
| | DIMINUTIVE | | |
| 21 | ngel | ngel | gudel "small cloth" |
| 22 | kal | kal | dihal "small quantity of water" |
| XXIII | kuŋ | NON-EXISTANT | puluŋ "little fulani" |
| 24 | koy | kon | puloy "little fulanis" |
| | AUGMENTATIVE | | |
| 25 | ngal | ngal | gudal "large cloth" |
| XXVI | ngii | NON-EXISTANT | maccungii "big slave" |

Table 2: Class elements in the nominal system

| NOUNS | ADJECTIVES | PRONOUNS OF REFERENCE | SUBJECT PRONOUNS | OBJECT PRONOUNS |
|-----------|------------|-----------------------|------------------|-----------------|
| rawaa-ndu | ɓalee-ru | ndun | ndu | ndu |
| nagg-e | ɓale-we | ngen | nge | nge |
| ngaa-ri | ɓalee-ri | ndin | ndi | ndi |
| pucc-u | ɓale-wu | ngun | ngu | ngu |

2.7. Table 2 sets out the class elements used in the sentences, given above for these examples. The sentences are merely illustrative and other concordial agreements will be dealt with in later chapters of the thesis.

II. Proposed grouping of classes

2.8. Let us consider Fuuta Jaloo first because, as will be seen later, this dialect shows more classes than Fuuta Tooro.

2.9. Nouns have five forms: a singular form and a plural form, singular and plural diminutive forms and augmentative singular forms⁽⁴⁾. Each of these forms is a member of a different class⁽⁵⁾, e.g.

| | |
|------------------------------------|-----------|
| Pullo, Fulbe, pulel, puloy, pulii | "A Pullo" |
| wuddere, gude, gudel, gudoy, gudii | "cloth" |

2.10. The words which are governed by nouns have not only five such forms but also sufficient forms to have singular and plural forms, diminutive singular and plural forms, and augmentative singular forms for every class of noun.

Table 3: Sample of nominal chains
Singular, plural, diminutive (sg./pl.) and augmentative forms, for the same stems in Fuuta Jalloo (6).

| Class name | Singular | Plural | Diminutive | | Augmentative | Meanings |
|------------|-----------|----------|------------|-----------|--------------|-----------------------------------|
| | | | Singular | Plural | | |
| 1. o | maccudo | maccube | maccungel | maccukoy | maccungii | "slave" |
| 3. nde | wudere | gude | gudel | gudoy | gudii | "cloth" |
| 4. ndi | ngaari | ga'i | ga'el | ga'oy | ga'ii | "bull" |
| 5. ndu | sawru | cabbi | cawel | cawoy | cawii | "stick" |
| 6. nge | nagge | na'i | nagel | nakkoy | naggii | "cow" |
| 7. ngo | jawo | jawe | jawel | jawoy | jawii | "bracelet" |
| 8. ngu | puccu | pucci | pucel | pucoy | pucii | "horse" |
| IX. ngii | baalii | baali | baalel | baaloy | baalal | "sheep" |
| 10. ngal | Leggal | Legde | Leggel | Lekkoy | leggii | "piece of wood" |
| 11. ngol | laawol | laabi | laawel | laawoy | lawii | "path" |
| 12. mba | tuuba | tuube | tuubel | tuuboy | tuubii | "trousers" |
| 13. ka | ngayka | gayde | gaygel | gaykoy | gaygii | "hole" |
| 14. ki | labi | labe | label | laboy | labii | "knife" |
| 15. ko | haako | kaaki | kaakel | kaakoy | kaakii | "leaf" |
| XVI. kol | nyalahol | nyalbi | nyalel | nyaloy | nyalii | "calf" |
| 17. dan | ndiyan | di'e | dihal | dihoy | di'ii | "water" |
| 18. dun | wimdirɗun | wimdirɗi | wimdirgel | wimdirkoy | wimdirgii | "any instrument used for writing" |

Table 4: Nominal class system in Fuuta Jaloo

| Class name | Normal suffixes (common to nouns and adjectives) | | | |
|---------------------------|--|---------|---------|---------|
| | Grade A | Grade B | Grade C | Grade D |
| Personal | | | | |
| 1. o | -o | -jo | -do | -do |
| 2. be | -be | -be | -be | -be |
| Non-personal | | | | |
| 3. nde | -re/-de | -re | -de | -nde |
| 4. ndi | -ri/-di | -ri | -di | -ndi |
| 5. ndu | -ru/-du | -ru | -du | -ndu |
| 6. nge | -e | -we | -ge | -nge |
| 7. ngo | -o | -wo | -go | -ngo |
| 8. ngu | -i | -wu | -gu | -ngu |
| IX. ngii | -ii | -wii | -gii | -ngii |
| 10. ngal | -al | -wal | -gal | -ngal |
| 11. ngol | -ol | -wol | -gol | -ngol |
| 12. mba | -a | -wa | -ba | -mba |
| 13. ka | -a | -ha | -ka | -ka |
| 14. ki | -i | -hi | -ki | -ki |
| 15. ko | -o | -ho | -ko | -ko |
| XVI. kol | -o- | -hol | -kol | -kol |
| 17. dan | --an | -jan | -dan | -dan |
| 18. dun | -un | -jun | -dun | -dun |
| 19. de | -e | -je | -de | -de |
| 20. di | -i | -ji | -di | -di |
| Personal and non-personal | | | | |
| Diminutive | | | | |
| 21. ngel | -el | -wel | -gel | -ngel |
| 22. kal | -al | -hal | -kal | -kal |
| XXIII kun | -un | -hun | -kun | -kun |
| 24. koy | -oy | -hoy | -koy | -koy |
| Augmentative | | | | |
| 25. ngal | -al | -wal | -gal | -ngal |
| XXVI. ngii | -ii | -wii | -gii | -ngii |

Table 5: Nominal class system in Fuuta Tooro

| Class no. | Agreement represented by subject pronoun | Normal suffixes (common to nouns and adjectives) | | | |
|--------------------------------------|--|--|---------|---------|---------|
| | | Grade A | Grade B | Grade C | Grade D |
| Personal | | | | | |
| 1. | o | -o | -jo | -do | -do |
| 2. | be | -be | -be | -be | -be |
| Non-personal | | | | | |
| 3. | nde | -re/-de | -re | -de | -nde |
| 4. | ndi | -ri/-di | -ri | -di | -ndi |
| 5. | ndu | -ru/du | -ru | -du | -ndu. |
| 6. | nge | -e | -ye | -ge | -nge |
| 7. | ngo | -o | -wo | -go | -ngo |
| 8. | ngu | -u | -wu | -gu | -ngu |
| 10. | ngal | -al | -yal | -gal | -ngal |
| 11. | ngol | -ol | -yol | -gol | -ngol |
| 12. | ba | -a | -wa | -ba | -ba |
| 13. | ka | -a | -ha | -ka | -ka |
| 14. | ki | -i | -wi | -ki | -ki |
| 15. | ko | -o | -ho | -ko | -ko |
| 17. | dam | -am | -jam | -dam | -dam |
| 18. | dum | -um | -jum | -dum | -dum |
| 19. | de | -e | -je | -de | -de |
| 20. | di | -i | -ji | -di | -di |
| Personal and Non-personal diminutive | | | | | |
| 21. | ngel | -el | -yel | -gel | -ngel |
| 22. | kal | -al | -yal | -kal | -kal |
| 24. | kon | -on | -yon | -kon | -kon |
| Augmentative | | | | | |
| 25. | ngal | -al | -yal | -gal | -ngal |

- 2.11. Table 1 shows that there are four diminutive classes and two augmentative classes.
- 2.12. If we put these aside for the moment, we can recognize that there are seventeen classes of nouns in the singular and three classes in the plural.
- 2.13. The words that these nouns govern have therefore some seventeen different forms in the singular and three different forms in the plural as well as six different forms for the diminutives and augmentatives, a total of 26 different forms.

Class suffixes

- 2.14. Each of the classes of table 1 has up to four different suffixes: " Nouns and adjectives belonging to the same

- (4) Both dialects have the augmentative class 25 ngal but Fuuta Jaloo also has an alternative form, class XXVI_{ngii}.
- (5) However class 10_{ngal} and the augmentative class 25 ngal, and class IX_{ngii} and the augmentative class XXVI_{ngii} make the same agreements respectively.
- (6) This table is a re-arrangement of table 1 and it shows the different forms with which noun stems are regularly associated, according to their grammatical status and class. Class 2 be (for the plural of personal nouns) is represented by "maccube" in the plural column; class 19_{di} by plurals ending in -i; class 20 de by plurals ending in -e; class 21 ngel (dim. sing.) is represented by the examples in the diminutive singular column (except for class 17, which is represented by dihal). Class XXIII is not represented. Class 24 is represented by all the entries in the diminutive plural column. As for classes 25 and 26, they are respectively represented by "baala1", augmentative of baalii (class IX) and the rest in the augmentative column.

class may have different suffixes, there being sometimes three, sometimes four distinct shapes to each class" (7). These class suffixes have been given different names by different linguists. Arnott calls them "grades" and Klingenheben "suffix stufen". I accept Arnott's classification of these suffixes into grades A, B, C, D because it agrees with my own findings, in both dialects.

2.15. Table 6 indicates the relationship between grades A, B, C, D. The nouns used in Grade A combine with adjectival stems of Grades A, B, C, D.

2.16. As indicated in table 6, the set of forms of a nominal have suffixes of the same grade except in very limited cases. This could be illustrated further by a paradigm including the following sub-groups:

- singular classes
- plural classes
- diminutive classes
- augmentative classes

2.17. The Fuuta Jaloo stems wud- "cloth", mbuuto- "leopard", gerto- "hen", koy- "leg" have been used in the table below. The same rules apply to Fuuta Tooro. On the other hand, table 6 shows that a noun stem has all its forms in the same grade, e.g.

wud - all in grade A
 mbuuto - all in grade B
 gerto - all in grade C
 koy - all in grade D

(7) Arnott, D.W., 1970, p.68

Table 6: Sample of nominal chains showing suffixes of grades A, B, C, D in Fuuta Jalloo

| Class name | Grade A | Grade B | Grade C | Grade D |
|-------------------|--------------|------------------|-----------|---------------|
| | | Adjectival stems | | |
| | aran-"first" | bale-"black" | habir-(8) | wod-"another" |
| Personal | | | | |
| 1. debbo "woman" | aran-o | bale-e-jo | habir-do | god-do |
| 2. rewbe "women" | aran-be | bale-e-be | habir-be | wob-be |
| Non-personal | | | | |
| 3. wudere "cloth" | aran-e-re | bale-e-re | habir-de | won-nde |
| 4. ngaari "bull" | aran-i-ri | bale-e-ri | habir-di | won-ndi |
| 5. sawru "stick" | aran-u-ru | bale-e-ru | habir-du | won-ndu |
| 6. nage "cow" | aran-e | bale-we | habir-ge | wor-nge |
| 7. Jalo "hoe" | aran-o | bale-wo | habir-go | wor-ngo |
| 8. puccu "horse" | aran-u | bale-wu | habir-gu | wor-ngu |
| IX baalii "sheep" | aran-ii | bale-wii | habir-gii | wor-ngii |
| 10. padal "shoe" | aran-al | bale-wal | habir-gal | gor-ngal |
| 11. kudol "grass" | aran-ol | bale-wol | habir-gol | gor-ngol |
| 12. ngesa "field" | aran-a | bale-wal | habir-ba | wom-mba |
| 13. laana "boat" | aran-a | bale-ha | habir-ka | wok-ka |
| 14. labi "knife" | aran-i | bale-hi | habir-ki | wok-ki |

(to be continued)

Table 6 continued.

| | | | | |
|---|---------|-----------|-----------|----------|
| 15. haako "leaves" | aran-o | bale-ho | habir-ko | wok-ko |
| XVI nyalahol "calf" | aran-ol | bale-hol | habir-kol | gok-kol |
| 17. ndiyay "water" | aran-an | bale-jan | habir-dan | god-dan |
| 18. godduy "something" | aran-un | bale-juj | habir-dun | god-dun |
| 19. gude "cloths" | aran-e | bale-e-je | habir-de | god-de |
| 20. pucci "horses" | aran-i | bale-e-ji | habir-di | god-di |
| Personal and non-personal Diminutive | | | | |
| 21. gudel "small cloth" | aran-el | bale-wel | habir-gel | gor-ngel |
| 22. lanjal "a bit of salt" | aran-al | bale-hal | habir-kal | gok-kal |
| XXIII deyuy "little woman" | aran-un | bale-hun | habir-kun | gok-kun |
| 24. deyoy "little women" | aran-oy | bale-hoy | habir-koy | gok-koy |
| Augmentative | | | | |
| 25. gudal "big cloth" | aran-al | bale-wal | habir-gal | gor-ngal |
| XXVI deyii "big woman" | aran-ii | bale-wii | habir-gii | gor-ngii |

(8) This adjectival stem refers to the means or instrument used for fighting.

Table 7: Representative nominal paradigm

| Category of class | Class name | Grade A wud-"cloth" | Class name | Grade B mbuuto-"leopard" | Class name | Grade C gerto-"hen" | Class name | Grade D name |
|-------------------|------------|---------------------|------------|--------------------------|------------|---------------------|------------|--------------|
| Singular | nde | wud-e-re | ndi | mbuuto-o-ri | ngal | gerto-gal | ngal | koy-ngal |
| Plural | de | gud-e | de | mbuuto-o-je | de | gerto-o-de | de | koy-de |
| Diminutive | | | | | | | | |
| Singular | kun | gud-un | kun | mbuuto-hun | kun | gerto-kun | kun | koy-kun |
| Plural | koy | gud-oy | koy | mbuuto-hoy | koy | gerto-koy | koy | koy-koy |
| Augmentative | | | | | | | | |
| Singular | ngii | gud-ii | ngii | mbuuto-wii | ngii | gerto-gii | ngii | koy-ngii |

17

2.18. It will be noticed from tables 4 and 5 that, in some cases, similar suffixes, have been assigned to different grades. For instance, this is the case with classes 3 nde, 4 ndi, 5 ndu where suffixes -re, -ri, -ru are found in both grades A and B and -de, -di, -du are in grades A and C. This distinction proves necessary since the same suffixes are found in different grades in other classes. Thus in table 7 plural suffix -de (class 19) in gerto-o-de corresponds to the singular ngal (class 10) with grade C suffix -gal (i.e. gerto-gal) whereas -de in koy-de goes with a grade D suffix as seen from the singular form koy-ngal.

III Adjectives

2.19. There are fundamental differences between nouns and adjectives, and these differences can be summarised as follows:

Nouns are limited to a clearly defined range of classes, e.g. a particular singular class and a particular plural class.

- within the constraint of semantics, an adjective can be used with a noun of any class and it must formally agree in terms of class, with this noun. According to the dialect, a noun has up to seven forms and these are members of seven classes (see table 3 which gives five of these forms) whereas an adjective has up to 26 forms and these are members of all the 26 nominal classes (see table 6).

2.20. On the other hand, the adjective and the noun it qualifies may belong to different grades of the class, as illustrated by table 6.

2.21. In both Fuuta Jaloo and Fuuta Tooro adjectives can be used attributively; they are then always found immediately after the noun(s) they modify, e.g.

Fuuta Jaloo/Fuuta Tooro:

Nagge mawŋge "a big cow"
 ŋgaari mawndi "a big bull"
 rawaandu mawndu "a big dog"

2.22. When adjectives are used as predicates they are preceded by the particle ko which may or may not be immediately before them, e.g.

Fuuta Jaloo/Fuuta Tooro

ŋge'e nagge ko mawŋge "this cow is big"
 Ndi'i ŋgaari ko mawndi "this bull is big"
 Ndu'u rawaandu ko mawndu "this dog is big"

2.23. Adjectives may have corresponding forms in the verbal system, in the stative tense, and similar meanings can be expressed alternatively by the predicative use of the adjective (with ko) or by this stative construction, e.g.

ŋge'e nagge ko mawŋge "this cow is big"
OR
 ŋge'e nagge no mawni "this cow is big"

Ndi'i ngaari ko mawndi "this bull is big"

OR

Ndi'i ngaari no mawni "this bull is big"

- 2.24. According to the semantics, the dialects offer in certain cases an adjective, or a past participle, or a verbal form, all possibly associated with the same stem or radical, e.g.

Neddo moyy-o "a good person" (adjective)

" moyy-u-do "a person who is good" (past participle)

" no moyy-i "a person is good" (verbal form)

Further stems of this type are as follows:

bon - "bad"

Juut - "tall"

tedd - "heavy"

fand - "little"

yaaj - "wide"

- 2.25. There are other cases of a different nature, e.g.

bale - "black"

wode - "red"

rane - "white"

In all the above cases, there is no verbal form, as there would be for the items in 2.24. These items are here referred to as adjectival stems.

ngaari bale -e-ri "a black bull"

ndi bawlii "it has become black" (not ndii*balii)

ngaari mbode-e-ri "a red bull"
 ndi wojjii "it has become red" (not ndi *bodii)

ngaari ndane-e-ri "a white bull"
 ndi rawnii "it has become white" (not ndi *dani)

Further examples

neddo dabb-o "a short person"
 himo rabbidi "he is short"
 rawaandu ngor-du "a male dog"
 ndu ngordii "it has become brave" (ngordude, lit. "to
 be male", and brave by implication)

- 2.26. Apart from nouns and adjectives, other nominals include the classes of items listed below .

| <u>Numerals</u> | <u>Noun substitutes</u> | <u>Specifiers</u> |
|-------------------|-------------------------|-------------------|
| | Independent pronouns | Demonstratives |
| | Possessive pronouns | Referentials |
| | Possessive suffixes | Interrogatives |
| | | Definitives |
| Subject pronouns | | |
| Object pronouns | | |
| Genitive pronouns | | |
| Relative pronouns | | |

- 2.27. The next three chapters will give a further description of the morphology of nominals and will be arranged as follows:

Chapter 3: Distribution of classes in the two dialects

Chapter 4: Numerals

Chapter 5: Noun substitutes and specifiers

CHAPTER 3. DISTRIBUTION OF CLASSES IN THE TWO DIALECTS

- 3.1. The previous chapter dealt with an outline of the class system. This chapter concerns itself with a detailed examination of the classes in the two dialects. The subject is dealt with in two main sections - Firstly, classes found in both dialects, secondly variations between the two dialects.
- 3.2. Before analysing the classes found in both dialects it will be pointed out that no one has been able to find the reasons why the various classes were formed. Gaden noted this difficulty in the following statement:
 "Les conceptions de la nature qui se sont traduites autrefois par la formation des classes et la réunion dans la plupart d'entre elles de groupes homogènes et de choses diverses..... Ces conceptions sont probablement ignorées aujourd'hui des Peuls" (1).
- 3.3. There is no space in this chapter to speculate about the reasons behind the assignments of nouns to individual classes. Generalisations covering meanings of nouns are based upon close examination of lexical items found in each class.

I. Classes found in both dialects

- 3.4. The following list of pronouns of reference shows that there seem to be twenty-one classes common to Fuuta Jaloo and Fuuta Tooro:

Personal classes

1. o
2. be

Non-personal classes

- | | | | | |
|--------|--------|------------------------|--------|------------------------|
| 3. nde | 6. nge | 10. ngal | 13. ka | 17. dan ⁽²⁾ |
| 4. ndi | 7. ngo | 11. ngol | 14. ki | 18. dun ⁽²⁾ |
| 5. ndu | 8. ngu | 12. mba ⁽²⁾ | 15. ko | 19. de |
| | | | | 20. di |

Diminutive classes

21. ngel
22. kal
24. koy⁽²⁾

Augmentative

25. ngal

3.5. The description follows the above order, i.e. personal/non-personal, diminutive/augmentative classes.

Personal classes

- Class 1 o
Class 2 be

(1) Gaden, H, 1913, p.50

(2) mba, dan, dun, koy have been selected to represent the variety of forms found in both dialects. Phonetic variations between the classes will be examined later in this chapter.

- 3.6. Classes 1 o and 2 ɓe are the personal singular and plural classes. They include in both dialects derived and non-derived nouns, e.g.

(i) derived

debbo, plur. rewbe, 'woman' (lit. the one whose task it is to follow, derived from the verb rewde 'to follow')

lando, plur. lambe, 'king' (lit. the one whose task it is to rule, derived from laamaade 'to rule')

sanyoowo, plur. sanyoobe, 'weaver' (lit. the one whose job it is to weave, derived from the verb sanyude 'to weave')

baylo, plur. waylube 'blacksmith' (lit. the one whose job it is to change, to give shape to metals, derived from the verb sanyude 'to give shape')

(ii) Non-derived

neddo 'person'
yimbe 'persons'

- 3.7. It has been argued that, of all classes in the language, personal classes are among the most homogenous; but even here there are a few items in the o class which do not refer to human beings and a few items referring to human beings which are not in the o class. These will be mentioned where they occur.

3.8. The next classes to be examined are the non-personal ones.

Class 3 nde; plural in class 19 de

3.9. This class includes items with a wide range of meanings, e.g.

a) Some little creatures and birds of prey, e.g.

| | |
|-----------|------------------|
| wojere | "hare" |
| jiire | "squirrel" |
| yaare | "scorpion" |
| segeleere | "hawk" (FJ only) |

b) places and times, e.g.

| | |
|-----------|--------------------------|
| juulirde | "mosque" |
| janggirde | "school" |
| ruumirde | "summer encampment" |
| seedirde | "dry-season encampment" |
| dabbirde | "cold-season encampment" |
| fitaare | "forest" |
| nyalaande | "day" |
| hitaande | "year" |
| yontere | "week" |

c) grains and fruit, e.g.

| | |
|--------|--------------|
| abbere | "grain" |
| boore | "monkey-nut" |

d) certain parts of the body, e.g.

| | |
|---------|---------|
| hoore | "head" |
| yiitere | "eye" |
| bernde | "heart" |

holbunde "ankle"
 hinere "nose"
 daande "neck"

e) A large number of abstract nouns

tikkere "anger" (FT only)
 yawaare "disrespect"
 innde "name"
 yennoore "insult" (FJ only)
 huunde "thing"

f) Miscellaneous

horde "calabash"
 wofoonde "egg" (FJ only)
 hootonde "ring"
 basalleere "onion" (FJ only)
 suddaaare "blanket" (FJ only)
 kembuure "charcoal" (FJ only)

3.10. Nde occurs with three nouns referring to persons, one in Fuuta Tooro and two in Fuuta Jaloo, eg.

FT: maccuŋgerde "big slave", side by side with maccuŋgal
 (class 25 ŋgal)

FJ: kiikalaare "old man"
 maamaare "old lady"

All three nouns have pejorative meanings.

Class 4 ndi; plural in classes 19 de and 20 di: (cf. 3.15)

3.11. This class is well known for containing nouns of male animals: "Tous les noms d'animaux de cette classe désignent des mâles" ⁽³⁾; this is true for the two dialects considered here.

bujiri "fat ox" (plur. buji, class 20 di)
 kalaldi (kalhaldi) "bull" (plur. kalali, class 20 di)
 ndamndi "he-goat" (plur. damdi, class 20 di)
 ngaari "bull" (plur. ga'i, class 20 di)
 pallardi "lizard" (plur. pallarde class 19 de)

3.12. This feature is all the more important as the language does not usually have the means of making male/female distinctions such as are found in many European languages. Classes 1 o and 2 be refer to male and female human beings alike. For the moment it will suffice to mention that the male/female distinction is made by the use of the appropriate form of the adjectival stems wor-"male" and rew -:"female".

e.g. cukalel gorel/cukalel deyel "little boy/little girl"

3.13. Class 4 ndi also occurs with items having the following meanings.

a) uncountables and abstract nouns

leydi "earth, country" (pl. leyde, class 19 de)
 njaareendi "sand" (pl. njaareeje, class 19 de)
 cuddi "fog" (pl. cuudijji, class 20 di)
 njuuri "honey" (pl. njuurijji, class 20 di)
 burtaari "profit, advantage" (plur. burtaariijji, class 20 di)

(3) Homburger, L, 1929, p. 105

b) Various types of grains, some meals and metals

ngawri "millet" (plur. gawe, class 19 de)
 nyiiri "food" (pl. nyi'e, class 19 de)
 lacciri "couscous" (pl. lacce, class 19 de)
 njanndi "metal" (pl. njande, class 19 de)

c) Various

njoobaari "provision for a trip" (plur. njoobaaje,
 class 19 de)

3.14. The class also includes the Fuuta Tooro mboomri "virgin".

3.15. In general, nominals in class 4 ndi referring to animals have their plural in class 20 di whereas nouns referring to inanimate objects have theirs in class 19 de, e.g.

ɲgaari pl. ga'i (di) "bull"
 leydi pl. leyde (de) "country"

Class 5 ndu; plural in class 20 di

3.16. The meanings found in this class include,

a) Names of some quadrupeds and birds, e.g.

rawaandu "dog"
 fowru "hyena"
 waandu "monkey"
 saafaandu "monkey"
 foondu "pigeon"

b) Names for certain circular and cylindrical objects, e.g.

faandu "gourd"
 suudu "hut"
 defirdu "kitchen"
 Lewru "moon"
 serdu "flute"
 wowru "mortar"

c) Names for certain parts of the body

reedu "stomach"
 wuddu "navel"
 nowru "ear"
 howru "knee"
 enndu "breast"
 banndu "body"

d) Nouns derived from certain verbs

nyaamndu "manner of eating" derived from the verb
 nyamde "to eat"

asdu "manner of digging" derived from the verb
 asde "to dig"

aawdu "manner of sowing" derived from the verb
 awde "to sow"

e) Miscellaneous

henndu "wind"
 weendu "lake"
 habaaru "news" (Arabic)

Class 6 nge; plural in class 20 di

- 3.17. Class 6 nge comprise 4 items in Fuuta Jaloo, "sun", "fire"⁽⁴⁾, "cow" and "hunger";

naange "sun"
 yiite "fire"
 nagge "cow"
 heege "hunger"

- 3.18. This has prompted some scholars to suggest that the "sun", "fire" and "cow" being major benefactors for the Fulbe, have all been grouped in the same class; but this theory is weakened by the presence in the same class, of heege "hunger".

Class 7 ngo; plural in class 19 de

- 3.19. Class 7 includes the following:

- a) Certain abstract nouns, e.g.

miijo "thought"
 suno "covetousness"

- b) Certain parts of the body

yeeso "face"
 junnngo "hand, arm"
 baawo "back"

(4) three in Fuuta Tooro where the noun for "fire" is a different word (i.e. Jayngol) and it is in class 11 ngol.

c) Various

jawo "bracelet"
 wuro "village"
 jalo "hoe"
 maayo "river"
 luumo "market (FJ only)"

Class 8 ngu; plural in class 20 di

3.20. Among nominals occurring in the ngu class one may distinguish;

a) Names of certain animals, e.g.

puccu "horse"
 cewngu "leopard"

b) Some abstract nouns, e.g.

nyawu "disease"
 nayewu "old age"
 ngorgu "courage"
 cukaaku "youth"

Class 10 ngal; plural in class 19 de

3.21. It includes nominals referring to "wood", e.g.

leggal "wood" "piece of wood"
 bullal "thorn" (giyal in Fuuta Tooro)
 undugal "pestle"

3.22. Class 10 also includes names of some large birds, some parts of the body and some abstract nouns, e.g.

a) large birds,

dutal "vulture"
gerlal "francolin"
jigawal "vulture"

b) parts of the body,

koyngal "leg"
yi'al "bone"

c) Abstract nouns,

munyal "patience"
danyal "gain profit"
kuugal "deed"

d) Miscellaneous,

beembal "granary"
meselal "needle"

Class 11 ngol; plural in class 20 di

3.23. Class 11 ngol includes names of long and thin objects, e.g.

boggol "rope"
leebol "animal hair"

gaarawol "thread"

- 3.24. Furthermore some nominals point to length in space or time and abstract nouns found here generally contain an idea of duration, e.g.

a) length

laawol "path"

keerol "frontier"

b) Abstract nouns

kulol "fright, fear"

diwol "flight"

jaangol "cold"

- 3.25. Such nouns as "proverb", "tale" and the Fuuta Tooro word for "fire" are also found in class 11 ngol, e.g.

tinndol "proverb"

taalol "tale, story"

jayngol "fire"

Class 12 mba (ba in FT); plural in classes 19 de and 20 di

(cf. 326-27 for appropriate use of de, di)

- 3.26. This class includes nouns with the following meanings:

large animals, e.g.

nyiiwa "elephant"

mbabba "donkey"

ngeelooba "camel"

noora "crocodile"

All these nouns have their plurals in class 20 di.

3.27. *ngesa* 'field, farm' seems to be the only noun in this class that does not refer to living creatures and it may be significant that it should make its plural in *de*. On the other hand, it is interesting to note that the initial consonant of the pronoun of reference in Fuuta Tooro is a bi-labial plosive *b* and not a nasal compound, as in Fuuta Jaloo.

Class 13 ka; plural in *de*

a) Abstract nouns,

donka 'thirst'
haala 'words, speech'
nguyka 'theft'

b) Miscellaneous

laana 'canoe'
ngayka 'hole, often in the ground'

3.28. This class seems to have been chosen for receiving loan words ending in *-a*, in both dialects, e.g.

sokla 'need' (Arabic)
haala 'words, speech' (Arabic)
lampa 'lamp' (French)
horma 'respect' (Arabic)
janfa 'treason' (Manding)
diina 'religion' (Arabic)

Class 14 ki; plural in *de*

3.29. It is the "tree" class, as opposed to the "wood" class (ngal), e.g.

tamaro-hi "date-tree"
 leemunne-hi "orange-tree"
 bohehi "baobab-tree"
 jabbehi "jujube-tree"

3.30. Class 14 ki also includes a variety of other nouns, e.g.

dan̄ki "bed"
 · labi "knife"
 naafki "armpit" (FI only)
 won̄kii "soul"

Class 15 ko; plural in class 19 de

3.31. ko is the "grass and foliage" class, e.g.

hude "grass"
 haako "foliage"

3.32. hunduko "mouth" is also found in this class.

Class 17 dan (dam in FI) plural in class 19 de

3.33. This class occurs with "liquids", as underlined by Gaden.
 "C'est la classe des liquides y compris le sel" (6),
 and as in the following illustrations:

(6) Gaden, H, 1913, p. 47

Fuuta JalooFuuta Tooro

kosan "milk"

kosam

ndiyan "water"

ndiyam

njaran "drink"

njaram

landan "salt"

landam

3.34. Besides it includes abstract nouns such as,

Fuuta JalooFuuta Tooro

ngurdan "life"

ngurdam

kiran "jealousy"

kiram

endan "later"

endam

Class 18 dɔŋ (dɔm in FI)

3.35. This class is often regarded as the neuter; it does not have any nominals peculiar to its class and it is used to avoid reference to any particular class, e.g.

lootirgal "wooden object used for washing" (class 10 ngal)

lootirdi "metallic object used for washing" (class 4 ndi)

But

lootirdɔŋ "any object used for washing" (class 18 dɔŋ)

Plural classes 19 de and 20 diClass 19 deClass 20 di

- 3.36 de and di are the plural counterparts of non-personal singular classes. The occurrence of these classes has been dealt with during the description of individual singular classes.
- 3.37 Having dealt with personal and non-personal classes, it is to diminutives and augmentatives that we now turn.
- 3.38 Diminutive and augmentative forms occur with appropriate nouns of both personal and non-personal classes. They have no nominals peculiar to their classes. This description will start with a look at diminutive classes.

Diminutive classes

Class 21 ngel

- 3.39. This class may convey an idea of smallness or physical weakness according to the item, it is sometimes used to express such feelings as affection or hate.

suka "young man" gives cukalel "child" (affectionate)
 wudere "cloth" gives gudel "small cloth"
 debbo "woman" gives deyel "little lady" (affectionate)
 gorko "man" gives gorel "little man" (pejorative)

Class 22 kal

- 3.40. Class 22 refers to small quantities in mass or uncountable nouns, thus,

landan "salt" gives lanƙal "small quantity of salt"
 kosan "milk" gives koccal "small quantity of milk"
 ndiyān "water" gives dihal "small quantity of water"
 leydi "earth" gives leykal "small quantity of earth"

Class 24 koy/kon

3.41. Class 24 is the plural counterpart of diminutive singular classes, thus

gudel "small cloth" gives gudoy (FJ)/ngudon (FT)
 "small cloths"

cukalel "child" gives cukaloy (FJ)/cukalon (FT)
 "children"

deyel "little lady" gives deyoy (FJ)/ndeyon (FT)
 "little ladies"

gorel "little man" gives goroy (FJ)/ngoron (FT)
 "little men"

Augmentative class 25 ngal

3.42. This class is associated with augmentative singular meaning, thus,

rawaandu "dog" gives dawangal "big dog"
 debbo "woman" gives deyal "big lady"
 gorko "man" gives goral "big man"
 wudere "cloth" gives gudal "big cloth"

- 3.43. The two dialects have no regular augmentative plural forms although other dialects do. Augmentative plural meaning is expressed for instance by the use of the appropriate plural form of "big" with the ordinary plural of a noun. For instance, the augmentative singular form of wudere "cloth" is gudal, but the augmentative plural form will only be gude (plural of wudere, in class 19 de) and mawde (plural of mawnde "big", in de).
- 3.44. After the classes common to the two dialects we now turn to consider the variations that occur between the two dialects.

Variations between the two dialects

- 3.45. The following plan will be adopted for the study of this variation.

- I Equivalence of classes
- II Corresponding words in different classes
- III Variations in agreement
- IV Variations in the category of consonants
- V Variations in the forms of class suffixes

I Equivalence of classes

- 3.46. There is equivalence of classes when a missing class is replaced by a different class. This feature occurs with the four Fuuta Jaloo classes missing in Fuuta Tooro, i.e. IX and XVI ngii, XVI kol, XXII kun.

- 3.47. Nominals of the ngii class in Fuuta Jaloo occur in

class 8 ngu for non-personal singular and class 25
ngal for augmentatives, e.g.

class IX ngii/class 8 ngu

Fuuta Jaloo: baalii "sheep" (class IX)
nyaakii "bee" (class IX)

gives in Futta Tooro: mbaalu "sheep" (class 8)
nyaaku "bee" (class 8)

- 3.48. The equivalence between classes IX ngii and 8 ngu occurs ..
mostly with insects.

class XXVI ngii/class 25 ngal

Fuuta Jaloo: gudii and gudal "big cloth"
give gudal "big cloth" in Fuuta Tooro

- 3.49. Nyalhol "calf" is the only member of the kol class in
Fuuta Jaloo. It has two corresponding forms nyalel and
nyale in Fuuta Tooro where they are members of the
ngel and nge classes.

- 3.50. Fuuta Jaloo nouns in the Kuṅ class occur in Fuuta Tooro
as members of the ngel class, e.g.

Fuuta Jaloo: gudun "small cloth"
gudel "small cloth" in Fuuta Tooro

II Corresponding words in different classes

- 3.51. As a rule nominal stems remain in the same singular classes

in the two dialects. Furthermore even in cases where there are different stems from one dialect to another they still remains in the same singular class e.g.

| | | |
|---------------|---------------|--|
| "dog" | (class 5 ndu) | rawaandu, bareeru, kutiiru, Kalbuuru etc. |
| "cooking pot" | (class 3 nde) | wureere, defirde, fayamde etc. |

3.52. Occasionally there occurs some interchange between the various classes, but the class suffix that is common to the two dialects often remains as an alternative form. For instance galle "house, home" is usually a plural noun in de class, but some speakers in Fuuta Tooro tend to use it in the singular class 1 o, galle o. Its plural counterpart is then galleeji "houses". It is not in the scope/interchangeability since "the class of suffix with which a given stem is associated in a nominal of a given meaning is strictly a lexical not a grammatical matter".⁽⁷⁾ It will however prove interesting to take a look at random examples and show the different usage in the two dialects.

i) Fuuta Tooro: lekki "tree" and "medicine"
(class 14 ki)
leggal "piece of wood"
(class 10 ŋgal)

Fuuta Jaloo: leggal "piece of wood and also tree"
(class 10 gal)
lekki "medicine" (class 14 ki)

(7) Arnott, D.W., 1960, p. 270

/ of this chapter to make an exhaustive investigation of such cases of

The Fuuta Jaloo leggal assumes the meanings of both lekki (class 14) and leggal (class 10) in Fuuta Tooro.

- ii) Fuuta Tooro: meccal "occupation" (class 10 ngal)
 mecce "occupation/occupations"
 (class 19 de and class 1 o)

In Fuuta Tooro mecce "occupation" has two pronouns of reference, de plural and o singular. There is also a form meccal (class 10 ngal). In Fuuta Jaloo only mecce occurs with pronoun of reference de;

Fuuta Tooro

kala ko ngaddandaa sakke e meccal o liggoto tan
 (literally 'whatever bring-you shoe-maker as job he
 will work only')

"A shoe-maker is able to do whatever job that is brought
 to him"

- 3.53. The same thing occurs when gollal 'work' (class 10 ngal) is used alongside golle 'work' (class 19 de) in Fuuta Tooro, e.g.

So tawii Alla waawnii kam ngal gollal ma mi naftor ngal
 (literally "if it occurs God teaches me this skill shall
 I make use of it")

"If God permits me to learn this skill I shall make
 great use of it"

- 3.54. Fuuta Tooro has a further variant for the word padal "shoe" commonly used in Fuuta Jaloo.

- iii) Fuuta Tooro: faɗo "shoe" (class 7 ŋgo)/paɗal "shoe"
 (class 10 ŋgal)
Fuuta Jaloo: paɗal "shoe" (class 10 ŋgal)

3.55. In some localities of Fuuta Tooro there are instances of overlapping between ndi and ki in ɗowdi, ɗofki, ŋguleendi and ŋguleeki.

- iv) Fuuta Tooro: ɗowdi "shade, shadow" (class 4 ndi)
 ɗofki "shade, shadow" (class 14 ki)
 ŋguleendi "heat" (class 4 ndi)
 ŋguleeki "heat" (class 14 ki) .
- Fuuta Jaloo: ɗowdi "shade, shadow" (class 4 ndi)
 ŋguleendi "heat" (class 4 ndi)

III Variation in agreement

3.56. It occurs when a word may have agreement with pronouns of reference of more than one class.

Normal agreement:

mbaroodi baleeri ndi (literally lion black this)
 "this black lion" (class 4 ndi)
 puccu baleewu ŋgu (literally horse black this)
 "this black horse" (class 8 ngu)

Variations in agreement

mbaroodi 'o "this lion"
 puccu 'o "this horse"

- 3.57. It will be interesting to have a look at the various attempts to explain the reasons of such variations.

One of the reasons put forward has already been mentioned earlier. Present day Fulbe, and above all Pulaar speakers from Fuuta Tooro, do not seem to be able to define the reasons that led to the assignment of nouns to the various classes. Therefore new words will be assigned to the language on the basis of their external features: "Les conceptions de la nature qui se sont traduites autrefois par la formation des classes, (ces conceptions) n'ont peut-être jamais été connues des Toucouleurs pour lesquels le Poular est leur propre aveu, une langue d'emprunt. C'est ce qui explique que, lorsqu'ils adoptent un mot étranger, ils ne répugnent pas à le placer dans la classe dont il se rapproche le plus par son aspect extérieur // (8).

This may be the reason why tuuba "trousers" and musiiba "mishap" are assigned to the same class. A similar case occurs when maaro "rice" is assigned indifferently to classes 1^o, 7^o, 15^o. This stem is usually found in class 15^o in both dialects,

| | | |
|-------|-----|--------|
| maaro | o | |
| maaro | ngo | "rice" |
| maaro | ko | |

- 3.58. The second explanation suggests that the importance of agreements depends upon the level of language. Obviously agreements will be respected in formal speech and written materials but they will tend to be more relaxed in ordinary speech: "Les accords du nominal et de l'épithète

sont observés dans tous les textes pouvant être assimilés à une forme d'expression littéraire ou un exercice de valeur littéraire ... Dans les récits contes dans la langue journalière par les peuls, l'expression de la détermination épithétique s'écarte beaucoup plus des normes du peul standard"⁽⁹⁾.

IV Variations in the category of consonants

3.59. Normally initial consonants are the same in both dialects, but there are a few instances of differences, as shown in table 1. The nasal compound in Fuuta Jaloo is replaced by a simple stop in Fuuta Tooro; initial consonants g and s in Fuuta Jaloo are replaced by j and c in Fuuta Tooro.

Table 1. Instances of variations in initial consonants

| Name of class | Category of initial consonant | Fuuta Jaloo | Fuuta Tooro | Meaning |
|---------------|-------------------------------|-------------|-------------|-------------|
| 10. ngal | g/j | gerlal | jarlal | "bush-fowl" |
| 11. ngol | g/j | gimol | jimol | "song" |
| 8. ngu | mb/b | mbatu | batu | "gathering" |
| 1. o | mb/b | mbileejo | bileejo | "magician" |
| 5. ndu | nd/d | ndowru | doomru | "mouse" |
| 4. ndi | ng/g | ngawri | gawri | "millet" |
| 1. o | ng/g | ngaynaako | gaynaako | "shepherd" |
| 8. ngu | s/c | sukaaku | cukaagu | "youth" |

(8) Gaden, H, 1913, P.50

(9) Lacroix, H, 1967, pp 305-6

3.60. There is a tendency for variations to occur in a number of nominal stems, as shown in table 2 below.

Table 2. Instances of variations in nominal stems

| Name of class | Category of Consonants | Fuuta Jaloo | Fuuta Tooro | Meaning |
|---------------|------------------------|-------------|-------------|------------|
| 3. nde | -n-/-m- | linsere | linsere | "rag" |
| 11. ngol | -n-/-m- | concol | comcol | "clothing" |
| 10. ngal | -y-/-s- | koyngal | kosngal | "leg" |
| 13. ka | -y-/-s- | ngayka | ngaska | "hold" |
| 5. ndu | -w-/-f- | nowru | nofru | "ear" |
| 5. ndu | -w-/-f- | howru | hofru | "knee" |
| 13. ka | -ŋ-/-m- | donka | domka | "thirst" |
| 10. ngal | -ŋ-/-m- | denngal | demngal | "tongue" |
| 19. de | - ' - / - h - | ba'e | bahe | "beards" |

V Variations in the forms of class suffixes

3.61. Most class suffixes tend to have the same forms in the two dialects; but phonetic variations occur in the forms of a number of suffixes.

(i) The Fuuta Jaloo final velar nasal is m in Fuuta Tooro, e.g.

| class name | Fuuta Jaloo | Fuuta Tooro | Meanings |
|-------------|-------------|-------------|-------------|
| 17. dan/dam | ndiyan | ndiyam | "water" |
| 17. dan/dam | kosan | kosam | "milk" |
| 18. du/dum | goddu | goddum | "something" |

(ii) The final palatal semi-vowel y in Fuuta Jaloo is replaced by n in Fuuta Tooro. This occurs with the diminutive plural class, as exemplified below.

| Class name | Fuuta Jaloo | Fuuta Tooro | Meanings |
|-------------|-------------|-------------|-------------------|
| 24. koy/kon | puloy | pulon | "little Fulbe" |
| 24. koy/kon | gudoy | ngudon | "small cloths" |
| 24. koy/kon | jawoy | njawon | "small bracelets" |

(iii) There occur variations from Fuuta Jaloo to Fuuta Tooro in the suffixes of the following classes:

6. nge, 10 ngal, 11 ngol, 21 ngel, 24 koy/kon, 25 ngal.

In Fuuta Jaloo all these classes have a suffix with a w-initial consonant, except for class 24 koy which has an h, e.g.

-we, -wal. -wol, -wel, -wal for nge, ngal, ngol, ngel, ngal
-hoy for koy.

In all these cases the labio-velar semi-vowel w and the glottal fricative h in Fuuta Jaloo are palatal semi-vowels y in Fuuta Tooro; this feature is shown by the following table.

| Class name | Examples of nouns common to both dialects | Rane - "white" | |
|------------|---|----------------|-------------|
| | | Fuuta Jaloo | Fuuta Tooro |
| 6. nge | nagge "cow" | rane-we | rane-ye |
| 10. ngal | gertogal "hen" | dane-wal | dane-yal |
| 11. ngol | loocol "stick" | dane-wol | dane-yol |

Table continued...

| | | | |
|--------------|---------------------------------|----------|-----------|
| Diminutives | | | |
| 21. ŋgel | gertogel "chicken" | dane-wel | dane-yel |
| 24. koy/kon | gertokoy "chickens" gertokon | dane-hoy | ndane-yon |
| Augmentative | | | |
| 25. ŋgal | gudal "big cloth" | dane-wal | dané-yal |

Summary

There are very few clear-cut relationships between the classes and the meanings of the members of any one class. Apart from the personal class, singular classes are extremely heterogenous. Nouns of certain semantic categories are assigned to several different classes, specially parts of the body, birds, animals.

In general the two dialects share most of the features of the nominal class system.

CHAPTER 4: NUMERALS

A. Cardinal numerals

Table 1: List of cardinal numerals in the two dialects.

| Category | Fuuta Jaloo | Fuuta Tooro |
|----------|-------------------|-------------------|
| 1 | go'o | go'o/goo |
| 2 | didi | didi |
| 3 | tati | tati |
| 4 | nayi | nayi |
| 5 | jowi | joyi |
| 6 | jeego'o | jeegom |
| 7 | jeedidi | jeedidi |
| 8 | jeetati | jeetati |
| 9 | jeenayi | jeenayi |
| 10 | sappo | sappo |
| 11 | sappo e go'o | sappo e go'o/goo |
| 12 | sappo e didi | sappo e didi |
| 20 | noogay | noogaas |
| 30 | cappande tati | capande tati |
| 40 | cappande nayi | capande nayi |
| 50 | cappande jowi | capande joyi |
| 100 | teemedere | teemedere |
| 110 | teemedere e sappo | teemedere e sappo |
| 200 | teemedde didi | teemedde didi |
| 300 | teemedde tati | teemedde tati |
| 500 | teemedde jowi | teemedde joyi |

To be continued....

Table continued...

| | | |
|---------|--------------|---------------|
| 1000 | wuluure | ujunere |
| 2000 | guluuji didi | ujunaaji didi |
| 1000000 | milyon | milyon |

- 4.1. Cardinal numerals in both dialects have single words for half (feccere) 1,2,3,4,5,10,20,100,1000, 1000000 (cf. Table 1 for illustrations). Remaining numerals are derivatives; forms from 6 to 9 are obtained by adding 1 to 4 to the figure 5, i.e.

jowi/joyi e go'o "5 and 1" gives jeego'o/jeegom
 jowi/joyi e didi "5 and 2" gives jeedidi "seven"
 jowi/joyi e tati "5 and 3" gives jeetati "eight"
 jowi/joyi e nayi "5 and 4" gives jeenayi "nine"

- 4.2. As shown in Table 1, the forms indicating tens are sappo "ten", noogay/noogaas "twenty" and a combination of the relevant unit number with the terms cappande/capande for forms from thirty to ninety, e.g.

cappande/capande tati "thirty" (cf. 4.9)
 cappande/capande nayi "forty" (cf. 4.9)

- 4.3. Singular and plural forms are used in both dialects in order to distinguish 100 and 1000 from their multiples, e.g.

(i) teemedere "one hundred" gives teemedde³/teemedde⁽¹⁾
didi "two hundred"

(ii) wuluure/ujunere "one thousand" gives guluuji/
ujunaaji didi "two thousand"

4.4. The term milyon 'million', found in the two dialects,
is a loan from the French language million.

4.5. Some space will now be devoted to a number of phonetic
and syntactic variations between the two dialects, as
shown in Table 1.

4.6. The bi-labial w in the Fuuta Jaloo form Jowi "five"
is replaced by the palatal semi-vowel y (joyi) in
Fuuta Tooro.

4.7. The Fuuta Jaloo form jeego'ə "six" takes a final
bi-labial nasal m, instead of the glottal stop and
the subsequent vowel,

jeego'o/jeegom

4.8. The palatal semi-vowel y, found in the Fuuta Jaloo
form noogay "twenty" is replaced by a duplication of
the final vowel a, together with the addition of an
alveolar s, in Fuuta Tooro,

noogay/noogaas

(1) but see also 4.10

- 4.9. The Fuuta Jaloo term cappandɛ 'multiples of ten' is characterized by the dropping of one of the bi-labial plosives in Fuuta Tooro,

Cappandɛ/capandɛ

- 4.10. The glottalized consonantsɗɗ of the plural form teemɛɗɗɛ 'multiples of hundred' are replaced by alveolar plosives dd in Fuuta Tooro, i.e.

teemɛɗɗɛ/teemedde

- 4.11. It will be mentioned that both dialects tend to prefer the contracted forms of cappandɛ/capandɛ and teemɛɗɗɛ/teemedde - such forms are obtained by a replacement of suffixes -ɗɛ/-ɗɛ with a glottal stop, e.g.

cappandɛ/capandɛ -----> cappan'/capan'
'multiples of ten'

teemɛɗɗɛ/teemedde -----> teeme'
'multiples of hundred'

- (v) As shown above, the plural suffix -ɗɛ (teemɛɗɗɛ 'hundred') is -de in Fuuta Tooro,

teemɛɗɗɛ -----> teemedde 'multiples of ten'

Both cappandɛ/capandɛ and teemɛɗɗɛ/teemedde tend to be reserved for emphatic sentences and formal speech.

(vi) Separate words are used for "thousand" e.g.

Yimbe ben nanngaa. Wuluure soka. Wuluure accitaa.
 "The people were caught. A thousand were jailed
 and a thousand released" (Fuuta Jaloo)

Tawi heen fergo nelaado ina yaara ujunere
 "It was in the year 1000 (Mbslem calendar)"

4.12. Separate words are used in the two dialects to refer to the term "thousand". This is wuluure (plural guluuji) in Fuuta Jaloo and ujunere (plural ujunaaji) in Fuuta Tooro.

B. Ordinal Numerals.

As shown in Table 2 below, the stems of ordinal numerals are based on those of cardinal numerals, except for 'first' where the stem is aran-, which is clearly not connected with go'o "one".

Table 2: Ordinal stems in the two dialects

| Category | Fuuta Jaloo/Fuuta Tooro |
|----------|-------------------------|
| 1st | aran- |
| 2nd | did-ab- |
| 3rd | tat-ab- |
| 4th | nay-ab- |
| 5th | jow-ab-/joy-ab- |

To be continued....

Table 2 continued...

| | |
|------|------------|
| 6th | jeeg-ab- |
| 7th | jeedid-ab- |
| 8th | jeetat-ab- |
| 9th | jeenay-ab- |
| 10th | sappo-b- |

Table 3. Examples of ordinal numerals

| Category | Personal debbo/rewbe "woman/ women" | Non-personal hor-de/kor-e "calabash/calabashes" | Diminutive |
|----------|---|---|--------------|
| 1st | Aran-o | aran(e)-re | Aran-el |
| 2nd | did-ab-o | did-ab(e)-re | did-ab-el |
| 3rd | tat-ab-o | tat-ab(e)-re | tat-ab-el |
| 4th | nay-ab-o | nay-ab(e)-re | nay-ab-el |
| 5th | njow-ab-o | jow-ab(e)-re | jow-ab-el |
| 6th | njeeg-ab-o | jeeg-ab(e)-re | jeeg-ab-el |
| 7th | njeedid-ab-o | jeedid-ab(e)-re | jeedid-ab-el |
| 8th | njeetat-ab-o | jeetat-ab(e)-re | jeetat-ab-el |
| 9th | njeenay-ab-o | jeenay-ab(e)-re | jeenay-ab-el |
| 10th | sappo-b-o | sappo-b(e)-re | sappo-b-el |

4.13. Ordinal numerals from second to ninth are obtained through a succession of two combinations.

- (i) Cardinal stems are combined with the ordinal affix -ab-, and (ii) the result is combined with relevant nominal suffixes, e.g.

did-ab-o "second" (class 1 o)
 tat-ab-o "third" (class 1 o)
 nay-ab-e-re "fourth" (class 3 nde)

(cf. Table 3 for further illustrations)

- 4.14. The ordinal "tenth" is composed of the full cardinal sappo "ten", the affix -b- and relevant nominal suffixes, e.g.

sappo-b-o (class 1 o)
 sappo-b-e-re (class 3 nde)
 sappo-b-i-ri (class 4 ndi)

(this case and the case below are illustrated in Table 3)

- 4.15. As for the stem aran- "first" it does not combine with any ordinal affix, presumably because it is an ordinal stem itself. It combines directly with relevant nominal classes instead, e.g.

aran-o (class 1 o)
 aran-e-re (class 3 nde)
 aran-i-ri (class 4 ndi)

C. Adjectival numerals

- 4.16. The types of numerals listed in table 4 below behave like adjectives; they have concordant and non-concordant forms and some are subject to initial consonant alternations.

Table 4. List of adjectival numeral stems in the two dialects.

| Category | Fuuta Jaloo/Fuuta Tooro |
|----------|--------------------------------------|
| 1 | woot- |
| 2 | ɗiɗ- |
| 3 | tat- |
| 4 | nay- |
| 5 | joŋ-/joy- |
| 6 | jeego'o/jeegom |
| 7 | jeediɗ- |
| 8 | jeetat- |
| 9 | jeenay- |
| 10 | sappo ⁽ⁱ⁾ |
| 11 | sappo e go'o ⁽ⁱ⁾ |
| 12 | sappo e ɗiɗ- |
| 20 | noogay/noogaas ⁽ⁱ⁾ |
| 30 | cappande/capande tat- |
| 40 | cappande/capande nay- |
| 100 | teemedere ⁽ⁱ⁾ |
| 200 | teemedde ɗiɗi ⁽ⁱ⁾ |
| 1000 | wuluure/ujunere ⁽ⁱ⁾ |
| 2000 | guluuji/ujunaaji ɗiɗi ⁽ⁱ⁾ |
| 1000000 | milyon ⁽ⁱ⁾ |

(i) These adjectival forms do not undergo any changes.
(cf. 4.17, 18, 19 and Table 5)

Table 5. Illustrations of adjectival numerals with personal/ Non-personal and diminutive suffixes (nominal stems nedd- "person, jal- "hoe", suka "young person").

| Category of Numeral | Personal nedd-o/yim-be "person/persons" | Non-personal Jal-o/Jal-e "hoe/hoes" | Diminutive cuka-lel/cuka-loy "child" |
|---------------------|---|---|--|
| 1 | goot-o | woot-o | goot-al |
| 2 | did-o | didi | did-oy/on |
| 3 | tat-o | tati | tat-oy/-on |
| 4 | nay-o | nayi | nay-oy/-on |
| 5 | njow-o/njoy-o | jowi/joyi | njow-oy/-njoy-on |
| 6 | njeego'o/njeegom | jeego'o/ jeegom | njeego'o/njeegom |
| 7 | njeedid-o | jeedidi | njeedid-oy/-on |
| 8 | njeetat-o | jeetati | njeetat-oy/-on |
| 9 | njeenay-o | jeenay-i | njeenay-oy/-on |
| 10 | sappo | sappo | sappo |
| 11 | sappo e go'o | sappo e go'o | sappo e go'o |
| 12 | sappo e did-o | sappo e didi | sappo e did-oy/-on |
| 20 | noogay/noogaas | noogay/ noogaas | noogay/noogaas |
| 30 | cap(p)ande tat-o | cap(p)ande tati | cappande tatoy/-on |
| 40 | cap(p)ande nay-o | cap(p)ande nayi | cappande nayoy/-on |
| 100 | teemedere | teemedere | teemedere |
| 200 | teemedde didi | teemedde didi | teemedde didi |
| 1000 | wuluure/ujunere | wuluure/ ujunere | wuluure/ujunere |
| 2000 | guluuji didi | guluuji/ juunaaji didi | guluuji/ujunaaji didi |
| 1000,000 | milyon | milyon | milyon |

4.17. It is well to mention that concordant forms are here taken to mean the numerals the endings of which agree with the suffixes of relevant nominal groups; in contrast, non-concordant forms do not have concord suffixes.

4.18. The concordant suffix for personal numerals is -o; concordant forms of this category include the following: (cf. Table 5)

a) Numerals 1 to 5 and 7 to 9, e.g.

| | |
|---------------------------------|------------------------------|
| Walyaabe <u>njow-o</u> . | "five saints" |
| Sukaabe beɲ timmay <u>nay-o</u> | "there could be four or five |
| maa <u>njow-o</u> | young <i>people</i> " |

| | |
|----------------------------------|---------------------------------|
| Debbo oo funi biɓbe <u>diɗ-o</u> | "The woman gave birth to twins. |
| be inniri oo biɗo | One was named after Jalla, |
| Jalla, be inniri oodoo | the other one after Umayru" |
| Umayru | |

b) Forms between 12 and 19, e.g.

| | |
|------------------------|-----------------------------|
| Gurupmaa fow so famdii | "However little a group is, |
| famdii ma won yimbe | it cannot be less than 15 |
| <u>sappoo e njoy-o</u> | peoples" |

(Context: Rice planting groups along the River Senegal, in Fuuta Tooro)

Almaami Bookar and Teekun "Almaami Bookar and his army
 mun felli be kadi, be shot them, they killed Modi
 libi Modi yaayaa e yimbe Yaayaa and several of his
 makko buy, hono sappo e followers, about 12 of them"⁽²⁾
did-o.

c) Multiples of ten from 30 upwards, e.g.

Yimbe capan' tat-o "thirty people"

Heeferbe cappande njeedid-o "seventy pagans"

Non-concordant forms of personal numeral include, 6,
 10, 11, 20, 100 and its multiples, 1000 and its
 multiples.

Almaamiibe njeego'o faabii "6 Kings came to his rescue.
 mo. Haabe buy nanngaa, Lappol Several people were made
 ngol yonay yimbe teemedde prisoners. The column
 jeedidi can reach 700 people"

4.19. For non-personal numeral stem, the only concordant form
 seems to be "one", e.g.

Jalo wooto "one hoe"
 leggal gootal "one stick"
 rawaandu wooturu "one dog"

All the remaining non-personal forms are the same as
 cardinal numerals, e.g.

(2) Sow, A.I. 1966, p. 210

Mbaala, Gural ngal
inde jeedidi

"Mbaala, Big City with
seven nouns"
(Fuuta Tooro)

Guruppaaji capan' tati
e jeedidi na ni do e
gesa he

"thirty seven groups are here,
as part of this farm"
(Fuuta Tooro)

Iwde yaltugol Timbo,
ruuma Tuubaa, fella
Turuban, arta faa to
Dombiyaaaje, hewtita
zurriya, ko duubi jowi

"From the time when they
left Timbo, including the
rainy season spent in Tuubaa,
the battle of Turuban, the
return to Dombiyaaaje and
the arrival at Zurriya,
five years elapsed"⁽³⁾
(Fuuta Jaloo)

Be lammini sori....
o haabi leyde cappande
jowi laamii duubi
cappande tati e nay

"they crowned Soru.....
He fought fifty countries
(and) ruled for thirty-four
years"⁽⁴⁾ (Fuuta Jaloo)

4.20. For diminutive numerals

Concordant forms include numerals one to five, seven
to nine and twelve to nineteen, e.g.

be addi caw-oy tat-oy

"they brought three little
sticks" (Fuuta Jaloo)

(3) Sow, A.I. 1966, p.232

(4) Sow, A.I. 1966, p.216

| | |
|----------------------|---------------------------|
| ko kon cukalon | "they are thirteen |
| <u>sappo e taton</u> | youngsters" (Fuuta Tooro) |

Non-concordant forms are the same as the ones found in personal and non-personal numerals, e.g. 6, 10, 11, 20, 21 and its multiples, 1000 and its multiples.

Initial consonant alternation

4.21. As in the case of nouns and adjectives, the consonants of numerals are sub-divided into fixed and alternating categories.

(i) Fixed consonants are encountered in initial position in the following cases:

did- "two", tat- "three",
 nay "four", noogay/noogaas "twenty",
 teemed- "hundred", ujunere "thousand",
 milyon "million"

All these are outside the pattern of initial consonant alternation.

(ii) Alternating initial consonant are found in the following circumstances:

woot- "one", jow- "five", sappo "ten",
 wuluu- "thousand"

The distribution of alternation of these consonants is however different from the one described in chapter 1, Section B.

- 4.22. In order to show this difference, variform consonants will be divided into the following three categories:

The first category includes sappo "ten", wuluu- "thousand"

The second category comprises only one stem jow- (or joy-) "five"

Like the second category, the third only involves one stem woot- "one"

- 4.23. The first category of stems includes consonants the alternation of which depends on singular-plural relationships. It is appropriate, at this stage, to throw further clarification on what is meant by singular/plural relationship in this context, since it has been argued that because such stems as sappo, "ten", wuluu- "thousand" all imply plurality "only plural classes are relevant in the pattern of consonant alternation."⁽⁵⁾

The singular/plural dichotomy is here taken to mean the opposition between "10", "1000" on the one hand and "multiples of 10, 1000" on the other hand, e.g.

yimbe/depte sappo "ten people/books"

yimbe/depte cappande tati "thirty people/books"

(alternating consonants: S/C)

julbe/jale wuluure "a thousand moslems/hoes"

julbe/jale guluuji tati "three thousand moslems/hoes"

(alternating consonants: W/g)

(5) Arnott, D.W., 1970, p.168

- 4.24. As mentioned above only the stem jow- (or joy-) is believed to include the second category of consonants under consideration. It has been felt necessary to treat this stem separately since the basis of its consonant alternation differs from that of sappo "ten", wuluu- "thousand" and, to a certain extent, from woot- "one". By way of opposition to the former, the pattern of consonant alternation of jow- does not depend on a singular/plural relationship. It depends rather on the type of nominal that is being considered. The initial-consonant will be plosive with non-personal nouns and nasal with personal nominal, e.g.

jale/boje/gude jowi (or joyi) "five hoes/hares/cloths"
 Fulbe/Julbe/rɛwbe njowo (or njoyo) "five Fulbe/Moslems/
 women" (alternating consonants: j/nj)

- 4.25. Woot- "one" has got common characteristics with the stems of both categories one and two. The pattern can depend on both singular/plural relationships and the type of nominal, as illustrated below,

1) Singular/plural relationship

Wudere wootere "one cloth"

Gude goote "cloths of one kind; some cloths"

ngudon ngooton "little cloths of one kind; some little cloths"

Woot- "one" has therefore got all three forms of consonant alternation patterns described in paragraph I, section B, Chapter 1, e.g.

W/g/ng

N.B. This alternation operates fully only in Fuuta Tooro since Fuuta Jaloo equivalents are characterized by the use of the plosive g for both plosive and nasal counterparts in Fuuta Tooro (cf. 117)

gude goote/gudoy gootoy; g/g

2) Category of Nominal

This concerns the first form of initial consonants. It is not always a fricative. It is fricative with non-personal nouns, as in the example above and plosive with personal nouns, e.g.

Wudere wootere "one cloth" but Pullo gooto "one Pullo"

Repetition

4.26. Both dialects express repetition by the stem laaw- "occasion, time" and the appropriate numeral form; e.g.

| | | |
|----------------------|-----------------|------------------|
| laaw-ol gootol | "once" | (lit. "one way") |
| laab-i didi | "twice" | |
| laab-i jowi | "five times" | |
| laab-i sappo | "ten times" | |
| laab-i sappo e go'o | "eleven times" | |
| laab-i noogay | "twenty times" | |
| laab-i cappande tati | "thirty times" | |
| laab-i teemedere | "hundred times" | |

4.27. Nde is also used sometimes;

nde wootere "once"
 nde didi "twice"
 nde tati "three times"

Equal-distribution

4.28. It involves total reduplication of the numeral in both Fuuta Jaloo and Fuuta Tooro;

go'o-go'o "one by one; one at a time"
 didi-didi "two by two; in twos"
 tati-tati "three by three"
 nayi-nayi "in fours; four each"
 sappo-sappo "ten by ten; ten each"
 noogay-noogay "twenty by twenty; twenty each"
 cappan'tati- cappan'tati "thirty by thirty; thirty each"

CHAPTER 5 NOUN SUBSTITUTES AND SPECIFIERS⁽¹⁾

5.1. The above terms include the following pronouns.

| <u>Noun Substitutes</u> | <u>Specifiers</u> |
|-------------------------|-----------------------------|
| Independent Pronouns | Near and far demonstratives |
| Possessive Pronouns | Referentials |
| Possessive Suffixes | Interrogatives |
| | Definitives |

5.2. This chapter will endeavour to make an examination of the relationships between the set of pronouns in the two dialects. The procedure of study will be the one that has been adopted so far for this thesis:

- Forms found in both dialects
- Variations between the dialects
- Forms found in one dialect and not the other

Noun substitutes

5.3. In both dialects, there are two types of noun substitutes: Concordant and non-concordant forms. The latter include first, second and third person forms and do not have concord suffixes whereas the former have concord suffixes that are related to the classes they refer to.

(1) cf. Arnott, D.W., 1970, p.170

A. Independent pronouns

Table 1. Non-concordant forms

| Person | Fuuta Jaloo | Fuuta Tooro |
|---------------|-------------|-------------------|
| 1. singular | miŋ | miin |
| 2. singular | aŋ | aan |
| 1. plur incl. | eneŋ | enen |
| 1. plur excl. | menenŋ | menen/minen |
| 2. plur | ononŋ | onon |
| 3. singular | kanyuŋ | kanyum/kanjum/kay |
| 3. plural | kanyun'enŋ | kanyum'en/ka'en |

- 5.4. In both Fuuta Jaloo and Fuuta Tooro, independent pronouns are mostly used for emphatic purposes:

Fuuta Tooro

ko mbi'ataa koo nafataa ko onon. "your saying of it
Minen domin ŋgoni doo ina nafa being useless only applies
amen no feewi. to you. It is very useful
to us where we are."

(Two shepherds talking about the validity of trying to grow a certain type of grain);

Table 2. Concordant forms

| Class name | Fuuta Jaloo | Fuuta Tooro |
|--------------|---------------------|---------------------|
| 1 o | kaŋko "as for him" | kaŋko "as for him" |
| 2 be | kaŋbe "as for them" | kaŋbe "as for them" |
| Non-personal | | |
| 3 nde | kayre "as for it" | kayre "as for it" |
| 4 ndi | kayri | kayri |
| 5 ndu | kayru | kayru |
| 6 ŋge | kaŋge | kaŋge |
| 7 ŋge | kaŋgo | kaŋgo |
| 8 ŋgu | kaŋgu | kaŋgu |
| IX ŋgii | kaŋgii | Fuuta Jaloo only |
| 10 ŋgal | kaŋgal | kaŋgal |
| 11 ŋgol | kaŋgol | kaŋgol |
| 12 mba/ba | kaŋba | kaŋba |
| 13 ka | kaŋka | kaŋka |
| 14 ki | kaŋki | kaŋki |
| 15 ko | kaŋko | kaŋko |
| XVI kol | kaŋkol | Fuuta Jaloo only |
| 17 daŋ/dam | kaŋjaŋ | kaŋjam |
| 18 duŋ/dum | kaŋyuj | kaŋyum/kaŋjum |
| 19 de | kaŋje "as for them" | kaŋje "as for them" |
| 20 di | kaŋji " | kaŋji " |
| Diminutive | | |
| 21 ŋgel | kaŋgel "as for it" | kaŋgel "as for it" |
| 22 kal | kaŋkal | kaŋkal |
| XXIII kuŋ | kaŋkuŋ | Fuuta Jaloo only |
| 24 koy/kon | kaŋkoy | kaŋkoŋ |
| Augmentative | | |
| 25 ŋgal | kaŋgal "as for it" | kaŋgal "as for it" |
| XXVI ŋgii | kaŋgii | Fuuta Jaloo only |

- Aan, mbiimi hodo ummidaa e leydi men? "I say, you, where do you come from?"
- Minen jooni min mba'i ko no majjiraa fe ni "We just look like people who lost something"
- A- Burboos, kanjum jooni won do dum danyi e leydi he? "Can the grass called burbos still be found in this region?"
- B- Burboos, burboos na ni do haa heewi "Burbos, there is plenty of burbos around."
- A- Ada waawi mi heen danyande? "Can you get some for me?"
- B- ii! Mi hodaani do "Well I don't live here."
- A- Min kay si a hodaani do, miin ina jarani mi arde. Minen do min ngoni do alaa ko woni do. "As far as I am concerned, even if you don't live here it is worth my coming to you. There is nothing where we live."

Fuuta Jaloo

- Ngaari mbeewa woo: O fenay. "The he-goat said: He is
Min ko ka damal do'o o tawimmi. telling lies. It is at
Mi nanii ngayuuri ko lamdo, this door that he met me.
min ko mi karamokoojo. Si mi I heard that you, lion, are
windaniima a buray baaba the king. I am a teacher.
gootoobe maa fow darja⁽²⁾. If I write for you, you
will be more prestigious
than any of your father's
children."

O dogi, kaŋko lando on; tawi ko "he, the king himself, ran
 kaŋko, e mbatulaabe dido wondi away; he was with two of
 his courtiers."

1. Non-concordant forms

5.5 It is well to note the following points on first and second
 person plural forms:

Arnott believes that "there is no particular grammatical
 reason for assigning these 'you and I forms' (ie the
 'en series) ⁽³⁾ to the first person rather than to
 the second person. On the contrary, in the language,
 the 'en series have more in common, grammatically,
 with the 'on series than with the min series, and
 it will be convenient on occasion to refer to the
 'en and the 'on series together as 2nd person plural
 forms. Consequently the 'en series are here
 referred to as "2nd person plural inclusive" (ie
 including the speaker), the 'on series as "2nd person
 plural, exclusive" (ie excluding the speaker)"⁽⁴⁾.

Although I can see Arnott's grammatical reasoning, I
 find it hard, as a native speaker of a Pulaar dialect,
 to accept enen or en for anything other than first
 person plural forms.

Along with the informants I have met so far and
 traditional grammars, I find it more natural to
 divide first and second person plural forms in the
 following manner:

(2) Sow, A.I., 1966, p.218 the translation is my own.

(3) the words in the preceding brackets are my own adding.

(4) Arnott, D.W., 1970, p.134

- (i) the en series have been treated as first person plural inclusive forms (ie including the people addressed)
- (ii) The first person plural exclusive counterpart is men (ie excluding the people addressed).
- (iii) The only second person plural form is the on series eg.

Fuuta Tooro

enen kam gese men moyyaani hikka "as for us our crops
were not good this
year"

ko min ngarta gaa ko tawi ko "When we were coming
minen fof ngondi here it was all of
us that were together."

Onon kam on njettii Alla e "You should thank God,
Nulaado mum, gese moyyi. your crops were good".

- 5.6. The forms of the third person singular and plural are the same as those of the neuter class 18 δm . Further investigations will be made on them in due course; for the time being I shall only provide examples illustrating the various uses of third person singular neuter forms (cf. 5.9 (iii)).

Fuuta Tooro

Julaabe bee ina njogii toon yimbe, kanyum'en woni golle mu'en ko nguyka sukaabe. Kanyum'en ngujjat tan sukaabe. Debbo oo ne ko yoyyo no feewi. Kanyum ne deyyi tan haa jamma, o dogi. "The traders had people over there, young people. They always kidnapped young people. The girl was very clever. She waited till nightfall and escaped".

2. Concordant forms

- 5.7. The basic principle in the formation of these forms is the same in both dialects. Concordant independent pronouns are obtained by combining concord suffixes with initial elements kay-/kan. Before illustrating the above statement, it is worth mentioning that where the nasal occurs, it is homorganic with the following consonants, e.g.

kan- +be kambe (class 2 be)
 kan- +ge kange (class 6 nge)
 kan- +go kango (class 7 ngo)
 kan- +ka kanka (class 13 ka)

kay- +re kayre (class 3 nde)
 kay- +ri kayri (class 4 ndi)
 kay- +ru kayru (class 5 ndu)

but also

kan+je kanje (class 19 de)
 kan+jan/-jam kanjan/kanjam (class 17 dan/dam)

- 5.8. The same form, *kaŋko*, is found for classes 1 o and 15 ko in both dialects; compare,

ko kaŋko noddumi "It is him that I called"
 ko kaŋko (huɗo koo) tayumi "It is the one (the grass)
 that I cut"

- 5.9. The variations between the two dialects could be summarised as follows:-

- (i) First and second person singular forms are marked by the alternance in the length of vowels.

Fuuta Jaloo has short vowels *i* and *a* in *min* and *an*; but the same vowels are long in Fuuta Tooro ie: *miin*, *aan*.

- (ii) The second variation is in terms of final nasal consonants. Where in Fuuta Jaloo there is a velar nasal, there is an alveolar in Fuuta Tooro. This phonological variation occurs with first, second and third person forms where a nasal is in final position; it is part of the general variation, whereby final nasals in Fuuta Jaloo are always velar, but in Fuuta Tooro some nasals are alveolar (-n) and some are bi-labial (-m), none velar.

- 1 sing. miŋ/miin
 2 sing. aŋ/aan
 1 plur. incl. eneŋ/enen
 1 plur. excl. meneŋ/menen

(iii) Some space will now be devoted to examples from the neuter form *ɗum*, or *ɗuŋ*, since not only does it contain the above mentioned variations but also there are such forms as *kanjum*, *kay* that seem to be peculiar to Futa Tooro only.

Futa Tooro

- | | |
|--|---|
| ko wafi giirngal ina wi'ee ina neeni ko <u>kay</u> adotoo huɗo fudde | "the reason why girngal grass is said to be good is that it grows before other types of grass." |
| A- Mbar won ko ndanyon e gese he? | A- "did you have good crops?" |
| B- <u>Kanjum</u> dey ko <i>ɗum</i> maw <i>ɗum</i> . No <i>ɗum</i> wai fof de <u>kanjum</u> samori gese waalo <i>ɗe</i> mbannoden <i>ɗe</i> | B- "Can't complain. Whatever the crops they are better than the ones we used to get from our riverside fields". |

(Two informants contrasting collective rice growing methods with traditional ones)

Lewru ka'e koode "the moon and stars"

(Both kay and ka are short forms of kanyum)

Nduungu hikka nguu kam ko
mawdum. Miin mi yi'ii
do kaawel doo, do gesa
Amarak do, kanjum e
dum wadi layanteeri.
Tabaari kalla, Kala ko
jabbanoo heen ina sebori.
So tawii Alla e Nelaado
muudum rokkii men jam, hokkii
men ndiyam, eden njaakora
heen yaakaar moyyo; Kanjum
ko dum furi heew hikka
e layanteeri, kanjum ina
wadi fof.

"Thank god for this year's
rains. At Kaawel village,
in Amarak's field, I saw
a lot of plants. Thank god,
everything that was sown
has grown. If God and his
messenger give us peace and
water we will be very
hopeful. There are a lot
more plants this year".

Fuuta Jaloo

Nyarke woo:

- ko hombo nii?

Ngaari mbeewa woo:

- ko miñ Alahajji mbeewa

- Alahajji mbeewa?

- Ii!

- e wonaa mbeewa ko woni
ga hodo kon?

- ko kanyun

- e wonaa mbeewa ko waalata
ka kula?

"the hyena said;

who is that?

the he-goat said:

- It is me Alahajji Goat

- Alahajji Goat?

- yes!

- Isn't it the goat found in
the village?

- yes, it is

- Isn't it the goat that spends
the *night* in the goat-pen?

- | | |
|--|---|
| - ko <u>kanyun</u> | - yes it is |
| - ko honto fewdaa? | - where are you going? |
| - Mido yaha hajju Makka ⁽⁵⁾ | - I am going on a pilgrimage in Mecca." |

B. Possessive pronouns

5.10. Possessive pronouns ^{are} ~~one~~ formed with may - plus the concord suffixes, giving,

| | | |
|-----------|--------|-------------------|
| may- +be | mabbe | (class 2 be) |
| may- +ge | magge | (class 6 nge) |
| may- +go | maggo | (class 7 ngo) |
| may- +gal | maggal | (class 10 ngal) |
| may- +ba | mabba | (class 12 ba/mba) |
| may- +re | mayre | (class 3 nde) |
| may- +ri | mayri | (class 4 ndi) |
| may- +jam | majjam | (class 17 dam) |
| may- +jum | majjum | (class 18 dum) |
| may- +je | majje | (class 19 de) |
| may- +ji | majji | (class 20 di) |

(The full list is given in Table 4 below)

| | |
|------------------------|----------------------------|
| galle mabbe | "their house" |
| hoore magge (nagge) | "its (cow's) head" |
| ndiyam maggo (maayo) | "its (ie. river) water" |
| gite maggal (gertogal) | "its (ie. chicken's) eyes" |
| koyngal mabba (mbabba) | "its (ie. donkey's) leg" |

(5) Sow, A.I., 1966, p.236

| | |
|-----------------------|---------------------------|
| dawol majjam (ndiyam) | "its (ie. water) way" |
| innde majji (na'i) | "their (ie. cow's) names" |
| " mayre (wojere) | "its (ie. hare's) name" |
| " mayri (ngaari) | "its (ie. bull's) name" |
| " mayru (fowru) | "its (ie. hyena's)name" |

5.11. On the other hand, just as in the case of independent pronouns, there is a single possessive form for both classes 1 o and 15 ko: makko; ... innde makko "its name" can consequently refer to either neddo "a person" or hudo "grass".

5.12. Further examples will now be quoted from my texts to illustrate the various uses of concordant possessive pronouns.

Fuuta Tooro

Lamdo oo jippii, omo wondi "The king came down, he was
e sakke makko, e maabo with his shoemaker, his
makko, e labbo makko, e weaver, his woodcutter and
bambaado makko. Be noddi his griot. They called
mawdo mabbe diine oo. their religious chief."

Wayri noon ko lasli "Since you are inquiring about
laamndidaa, kambe laamiibe origins, all those kings that
doo wurosoogi bee fof, ruled in Wurosoogi, their
lasli mabbe mo na laamoo, origin is Moolo Aali. In the
kambe laamiibe doo fof be past, before any of them ruled,
lamoyii ko Moolo Aali. he had to be crowned in Mooli
Aali"

Table 3. Possessive pronouns: Non-concordant forms

| Person | Fuuta Jaloo | Fuuta Tooro |
|----------|--------------------------------|---------------------------|
| Singular | | |
| 1 | aŋ | am |
| 2 | maada, ma'a, <u>maa</u> | maada, <u>maa</u> |
| 3 | muuduŋ/mu'uŋ/ <u>muŋ</u> | muudum/majjum/ <u>mum</u> |
| Plural | | |
| 1 incl | meeden/me'eŋ/ <u>meŋ</u> | meeden/men/ <u>meen</u> |
| 1 excl | amen | amen |
| 2 | moodoŋ/mo'oŋ/ <u>moŋ</u> | mooden/mon/ <u>moon</u> |
| 3 | muuduŋ'eŋ/mu'eŋ/ <u>muŋ'eŋ</u> | muudum'en/ <u>mum'en</u> |

(where there are alternative forms, the most commonly used is the one underlined).

Table 4. Possessive pronouns: Concordant forms

| Class name | Fuuta Jaloo | Fuuta Tooro |
|--------------|------------------|-------------------|
| Personal | | |
| 1 o | makko | makko |
| 2 be | mabbe | mabbe |
| Non-personal | | |
| 3 nde | mayre | mayre |
| 4 ndi | mayri | mayri |
| 5 ndu | mayru | mayru |
| 6 nge | magge | magge |
| 7 ngo | maggo | maggo |
| 8 ngu | maggu | maggu |
| IX ngii | maggii | Fuuta Jaloo only |
| 10 ngal | maggal | maggal |
| 11 ngol | maggol | maggol |
| 12 mba/ba | mabba | mabba |
| 13 ka | makka | makka |
| 14 ki | makki | makki |
| 15 ko | makko | makko |
| XVI kol | makkol | Fuuta Jaloo only |
| 17 dan/dam | majjan | majjan |
| 18 dun/dum | muudun/mu'un/mun | muudun/majjum/mum |
| 19 de | majje | majje |
| 20 di | majji | majji |
| 21 ngel | maggel | maggel |
| 22 kal | makkal | makkal |
| XXIII kun | makkun | Fuuta Jaloo only |
| 24 koy/kon | makkoy | makkon |
| Augmentative | | |
| 25 ngal | maggal | maggal |
| XXVI ngii | maggii | Fuuta Jaloo only |

5.14. In both Fuuta Jaloo and Fuuta Tooro, 1st person plural inclusive, 2nd and 3rd person singular and plural forms consist of the following elements:-

- a) initial elements maa-, mee-, moo-, muu- that could be analysed as a bi-labial nasal m preceding a long vowel.
- b) final elements -da, -deŋ/den , -doŋ/don, duŋ/dum, duŋ'en/du'en. All these forms have contracted counterparts in both dialects, as outlined in table 3, e.g.

Fuuta Jaloo/Fuuta Tooro

| | long forms | short forms |
|--------------|---------------|--------------------|
| 2 sing | maada | ma'a/maa |
| 1 plur- incl | meedeŋ/meeden | me'en/men/men/meen |
| 2 plur | moodoŋ/moodon | mo'oŋ/moŋ/mon/moon |
| 3 sing | munduŋ/muudum | mu'uŋ/muŋ/mum/muun |

Examples

baaba maada/baaba maa "your father"
 kaaw meedeŋ/meeden; kaaw me'en/men/men "our uncle"
 Nagge moodoŋ/moodon; Nagge mo'oŋ/moŋ/mon "your cow"
 Alla e Nelaado muuduŋ/muudum- Alla e Nelaado mu'uŋ/muŋ/mum
 "God and his Messenger"

Fuuta Tooro

.Wata faarndor na'i maa haa "Don't boast about your
 debbo maa boccito maa yaha cattle to the point of
 laawol mum losing your wife".

- .Maaro men koo fof moyyii hikka "All our rice was good this year"
- .Naannee banndiraabe moodon e ligey he "Provide jobs for your relatives"
- .Alaa ko buri ladde men welde "There is nothing as nice as our fields".
- . Itten haggilaaji men e ngaynaaka kaa bola. Matten haqqilaaji men e gannde jaarinooje sukaabe men yeeso "Don't let us put all our minds to cattle breeding only. Let us also think about the skills that will advance our children".

Examples of muudum/muudun

a) Fuuta Tooro

Soko tawii gooto e mon yaarata tan ko Alla e Nelaado muudum e fawndude hoore muudum, ma en peew.

"If each of you endeavours to go by the word of God and his Messenger, and to be honest, we can only go forward".

Neddo fow anndi ko ganndal mum. Goto fow e ganndal mum.

Each person is versed only in his own field of knowledge. Everybody has got his own field of knowledge".

b) Fuuta Jaloo

- .Bonooru nduṅ naati ka nder fammeere. Tawi no nibbiti nder ton. Gite mayru natti hentaade tuṅ ndu fonndi e ngayuuri no metta takkere muduṅ,wi'i: 'Neene mi yakkay teew bonooru' "The hyena entered the cave. It was dark in there. As soon as her eyes became clear. She saw a lion licking its paw. The little lion called its mother: 'Mummy, I'd like to eat some hyena meat.'
- .Mb maayii anndaa finnde mu'ud luttay e yiite "Whoever dies without belonging to any religion will be sent to Hell forever."
- .Ko hebudaa woo hebay wondiibe maada. "Whatever happens to you will happen to your neighbours".
- .Si gorol maa habii ma ko ka deyol maa huccirtaa. "If your father's line of descendants set themselves against you, it is your mother's descendants that you turn to."

5.15. Full forms tend to be found in formal speech or written material whereas contracted ones are generally used in ordinary day-to-day conversations, it should however be stressed that there are mere tendencies and not hard and fast rules in any way.

5.16. First person singular 'an/'am and plural exclusive
'amen/'amen have no contracted counterparts:

5.17. Examples illustrating the use of first person forms:

Fuuta Tooro

Mobo yewtida e musiddo am oo "I am talking to my relative"

Mode anndi dewgal amen
juuttaa "I know that our marriage
is not going to last long".

o wii be: "bannde amen so
ndurngu siltii en ndanyii do
yentuden". "He said to them, my dear
brothers when the rains are
over, we have somewhere to
go back to".

Fuuta Jaloo

Ko Allahu lamdo joomi amen
subii wadi Makka suudu amen
yo moyyube wanngo suudu amen (6) "It is God, our Lord, the
Supreme Master, that chose
Mecca and made it our place
of residence, for the best to
take a walk in our house".

be warii baaba an "they have killed my father"

ko a biddo an "you are my son"

(6) Sow, A.I., 1966, p.66

5.18. Coming back to the variations between the two dialects, it will be noted that among the short forms mentioned under 5.14 there is a Fuuta Jaloo series that tends to keep a glottal stop in its contracted form. The glottal stop is often absent in the same context in Fuuta Tooro: thus instead of the Fuuta Jaloo ma'a, me'en, mo'on, one tends to meet maa or ma, meen or men, moon or mon in Fuuta Tooro, e.g.

Fuuta Jaloo

No mantora Mākka Yimbe me'en
E fii rokkeede burdo me'en⁽⁷⁾

"Boasting about Mecca,
our people are, for
being given it by our Lord".

Ko non dey ko biɗɗo mo'on
Ko biɗɗo subaado burdo mo'on
Ko oo furi hay e mawbe mo'on
Mo danyunoo feere biɗɗo mu'un
wa oo 'iwataa e takko mu'un
wanaa fii wodditoo 'e mu'un
wa o'o gido towɗo aljanna⁽⁸⁾

"Of course he is your child,
He is your best child,
He is better than even your
ancestors"
"Anybody with a son like this
one will strive to keep him by
his side; he will not let this
friend of Paradise be far
from him".

5.19. It should be stressed, however, that these forms are hardly used in ordinary speech nowadays, even in Fuuta Jaloo.

(7) Sow, A.I., 1966, p.66

(8) Sow, A.I. 1966, p.71

5.20. On the other hand, there exists a form majjum (class 18 *dum*) that I have not encountered in Fuuta *Jaloo*.

Since class 18 *dun/dum* has the greatest number of alternative forms of all classes and because of its widespread usage it has been thought helpful to give further illustrations of this class⁽⁹⁾.

Fuuta Tooro

| | |
|---|--|
| Taki wi'eede nagge buri mbeewa buri mbaalu ko diwnat <u>biyum</u> diwna hoore <u>majjum</u> | "The reason why a cow is thought to be better than a goat or a sheep is because it saves its calf and itself". |
|---|--|

| | |
|--|--|
| Hammadi baleejo turii, o wutti Hammadi Bodeejo, oon maayi. O jaggi gawlo <u>mum</u> e bambaaɗo <u>mum</u> , o habbi be haa tiidi | "Hammadi Baleejo bent over, he blew over Hammadi Bodeejo the latter dies. He arrested the latter's griot, his bambaado, he tied them very tightly". |
|--|--|

| | |
|--------------------------------|---|
| Ne-ɗɗo yo yaa haaju <u>mum</u> | "Let everybody go about his own business". |
|--------------------------------|---|

(9) this class has been treated in great length by Arnott (cf. Arnott, D.W., 1970, Chapter 26)

C. Possessive suffixes

5.21. This refers to suffixes that combine with nouns, mostly to show relationship, or to indicate possession. Possessive suffixes seem to occur in Fuuta Tooro only, and are not encountered in Fuuta Jaloo, except in a very limited number of fixed phrases such as *joom-an* 'my owner, my master' (in reference to God).

Fuuta Tooro

| | |
|------------------|---------------------------|
| <i>baab-am</i> | 'my father' |
| <i>yumm-am</i> | 'my mother' |
| <i>maam-am</i> | 'my grand-father' |
| <i>kaaw-am</i> | 'my uncle' |
| | |
| <i>baab-e</i> | 'your father' |
| <i>mawn-e</i> | 'your big brother/sister' |
| <i>miny-e</i> | 'your younger brother' |
| <i>biy-e</i> | 'your son' |
| | |
| <i>baab-iiko</i> | 'his father' |
| <i>yumm-iiko</i> | 'his mother' |
| <i>maam-iiko</i> | 'his grand-father' |
| <i>kaaw-iiko</i> | 'his uncle' |

Examples in Context

| | |
|-----------------------------------|---------------------------|
| <i>Debbo kala mbo njiddaa fow</i> | 'If you love a woman and |
| <i>ina yidnaa res, biiddo fow</i> | she loves you, marry her. |

mo njibindina on ko
biy-e

Any child that comes out of
the marriage is yours"

saa naanii galle wonaa
gall-am miin tan-

"My house should not mean
a house for me alone"

seedeeji golle hakkund-am e
Hammadi, kuugal-am e makko

"Witnesses of my battle
against Hammadi, my namesake
and of my victory"

saa resii debbo ada hoddi
e yumm-um, yumma oo
feewaani, saa yattiima
dum tan, ummoo naatoaya
suudu yumm-um

"If you get married and
stay in the same house as
your mother-in-law; if
the latter is not lenient,
whenever you have an
argument with your wife, she
will run to her mother"

O wi'i rawaandu nduu
salminoy yumm-um Baaru.
Rawaandu nduu yehi haa
yottii, joodii e koyde
yumm-um Baaru. O wi'i
baamm-um Baaru; Rawaandu
nduu feyyi joodoyii e
koyde baammum Baaru

"He told the dog to go and
greet Baaru's mother. The
dog went all the way and
sat on Baaru's mother's
feet. He said: Baaru's
father ; the dog went and sat
on Baaru's father's feet"

Taki wi'eede nagge buri
mbeewa buri mbaalu ko
diwnat biy-um, diwna
hoore mum

"The reason why cows are said
to be better than goat is
that the former can protect
themselves and their calves
against the attacks of
hyenas".

5.22. Fuuta Jaloo uses ordinary possessive pronouns in all instances where possessive suffixes are encountered in Fuuta Tooro; thus the three sets of examples above become in Fuuta Jaloo.

| | | |
|-------|----|-------------------|
| baaba | an | "my father" |
| yumma | an | "my mother" |
| maama | an | "my grand-father" |
| kaaw | an | "my uncle" |

| | | |
|------------|-------|----------------------------------|
| baaba | maada | "your father" |
| mawniraawo | maada | "your big brother" |
| mioyiraawo | maada | "your little brother" |
| bii | maada | "your little son" (or biido maa) |

| | | |
|-------|-------|--------------------|
| baaba | makko | "his father" |
| yumma | makko | "his mother" |
| maama | makko | "his grand-father" |
| kaawu | makko | "his uncle" |

5.23. Of the formation ^{of} non-concordant possessive suffixes Arnott writes: "The 1st and 2nd person plural forms each have a first element -ii- combined with a suffix resembling the subject element. The 1st and 2nd person singular forms, and both 3rd person forms, on the other hand, are simple suffixes -am, -a, -um, -um'en, with no preceding -ii- elements".⁽¹⁰⁾

5.24. A full list of possessive suffixes in the Fuuta Tooro dialect is provided in Tables 5 and 6.

(10) Arnott, D.W. 1970, p. 141; please refer to Table 6 for illustrations

Table 5. Possessive suffixes in the Fuuta Tooro dialect:

Non-concordant forms

| Person | Possessive suffix |
|-------------|-------------------|
| 1 sing | -am |
| 2 sing | -e |
| 1 plur incl | |
| 1 plur excl | -iimen |
| 2 plur | -ii'on |
| 3 sing. | -um |
| 3 plur | -um'en |

Table 6. Possessive suffixes in the Fuuta Tooro: Concordant forms

| Class name | Possessive suffix |
|--------------|-------------------|
| Personal | |
| 1 o | -iiko |
| 2 be | -iibe |
| Non-personal | |
| 3 nde | -iire |
| 4 ndi | -iiri |
| 5 ndu | -iiru |
| 6 nge | -iige |
| 7 ngo | -iigo |
| 8 ngu | -iigu |
| 10 ngal | -iigal |
| 11 ngol | -iigol |
| 12 ba | -iiba |
| 13 ka | -iika |
| 14 ki | -iiki |
| 15 ko | -iiko |
| 17 dam | -iijam |
| 18 dum | -iijum |
| 19 de | -iije |
| 20 di | -iiji |
| 21 ngel | -iigel |
| 22 kal | -iijal |
| 24 kon | -iikon |
| 25 ngal | -iigal |

Table 7. Demonstrative pronouns in Fuuta Jaloo and Fuuta Tooro

| Class name | Fuuta Jaloo | | Fuuta Tooro | |
|--------------|-------------|-------|------------------|-------|
| | NEAR | FAR | NEAR | FAR |
| Personal | | | | |
| 1 o | o'o | oya | oo | oya |
| 2 be | be'e | beya | bee | beya |
| Non-personal | | | | |
| 3 nde | nde'e | ndeya | ndee | ndeya |
| 4 ndi | ndi'i | ndiya | ndii | ndiya |
| 5 ndu | ndu'u | nduya | nduu | nduya |
| 6 nge | nge'e | ngeya | ngee | ngeya |
| 7 ngo | ngo'o | ngoya | ngoo | ngoya |
| 8 ngu | ngu'u | nguya | nguu | nguya |
| IX ngii | ngi'ii | ngiya | Fuuta Jaloo only | |
| 10 ngal | nga'al | ngala | ngaal | ngala |
| 11 ngol | ngo'ol | ngola | ngool | ngola |
| 12 mba/ba | mba'a | mbaya | baa | baya |
| 13 ka | ka'a | kaya | kaa | kaya |
| 14 ki | ki'i | kiya | kii | kiya |
| 15 ko | ko'o | koya | koo | koya |
| XVI kol | ko'ol | kola | Fuuta Jaloo only | |
| 17 dan/dam | da'an | dama | daam | dama |
| 18 dun/dum | du'un | duma | duum | duma |
| 19 de | de'e | deya | dee | deya |
| 20 di | di'i | diya | dii | diya |
| Diminutive | | | | |
| 21 ngel | nge'el | ngela | ngeel | ngela |
| 22 kal | ka'al | kala | kaal | kala |
| XXIII kun | ku'un | kuma | Fuuta Jaloo only | |
| 24 koy/kon | ko'oy | koya | koon | koya |
| 25 ngal | nga'al | ngala | ngaal | ngala |
| XXI ngii | ngi'ii | ngiya | Fuuta Jaloo only | |

Specifiers

A. Demonstratives (cf. Table 7 for a complete list)

5.25. They are sub-divided into near and far demonstratives.

I. Near demonstratives

5.26. Near demonstratives are obtained in Fuuta Jaloo by inserting a vowel and a glottal stop after the initial consonant; the vowel being the same as that of the pronoun of reference; in Fuuta Tooro just the vowel, without the glottal stop, is inserted.

5.27. A few Fuuta Jaloo examples showing the use of near demonstratives;

Fii jaahu no hulbinii! Ngo'o
 juɲɲo almaami saadu tayaango,
 ko mi-seedee ngo'o winndu
 kaamilu jeedidi ko mi seede
ngo'o juɲɲo defaaki e
 suddiido janano. Ko fii
 laamu woni sabaabe makko.
 Allahu Lamdo yaltin laamu
 ga cuudi amey miɲ e makko. (11)

"Glory matters are
 dreadful! This amputated
 hand of Almami Saadu, I
 can (certify)
 (testify) that it
 has never used sand or
 stones for ablutions. I
 testify (certify) that it
 copied the Coran seven
 times and that it never
 touched other people's
 wives. It is because of
 power struggle that the
 Almaami was killed. May
 God, rid our two houses of
 power for ever."

(11) Sow; A.I., 1968, p. 42

(Power struggle between Alfaa Saalihi and Almaami Saadu. The latter has just been killed and the former mourns him).

| | |
|--------------------------------|-----------------------------|
| Almaami Ibraahiima Donol Feela | "Alhaami Ibraahiima Donol |
| hawtiti mawbe beṅ. Be wi'i be | Feela assembled the elders. |
| yi'aani (jihaadi ndin) e | The latter said that the |
| <u>nga'al</u> | expedition did not reveal |
| | itself to them this time". |

(Almaami Aamadu was about to start an islamic war. He asked for Almaami Ibraahiima's approval)

II. Far demonstratives

5.28. The formation of far demonstratives is the same in both dialects. If the class pronoun ends in a vowel, -ya is added, and if it ends in a consonant, -a is added, e.g.

| | |
|---------------|-------------------------------------|
| class 1 o | o-ya; oya debbo "that woman" |
| class 2 be | be-ya; beya rewbe "those women" |
| class 3 nde | nde-ya; ndeya horde "that calabash" |
| class 6 nge | nge-ya; ngeya nagge "that cow" |
| class 10 ngal | ngal-a; ngala leggal "that stick" |
| class 11 ngol | ngol-a; ngola laawol "that path" |
| class 21 ngel | ngel-a; ngela cukalel "that child" |

5.29. Apart from the above mentioned types of near and far demonstratives there are other different forms that are obtained in the following manner: Where the

concord element ends in a vowel, this vowel is lengthened, and doo "here", or daa "there", or too "over there" is added. Where the concord element ends in a consonant, the doo, daa, or too are added without further change, e.g.

(i) doo "here"

| | |
|--------------|--|
| class 1 o | oodoo "this one" |
| class 2 be | beedoo "these ones" |
| class 12 mba | mbaadoo "this one" (field, trousers etc.) |
| class 13 ka | kaadoo "this one" (hole etc.) |
| class 15 ki | kiiadoo "this one" (tree etc.) |

(ii) with daa "there"

| | |
|---------------|--------------------------------|
| class 15 ko | koodaa (hudo) "that grass" |
| class 19 de | deedaa (boje) "those hares" |
| class 20 di | diidaa (laabi) "those paths" |
| class 21 ngel | ngeldaa (cukalel) "that child" |
| class 22 kal | kaldaa (leykal) "that ground" |

(iii) with too "over there"

| | |
|---------------|-------------------------------|
| class 3 nde | ndeetoo (wojere) "that hare" |
| class 4 ndi | ndiitoo (ngaari) "that bull" |
| class 5 ndu | nduutoo (suudu) "that hut" |
| class 10 ngal | ngaltoo (leggal) "that stick" |
| class 11 ngol | ngoltoo (laawol) "that path" |

Miin e naannotoodo ngaldoo
naamnal ko min soowanaabe.
Ko dumdoo dey woni beedoo
be tawdaa doo.

"Both myself and the
man asking these ques-
tions belong to the Sow
Family. These are the
people you found here".

Jooni noon e ooodoo jamaanu
mo ngonden, keddii ko rawbe.

"There are only women
left in today's world"

Debbo deftoowo law noon
deftata ko ndiidoo yehii,
ndiidoo araani, defa doon
bottaari; bottaari lommbiindi
hakkunde muudum e bottaari ndi;
duum min mbi'ata dum ko puukri

"A woman who is an effi-
cient cook is a woman who
cooks after this meal is
eaten and before the next
has been prepared. She
cooks in-between meals.
A meal that is between break-
fast and lunch; that is
what we call Puukri."

- 5.32. In stories and tales, both types of near and far demon-
stratives are used, as indicated by the sentences below:

Wonnoo doo ko worbe dido.
Be poodoondiri; bee mbi'i ko
boggol, bee mbi'iko tekkere,
bee mbi'i alaa ko njoobaari
mabbe. Jooni noon oya
jaggi, oya wii ko kanyum
jeyi noon; Oya hebbitii
wi'i accu kaakam, oya
wi'i mi accaani. Oya wi'i

"Once upon a time, there
were two men. They had
a disagreement; some
people say (the disagreement)
was about a rope, others
say it was about a rag, others
say it was about the food
they took with them. Now,
one of the two men took

miin jeyi, oya wi'i a
 jeyaa; oya wi'i dal, oya
 wi'i mi dalaani

hold of it, the other
 said it was his; one
 said: leave it alone
 it is mine, the other
 replied: No I shan't
 leave it; One said:
 Give it back to me, the
 other replied no; one
 said: It is mine, the other
 replied: It is not yours;
 one said: Let go, the
 other said no".

(As will be noted, the two sets of forms used here are
 bee---bee, oya---oya instead of bee---beya, oo--- oya).

Soo nelaama, o wi'aama addu
duma, omo ummo o adda; Kono
 noon o haalataa

"He is told; Bring that
 object. He would get
 up and bring it but he
 wouldn't talk".

5.33. Referentials and definitives will be dealt with together
 for convenience. The following tentative definitions
 will however show the difference between these two types
 of pronouns.

5.34. Though both referentials and definitives refer to "the one
 in question" "the one mentioned earlier", there is a
 semantic difference between the two.

Referentials and definitives

Table 8. List of referentials and definitives in the two dialects.

| Class name | Fuuta Jaloo Referentials and definitives | Fuuta Tooro | |
|--------------|---|------------------|------------------|
| | | Referentials | Definitives |
| Personal | | | |
| 1 o | oŋ | oon | oo |
| 2 be | beŋ | been | bee |
| Non-personal | | | |
| 3 nde | ndeŋ | ndeen | ndee |
| 4 ndi | ndiŋ | ndiin | ndii |
| 5 ndu | nduŋ | nduum | nduu |
| 6 nge | ngeŋ | ngeen | ngee |
| 7 ngo | ngoŋ | ngoon | ngoo |
| 8 ngu | nguŋ | nguum | nguu |
| IX ngii | ngiŋ | Fuuta Jaloo only | Fuuta Jaloo only |
| 10 ngal | ngal | ngaal | ngaal |
| 11 ngol | ngol | ngool | ngool |
| 12 mba/ba | mbaŋ | baan | baa |
| 13 ka | kaŋ | kaan | kaa |
| 14 ki | kiŋ | kiin | kii |
| 15 ko | koŋ | koon | koo |
| XVI kol | kol | Fuuta Jaloo only | Fuuta Jaloo only |
| 17 dan/dam | dan | daam | daam |
| 18 duŋ/dum | duŋ | duum | duum |
| 19 de | deŋ | deen | dee |
| 20 di | diŋ | diin | dii |
| Diminutive | | | |
| 21 ngel | ngel | ngeel | ngeel |
| 22 kal | kal | kaal | kaal |
| XXIII kuŋ | kuŋ | Fuuta Jaloo only | Fuuta Jaloo only |
| 24 koy/kon | koy | koon | koo |
| Augmentative | | | |
| 25 ngal | ngal | ngaal | ngaal |
| XXVI ngii | ngiŋ | Fuuta Jaloo only | Fuuta Jaloo only |

- 5.35. Definitives will correspond more closely to the definite article in such languages as English or French whereas referentials tend to be closer to the English demonstrative "that one". This difference will be emphasised by the position of the pronoun. Definitives follow the noun and referentials precede the noun. They are adjectival in these circumstances. Referentials are also pronominalised but definitives are not; (the class pronoun would be used instead). The following are examples of definitives and referentials in the two dialects.

Referentials

Fuuta Tooro

- | | |
|---|---|
| <p>Min ngaawat gawri bi'eteendi Mayram Sawdatu. <u>Ndiin</u> iwri amen ko funnaange</p> | <p>"We also sow a millet called Mayram Sawdatu. It was brought to us from the East".</p> |
| <p>Mbi'aa ko miin wii noon, miin Malal Cekel, mbo no firta e ko kaalmi koo, yo <u>oon</u> jibine nji'aa dum</p> | <p>"Say that <u>I</u> said so, I, Malal Cekel, whoever disagrees with what I said, let that person be born and you see him" (in other words the person that will disagree with what Malal Cekel said is not born yet)</p> |
| <p>So Pullo dadiima, feewii e na'i ina bira ina yarna</p> | <p>"If a <i>Pullo</i> gets ready, goes and milks his cows, gives the</p> |

hoŋbe, ina okka miskineebe,
oon woni Pullo.

milk to visitors and
 poor people, that is a
 Pullo".

Fuuta Jaloo

Maama Bano jibini biŋbe muŋ ka
 Dalen. On jibini Cerno Saadu
 mo Maama Bano...

"Maama Bano had his children
 in Dalen. He begot (Maama
 Bano's) Cerno Saadu".

Cerno Jaafaaru mo Cerno Saadu,
On jibini Miseen Abdur-Rahmaani
 oo ministir Kooperatif wondo
 Konaakiri do ⁽¹²⁾

"Cerno Saadu's Cerno Jaafaaru,
 he begot Mister Abdur-Rahmaani,
 the Minister of Cooperation in
 Conakry".

Fellindiraa Talansan. Allaahu
 okki Fulbe ben poolal. Ko
nden haure wonoyi fuddunde
 jihaadi ndin e Fuuta Jaloo.
 Fuddu-be ndin jihaadi ko
 be sappoo e dido ⁽¹³⁾

"There was a battle in Talansan.
 God gave victory to the
 Fulbe . That was the
 beginning of islamic wars
 in Fuuta Jaloon. Twelve
 people started that war".

Ndin in the last two sentences is typical of the way
 in which Fuuta Jaloo manages to render the ideas of
 definite and referential. As a matter of fact, although
 used with the same word jihaadi "Islamic war", ndin plays
 the role of a definitive in jihaadi ndin and a referential
 in ndin jihaadi, in other words "the war" as opposed to
 "that war".

(12) Sow, A.I., 1968, p.86

(13) Ibid, p.86

Examples of Definitives

Fuuta Tooro

Min kiwa colli haa maaro koo
daroo, min mbada ndiyam e
leydi hee. Maaro fudko koo
fudda e ngesa hee, mbedemin
cubtoo hudo koo haa maaro
koo dany lewru. So min
ummiima e oon palaas, min
ngona e liggo gese de. Min
ngarita ndiyam dam, min ponnda
ndiyam dam. So maaro koo
benndii, ko laamu nguu jeyi
koo yetta, ko min njeyi koo
artira e juude amen.

"We scare the birds away
until when the rice grows.
We water the field. The
rice that has grown does so with
some weeds. We get into the
field and pull the weeds out
until the rice is a month old.
After that, we go on working in
the field again. We then stop
the water, and measure it
(the water). When the rice is
ripe, the authorities take their
part and hand us back ours".

(Description of rice growing processes in Fuuta Tooro).

Waddiibe bamdi ina ummii Jolof
to wi'etee yan yan. Been
waddiibe ngari haa tawi debbo
oo.

"Donkey riders came from Jolof,
from Yan-Yan village. Those
riders came up to the woman."

5.36. The variations between the two dialects as far as
referentials and definitives are concerned, could be
summarised in the following manner:

- (i) Difference in the final nasal. It has already
been dealt with in the course of this study
(see 5.9 (ii) and 5.13)

- (ii) Presence in Fuuta Tooro of separate definitive forms.
- (iii) Fuuta Jaloo does not have separate definitive forms but uses the same forms to express referential and definitive ideas.

C Interrogatives (see Table 9 for complete list)

- 5.37. Interrogatives are the same in two dialects. They functions as adjectives or pronouns.

Fuuta Jaloo

| | |
|------------------------------|---|
| (ko) <u>hombo</u> ari han̄ki | "who came yesterday?" (class 1 o) |
| (ko) <u>hombe</u> nii | "who are these (people)?" (class 2 be) |
| (ko) nagge hon̄nge tayyi | "Which cow broke it's rope?" (class 6 n̄ge) |
| (ko) hon̄ngu yiidaa | "which one did you see?" (class 8 n̄gu) |
| (ko) hon̄ngal joggi han̄ki | "which one crowed yesterday?" (class 10 n̄gal) |
| (ko) hom̄mba burani maa | "which one do you prefer?" (class 12 mba) |

- 5.38. There is a difference in the formation of interrogatives in the two dialects. Fuuta Jaloo prefixes the grade D suffix forms by hon- and Fuuta Tooro by ho-; the n in hon- represent a nasal consonant homorganic with the initial consonant of the suffix.

Fuuta Tooro

| | |
|-------------------------------------|------------------------------|
| Almaami Fuuta wadi pucci | "The king of Fuuta asked |
| neli koolaado mum yoo yaa | his messenger to go by |
| haa yi'a Samba Nguma, haa | horse and see Samba Nguma, |
| o annda <u>hombo</u> woni oo gorko, | find out who that man |
| arta haalan dum; <u>hombo</u> woni | is, come back and tell him. |
| oo nyaagotoodo no taccude | Who is the man who is asking |
| lesdi muudum, ina abboo | for permission to cross his |
| sayku Umar, bi'eteedo | (i.e. the king's) country in |
| Samba Nguma | order to follow Sayko Umaar, |
| | a man called Samba Nguma". |

| | |
|---------------------------|-------------------------------|
| Hol gorko gardo to lekkol | "Which man came to the school |
| too hanke? | yesterday?" (class 1 o) |

| | |
|------------------|----------------------------|
| Hol huɗo kesɗaa? | "Which grass did you cut?" |
| | (class 1 ko) |

| | |
|--------------------|-----------------------|
| Hol nagge njeyɗaa? | "Which cow is yours?" |
|--------------------|-----------------------|

| | |
|-----------------------|-------------------------------|
| Hol rawaandu dogannoo | "Which dog was running in the |
| e mbedda hee? | street?" (class ndu) |

Table 9. List of interrogative pronouns

| Class Name | Fuuta Jaloo | Fuuta Tooro |
|--------------|-------------|------------------|
| Personal | | |
| 1 o | hombo | hombo |
| be | hombe | hobe |
| Non-personal | | |
| nde | honnde | honde |
| ndi | honndi | hondi |
| ndu | honndu | hondu |
| nge | honnge | hongge |
| ngo | honngo | honggo |
| ngu | honngu | hongu |
| IX ngii | honngii | Fuuta Jaloo only |
| 10 ngal | honngal | hongal |
| 11 ngol | honngol | hongol |
| 12 mba/ba | hommba | hoba |
| 13 ka | honka | hoka |
| 14 ki | honki | hoki |
| 15 ko | honko | hoko |

| Augmentative | | |
| 25 ngal | honngal | hongal |
| XXVI ngii | honkoy | Fuuta Jaloo only |

Conclusion

In general this chapter has shown that while there are certain differences in detail between the nominal systems of the two dialects the similarities are considerable. There is indeed a marked tendency of uniformity of behaviour in the nominal class systems of both Fuuta Tooro and Fuuta Jaloo.

PART III: VERBAL SYSTEM

Chapter 6. Introductory survey of the verbal piece
in the two dialects

- 6.1. The morphological complexity of Pulaar/Fulfulde has sometimes led to a certain amount of confusion in the description of the verbal system. Differences between linguists can be noted over the treatment of the tense system, the content of individual tenses etc. Limitations of space make it impossible to provide a fuller review of such issues in this thesis.
- 6.2. I have spoken of "verbal piece" in order to include consideration of the subject pronoun, the verb word, the object pronoun as well as the past anterior affix, as they vary for example from tense to tense. This chapter is just an introductory survey and the terms and categories are dealt with in detail in subsequent chapters. The material examined requires the formal recognition of the following categories:

Category I: Mood

- (i) Indicative; (ii) Subjunctive; (iii) Imperative

Category II: Tense

A) Tenses of the indicative mood

- (i) General Past; (ii) Emphatic Past; (iii) General Future; (iv) Vague Future; (v) Continuous; (vi) Stative; (vii) Negative Past; (viii) Negative Future/habitual; (ix) Emphatic Negative; (x) Relative Past; (xi) Relative Future.

B) Tenses of the subjunctive mood

(i) Primary Tense; (ii) Secondary Tense.

Category III: FormForms of the imperative mood

(i) General Form; (ii) Polite Form; (iii) Iterative Form.

Category IV: Polarity

(i) Positive; (ii) Negative.

Category V: Voice

(i) Active; (ii) Middle; (iii) Passive.

Category VI: Number

(i) Singular; (ii) Plural.

Category VII: Person (Related to Number)

(i) First person singular; (ii) Second person singular;
 (iii) Third person singular; (iv) First persons plural
 inclusive and exclusive; (v) Second person plural;
 (vi) Third person plural; (vii) Impersonal forms.

Category VIII: Past anterior affixCategory IX: Transitivity

(i) Transitive; (ii) Intransitive

Category X: Derivative infixes

(i) Modal and comparative (-ir-/-or-); (ii) Associative and comprehensive (-id-/-od-); (iii) Reciprocal (-indir-/-ondir-); (iv) Dative (-an-); (v) Reversive, reflexive, repetitive, retaliative, intensive etc. (-it-); (vi) Distantive (-oy-); (vii) Causative (-in-); (viii) Others.

Category XI: Verbo-nominals

(i) Infinitive; (ii) Past Participle; (iii) Future Participle.

Category I: Mood

6.3. The material examined points to the existence of three moods, indicative, subjunctive and imperative. Such moods will be illustrated under their relevant tenses and forms outlined below.

Category II: Tense

6.4. There is a difference in the interpretation of the term tense in the Pulaar/Fulfulde language from what occurs in many European languages; this term has traditionally implied an idea of time, past, present, or future; it allows one to determine clearly the precise moment when an action is performed; by way of opposition, Pulaar/Fulfulde is less concerned

by the time of performance of an action, it is more concerned about the process of the latter; The tense system could be sub-divided into two major categories, for this purpose: Tenses for actions that have been performed and tenses for actions that remain to be performed, as rightly pointed out by Labouret: "L'European et le Peul ont en matière de conjugaison des idées qui ne concordent pas; Le premier s'attache en effet à déterminer avec exactitude le moment précis où l'action s'accomplit, où l'état est acquis; Son verbe est donc conçu et employé surtout pour exprimer le temps. Le second n'éprouve pas cette préoccupation, en revanche, il cherche à décrire avec soin la façon dont l'acte est réalisé, dont la manière d'être est obtenue. En conséquence son verbe s'attache à détailler ce que les grammairiens nomment le procès"⁽¹⁾

It should therefore be emphasized that individual tenses used here should be viewed in this context, even though they bear traditional names such as General Past, General Future etc.

- 6.5. Individual tenses of Pulaar/Fulfulde are distinguished mainly by the tense suffix. There will be separate suffixes for the majority of tenses listed under Category II.
- 6.6. There are, however, other features that intervene in the differentiation of individual tenses, as mentioned

by Arnott: "Although in many cases the suffix is itself sufficient to differentiate one tense from another, nevertheless a full description of the characteristics of any tense is impossible without reference to other features. These other features include not only the shape of the subject pronouns, but also the arrangement of the elements, the place of the verbal form in the intonation pattern of the sentence....." (2)

The following illustrations of the features mentioned above will be supplemented by further examples of individual tenses, the complete list of which has already been made under category II (cf. category II)

In the first set of examples,

| | | | | | | | |
|-----------------------|-----|-------------|----|-----|---------|---|-----|
| subject pronouns | are | represented | by | the | numeral | 1 | (3) |
| verbal radicals | " | " | " | " | " | " | 2 |
| tense suffixes | " | " | " | " | " | " | 3 |
| object pronouns | " | " | " | " | " | " | 4 |
| past anterior affixes | " | " | " | " | " | " | 5 |

1 2 3 2 3 1 2 3 2 3

Mo hul-ii maay-ay, mo suus-ii maay-ay

"The brave will die, the coward will die" (lit. he who is afraid will die, he who is brave will die)

(1) Labouret, H, 1952, p.55

(2) Arnott, D.W., in Journal of West African languages, no 1, 1965, p.5

(3) cf. categories VII and VIII for further details on subject and object pronouns and the past anterior affix.

1 2 3 4
Mido loot-i be "I have washed them"

1 2 3 5
O loot-i-no "He had had a wash"

- 6.7. It is interesting to note that some of the morphological differences within the tense system are carried by intonation and final glottality. The syllable with the highest pitch is the one that is underlined in the examples below.

Glottality occurs with the final short i vowel as in the middle voice emphatic past o faggi and in the active voice, relative past intransitive as in o ari "he came", but only when these items are pausal. The glottal stop will disappear as soon as another item follows the tense suffix. This is the reason why it is absent in ko o faggi haŋki "he did feed himself yesterday" or in o ari haŋki "he came yesterday" where the verb is no longer pausal (cf. Chapter 1, Section E)

1) Active Voice

| | | |
|------------------|------------------------|---|
| General Past: | o <u>fagg-ii</u> ndu | "he has fed it" |
| General Future: | o <u>fagg-ay</u> ndu | "he will feed it" |
| Relative Past: | o <u>fagg-i</u> ndu | "he fed it" |
| Emphatic Past: | o <u>fagg-u</u> ndu | "he <u>fed</u> it" |
| Negative Past: | o <u>fagg-aali</u> ndu | "he has not fed it/ did not feed it" |
| Negative Future: | o <u>fagg-ataa</u> ndu | "he will not feed it" |

2) Middle Voice

| | | |
|------------------|-----------------------|---|
| General Past: | o fagg- <u>ike</u> | "he has fed himself" |
| General Future: | o fagg-oto | "he will feed himself" |
| Relative Past: | o fagg-ii | "he fed himself" |
| Emphatic Past: | o fagg-i | "he fed himself" |
| Negative Past: | o fagg- <u>aaki</u> | "he has not fed himself/ did not feed himself" |
| Negative Future: | o fagg- <u>ataako</u> | "he will not feed himself" |

3) Passive Voice

| | | |
|------------------|-----------------------|---------------------------------------|
| General Past: | o fagg- <u>aama</u> | "he has been fed" |
| General Future: | o fagg-ete | "he will be fed" |
| Relative Past: | o fagg-aa | "he was fed" |
| Emphatic Past: | o fagg-a | "he was <u>fed</u> " |
| Negative Past: | o fagg- <u>aaka</u> | "he was not been fed/ was not fed" |
| Negative Future: | o fagg- <u>ataake</u> | "he will not be fed" |

6.8. It is useful to point out that the place of the high pitch syllable is retained for the same tense in all three of the voices; for the General past and the Negative past, the high pitch is on the syllable following the stem e.g.

- o faggii
- o faggike
- o faggaama

For the General Future, the Relative Past and the Emphatic

past the high pitch is on the first syllable of the verb, i.e. fag-, whereas it is on the -taa- suffix for the Negative Future. On the other hand, the high pitch syllable usually has the greatest prominence to the ear, and it may be considered as the "stressed" syllable. The subject of final glottality has already been mentioned in Chapter 1 on phonology.

6.9. Following Arnott's description of the verbal system in the Pulaar/Fulfulde language ⁽⁴⁾, the tenses of the indicative mood have been grammatically classified into general and relative groups, as outlined below.

(i) General tenses

General Past
 Emphatic Past
 General Future/habitual
 Vague Future
 Negative Past
 Negative Future/habitual
 Emphatic Negative
 Stative
 Continuous

(ii) Relative tenses

Relative Past
 Relative Future

(4) cf. Arnott, D.W., 1970, p.181, § 29.5-6

- 6.10. Details about the above classification are provided in Chapters 7 and 8. For the moment it is sufficient to say that the difference between the two groups is mainly grammatical and not semantic.
- 6.11. The tenses of the subjunctive mood have been subdivided into primary and secondary tenses; the reasons for this sub-division are provided in Chapter 8, together with a detailed analysis of the two tenses of the mood.

Category III: Form

- 6.12. This category is limited to the imperative mood of the verb and the differences correlate for instance with degrees of politeness. I have not therefore found it possible to deal with the differences as related to tense. This is set out in Chapter 8.

Category IV: Polarity

- 6.13. This category has been set up to handle such differences as lootii "has washed"/lootaali "has not washed". It comprises two terms, positive and negative which can be applied to the tense system. A full list of positive and negative tenses of the verbal system of the two dialects is provided below. It is followed by further illustration of polarity in singular and plural forms.

A. Positive tenses and forms

(i) tenses of the indicative mood

General Past
Emphatic Past
Relative Past
General Future/habitual
Vague Future
Relative Future/habitual
Stative
Continuous

(ii) tenses of the subjunctive mood

Primary tense
Secondary tense

(iii) forms of the imperative

General form
Polite form
Iterative form

B. Negative tenses

Negative Past
Negative Future/habitual
Emphatic Negative

Examples of polarity

(i) Positive

- o lootii horde nden "he has washed the calabash"
- o looti horde nden "he washed the calabash"
- o lootay horde nden "he will wash the calabash"
- lootu horde nden "wash the calabash"

(ii) Corresponding negative

- o lootaali horde nden "he has not washed the calabash"
- o lootaali horde nden "he did not wash the calabash"
- o lootataa horde nden "he will not wash the calabash"
- wata lootu horde "don't wash the calabash"
- nden

NB The above examples have been taken from Fuuta Jaloo but illustrations of this usage are also found in Fuuta Tooro. Variations in the negative forms of the two dialects will be dealt with separately under negative tenses (cf. Chapter 7)

=

Category V: Voice

6.14. Some verbs in Fuuta Jaloo and in Fuuta Tooro have a set of three infinitives with endings (i) -ude, (ii) -aade, (iii) -eede which are analysed here under the category of voice; other verbs have one or two infinitives and from a syntactical point of view, verbal radicals can be sub-divided into three major *classes* on the basis of their voice-potential:

(i) One-voice radicals

(ii) Two-voice radicals

(iii) Three-voice radicals

(cf. Tables 1, 2 and 3 for illustrations)

6.15. It is well to point out that differences of forms treated under voice include not only infinitives as given here but also finite tense forms and participles.

Table 1. One-voice radicals

| ACTIVE ONLY | |
|-------------------------|----------|
| INFINITIVE | MEANING |
| mawn-ude ⁽⁵⁾ | grow up |
| rawn-ude | be white |
| Juut-ude | be tall |
| yoor-ude | dry up |
| beeb-ude | dry up |
| faaf-ude | be tight |
| huny-ude | frown |
| tedd-ude | be heavy |
| weeb-ude | be cheap |

Examples of their use:

o faalaaka mawn-ude "he does not want to grow up"

" juut-ude "he does not want to be tall"

" huny-ude "he does not want to frown"

(5) A hyphen has been used to highlight the suffixes of the various voices;

| MIDDLE ONLY | |
|----------------------------|-----------------|
| INFINITIVE | MEANING |
| yeyyit-aade ⁽⁵⁾ | look back |
| welt-aade | be cheerful |
| du'-aade | pray |
| sal-aade | refuse |
| awl-aade | use as a pillow |

Examples:

o waawata yeyyit-aade "he cannot look back"
 " du'-aade "he cannot pray"
 " sal-aade "he cannot refuse"

| PASSIVE ONLY | |
|--------------------------|-----------------|
| INFINITIVE | MEANING |
| faal-eede ⁽⁵⁾ | want, feel like |
| mal-eede | be blessed |
| haang-eede | become crazy |

Examples:

Ko kanko buri faal-eede dun/dum "he is the one who
 wants it more"
 (lit. he is the one
 who exceeds in wanting it)
 " mal-eede "he is the one who is more
 blessed"
 " haang-eede "he is the one who is crazier"

Table 2. Two-voice radicalsACTIVE-MIDDLE

| ACTIVE | MEANING | MIDDLE | MEANING |
|----------|--------------------|-----------|-----------|
| wodf-ude | be distant | wodf-aade | move away |
| waal-ude | spend the night | waal-aade | lie down |

Examples:(i) Active voice

Ko Maataam buriPodoor wodf-ude

"Maataam is further than Podor" (lit. Maataam exceeds Podoor in being distant)

O Sali waal-ude ton/toon

"he refused to spend the night there"

(ii) Middle voice

Noddu mo doo e o wodf-aade "Call him before he moves away"

O Sali waal-aade ka dow mbaldi "He refused to lie down
on the bed"

ACTIVE-PASSIVE

| ACTIVE | MEANING | PASSIVE ⁽⁶⁾ | MEANING |
|----------|---------|------------------------|-------------------|
| to6-ude | rain | to6-eede | be washed by rain |
| naat-ude | enter | naat-eede | be entered |

ACTIVE-PASSIVE table continued

| | | | |
|----------|------------------|-----------|--------------|
| heew-ude | fill up, be full | heew-eede | be filled up |
| dog-ude | run | dog-eede | be run |
| aaw-ude | sow | aaw-eede | be sown |
| bur-ude | beat, exceed | bur-eede | be exceeded |
| yah-ude | go, visit | yah-eede | be visited |
| sopp-ude | cut | sopp-eede | be cut |

Examples:

ndiyan wayrii toḅ-ude do'o "It is a long time since
it has rained here"

... naat-ude e nder suudu "... to enter a hut"

... aaw-ude ngawri "... to sow guinea-corn"

... sopp-ude ledde "... to cut wood"

(iii) Passive

Maataam wayrii toḅ-eede "It has not rained in Maataam
for a long time" (lit. Maataam
was a long time since it was
washed by the rain)

ngesa mban gaynaama
aaw-eede "All the grains have been sown"
(lit. the field has been
finished in being sown)

| | |
|---|---|
| Nde'e saare waawetaake <u>yah-eede</u> | 'No one can go to this town' (lit. this town cannot be visited) |
| Luumo ngon fuddaama <u>ar-eede</u> | 'People have started coming to the market' (lit. the market has started to be come) |

MIDDLE-PASSIVE

| MIDDLE | MEANING | PASSIVE | MEANING |
|-------------|------------------------|-------------|----------------------------|
| Ligg-aade | work | Ligg-eede | be worked |
| ad-aade | precede | ad-eede | be preceded |
| bad-aade | be near | bad-eede | be approached |
| soyn-aade | see in the distance | soyn-eede | be seen in the distance |
| wadd-aade | mount | wadd-eede | be mounted |
| memmb-aade | search | memmb-eede | be searched |
| jood-aade | sit | jood-eede | be sat |
| laam-aade | rule | laam-eede | be ruled |
| toppit-aade | look after | toppit-eede | be looked after |
| hirt-aade | have supper | hirt-eede | have supper |
| seed-aade | witness | seed-eede | be witnessed |

(6) This is a use of the passive which is unusual in many European languages. Gaden was struck by it, and he wrote: "Les verbes aller et pleuvoir, sont en foul des verbes actifs, mais s'emploient également au passif comme si une action était exercée sur le lieu où l'on va et sur celui où il pleut.

Podor, jaar-ete koyde "Podor est allé à pied" C'est à dire "on va à pied à Podor" ... Ces exemples montrent que les verbes français Correspondants ne sont pas toujours les équivalents exacts des verbes fous" (Gaden, H, 1913, p.54)

Examples(i) Middle voice

| | |
|-----------------------|-------------------------------|
| ... Ligg-aade e ngesa | "...to work in a field" |
| ... bad-aade saare | "...to get near to a village" |
| ... wadd-aade puccu | "...to mount a horse" |

(ii) Passive voice

| | |
|--|---|
| ngun puccu gasataa <u>wadd-eede</u> | "this horse cannot be mounted" |
| Maa ngesa gasataa <u>Ligg-eede</u> | "No one should work in this field" (lit. this field cannot be worked) |
| O arti ado <u>hirt-eede</u> | "he came back before supper-time" (lit. He came back before supper-was-had) |

Table 3. Three-voice radicalsACTIVE- MIDDLE- PASSIVE

| ACTIVE | MEANING | MIDDLE | MEANING | PASSIVE | MEANING |
|----------|---------------------|-----------|--------------|-----------|---------------|
| rutt-ude | take back | rutt-aade | go back | rutt-eede | be taken back |
| saak-ude | disperse | saak-aade | disperse | saak-eede | be dispersed |
| fagg-ude | feed | fagg-aade | feed oneself | fagg-eede | be fed |
| hocc-ude | collect, pick up | hocc-aade | jump | hocc-eede | be collected |

to be continued....

ACTIVE- MIDDLE-PASSIVE Table continued

| | | | | | |
|----------|----------|-----------|---------------------------|-----------|------------------------------|
| hipp-ude | invert | hipp-aade | wear on the head (hat) | hipp-eede | be worn on the head (hat) |
| wayl-ude | change | wayl-aade | change oneself | wayl-eede | be changed |
| lanc-ude | disperse | lanc-aade | disperse | lanc-eede | be dispersed |
| sokk-ude | squeeze | sokk-aade | squeeze oneself | sokk-eede | be squeezed |
| bet-ude | measure | bet-aade | measure onself | bet-eede | be measured |
| loot-ude | wash | loot-aade | have a wash | loot-eede | be washed |

Examples(i) Active voice

o suusataa rutt-ude de "He will not dare to take them
back"

o suusataa saak-ude de "he will not dare to disperse
them"

o suusataa fagg-ude de "he will not dare to feed them"

(ii) Middle voice

Be jabaali rutt-aade "they have refused to go back"

Be jabaali saak-aade "they have refused to disperse"

Be jabaali fagg-aade "they have refused to feed themselves"

(iii) Passive voice

Be ronketaake rutt-eede "It is not impossible to take them back"

Be ronketaake saak-eede "It is not impossible to disperse them"

Be ronketaake fagg-eede "It is not impossible to feed them"

Be ronketaake loot-eede "It is not impossible to wash them"

(lit. they will not be failed to be taken back,
dispersed etc.)

6.16. The functions of the three voices have been defined as follows:

- The Active voice indicates an action performed by the subject or a "quality" (e.g. to grow up, to be tall, to be white etc.)
- The middle voice refers to neutral or reflexive actions.
- The passive voice indicates that the subject is the goal of the action.

Category VI: Number

6.17. This category is concerned with number in the verbal piece. The important point is that the Pulaar/Fulfulde language is characterised by a system of initial consonant alternation in nouns and verbs. This alternation feature has already been treated in chapter 1. For the present purpose it will be sufficient to provide some illustrations of such alternations. The following examples have been taken out of a questionnaire devised by the author, for field work in Fuuta Tooro.

| Singular | Plural | Meaning | Alternating Consonants |
|----------|----------|-------------|------------------------|
| o dogi | be ndogi | he/they ran | d/nd |
| o asi | be ngasi | " " dug | '/ng |
| o ari | be ngari | " " came | '/ng |
| o yi'i | be nji'i | " " saw | y/nj |

to be continued...

| | | | | |
|---------|-----------|---------|------------|------|
| o yeeyi | be njeeyi | he/they | sold | y/nj |
| o habi | be kabi | " " | fought | h/k |
| o hooti | be kooti | " " | went home | h/k |
| o wi'i | be mbi'i | " " | said | w/mb |
| o wari | be mbari | " " | killed | w/mb |
| o soki | be coki | " " | locked | s/c |
| o seeki | be ceeki | " " | tore | s/c |
| o seki | be ceki | " " | were angry | s/c |

Category VII: Person

6.18. This category is concerned with personal and non-personal subject and object pronouns. The two dialects have several types of subject pronouns. A whole chapter (i.e. chapter 11) has been devoted to subject and object pronouns; for the moment, illustrations will only be provided for one type of subject pronouns. In the examples below, subject and object pronouns are respectively found before and after the verb in the General Past tense (yaafike).

| | | | |
|-----|---------|-----|-----------------------|
| Mi | yaafike | ma | "I have forgiven you" |
| A | " | meŋ | " You have " us " |
| O | " | eŋ | "He has " us" |
| Eŋ | " | mo | "We have " him" |
| Meŋ | " | oŋ | "We have " you" |
| Oŋ | " | be | "You have " them" |
| be | " | laŋ | "They have " me" |

Category VII: Past anterior affix

6.19. This category refers to the feature whereby an element, -no/-noo⁽⁷⁾, combines with a particular tense to take a particular action further back into the past.

The following Fuuta Jaloo examples provide an illustration of the use of the past anterior affix.

Mi lootii-no Umar "I had washed Umar"
 O Suuf-u-no Demba "He had hidden Demba"
 (General Past active + Past anterior affix)

Mi looti-no-ke/Mi looti-noo-ma "I had had a wash"
 O Suufi-no-ke/O Suufi-noo-ma "He had hidden"
 (General past middle + past anterior affix)

Mi loota-noo-ma "I had been washed"
 O Suuda-noo-ma "He had been hidden"
 (General past passive + past anterior affix)

Mi lootay-no Umar "I was going to wash Umar"
 O Suuday-no Demba "He was going to hide Demba"
 (General Future active + past anterior affix)

Mi loototo-no "I was going to have a wash"
 O Suudoto-no "He was going to hide"
 (General Future middle + past anterior affix)

Mi lootete-no "I was going to be washed"
 O Suudete-no "He was going to be hidden"
 (General Future passive + past anterior affix)

(7) Please see Chapter 10 for relevant use of -no or -noo.

Category IX: Transitivity

6.20. There are certain differences in verbal classes which suggest a division into two major groups: Transitive and intransitive clauses.

6.21. Transitive clauses occur where the verb is followed by a pronoun or a noun - phrase as the object, e.g.

O Soodii puccu am "He has bought my horse"
O Soodii ngu "He has bought it"

There are clauses with more than one object pronoun, e.g.

O yeeyii be ngu "He has sold it to them"
Mi okkii mo nge "I have given it to him"

6.22. Intransitive clauses occur where the verb does not take any object, e.g.

O maayii "He has died"
O majjii "He has got lost"
O daanike/ O daanniima "He has fallen asleep"

Verbs of motion may be followed immediately by a place noun but this is not the object of the verb, nor can the noun be pronominalised, e.g.

O yehii Dakar "He has gone to Dakar"
(Dakar is not the object of yehii; nor can we say
O yehii nde "he has gone it")

Category X: Derivative infixes

- 6.23. The two dialects have three types of radicals:
Simple, derived and complex.
- 6.24. Simple radicals are basic radicals; they always remain a single entity and cannot be broken down into any further morphological components.
- 6.25. Derived radicals are generally simple radicals plus affixes of the kind listed in Table 4. Such radicals are semantically different from simple radicals. This definition of derived radicals is similar to the one made by Stennes for the dialect he studied: "stem extensions are suffixed to the root and alter the meaning of the original form"⁽⁸⁾.
- 6.26. Derivative infixes occupy an important part in the two dialects and in Pulaar/Fulfulde as a whole, since they provide the possibility of always creating a wide range of semantic nuances from simple radicals. Noye believes that they are among the features that contribute most to the richness of the language: " Une des richesses de la langue peule provient de la possibilité de former, à partir de racines simples, différents verbes dérivés qui indiqueront certaines modalités de l'action. Le français utilise pour cela surtout des

(8) op. cit. stennes, p.129.

préfixes de dérivation, qui sont placés à la suite de la racine et forment un nouveau radical qui reçoit pour la conjugaison les mêmes terminaisons que le verbe simple"⁽⁹⁾.

- 6.27. The same infix may have several different meanings according to the types of radicals. As a matter of example, the infix - it - has reversive, repetitive, intensive, retaliative and other types of meanings.
- 6.28. In his study of the dialect of Gombe, Arnott points out that individual infixes, which he calls extensions, "are differentiated on a phonological and grammatical basis, viz on the basis of
- a) their form
 - b) their behaviour in regard to voice-potential and transitivity ⁽¹⁰⁾.
- 6.29. Before providing an illustration of derivative infixes in Table 4 below, it is worth mentioning that they are fully described in Chapter 9.

(9) Noye, D., 1974, p.766

(10) op. cit. Arnott, p.333

Table 4. Illustrations of derivative infixes⁽¹¹⁾

Types of infixes

| Infixes | Name | Illustrations |
|--------------|---------------|---|
| t-/-it/ut | reversive | habb-ude/habb-it-ude "tie/untie" |
| | repetitive | nanng-ude/nanng-it-aade "catch/ catch again" |
| | reflexive | p <i>i</i> i-de/p <i>i</i> i-t-aade "hit/hit oneself" |
| | retaliative | jal-de/jal-t-aade "laugh/laugh back" |
| | intensive | |
| id-/ud-/-od- | Associative | naat-(u)de/naat-id-ude "enter/ enter together" |
| | comprehensive | nyaam-(u)de/nyaam-id-ude "eat/ eat up" |
| -ir-/-or- | modal | habb-ude/habb-ir-de "tie/tie with" |
| | locative | yaa-de/yah-ir-de "go/go by ... " |

(11) cf. Chapter 9 for use of relevant voices with infixes.

Category IX: Verbo-nominals⁽¹²⁾

6.30. There are three groups in this category: Infinitive, past participle and future participle, as illustrated below.

Table 5. Illustrations of verbo-nominals

| Voice | Infinitive | Past Participle | Future Participles |
|-------------------------------|-----------------------------|-----------------|--------------------|
| Active | suud-ude "to hide" | suud-udo | suud-oowo |
| | rutt-ude "to return" | rutt-udo | rutt-oowo |
| | saak-ude "to disperse" | saak-udo | saak-oowo |
| | femb-ude "to shave" | femb-udo | feemb-oowo |
| | fagg-ude "to feed" | fagg-udo | fagg-oowo |
| Middle (reflexive meaning) | suud-aade "to hide" | suud-iido | suud-otoodo |
| | rutt-aade "to return" | rutt-iido | rutt-otoodo |
| | saak-aade "to disperse" | saak-iido | saak-otoodo |
| | feemb-aade "to shave" | femb-iido | feemb-otoodo |
| | fagg-aade "to feed" | fagg-iido | fagg-otoodo |
| Passive | suud-eede "to be hidden" | suud-aado | suud-eteedo |
| | rutt-eede "to be returned" | rutt-aado | rutt-eteedo |
| | saak-eede "to be dispersed" | saak-aado | saak-eteedo |
| | feemb-eede "to be shaved" | feemb-aado | feemb-eteedo |
| | fagg-eede "to be fed" | fagg-aado | fagg-eteedo |

(12) cf. Chapter 12 for details on verbo-nominals.

6.31. Finally, the findings on the verbal piece are described in the ensuing chapters:

Chapter 7: Tenses of the indicative mood

Chapter 8: Tenses of the subjunctive mood and forms of the imperative

Chapter 9: Derivative infixes

Chapter 10: The past anterior affix

Chapter 11: Subject and object pronouns

Chapter 12: Verbo-nominals

CHAPTER 7: TENSES OF THE INDICATIVE MOOD

- 7.1. Tenses of the indicative Mood have been sub-divided into general and relative groups by Arnott, partly on morphological and syntactic ground.

The general group include all the tenses where all the subject pronouns precede the base, i.e. general past, emphatic past, general future, vague future, continuous, stative, negative past, emphatic negative, negative future. By way of opposition, the relative group includes tenses where for some persons the verbal base precedes the subject pronouns. It includes the relative past and the relative future.

General FutureFuuta Jaloo

Janngo mi loot-ay⁽¹⁾ horde nden "Tomorrow I shall
wash the calabash"

Janngo a nyaam-ay nyiiri ndin "Tomorrow you will
eat the food"

Relative FutureFuuta Tooro

Ko janngo loot-at-aa "It is tomorrow that you
will wash"

Nde ngar-t-aa? "When will you come?"

(1) the tense suffix under consideration is indicated by a hyphen that separates it from the verbal radical.

Table 1: Suffixes of General Tenses

| Tense | Active | | | | Voice | | | |
|------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| | Fuuta Jaloo | | Fuuta Tooro | | Middle | | Passive | |
| | Fuuta Jaloo | Fuuta Tooro |
| General Past | -ii | -ii | -ike | -iima | -aama | -aama | -aama | -aama |
| Emphatic past | -(u) | -(u) | -i | -i | -a | -a | -a | -a |
| General future/ Habitual | -ay | -at | -oto | -oto | -ete | -ete | -ete | -ete |
| Vague future | Non-existent | -(u) | Non-existent | -o | Non-existent | Non-existent | -e | -e |
| Negative past | -aali | -aani | -aaki | -aaki | -aaka | -aaka | -aaka | -aaka |
| Negative future/ Habitual | -ataa | -ataa | -ataako | -ataako | -ataake | -ataake | -ataake | -ataake |
| Emphatic Negative | -aa | -aa | Non-existent | Non-existent | Non-existent | Non-existent | Non-existent | Non-existent |
| Stative | -i | -i | -ii | -ii | -aa | -aa | -aa | -aa |
| Continuous 1 | -a | -a | -oo | -oo | -ee | -ee | -ee | -ee |
| Continuous 2 | -(u)de | Non-existent | -aade | Non-existent | -eede | -eede | Non-existent | Non-existent |

NB The brackets indicate that the -u is optional with all simple radicals (i.e. of CVC- or CVCV- structure) ending in f, s, r, l, w, k, m, n and b. The same thing occurs with the general imperative active as well as the active infinitive and past participle (cf. Chapters 8 and 12). It should however be emphasized that the omission occurs more frequently in Fuuta Tooro than Fuuta Jaloo. The latter tends to maintain the -u with the above types of radicals.

The following extract ^{my} from Fuuta Tooro material will further illustrate the difference between general and relative tenses. In this case relative past forms (wad-i, won-i art-i, heb-i etc.) is used for narrative purposes whereas general past forms (art-ii, fellan-ii, takk-ii etc.) are used in conversation.

| | |
|---------------------------|-----------------------------|
| nolo wad-i anngaas; | "nolo volunteered for |
| o won-i e armee, omo | the army; He remained |
| fellana tubakoobe haa | in the army and fought |
| o heb-i seneral. o art-i. | (lit. he has been fighting) |
| o yeh-i Ndar, o wi'-i | for the white men until he |
| tubakoobe mi art-ii, mi | became a general. He came |
| fellan-ii on haa mi takk- | back. He went to Ndar |
| ii seneral na ni. | (and) said to the white |
| | men: I have come back, |
| | I have fought for you |
| | until I have become a |
| | general as you can notice |
| | (lit. here it is)" |

- 7.2. We will now make a close examination of the individual tenses. We will start with general tenses and then go on to relative tenses.

The General Past

Active: -ii

Middle: FJ -ike⁽²⁾
FJ -iima

(2) FJ and FT stand for Fuuta Jaloo and Fuuta Tooro. These will be used whenever tense-suffixes are different in the two dialects.

Passive: -aama

Examples:

Active (Fuuta Jaloo/Fuuta Tooro)

| | | |
|-----------|-----------------|-------------------------|
| 1 sg | Mi loot-ii Umar | "I have washed Umar" |
| 2 sg | A loot-ii Umar | "You have wahed Umar" |
| 3 sg | O " | "He has washed Umar" |
| 1 pl incl | En/En " | "We have washed Umar" |
| 1 pl excl | Men/Men " | "We have washed Umar" |
| 2 pl | On/On " | " You have washed Umar" |
| 3 pl | Be " | "They have washed Umar" |

Middle

| | <u>Fuuta Jaloo</u> | <u>Fuuta Tooro</u> | <u>Meaning</u> |
|-----------|--------------------|--------------------|----------------------|
| 1 sg | Mi loot-ike | Mi loot-iima | I have had a wash |
| 2 sg | A loot-ike | A loot-iima | You have had a wash |
| 3 sg | O loot-ike | O loot-iima | He has had a wash |
| 1 pl incl | En loot-ike | En loot-iima | We have had a wash |
| 1 pl excl | Men loot-ike | Men loot-iima | We have had a wash |
| 2 pl | On loot-ike | On loot-iima | You have had a wash |
| 3 pl | Be loot-ike | Be loot-iima | They have had a wash |

Passive (Fuuta Jaloo/Fuuta Tooro)

| | | |
|-----------|-------------------|----------------------|
| 1 sg | Mi loot-aama | I have been washed |
| 2 sg | A loot-aama | You have been washed |
| 3 sg | O loot-aama | He has been washed |
| 1 pl incl | En/En loot-aama | We have been washed |
| 1 pl excl | Men/Men loot-aama | We have been washed |
| 2 pl | On/on loot-aama | You have been washed |

(i) si

Fuuta Jaloo

Si mi itt-ii a tampay "If I take it away you will
suffer"

Si lekki haar-aama "Too much medicine does not
nyawndataa cure anybody" (lit. if a
medicine has been taken to
one's full satisfaction it
will not cure).

Si diina aadej, tiid-ii "If a person's religious
o juulay belief is strong he will
perform his devotions.

Si bilakorooyo suw-ike "If a boy goes through circum-
wullaani haray mawbe cision without crying his
makko yett-ii Alla parents praise God for it
(lit. if a boy has been
circumcised (and) has not
cried it will be (that) his
parents have thanked God."

Si almaami taar-aama "Whenever the king has been
ga juulirde Fugumbaa, crowned in the Mosque of
tabalde nde piy-aama, Fugumba, that the drum has
mawbe ben nodd-aama, been beaten, that the
meetelli diŋ wadee e elderly have been called,
horde addee teddiniree the turbans are put in a
mawbe ben fow calabash and shows to the
latter."

(ii) bayri/baawo (since, because, when etc.)

Fuuta Tooro

| | |
|---|--|
| <p><u>Baawo</u> o <u>res-ii</u> debbo sukunya omo woni laafdo, bidfo be njibindini fow laabataa</p> | <p>"Since he (has) married a cannibal and he is not one, their child could become it (lit. Any child they got together will not be clean).</p> |
|---|--|

Fuuta Jaloo

| | |
|---|--|
| <p><u>Baawo</u> Fuuta e Fuladuu <u>fellindir-ii</u> yimbe Fuladuu ben eggii</p> | <p>"When Fuuta Jaloo and Fula duwfought each other, the Fuladuu people moved away"</p> |
|---|--|

| | |
|---|--|
| <p><u>Bayri</u> leydi ndin <u>sennd-aama</u> mo kala jonnaa gebal mu'un</p> | <p>"When the land was divided, each individual was given his part"</p> |
|---|--|

The Empahtic Past

Active

(-u)

Middle

-i

Passive

-a

- 7.4. This tense is used where the emphasis falls on the meaning on the verb radical, e.g.

ACTIVE

Fuuta Tooro

| | |
|------------------|---------------------------|
| Ko mi sudd-u dum | "I <u>did</u> cover it" |
| Ko o yan | "He <u>did</u> fall down" |
| Ko o loot dum | "He <u>did</u> wash" |

(Compare with the emphatic statements in the relative past, mentioned in 7.34 where emphasis is not on the verb meaning but on some other element in the sentence)

| | |
|------------------------|---|
| Ko han̄ki o sudd-i dum | "It was <u>yesterday</u> that he covered it " |
| Ko han̄ki o yan-i | "It was <u>yesterday</u> that he fell" |
| Ko han̄ki o loot-i dum | "It was <u>yesterday</u> that he washed it" |

MIDDLE

| | |
|--------------|-----------------------------|
| Ko mi sudd-i | "I <u>did</u> cover myself" |
| Ko mi loot-i | "I <u>did</u> wash myself" |
| Ko o suud-i | "He <u>did</u> hide" |

Compare with:

| | |
|---------------------|---|
| Ko han̄ki o sudd-ii | "It was <u>yesterday</u> that he covered himself" |
| Ko han̄ki o loot-ii | "It was <u>yesterday</u> that he washed" |
| Ko han̄ki o suud-ii | "It was <u>yesterday</u> that he hid" |

PASSIVE

Ko dum def-a "It was cooked"
 Ko o huɗ-a "He was cursed"
 Ko o taw-a e dow debbo janano "He was found on top
 of someone else's wife"

Compare with:

Ko dum def-aa "It was that one that was
 cooked"
 Ko kaŋko huɗ-aa "It was him that was cursed"
 Ko haŋki o taw-aa e "It was yesterday that he was
 dow debbo janano found on top of someone else's
 wife"

The General FutureACTIVE

FJ -ay
 FT -at

MIDDLE

-oto

PASSIVE

-ete

Examples: (Fuuta Jaloo/Fuuta Tooro)

Active

| | | |
|-----------|----------------------------|--------------------|
| 1 sg | Mi loot-ay/Mi loot-at Umar | I shall wash Umar |
| 2 sg | A loot-ay/A loot-at Umar | You will wash Umar |
| 3 sg | O loot-ay/O " | he " |
| 1 pl incl | En loot-ay/O " | we " |
| 1 pl excl | Men loot-ay/Men " | we " |
| 2 pl | On loot-ay/On " | you " |
| 3 pl | Be loot-ay/Be " | they " |

Middle

| | | |
|-----------|-------------|---------------------|
| 1 sg | Mi loot-oto | I shall have a wash |
| 2 sg | A " | you will " |
| 3 sg | O " | he " |

| 3 sg | O " | he " |
| 1 pl incl | En/En " | we shall " |
| 1 pl excl | Men/Men " | we " |
| 2 pl | On/On " | you will " |
| 3 pl | Be " | they " |

- 7.6. The general future is used in both dialects to refer to some action that one thinks is certain to happen, as in the following Fuuta Tooro example:

Hammadi Satigi ko kaardo,
 ko bii laamdo, ko
 baammum will fof won-at

"Hammadi Satigi is arrogant,
 he is the son of a king,
 whatever his father says
 will happen"

7.7. This tense is also used in both dialects after such particles as so/si "if", bayri "because" which are tied to general and not relative tenses.

a) so/si "if" (conditional clauses)

(i) Fuuta Tooro

Sikaa maccudo, won maa ngartaa
 e baamma, tawa won jontaado
 ma e dingiral, mbi'aa ada
 yidi dum resde, nyande
 heen a fiy-ete salambure, sabu
 on kawrii e dingiral kono
 ongonaa gootum.

"If you belong to the
 slave caste and if you
 ask your father to help
 you marry a free girl you
 had befriended in the village,
 he will beat you up that day
 because even though you
 met that girl you are not
 marriageable (lit. if you
 are a slave, you may come
 back to your father, when
 your girlfriend is in the
 village, you say you want
 to marry her; that day
 you will be beaten up (with)
 a stick, because you
 met each other in the village
 but you are not the same)"

(ii) Fuuta Jaloo

Si o maay-ay you o maayu "If he is going to die, let him die"

Si biraadan dan yon-ay
yimbe ben, addu dan "If the milk is going to be enough for everybody, then bring it."

Si oⁿ hald-ay ko doo "If you are going to talk you
haldoton teppere tew are going to do it here, you
o sottataa are not going to move an
inch from here"

b) Causal clause

bayri o yah-ay ka luumo "Since he is going to go to
yo o nabor minnyiraabe the market let him take his
makko ben brother with him."

The general future can also be the main clause in the sentence containing subordinate clauses, e.g.

(i) after a Conditional clause

Donngal biraadan no metti "A pot of milk is hard to
ronndaade; si dan yeyaama carry on the head; When (the
dan hibb-ay pot) is tilted the milk gets
spilt."

Fuuta Tooro

Mbeewa so waalii e ladde tan "If a goat spends the night
boy nyaam-at in the bush it will be
eaten up by jackals"

Saa⁽⁴⁾ addii kanne ma, a "When you bring your gold,
hald-at e baylo you will discuss the price
with the goldsmith"

Hade so mi innii ma, "Since at the simple call of your
Mbaalam, mi yi'-at Jaara name, my Mbaalam, I see my
Yaayam, hono wadetee dear mother Jaara, how can I
haa mi waasa yidde ma? be made to dislike you?"

(ii) after a Relative clause

Fuuta Jaloo

Mb hulii Maay-ay, mo suusii "The coward will die, the
maay-ay brave will die"(lit. He
who is afraid will die, he
who is brave will die)

Mb ndaarani ma biddo maa "He who looks after your
har-ay hebii ma child will turn you into
your friend"

7.8. The general future is also used for habitual meaning with regard to an habitual activity of a permanent nature.

(4) Saa is a commonly used spoken form of so a "if you".

Fuuta Tooro

Ko mi demoowo;
Mi rem-at gaw-ri,
mi rem-at maaro

"I am a cultivator I cultivate
 guinea corn or rice (lit. I
 shall cultivate guinea corn, I
 shall cultivate rice).

Dafi nyawndirdi asoytee
 ko to ladde; woni heen
 di pasn-ete woni heen
 di mbad-ete tan ndiyam
 haa wukka di njaree

"The roots that heal are usually
 dug from the bush. Sometimes
 they are boiled, sometimes
 they are just heated up in
 water and given to the patient
 to drink (lit. sometimes they
 will be put only (in) water
 until warm, they are drunk)"

- 7.9. Furthermore there is another special use of the
 general future: It is often found at the beginning of
 a series of descriptive sentences, where the same
 action has been repeated several times, e.g.

Fuuta Tooro

Debbo maabo oo wii
 kanyum hay gooto
 bamataa dum so wonaa
 nyalludo sanje gila
 subaka haa naange muta
 tawa daldugal mum
 saamaani e leydi.
 Maabube fof nani.
 Maabo ar-at tan nyalla
 sanje haa naange
 daroo e hoore, daldugal
 mum saama e leydi

"The weaver-woman said that
 no one would marry her except
 for the one who would spend a
 whole day weaving without
 dropping his needle. All the
 weavers heard about it. A
 weaver would come and work till
 noon, and then his needle would
 fall to the ground."

7.10. It is used in both dialects to express future meanings in reported speech and in interrogative sentences, e.g.

(i) Reported speech

| | |
|-------------------------------|---------------------------------|
| o wii o <u>nodd-at</u> kam | "He said he will call me" |
| o wii o <u>loot-at</u> kam | "He said he will wash me" |
| o wii be <u>njaaf-oto</u> mbo | "He said they will forgive him" |
| o wii be <u>loot-oto</u> | "He said they will wash" |
| o wii o <u>fiy-ete</u> | "He said he will be beaten up". |
| o wii <u>loot-ete</u> | "He said he will be washed" |

(ii) Interrogative sentences

| | |
|---|---|
| Mi <u>yi'-at</u> ma janngo? | "Shall I see you tomorrow?" |
| A <u>ar-at</u> janngo? | "Will you come tomorrow?" |
| Debbo oo tawi gorko oo na lelii na fortii sikki ko maaydo; o wii: Min noon, mi <u>woy-at</u> haa mi gayna nde mi fudda nyaamde walla mi <u>nyaam -at</u> haa mi gayna nde mi fudda woyde | "The woman found the man stretched out on the floor, she thought he was dead. She said (to herself): Shall I cry before eating or shall I eat before crying?" |

7.11. Fuuta Jaloo uses it for simple future meanings, when Fuuta Tooro uses the vague future, e.g.

| | |
|---------------------------------------|--|
| o <u>loot-ay</u> jaango | "He will wash tomorrow" |
| o <u>nodd-ay</u> mo jaango | "He will call him tomorrow" |
| -Mi <u>loot-oto</u> faddi jaango | "I shall have a wash the day after tomorrow" |
| -a <u>yaaf-oto</u> mo faddi jaango | "You will forgive him the day after tomorrow" |
| -Mi <u>loot-ete</u> si mi ara | "I shall be washed before coming" |
| -Mi <u>nodd-ete</u> | "I shall be called" |

The Vague Future

7.12. This tense does not seem to occur in Fuuta Jaloo; the general future is used in contexts where the vague future appears in Fuuta Tooro. Before giving the list of the suffixes of this tense, it is important to emphasize that they are always used in combination with a specific particle "ma" which may be regarded as a tense prefix.

ACTIVE - (u)
MIDDLE - o
PASSIVE - e

7.13. The vague future is used to indicate future meanings in direct speech e.g.

| | |
|--|--|
| Ma o nodd-u ɓe | "He will call him" |
| Ma ɓe nodd-u on | "They will call you" (plural) |
| Ma o yaaf-o mi | "He will forgive me" |
| | |
| Bannɗel, ar wonɗu e am, <u>ma mi innir ma</u> wonkam | "Sweet Love, come and stay with me, I shall name my heart after you" |
| | |
| Ko pulaar mbiidaa ngardaa jaŋngu saa ummiima doo <u>maa nawt-u</u> ko laabi | "You said you came to learn, you will be fully satisfied by the time you leave this place." |
| | |
| <u>Ma mi sood</u> ngaari ndii ujunnaaji joy | "I'll give you (lit. buy) five thousand for the bull" |

- 7.14. The vague future is also the main clause of a sentence with subordinate clauses introduced by such particles as so "if" and it is not used in interrogative future sentences, for which the general or relative futures are used.

| | |
|--|--|
| So gesa baa liggaama <u>ma</u> enen fof en <u>kejj-u</u> heen | "When the field yields it will be beneficial to all of us" |
| | |
| Saa yottiima e wuro hee <u>maa yii</u> doon weendu heeda maa e funnaange. Nde ngardaa fof saa tawaani mi doon <u>maa</u> | "When you get to the village you will see a water well towards the east. Whenever you come, if you don't find me, you will find my wife" |

taw jom suudam walla or my son or my mother. If
 biyam walla neenam. you look towards the east
 Saa soyniima funnaange you will see Demmba

The Stative (5)

Examples: (Fuuta Jaloo/Fuuta Tooro)

Active

| | | |
|-----------|------------------------|--------------------|
| 1 sg | Mido/Modo loot-i Umar | I have washed Umar |
| 2 sg | Hida/Ada loot-i Umar | You " |
| 3 sg | Himo/Omo loot-i Umar | He has " |
| 1 pl incl | Hiden/Eden loot-i Umar | we have " |
| 1 pl excl | Meden/Emin loot-i Umar | we " |
| 2 pl | Hidon/Odon loot-i Umar | you " |
| 3 pl | Hibe/Ebe loot-i Umar | they " |

Middle

| | | |
|-----------|--------------------|-------------------|
| 1 sg | Mido/Modo loot-ii | I have had a wash |
| 2 sg | Hida/Ada loot-ii | you " |
| 3 sg | Himo/omo loot-ii | he has " |
| 1 pl incl | Hiden/Eden loot-ii | we have " |
| 1 pl excl | Meden/Emin loot-ii | we " |
| 2 pl | Hidon/Odon loot-ii | you " |
| 3 pl | Hibe/Ebe loot-ii | they " |

(5) Please refer to Tables 1^{Page 158} and 2^{Page 179} for the suffixes of the stative and to Tables 2 and 3^{Page 181} for the accompanying subject pronouns.

Passive

| | | |
|-----------|--------------------|--------------------|
| 1 sg | Mido/Modo loot-aa | I have been washed |
| 2 sg | Hida/Ada loot-aa | You " |
| 3 sg | Himo/Omo loot-aa | he has " |
| 1 pl incl | Hiden/Eden loot-aa | we have " |
| 1 pl excl | Meden/Emin loot-aa | we " |
| 2 pl | Hidon/Odon loot-aa | you " |
| 3 pl | Hibe/Ebe loot-aa | they " |

7.15. A verb such as anndude "to know" has forms which are considered as "stative" and others which are non stative, so that for the present purpose "stative" is not applied just to a class of verbs as is the case in such languages as English; it has been treated as a tense by Arnott in his book "The Nominal and Verbal Systems of Fula" (1970). In order to give a clearer understanding of the meanings of this tense, I shall compare it with the general past (Gp) when the latter indicates a completed action. First of all I shall make a distinction between dynamic and non-dynamic verbs. The former can be given a dynamic use, ie. they can be put into the progressive form, e.g. nyaamude "to eat", yawde "to climb", wallude "to help", ittude "to pick", arde "to come".

Non-dynamic verbs which are not used in the progressive form include verbs of inert perception or cognition, e.g. moyyude "be good", bonde "be bad" welde "to be tasty", anndude "to know", mawnude "to grow up", sattude "to be difficult".

1) Dynamic VerbsACTIVE

- Mido yaw-i "I am up the tree" (ie. I have finished climbing and I am still up the tree)
- GP: Mi yaw-ii "I have climbed" (and I may not necessarily still be up the tree; I may have come down).
- Mido nodd-i mo "I have called him" (but he may not have answered the call yet)
- GP: Mi nodd-ii "I have called him" (He may have answered my call since then)
mo
- Himo nyaam-i "He has (just) eaten rice"
maaro
but
- GP: O nyaam-ii "It's a long time since he ate
maaro koŋ gila the rice"
ko booyi

MIDDLEFuuta Tooro

- Aɗa loot-ii "You are washed clean"
but
- GP: A loot-iima "You have washed"
- Ebe cuud-ii "They are hiding"
but
- GP: ɓe cuud-iima "They have hidden"

emin njood-ii "We are seated" (We are still
sitting down)

but

Q: min njood-
iima "We have sat down" (as opposed to
we have stood up)

odon tor-ii "You have requested" (You have made
the request and you are still waiting
for a reply)

but

Q: A tor-iima "You have requested" (and you may
have already got the reply).

PASSIVE

Fuuta Jaloo

Mido nodd-aa "I have been called" (The call has
been made to me and I am still to
reply).

but

Q: Mi nodd-aama "I have been called" (and I may
already have answered).

hidon nanng-aa "You are under arrest"

but

Q: on nanng-aama "You have been arrested" (and
released perhaps)

In the above stative examples of all the three voices,

the important factor is not only the completion of the dynamic activity but also, and above all the fact that the subject is continuing in the state relative to the meaning of the verb. On the other hand, the general past can indicate that the action is completed but also that it is not necessarily going on in the state of completion. These two meanings can be summarized as follows:

- (i) Stative: completed and still continuing state
- (ii) GP: completed but may not be continuing into present time.

2) Non-dynamic verbs

These verbs seem to occur in the active voice and, to a lesser extent, the passive. They do not seem to occur in the middle voice.

ACTIVE VOICE

Fuuta Tooro

- | | |
|--------------------|---|
| <u>Enge mawn-i</u> | "it (ie. cow etc.) is big" |
| but | |
| GP: nge mawn-ii | "it has become big" (which it was not before) |
| | |
| <u>Omo myy-i</u> | "He is a good man" |
| but | |
| GP: O moyy-ii | "He has been good" (over this matter) |

emin ngannd-i dum "We know it" (We have always known it)

but

Q: Min ngannd-ii "We know it" (we know it now; we
dum did not know it but we have come
to know it; we have found out).

ada ngord-i "You are a brave man" (and you
always are)

but

Q: a ngord-ii "You have been brave" (Over this
case etc.)

PASSIVE VOICE

Fuuta Jaloo

Himo dond-aa "He is thirsty"

but

Q: o dond-aama "He has got thirsty" (as opposed
to previously, when he was not
thirsty)

Mido weel-aa "I am hungry"

but

Q: Mi weel-aama "I have got hungry" (as opposed to
the previous state when I was
not hungry)

Mido jaang-aa "I am cold"

but

Q: Mi jaang-aama "I have become cold"

The meanings of the stative with non-dynamic verbs could be described as follows:

(i) In the active voice it tends to indicate the possession of a quality or a defect of some kind with the implication that this is a lasting feature whereas the general past implies that the quality or defect are temporary.

(ii) In the passive voice it has a similar meaning to that indicated for the dynamic verbs, i.e. the subject is continuing in the state of completion.

It is interesting to note that the meanings of the stative could be made to occur in the past or future times thanks to special constructions. e.g.

Past time

Fuuta Jaloo

Tawi mido yaw-i "at that time I was up the tree"
(lit. It was found I am up the tree).

Tawi mido nodd-i "At that time I had called him" (lit.
mo It was found I have called him)

o wi'i himo nyaam- "We said he had eaten rice" (lit. He
-i maaro said he had eaten rice"

Future time

Fuuta Tooro

| | |
|----------------------------|---|
| Tawat <u>emin ngannd-i</u> | "We will have known" (lit. It will be found we know) |
| Tawat <u>omo domf-aa</u> | "He will have been thirsty" (lit. It will be found that he is thirsty). |

NB It should be emphasized however that this feature is not peculiar to the stative. It occurs equally with the general past and, as will be seen later, the continuous.

The Continuous tense

- 7.16. The two types of suffixes of this tense are shown in Tables 1 and 2. The accompanying subject pronouns are in Tables 2 and 3.
- 7.17. As shown in Table 2 only continuous 1 is common to the two dialects. Continuous 2 does not seem to occur in Futa Jaloo. I shall start by analysing continuous 1 and then go on to continuous 2.

Table 2. The stative and the continuous in the two dialects

| TENSE-SUFFIXES | | | | | | | | | |
|--|--------|---------|--|----------------------|--------|---------|------------------------|------------|---------|

Table 3. First person elements of the stative and the continuous in Fauto Tooro

| Forms | Areas where encountered |
|-------|----------------------------------|
| Modo | Madina Ndiatbe, Matam, Wurossoji |
| modo | " " |
| Mede | " " |
| Mede | " " |
| Mido | Matam |

Continuous 1Examples of its useActive

| | | | |
|-----------|------------|-------------|-------------------|
| 1 sg | Mido/Modo | loot-a Umar | I am washing Umar |
| 2 sg | Hida/Ada | " | you are " |
| 3 sg | Himo/Omo | " | he is " |
| 1 pl incl | Hiden/Eden | " | we are " |
| 1 pl excl | Meden/Emin | " | we " |
| 2 pl | Hidon/Odon | " | you " |
| 3 pl | Hibe/Ebe | " | they " |

Middle

| | | | |
|-----------|------------|---------|--------------------|
| 1 sg | Mido/Modo | loot-oo | I am having a wash |
| 2 sg | Hida/Ada | " | you are " |
| 3 sg | Himo/Omo | " | he is " |
| 1 pl incl | Hiden/Eden | " | we are " |
| 1 pl excl | Meden/Emin | " | we are " |
| 2 pl | Hidon/Odon | " | you " |
| 3 pl | Hibe/Ebe | " | they " |

Passive

| | | | |
|-----------|------------|---------|-------------------|
| 1 sg | Mido/Modo | loot-ee | I am being washed |
| 2 sg | Hida/Ada | " | you are " |
| 3 sg | Himo/Omo | " | he is " |
| 1 pl incl | Hiden/Eden | " | we are " |
| 1 pl excl | Meden/Emin | " | we are " |
| 2 pl | Hidon/Odon | " | you " |
| 3 pl | Hibe/Ebe | " | they " |

- 7.18. It indicates an action in progress, i.e. an action that has not been completed at the time of utterance, e.g.

Fuuta Tooro

| | |
|-------------------------------------|--------------------------|
| Min, Boy Sakke, <u>mbodo hald-a</u> | "I, Boy the shoemaker, |
| e Barka. <u>Omo naamn-oo</u> mi | am talking to Barka. He |
| haafeer mecce sakeebe no | is asking me to tell him |
| fuddiri e halke ganndalam. | about the shoemaking |
| <u>Mbodo haln-a</u> mo heen ko | profession. I am telling |
| nganndu mi heen ko. | him what I know about |
| | it" |

Fuuta Jaloo

| | |
|-------------------------------|--------------------------|
| hibe <u>tappondir-a</u> kelle | "They are clapping their |
| | hands" |

| | |
|---------------|------------------------|
| Meden loot-oo | "We are having a wash" |
|---------------|------------------------|

| | |
|---------------|------------------------|
| hidon loot-ee | "You are being washed" |
|---------------|------------------------|

- 7.19. On the other hand, just like the stative, this tense could be used in reference to past or future time. It then indicates a lasting or a repetitive process e.g.

Past time

| | |
|-------------------------------|--------------------------|
| Tawi <u>himo itt-a</u> manngo | "He was picking some |
| | mangoes" (lit. It was |
| | found he is picking some |
| | mangoes). |

| | |
|--------------------------|-----------------------------|
| Hari <u>hibe loot-oo</u> | "They were having a wash" |
| | (lit. It was found they are |
| | having a wash). |

wiaama addu duma omo
umm-oo o adda, kono noon
o haalataa; kala ko kaalɗaa
e makko omo nan-a kono o
jastotaako

task, he was told to
bring something over, he would
do it immediately but he would
not talk; He would understand
whatever he was told but
would not reply."

Jooni noon, kaalnan maa
mi ko kabaaru demal. Min
ndemat gawri, min ndemat
maaro; gerte, emin ndem-a.
so yehii haa gerte dee
mawnii seeda min ndewa
heen mbedemin doof-a
kudi mbedemin werl-oo
haa laaba wi'a cer

"Now I am going to talk to
you about farming. We grow
guinea-corn and rice; we
also grow ground-nuts; when
the latter grows a little
we pick out the weeds and throw
them away until the fields
are absolutely clean".

c) Relative clauses (with the particle ko)

Fuuta Tooro

woni sakke-sakkeɓe, ko
sakke kala ko ngaddandaa
ɗum e meccal wonaa ko
na nawt-a, liggoto tan

"The true shoemaker is the
one that can cope with any
task in his profession"(lit.
It is a shoemaker who
whatever you bring him he
is not returning, he will
do it).

Tawi ko ndunngu na silt-a

"It was getting towards
the end of the rainy season"
(lit. It was found that it was
getting towards the end of the
rainy season)

Hay gooto waawaa danje ko "No one can get (what is
no wi'-ee hirke walla ko called) a saddle or a
no wi'-ee tabalde so wonaa drum unless they are
sakke fewni dum made by a shoemaker"

d) Conditional clauses, after si/so "if"

So tawii a arii ada "When you come to propose
yam-a debbo, konngudi marriage to a girl, don't
mum jeegom, kala heen accept any of the following
konngol gootol ngol six answers she may give
ngadidaa nande tan you; if you do so, you ~~wont~~
jabdaa, a haytii marry her." (lit. when you
humande deebo oo. come you are proposing
 marriage to a woman, six of
 her answers, each of them
 that you hear first and
 accept it, you have failed
 to get engaged to her).

Kabeteebe bee ummii to "The soldiers left Gede and
Gede to ebe njoftoy-oo were on their way home when
haa be njii oodoo they saw the slave who dwelt
jiyaado omo hodi e in a hole; they saw him when
ngaska hee. So ebe they were going and when
njah-a ebe nji'-a they were coming back." (lit.
mo, so ebe ngart-a when they were going they were
ebe nji'a mo. seeing him when they were
 coming they were seeing him).

e) Causal clauses, after baade "since, because"

Baade, aan gardo oo ada "Since you, the newcomer,

| | |
|---|--|
| <p><u>woy-ee</u> too, beedoo <u>ina ngoy-a</u> jaado oo, bee kam malaama, ndanyii nanndufo e jaado oo.</p> | <p>you are being missed over there, and that the people over here are missing the one that has gone, they are lucky since they have found somebody who is like the one that left."</p> |
|---|--|

f) Purpose clause, after mbela "in order"

| | |
|--|--|
| <p>Yimbe bee mbii sayku Umaar yoo wadan be sabaabu mbela bii laamdo oo <u>ina sell-a</u></p> | <p>"The people asked sayku Umaar to do some prayers * in order to heal the king's son".</p> |
|--|--|

g) Temporal clause after haa "until"

| | |
|---|--|
| <p>Juntel nyalli sanje haa buudu naange <u>na yooi-oo</u>, futuroo <u>na ndaare</u> yonde</p> | <p>"Juntel spent all day weaving until sunset, and dusk was just coming"</p> |
|---|--|

h) Object clauses

| | |
|--|--|
| <p>Hay so mi wondaani e maa tawata ko <u>mbed a yim-a</u></p> | <p>"Even if I am not with you I find myself singing you (lit. Even if I am not with you it happens that I am singing you).</p> |
|--|--|

| | |
|---|---|
| <p>Waaaji gooto meedii ummaade wii <u>no yah-a</u> janggoya pulaar; o ummii omo yaha.</p> | <p>"(Once upon a time) A man said he was going to learn Pulaar (lit. a man once got up and said he was</p> |
|---|---|

going to learn Pulaar).
 He set out and went (lit.
 he got^{up} he was going).

- i) Continuous 1 can also be used in a main clause,
 as after the following conditional clauses in
 Fuuta Tooro:

So mi yeewii ma mbedā naat-a "When I look at you I see
 do sekereejī nari maa mayata. the hidden flicker of your
 beauty"(lit. I enter
 where the secrets of your
 beauty flicker).

So jiyaaḍo oo wi'aama "The slave would do whatever
 addu ḍuma, omo umm-oo he is told but he would not
 o adda kono non o haalataa. talk (lit. if the slave
 Kala ko kaaldudaa e makko has been told bring that
omo nan-a kono o jastotaako one over there, he gets up
 and brings (it)) He
 understands whatever he is
 told but he does not talk
 back".

Maamuudu wii tubakooḍe "Maamuudu said to the
 bee on mbaawaa naadde Fuuta white men you will not be
 so wonaa so jamma arii odon able to enter Fuuta Tooro
njaar-a jamma, so nyalawma unless you travel by night
 arii odon mbaal-oo. and sleep during the day"
 (lit. when the night
 comes you go by night).

Continuous 2

Examples: (Fuuta Jaloo only)

Active

| | | | | |
|-----------|--------------------|---|-------------------|---|
| 1 sg | Miɗo loot-ude Umar | | I am washing Umar | |
| 2 sg | hiɗa | " | you are | " |
| 3 sg | himo | " | he is | " |
| 1 pl incl | hiɗeŋ | " | we are | " |
| 1 pl excl | Mɛɗeŋ | " | we | " |
| 2 pl | Hiɗoŋ | " | you | " |
| 3 pl | Hiɓe | " | they | " |

Middle

| | | | | |
|-----------|----------------|---|--------------------|---|
| 1 sg | Miɗo loot-aade | | I am having a wash | |
| 2 sg | Hiɗa | " | you are | " |
| 3 sg | Himo | " | he is | " |
| 1 pl incl | Hiɗeŋ | " | we are | " |
| 1 pl excl | Mɛɗeŋ | " | we are | " |
| 2 pl | Hiɗoŋ | " | you | " |
| 3 pl | Hiɓe | " | they | " |

Passive

| | | | | |
|-----------|----------------|---|-------------------|---|
| 1 sg | Miɗo loot-eede | | I am being washed | |
| 2 sg | Hiɗa loot-eede | | you are | " |
| 3 sg | Himo | " | he is | " |
| 1 pl incl | Hiɗeŋ | " | we are | " |
| 1 pl excl | Mɛɗeŋ | " | we are | " |
| 2 pl | Hiɗoŋ | " | you | " |
| 3 pl | Hiɓe | " | they | " |

7.21. Like continuous 1, it indicates a continuous process in Fuuta Jaloo.

| | |
|------------------------------|---|
| Mido yaa-de | "I am going" |
| Himo nyaam-ude | "He is eating" |
| hibe suud ^f -aade | "They are hiding" (lit. they are in the process of hiding) |
| hibe loot-ade | "They are having a wash" |
| Mæden loot-eede | "We are being washed" |
| Himo suud-eede | "He is being hidden" |

Past time

| | |
|------------------------------|-----------------------------------|
| o naati xalwa duubi | "He went into seclusion for |
| jeefidi <u>himo hoor-ude</u> | seven years and was just fasting" |

| | |
|----------------------|------------------------------|
| Konu ngun jaabondiri | "All the crowd said at once: |
| gootol: Accen hare, | Let's avoid wars, we are |
| <u>hidenɗabb-ude</u> | attempting to get in heaven, |
| aljanna, nanngerṭ | let's perform our religious |
| diina Alla Kan | duties." |

Future time

| | |
|-----------------------------|---|
| Taway <u>himo hoor-ude/</u> | "He will be fasting, looking |
| <u>dabb-ude</u> etc. | for.... " (lit. It will be found that he is looking for) |

- 7.22. It is appropriate at this stage to devote some space to the subject as found in the stative and continuous tenses.

When the subject of the verb is a noun phrase it is accompanied by the particle *no* which can be regarded as indicator of the stative and the continuous tenses, e.g.

Active voice

| | |
|------------------------|----------------------------------|
| Bello <u>no annd-i</u> | "Bello knows" (stative) |
| Bello <u>no ar-a</u> | "Bello is coming" (continuous 1) |
| Bello <u>no ar-de</u> | "Bello is coming" (continuous 2) |

Middle voice

| | |
|-------------------------------------|---|
| Demba <u>no jood^f-ii</u> | "Demba is seated" (stative) |
| Demba <u>no loot-oo</u> | "Demba is having a wash" (continuous 1) |

Passive voice

| | |
|---------------------------|--|
| Barka <u>no jagg-aa</u> | "Barka is under arrest" (stative) |
| Barka <u>no jagg-eede</u> | "Barka is being arrested" (continuous, FJ only) |

- 7.23. The subject pronouns shown in Tables 2 and 3 are particular in that they can only be used in the stative

and the continuous tenses. The particle *no* does not occur with pronoun subjects. In Table 3, I tried to list the various first person forms that I encountered during my field work in Fuuta Tooro. The areas mentioned in this table are among the localities I visited. It is hoped that this will provide a better understanding of the geographical distribution of individual subject pronouns which have also been arranged according to the frequency of their occurrence.

The negative past

Tense-suffixes

Active: FJ: -aali
 FT: -aani

Middle: -aaki

Passive: -aaka

Examples: (Fuuta Jaloo/Fuuta Tooro)

Active

| | | | | |
|-----------|-------|---------------------|------|------------------------|
| 1 sg | Mi | loot-aali/loot-aani | Umar | I have not washed Umar |
| 2 sg | A | " | | you " |
| 3 sg | O | " | | he has not " |
| 1 pl incl | En/En | " | | we have not " |
| 1 pl excl | | " | | we " |
| 2 pl | On/on | " | | you " |
| 3 pl | Be | " | | they " |

Middle

| | | |
|-----------|--------------|-----------------------|
| 1 sg | Mi loot-aaki | I have not had a wash |
| 2 sg | A " | you " |
| 3 sg | O " | he has not " |
| 1 pl incl | En/En " | we have not " |
| 1 pl excl | Men/Men " | we " |
| 2 pl | On/on " | you " |
| 3 pl | Be | they " |

Passive

| | | |
|-----------|--------------|------------------------|
| 1 sg | Mi loot-aaka | I have not been washed |
| 2 sg | A " | you " |
| 3 sg | O " | he has not " |
| 1 pl incl | En/En " | We have not " |
| 1 pl excl | Men/Men " | we " |
| 2 pl | On/On " | you " |
| 3 pl | Be " | they " |

7.24. This tense is the negative counterpart of the general past, the relative past and sometimes the ~~s~~ative, e.g.

a) Counterpart of the General PastFuuta Jaloo

| | |
|--|---|
| -Ko mi seedee ngo'o junngo <u>taam-aaki</u> juuli; ko mi seedee ngo'o junngo <u>def-aaki</u> e suddiido janano ⁽⁷⁾ (middle voice) | "I am witness that his hand never used sand or stones for ablutions; I can witness that this hand never set itself on other people's wives." |
|--|---|

(7) Ibid. p.42

-Mi yi'-aali njaareendi "I have not seen the sand"
ndin (active)

Fuuta Tooro

Yirlaabe Wurosogi bee mbi'aa "The Yirlaa e from Wurosogi
yirlaabe-Alla-yidi fii ko were nicknamed the
be kaɓ-aaka, pellondir-aani God-loved Yirlaabe since
e safalbe koo (passive voice) they did not have to
fight the Mbors"

Woni jiyaado ko mbo hay "A jiyaado is a slave that
gooto sood-aani, hay was neither bought nor
gooto fell-aani conquered through war"
(active voice)

b) Counterpart of the Relative Past

Fuuta Jaloo

Karamoko Alfaa o jaɓ-aali "Karamoko Alfaa refused
fellude (active) to fight"

o nelt-aali o jaaraama o "He did not send back to
wi'-aali huunde (active) say thank you"

c) Counterpart of the stative

Fuuta Jaloo

Almaami Sori-Mawdo wi'i "Almaami Sori-Mawdo told
bibbe mun ben :Fuuta his children :Fuuta does
faal-aaka wallude en (passive) want to help us".

Fuuta Tooro

Hay so mi wonnd-aani e "Even when I am not with you,
 ma tawata ko mbede yi'a I still see you in my mind".
 ma (active)

- 7.25. The ensuing examples show that this tense can be subsequent to a number of tenses including the negative past itself.

a) Relative PastFuuta Jaloo

Janngi faam-aali,
 Faami janng-aali,
 janng-aali faam-aali,
 Ko bee tato wonoyta
 sabaabe ndii leydi.

"The one who studied without
 understanding ,

The one who understood without
 studying ,

The one who did not study and
 did not understand ,

These are the three people that
 will be the cause of this
 country's downfall."

b) Negative PastFuuta Tooro

Min, mi fiɓ-aani mi
fiɓan-aaka

"I don't make any charms and I
 don't have any made".

THE NEGATIVE FUTURE/HABITUAL

Active: -ataa

Middle: -ataako

Passive: -etaake

Examples of their use: (Fuuta Jaloo/Fuuta Tooro)Active

| | | |
|-----------|-------------------|--------------------|
| 1 sg | Mi loot-ataa Umar | I shan't wash Umar |
| 2 sg | A " | you won't " |
| 3 sg | O " | he " |
| 1 pl incl | En/En " | we " |
| 1 pl excl | Men/Men " | we " |
| 2 pl | On/On " | you " |
| 3 pl | Be " | they " |

Middle

| | | |
|-----------|----------------|----------------------|
| 1 sg | Mi loot-ataako | I shan't have a wash |
| 2 sg | A " | you won't " |
| 3 sg | O " | he " |
| 1 pl incl | En/En " | we " |
| 1 pl excl | Men/Men " | we " |
| 2 pl | On/On " | you " |
| 3 pl | Be " | they " |

Passive

| | | |
|-----------|----------------|--------------------|
| 1 sg | Mi loot-etaake | I shan't be washed |
| 2 sg | A " | you won't " |
| 3 sg | O " | he " |
| 1 pl incl | En/En " | we " |

| | | | |
|-----------|---------|-------------|--------------------|
| 1 pl excl | Meŋ/Men | loot-etaake | we won't be washed |
| 2 pl | On/On | " | you " |
| 3 pl | Be | " | they " |

7.26. This tense is the negative counterpart of all the future tenses. Like other future tenses it has both future and habitual meanings.

a) Future meaning

Fuuta Jaloo

Si hida ngordi a dog-ataa
baaba-gootoobe maa araa
gaa (active) "If you are brave you will
not run away from your
brothers and come here"

Lando on wi'i: mi accit-
ataa on haa ko arata
(active) "The king said: I shan't release
you till next year".

A immoto kaa a imm-otaako?
(Middle) "Will you get up or not?"

Si a warii yamma aaden e
ben makko on weld-ataa
(active) "If you kill a person's father
and his mother, you will not
get on with him".

Fuuta Tooro

Kala kabdo e sayku Umar
o mal-etaake (passive) "Whoever fights Sayku Umar
will not be happy".

Debbo oo wii kanyum
human-taake so wonaa "The woman said that the only
person to marry her is the one

nyalludo sanje tawa
daldugal mum saamaani
(passive)

who will spend a day weaving
without dropping his needle".

b) Habitual meaning

Fuuta Jaloo

Ko oo wi'etee Iburaahiimi
Sori kanjaa mo muus-etaake,
lando mo dogid-ataa e
dogoobe, Kanjaa mo yilt-
otaako (passive, middle)

"This is the man who is called
Iburaahiima Sori Kanjaa who
does not experience any pain, a
king who does not flee
with the panic-stricken
fugitives, Kanjaa-who-never-
retreats".

Fuuta Tooro

gorko oo so arii leloyaade
comci mum tan jogotoo, o
wayl-ataako (middle)

"When bed-time comes the man
keeps his clothes on, he
does not get changed".

- 7.27. The following example illustrates the use of the negative future in relative adverbial clauses.

Fuuta Tooro

Yimbe Misiraa bee ngari
ina lamndoo Sayku Umaar;
gooto heen fof ina
lamndoo ko goddo lamnd-
otaako mo (middle)

"The people of Misiraa started
interrogating Sayku Umaar,
each of them asking questions
that the other one would not
ask".

Wadi Sayko Umaar wirt-
ataako wuro walla jeere
 o teddinaaka ko o yidaa
 yawaare te o addataa
 yawaare (Middle)

"The reason why Sayko Umaar
 will not reach a village
 or a town without getting a
 warm welcome is that he does
 not like disregarding other
 people".

THE EMPHATIC NEGATIVE

Active: -aa

Examples

Active voice only

| | | | | | | | |
|-----------|-----------------|---------|----|------|----------------|------|-----|
| 1 sg | Mi | loot-aa | mo | I | <u>did not</u> | wash | him |
| 2 sg | A | " | | you | " | | |
| 3 sg | O | " | | he | " | | |
| 1 pl incl | E _n | " | | we | " | | |
| 1 pl excl | Me _n | " | | we | " | | |
| 2 pl | O _n | " | | you | " | | |
| 3 pl | Be | " | | they | " | | |

7.28. This tense is limited to the active voice. Arnott⁽⁸⁾
 treats this tense as the negative of quality. He
 reports that radicals found in this tense refer to
 the acquisition (or possession) of a quality of
 some kind. While many examples can be found in support
 of his statement, the result of my findings point to
 the fact that the central meaning is emphasis. It is

(8) Arnott, D.W. 1970 note 2 p.264 p.296-298

for this reason that I have preferred to call the tense the emphatic negative.

7.29. The following examples will illustrate the various uses of the emphatic negative.

a) Negative counterpart of the stative:

Fuuta Tooro

Mi suus-aa haalde

"I don't dare talk"

Mi annd-aa oo gorko no
wi'etee.

"I don't know this man's name".

Mi waaw-aa naamnude
ma e SAED

"I can't get you into SAED".

b) Emphatic Negative statement

Fuuta Tooro

Waawbe habde e Sayku Umaar
bee yo njow juude mum; Be
mbaaw-aa bee mbaaw-aa.

Yimbe bee fof mbii: En
mbaaw-aa habde e Sayku Umaar
koy.

"Let all those who can fight
Sayku Umaar raise their
hands; never mind for those
who can't. All the people
replied: We can't fight
Sayku Umaar."

Mi feer-aa jantaneede
Paris

"I've never been told about
Paris".

Fuuta Jaloo

Oᵇ toonyii laᵇ sabuna mi
wi'-aa mi wad-aa hay
 huunde

"You accused me wrongly because
 I never said or did anything".

Alfaa Saaliḥu wuur-aa

"Alfaa Saaliḥu is dead".

- 7.30. This tense is also used after a number of particles, as exemplified below.

Fuuta Tooro

Nedḍo so yid-aa yawaare
 addataa yawaare

"A person that does not
 want to be disregarded will
 not disregard other people".

Mate won-aa ndiya ngaari
 njeeytaa?

"Isn't it the bull over
 there that you are selling?"

- 7.31. It can also be used without subject. It might be argued that 'won-aa' is an impersonal form meaning 'it is not'.

Fuuta Tooro

Gorko galle won-aa ḍo
 welaa fof resa, won-aa
 ḍo yidi fof resa

"Being a family man does not
 mean marrying anybody anywhere."

Ko Alla wadi koo, kanyum
wadi won-aa enen mbelaa

"God is the only one
responsible for his deeds;
We can't do anything against
him".

Hammadi-Soogi wii Hammadi-
Satigi ngeedoo nagge
won-aa wareteenge

"Hammadi-Soogi said to
Hammadi Satigi, this cow
is not for slaughtering".

Al-aa koo dabbata o ronka
hebde

"He will not set out for anything
without getting it".

Fuuta Jaloo

duud-aa nde o ari ndaarude
lan mi fanndaaki mo

"There are few occasions when
he came to see me and I didn't
give him anything".

RELATIVE TENSES

The Relative Past

Active: -i

Middle: -ii

Passive: -aa

Table 4. The relative past and the relative future in the two dialects.

| 1 sg | loot-u-mi Umar | I washed Umar |
| 2 sg | loot-u- ^u daa Umar | you washed Umar |
| 3 sg | O loot-i Umar | he " |
| 1 pl incl | loot-u-den/loot-u-den Umar | we " |
| 1 pl excl | Men/Men loot-i Umar | we " |
| 2 pl | loot-u-don/loot-u-don Umar | you " |
| 3 pl | Be loot-i Umar | they " |

Middle

| | | |
|-----------|--------------------------|--------------|
| 1 sg | loot-ii-mi | I had a wash |
| 2 sg | loot-i- ^u daa | you " |
| 3 sg | O loot-ii | he " |
| 1 pl incl | loot-i-den/loot-i-den | we " |
| 1 pl excl | Men/Men loot-ii | we " |
| 2 pl | loot-i-don/loot-i-don | you " |
| 3 pl | Be loot-ii | we " |

Passive

| | | |
|-----------|--|--------------|
| 1 sg | loot-aa-mi | I was washed |
| 2 sg | loot- ^u a- ^u daa | you were " |
| 3 sg | O loot-aa | he was " |
| 1 pl incl | loot-a-den/loot-a-den | we were " |
| 1 pl excl | Men/Men loot-aa | we were " |
| 2 pl | loot-a-don/loot-a-don | you were " |
| 3 pl | Be loot-aa | they were " |

7.32. As mentioned earlier, the relative past is particularly common in narrative accounts, e.g.

Fuuta Jaloo

Marjugu town-i kaafa kan.
 Almaami saadu townit-i
 juŋŋo mu'urŋ ŋoŋ.
 Ko ɓaawo duŋ non Alfaa
 Saalihu hoot-i Daara.
 Soriyaabe hewtitit-ii
 afo Moodi Haamidu Bamba
 Parawii, takko Jolaake.
 Be fell-i mo ga hoore
 puccube lib-i; be wi'-i
 be yottanike almaami
 Saadu

"Marjugu raised his sword.
 Almaami Saadu raised his
 hand again... It was
 after that that Alfaa
 Saalihu went back to
 Daara. The Soriyaabe
 caught up Moodi Haamidu
 Bamba Parawii's son near
 Jolaake. They shot him dead
 from his horse and claimed
 that they had revenged
 Almaami Saadu."

Fuuta Tooro

Gorko oo jaak-i no feewi

"The Man was very worried".

Waaŋi gooto meed-ii ummaade
wi'-i no yaha no jaŋngoya
 pulaar. O umm-ii omo yaha.
 O ar-i haa e wuro o taw-i
 doon waaŋi gooto ina
 joodii e hakkunde yimbe
 tan o hettin-i dum.

"(Once upon a time) there
 was a man who set out to
 study Pulaar(lit. he said
 he is going he is learning
 Pulaar). He went away (lit.
 he got up and is going).
 He came to a village and
 found a man sitting in a
 crowd; he recognised the
 man".

- 7.33. This tense is also used in combination with certain particles to introduce relative and relative adverbial clauses.

a) Relative clauses:Fuuta Jaloo:

Ndaar ledde de add-ufaa den "Look at the wood that
you brought over".

addu kaalisi' mo o jonn-i "Hand me the money that
maa on he gave you".

(rawaandu) ndu jey-mi "My dog (lit. the dog I
ndu buri mawnude ndu yi-i own) is bigger than the
mi hanke ndu one I saw yesterday."

Fuuta Tooro:

E oon saha wi'aaka cukalel "At that time it had not
jibini hoore mum, ko wel-aa been said that a child is
fof watta under no authority (lit.
that a child gave birth
to himself) ⁽⁹⁾ and that
he could do whatever he
wanted".

b) Relative adverbial clauses:

In this case the clause is often the object of the verb.

Fuuta Jaloo

Mi anndaa nde o nanng-aa "I don't know when he was
arrested".

(9) The informant is implying here that a child should accept his parents' authority since it was thanks to them (and God) that he came to the world.

Miɗo anndi ka o suud-ii "I know where he is hiding".

- 7.34. Furthermore the relative past is often used in statements, with or without ko, where the emphasis is on an element in the sentence other than the verbal radical. e.g.

Fuuta Jaloo:

Ko kaalisi okk-aa-mi "It was money that I was given".

Ko hannde ndi maay-i "It is today that it died".

Fuuta Tooro:

Miin, Malal Cekel, wi-i noon, jedduɗo woo yo oon jibine mi yi'a ɗum "It is I, Malal Cekel, who said so, I should like to know if there is anyone who disagrees with it (lit. the one that disagreed, let him be born and I see him).

Miidaa pulaar ngar-daa jaɗɗude saa iwii doo maa naftor ko feewi "You said that it is pulaar that you came to learn by the time you leave this place you will be fully satisfied."

Ko nguudoo Sood-aa hannde "It is this one (ie horse etc.) that was bought today".

Heccanki mbayr-u-mi
yiide mbo

"I have not seen him since
the day before yesterday
(lit. It is the day
before yesterday that I
stopped seeing him".

THE RELATIVE FUTURE

Active: -ata⁽¹⁰⁾

Middle: -otoo

Passive: -etee

- 7.35. The following Fuuta Tooro examples will illustrate both the subject-base and base-subject arrangements in the relative future (cf. table 4).

ACTIVE

| | | |
|-----------|--------------------------|---|
| 1 sg | ko janngo loot-an-mi nde | It is tomorrow I shall wash it (Calabash) |
| 2 sg | ko janngo loot-at-aa nde | It is tomorrow you will wash it (Calabash) |
| 3 sg | ko janngo o loot-ata | It is tomorrow he will wash it (Calabash) |
| 1 pl incl | ko janngo loot-et-en | It is tomorrow we shall wash it (Calabash) |
| 1 pl excl | ko janngo men loot-at-a | It is tomorrow we shall wash it (Calabash) |
| 2 pl | ko janngo loot-ot-on | It is tomorrow you will wash it (Calabash) |

3 pl. ko jaɲŋgo ɓe loot-ata It is tomorrow they will
wash it (Calabash)

MIDDLE

| | | | | |
|-----------|-----------|---------------|----------------|----------------|
| 1 sg | ko jaɲŋgo | loot-otoo-mi | It is tomorrow | I shall wash |
| 2 sg | " | loot-oto-ɗaa | " | you will wash |
| 3 sg | " | o loot-otoo | " | he will wash |
| 1 pl incl | " | loot-oto-ɗen | " | we shall wash |
| 1 pl excl | " | men loot-otoo | " | we shall wash |
| 2 pl. | " | loot-oto-ɗon | " | you will wash |
| 3 pl. | " | ɓe loot-otoo | " | they will wash |

PASSIVE

| | | | | |
|-----------|-----------|--------------|----------------|---------------------|
| 1 sg | ko jaɲŋgo | loot-ete-mi | It is tomorrow | I shall be washed |
| 2 sg | " | loot-ete-ɗaa | " | I shall be washed |
| 3 sg | " | o loot-ete | " | he will be washed |
| 1 pl incl | " | loot-ete-ɗen | " | we shall be washed |
| 1 pl excl | " | men loot-ete | " | we shall be washed |
| 2 pl | " | loot-ete-ɗon | " | you will be washed |
| 3 pl | " | ɓe loot-ete | " | they will be washed |

7.36. I shall now attempt to analyse the various uses of the relative future in the hope that these will bring differences between the two tenses.

7.37. In relative clauses the relative future can be used with ko or other types of particles e.g.

a) Ko

Fuuta Jaloo

Ko pulaar men haal-ata
Ko ɗun men fini men tawi

"We speak Pulaar. It is the
language we were brought up in(lit.it

(10) As will be noticed these suffixes are only for subject-base arrangements. The full paradigm of the relative future suffixes is given in Table 4.

is Pulaar that we speak, It is that
that we woke up and found.)

Ko waawfo woo wonnd-etee

"Everybody loves a winner
(lit. It is he who won that
is stayed with)

Ko Aliyu nodd-ay-mi

"I am calling Aliyu (lit.
It is Aliyu that I am
calling)."

Fuuta Tooro

njɛwt-an-mi ko kabaaru
gaynaaka Fulbe

"I am talking about how
the Fulbe look after
their cattle (lit. I am
talking it is about Fulbe
herding)."

b) Other relative pronouns

Fuuta Tooro

Hollam nagge nge njeey-at-aa
ngee

"Show me the cow that you
are buying".

Fuuta Jaloo

Puccu ngu wadd-oto-daa ngu

"The horse that you are
going to mount".

Sawru ndu ittir-t-on
leemunne ndun

"The stick that you use to
pick oranges".

| | |
|--|---|
| Hudo ko <u>ndi nyaam-ata</u> janngo kon | "The grass that it (ie the bull) will eat tomorrow". |
| Loopal <u>ngal wicc-at-aa</u> mo ngal | "The mud that you will splash over him". |

c) The relative future is also used in relative adverbial clauses, introduced by *nde* 'when, by the time', *ka* 'at' etc.

(i) time (nde)

Fuuta Tooro

| | |
|-------------------------------------|--------------------------------------|
| Mi anndaa <u>nde</u> o <u>ar-ta</u> | "I don't know when he is coming". |
|-------------------------------------|--------------------------------------|

Fuuta Jaloo

| | |
|--|--|
| Fulbe tato e jaakaabe cappande tato e tato. <u>Nde wi'-etee</u> naange wulii tawi Fulbe ben gaynii habbude be. Kotoo Kanjuraa wullaani kono ndiyan yaltii <u>ka gite</u> ⁽¹¹⁾ . | "(Once upon a time) there were three Fulbe and thirty-three Jaahankes. By the time it was late morning the Fulbe had made all of them prisoners. (lit. had finished tying them). Big brother Kanjuraa did not cry but tears came out of his eyes (lit. water came out of his eyes)." |
|--|--|

(11) The Jahankes belong to the Manding group in West Africa. The above is part of a pack of stories young Fulbe from Fuuta Jaloo are told to ridicule the Jahankes that they regard as their cousins.

(ii) Place (ka)

Men Ɔotti ka wi'-etee
Saare Bese

"We met at a village which
is called Saare Bese".

Ka meem-at-aa mo don

"Where you usually touch him".

(iii) Manner (no)

No puccu waddor-tee

"How to mount a horse".

No laana awyir-tee

"How to ply a paddle".

7.38 The following examples illustrate its uses in interrogative sentences:

Fuuta Tooro

Ko mbii-t-on dum?

"What do you call this"

Ko o haal-ata?

"Which language does he
speak?"

Hoto loot-oto-daa?

"Where will you wash?"

Nde ngar-t-on wuro amen?

"When will you come to our
village?"

No be mbi'-etee?

"What are their names?"

7.39. It is well to make the following brief comment on future tense in the two dialects under consideration: Fuuta Tooro has three forms which correspond to Arnott's three future tense: General future, relative future and vague future. It should however be underlined that the distribution as to usage is not the same. As a matter of fact, Arnott gives the example from Gomba Kay, to baccel yarii bone, gel-janyguma (Arnott, 1970, p.275) "if a child suffers it will learn" where "it will learn" is in the vague future; whereas Fuuta Tooro has mbeewa so waalii e nder ladde boy nyaam-at dum "if a goat spends the night in the bush, a jackal will eat it" where the latter clause is in the general future. Fuuta Jaloo has only got two sets of forms which correspond to Arnott's ^{vague future}svand General and relative futures; all the meanings have to be distributed within these two sets of forms. On the other hand, as pointed out by previous linguists, future forms, with the exception of the vague future can also carry habitual meanings.

7.40. Some formal similarities and differences between the general future ^{and} the relative future have already been mentioned during the course of this chapter. I am going to make a very brief summary of the common and different features mentioned so far.

1) Common feature:

They both may indicate future/habitual actions.

2) Differences:

- a) In all the persons of the general future the subject precedes the verbal radical.
- b) For some persons in the relative future the subject follows the verbal radical.
- c) The general future can be used on its own whereas the relative future cannot.

7.4 L After analysing individual tenses of the indicative mood it is now appropriate to devote some space to the description of:

- suffixes found in one dialect only
- variations between the suffixes of the two dialects
- variations between the suffixes of individual dialects.

There is a suffix of the general past middle in Fuuta Tooro that does not exist in Fuuta Jaloo. It is the tense suffix -imaama used sometimes instead of the ordinary -iima, e.g.

| | | | | |
|------------------|---|-----------------|---|-----|
| o yaaf-imaama mi | } | he has forgiven | { | me |
| o yaaf-imaama ma | | | | you |
| o yaaf-imaama mo | | | | him |

It should be emphasized that this form is less frequently used than its counterpart, -iima.

7.42. The following variations are found between Fuuta Jaloo and Fuuta Tooro; they have been outlined without further illustrations since individual items have been sufficiently illustrated during the course of this description.

a) Tense-suffixes

1) General Past Middle:

Fuuta Jaloo: -ike

Fuuta Tooro: -iima

2) General Future Active

Fuuta Jaloo: -ay

Fuuta Tooro: -at

3) Negative Past Active

Fuuta Jaloo: -aali

Fuuta Tooro: -aani

4) Relative Future Active

7.43. There is a variation in the base-subject form of the first person singular.

Fuuta Jaloo: -ay-mi

Fuuta Tooro: -an-mi

- 7.44. There is a slight variation in the negative future, middle and passive in Fuuta Jaloo. In some instances these suffixes are -otaako and -etaako instead of the usual -ataako and -ataake commonly used in the two dialects.

CHAPTER 8: TENSES OF THE SUBJUNCTIVE MOOD AND FORMS
OF THE IMPERATIVE

Table 1. The primary tense in the two dialects

| ACTIVE | MIDDLE | PASSIVE |
|--------|--------|---------|
| yo+(u) | yo+o | yo+e |

Table 2. The secondary tense in the two dialects

| VOICE | Subject-base 1sg, 3sg, 1pl.excl., 3pl. | Base-subject |
|---------|---|---|
| ACTIVE | -a | 2sg -aa 1 pl. incl. -en/-en 2 pl. -on/-on |
| MIDDLE | -oo | 2 sg -o-daa 1 pl. incl. -o-den/-o-den 2 pl. -o-don/-o-den |
| PASSIVE | -ee | 2 sg -e-daa 1 pl. incl. -e-den/-eden 2 pl. -e-don |

- 8.1. This chapter will take a close look at the tenses of the subjunctive and the forms of the imperative. It is worth noting that, by way of contrast with the

indicative, neither the subjunctive nor the imperative can combine with the preterite element -no.

I. Tenses of the subjunctive mood

The subjunctive comprises two tenses:

- The primary tense
- The secondary tense

These two tenses seem to fit in well with Arnott's division of the verbal system of Pulaar/Fulfulde into general and relative tenses. For instance, like other general tenses, the primary tense can be used on its own; furthermore, in all its persons the subject pronoun precedes the verbal base, as illustrated by the following examples.

Subjunctive mood: Primary tense

Active Voice

| | |
|------------------|-----------------------------------|
| yo mi loot-u nde | "Let me wash it" (calabash etc.) |
| yo a loo-u nde | "Do wash it (calabash etc.) |
| " o " | "Let him wash it" (calabash etc.) |
| " en " | "Let us wash it" (") |
| " men " | "Let us wash it" (") |
| " on " | "Do wash it" (") |
| " be " | "Let them wash it" (") |

Middle Voice

| | |
|--------------|----------------------|
| yo mi loot-o | "Let me have a wash" |
| yo a " | "Do have a wash" |

| | | |
|-------|--------|------------------------|
| yo o | loot-o | "Let him have a wash" |
| " en | " | "Let us have a wash" |
| " meŋ | " | "Let us have a wash" |
| " oŋ | " | "Do have a wash" |
| " be | " | "Let them have a wash" |

Passive Voice

| | | |
|-------|--------|----------------------|
| yo mi | loot-e | "Let me be washed" |
| " a | " | "You be washed" |
| " o | " | "Let him be washed" |
| " en | " | "Let us be washed" |
| " meŋ | " | "Let us be washed" |
| " oŋ | " | "You be washed" |
| " be | " | "Let them be washed" |

As a matter of contrast, the secondary subjunctive has got a lot of similarities with relative tenses (ie relative past and relative future). It is almost always dependent upon either particles (such as maa below) or other clauses. Besides, like other relative tenses, it has both subject-base and base-subject arrangements in its tense paradigm, e.g.

Subjunctive mood: Secondary tense

Active Voice

| | | |
|---------|-------------|------------------|
| maa mi | loot-a nde | "I must wash it" |
| maa | loot-aa nde | "You ... " |
| maa o | loot-a " | "he ... " |
| maa | loot-en " | "we ... " |
| maa meŋ | loot-a " | "we ... " |

| | |
|-------------------|--------------------|
| maa loot-onj nde | "You must wash it" |
| maa be loot-a nde | "They ... " |

Middle Voice

| | |
|------------------|----------------------|
| maa mi loot-oo | "I must have a wash" |
| maa loot-o-faa | "You ... " |
| maa o loot-oo | "he ... " |
| maa loot-o-denj | "we ... " |
| maa menj loot-oo | "we ... " |
| maa loot-o-donj | "you ... " |
| maa be loot-oo | "they ... " |

Passive Voice

| | |
|------------------|--------------------|
| Maa mi loot-ee | "I must be washed" |
| maa loot-e-faa | "you ... " |
| maa o loot-ee | "he ... " |
| maa loot-e-denj | "we ... " |
| maa menj loot-ee | "we ... " |
| maa loot-e-donj | "you ... " |
| maa be loot-ee | "they ... " |

- 8.2. As regards terms, however, I have preferred to use "primary" and "secondary" because by so doing I can indicate the similarity with "general" and "relative" tenses and, at the same time point out the differences, including the fact that the secondary subjunctive can be used on its own and that its first person singular is not inverted.⁽¹⁾

(1) I am indebted to Professor D.W. Arnott for drawing my attention to the above differences between relative tenses and the secondary subjunctive.

A. The primary tense

- 8.3. Yo has been treated as a tied particle, for the positive clause. It can only be used with the primary tense. From a semantic view point the meanings of this tense can be summarised as follows: The primary subjunctive expresses a desire - positive or negative (fear, prohibition), direct or indirect.
- 8.4. When used on its own, the primary tense has either desiderative meaning or it expresses indirect command (ie. a command made through some third party) e.g.

Fuuta Jaloo

| | |
|--|---|
| <u>Yo aaden won-u</u> haaloowo goonga (active voice) | "Let a person speak the truth". |
| <u>yo be ar</u> jooni (active voice) | "Let them come now" |
| <u>yo Alla yurm-e</u> mo (passive) | "May God pity him" |
| <u>Yo Alla yaaf-o</u> ma (middle) | "May God have mercy on you" |
| Juldo fow <u>yo munny-o</u> juldo fow <u>yo nund-u</u> (middle) | "Let every Mbslem be patient; let every Mbslem be honest" |

- 8.5. It is useful to point out here that a large number of the

forms that Arnott treated as belonging to the desiderative tense in Gomba have exact parallels here. This is one of the reasons why I have found it unnecessary to set up a separate desiderative tense since, for the two dialects under consideration, there are no separate forms.

- 8.6. The primary tense can also be used in the main clause of a sentence with subordinate clauses, as in these Fuuta Jaloo examples:

| | |
|---------------------------------|------------------------|
| si laamu ngun sokay en | "If the government is |
| <u>yo ngu sok-u en</u> (active) | going to arrest us let |
| | it do so". |

| | |
|------------------------------------|---------------------------|
| si on foolaama <u>yo be faab-o</u> | "If you are defeated, let |
| on (middle) | them help you". |

| | |
|---------------------------|-------------------------|
| Bayri mayde nden tultataa | "Since death will come, |
| <u>yo nde ar</u> (active) | let it do so". |

- 8.7. The primary tense is found in subordinate clauses such as the following:-

(i) as an object clause after the verbs wi'ude innude "to say", toraade "to beg", maakude "to day", yidude "to want", faaleede "to desire", du'aade "to bless", hulude "to fear", hakkilande "to take care", hadude "to prevent", nelude "to send", nyaagaade "to request" (but see also 8.20).

Fuuta Jaloo

Kotoo, neene wi'i yo a ar
(active)

"Big brother, Mum wants to see you" (lit. Big brother, mum says that you should come).

Innaa yo o imm-o o habida
e maɓɓe (middle)

"He was told to get up and fight them (lit. It was said that he should get up and fight with them)"

Lando on nuli yo be sok-e
(passive)

"The king sent for them to be arrested (lit. The king sent that they should be arrested)

o torii be yo be okkor mo
ko o nyaama (active)

"He asked them to give him something to eat. (lit. He asked them that they should give him something to eat)"

Maakaa yo gujjo on dumb-e
(passive)

"The thief was ordered to be tied up (lit. It was said that the thief should be tied up)"

Fuuta Tooro

Almaami Fuuta neli koolaado
mum yo yaa haa yi'a samba
Nguma.... Nelaado oo arti
haalani almaami oo

"The King of Fuuta Tooro told his confidant to go and find Saamba Nguma (lit. The King of Fuuta sent his

nyaagude sambia Nguma,
yo o yamir-e ebe
 taccude leydi almaami
 (active; passive)

confidant that he should go until he sees Sambia Nguma) .. The Messenger returned and told the king about Sambia Nguma's intention to cross the former's territory (lit. The messenger returned and told the king about Sambia Nguma's request that he should be informed that they are crossing the king's territory)"

Laamu nguu hokki men
 maaro wii yo men ngaaw
 (active)

"The government gave us some rice for sowing (lit. The government gave us rice and said that we may sow)"

Ma mi wii faatumata Sambia
 Suleymaana yo o dacc-u haa
 hiira nde o fudfoo yaade
 (active)

"I shall tell Faatumata Sambia Suleymaana to wait till night fall before she goes. (lit. I shall tell Faatumata Sambia Suleymaana that she should wait till night fall before she starts to go)"

Kumaandan wiino yo Juude
 Benke reenoye wata
 safalbe lummbu⁽²⁾
 ngara ena njana e Fuuta
 (passive)

"The District Commissioner had ordered a watch over the river Juude Benke in order to prevent the Mbors from attacking Fuuta Tooro (lit. The District Commissioner

had said that Juude Benke should be watched not- the Moors- cross, come are attacking Fuuta)"

(ii) Purpose Clauses

The only examples that I have found so far are introduced by the particle fii "in order that, for" e.g.

Fuuta Jaloo

Sebbe ben fow dogi fii yo
be laaw-o jeyal Fuuta
(middle)

"All the Mandings fled in order to escape the rule of the Fulbe (lit. All the Mandings fled in order that they may escape Fuuta ownership)"

O artiraa fii yo o
laam-o (middle)

"He was brought back in order to be made a king"

Fuuta Tooro

Heeferbe bee njidi wadde
feere fii yo be nyif-u
fii diina gila dum
fuddaami (active)

"The pagans wanted to destroy Islam even before it started. (lit. The pagans wanted to do a trick in order to extinguish everything about Islam from the time when it has not started)"

(2) The primary subjunctive is used here after wata and this clause will be considered at a later stage in this chapter.

- 8.8. The negative counterpart of the primary tense is obtained by replacing the particle yo with the negative particle wota and maintaining the same suffixes; thus the negative counterparts of the examples under 8.7. (i) will be as follows:-

Fuuta Jaloo

Kotoo, neene wi'i wota a ar (active) "Big brother, mum said you shouldn't come"

Be maaki wota o loot-e (passive) "They said that he shouldn't be washed"

Fuuta Tooro

Almaami Fuuta wii koolaado mum wota o yaa.. (active) "The King of Fuuta said to his confidant that he shouldn't go..."

Laamu ngu wii wota men ngaaw maaro ko (active) "The government said that we shouldn't sow the rice"

Instances of negative counterparts where the primary subjunctive is used on its own are (Fuuta Jaloo):

Wota o ar (active) "Don't let him come"

Wota o nyaam-u (active) "Don't let him eat"

Wota be jood^f-o (middle) "Don't let them sit down"

Wota be waal-o (middle) "Don't let them lie down"

Wota di nyaam-e (passive) "Don't let them be eaten"

Wota de nanng-e (passive) "Don't let them be caught"

B. The Secondary tense of the subjunctive

8.9. Before going through the usages of the secondary tense it is worth mentioning again that the subject pronoun of its first person singular form is not inverted, in contrast with the relative tenses; other persons are inverted as with the relative tenses.

8.10. I shall now go on to describe the various uses of the secondary tense with or without an introductory particle.

I After an introductory particle

(i) After the particle maa

8.11 Combined with this particle, the secondary tense expresses obligation or logical necessity e.g.

Fuuta Tooro

| | |
|---|---|
| <p>Ko tampere tan min ndanyi e gese hee. No wadi heen gese de naataani bom. Kono laamu nguu wii tan ko <u>maa</u> maaro koo fow <u>yob-ee</u> (passive)</p> | <p>"We only wasted our energies in those fields. (lit. It is only tiredness that we got in those fields). Some fields did not produce anything at all. But still the govern- ment ordered us to repay the rice. (lit. But all, the government said only that the rice must be paid back)"</p> |
|---|---|

(for further examples of this form, please see the paradigm on page 219)

(ii) After the particle ko

- 8.12. The secondary tense occurs equally with the particle ko which introduces relative clauses, e.g.

Fuuta Jaloo

Mi alaa ko mi nyaam-a
(active)

"I have nothing to eat
(lit. I have nothing that
I may eat)"

Hida jogii ko hiIn-odaa
e dee balde (middle)

"You have got something to
worry about these days
(lit. you've got what you
may worry about these
days)"

Himo yoobii ko yar-en
(active)

"He has brought a drink
for us. (lit. he has brought
what we may drink)"

(iii) After the particle haa

- 8.13. In this case the secondary tense occurs in temporal clauses, e.g.

Fuuta Jaloo

Saare woo saare nde hewtuɗaa "Whichever village you

haa naat-aa Kaasamaasi,
a taway don Fulbe
(active)

come to from here to
Casamance (lit. Any village
that you reach until you
enter Casamance), you are
bound to meet Fulbe"

O wi'i: mi accataa on
haa haal-on (active)

"He said: I shan't let you
speak (lit. I shall leave
you until you speak)"

Halfineŋ mo biibe me'eŋ beŋ
haa art-eŋ (active)

"Let's leave our children
with him until our return
(lit. let's leave our
children with him until
we return)"

Mi haalantaa ma haa art-aa
(active)

"I shan't tell you until
you return"

Fuuta Tooro

been ŋgoni yimbe be
pawjataa feere maa haa
kaljit-aa, ngar-a mbi-a
no ittu ma e dum (active)

"Those are the people who
try to make you go back
on your decisions (lit.
those are the people who,
you think over something
until you finish, come and
say they are making you
change your mind over it)"

-Alla oo wiino: Gollan
aduna ma haa mbay-aa no
a jogoraani maayde ni,
kaa guuroowo tan,

"God had said: Work for this
world as if you will never
die (lit. work for your world
until you resemble someone

ngollon-aa laakare ma
 haa mbay-aa o neddo
 jogordo maayde ni
 (active)

who is not going to die,
 someone who will live for
 ever) and work for heaven
 as if you are going to
 die very soon (lit. until
 you look like someone
 who is about to die)"

Almaami Fuuta neli koolaado
 mum yo o yah haa o yi'-a
 Samba Nguma, haa o annd-a
 hombo woni oo (active)

"The king of Fuuta Tooro
 ordered his confidant to
 go and find out who Samba
 Nguma was (lit. The king of
 Fuuta sent his trusted man
 that he should go until
 he sees Samba Nguma until
 he knows who he is)"

Si a addii kanne maa a
 haaldat e baylo. So
 on nanondirii, aan baylo
 oo, mbadaa⁽³⁾ kanne oo
 jayngol kaaynaa⁽³⁾ haa
 wont-a ndiyam (active)

"When you bring your gold
 you talk the price over
 with the goldsmith. If
 you agree (on the price) you,
 the goldsmith, take the gold
 and melt it (lit. if you
 agree, you, the goldsmith,
 put the gold in the fire and
 melt it until it becomes
 water)"

(also see 8.13 for further examples with haa)

(3) please see 8.18. for the use of the secondary subjunctive
 in consecutive sequences.

(iv) After si in Fuuta Jaloo and nde in Fuuta Tooro

- 8.14. It is interesting to note the use of the secondary tense after si meaning "before" in Fuuta Jaloo. It introduces a temporal clause in this case and it can be replaced by the particle nde in Fuuta Tooro. In both dialects, si, or so, usually means "if" and requires general tenses.

| | |
|-----------------------------|----------------------------|
| Feere alaa, o laamoto | "He will be a king before |
| <u>si o maay-a</u> (active) | he dies (lit. there is no |
| | way - out of it -, he will |
| | rule before he dies)" |

Fuuta Tooro

| | |
|----------------------------------|-------------------------------|
| Joodoto haa jamma <u>nde o</u> | "He will wait till night fall |
| <u>fudd-oo</u> yobtaade (middle) | before he takes his revenge" |

(v) After the particles ka in Fuuta Jaloo and to in Fuuta Tooro

- 8.15. This tense is also used in subject clauses introduced by ka in Fuuta Jaloo and to in Fuuta Tooro after such verbs as haanude, fotude "to be proper".

Fuuta Jaloo

| | |
|------------------------------|-----------------------------|
| No haani <u>ka o laam-oo</u> | "It is proper for him to be |
| (middle) | a king (lit. It is proper |
| | that he should be a king)" |

Fotaa ka yenn-aa mo
(active)

"You shouldn't abuse him
(lit. It is not proper
for you to abuse him)"

Fuuta Tooro

Ina haani to mbi'-en
mbo baaba (active)

"We should call him father
(lit. It is proper that we
should call him father)"

Ina foti to be teddin-a
mbo (active)

"They should respect him
(lit. It is proper that
they should respect him)."

- 8.16. Other instances of the use of the secondary subjunctive after ka in Fuuta Jaloo or to in Fuuta Tooro when it introduces a locative clause,

Fuuta Jaloo

Mi alaa ka mi nyaam-a
(active)

"I have nowhere to eat (lit.
I have nowhere I may eat)"

Mi do jogii kaminyawi-oo
kaalisi (middle)

"I have somewhere to borrow
money (lit. I have somewhere
I may borrow money)"

Fuuta Tooro

A da jogii to mbaa-aa dum
(active)

"Do you have anywhere to
put it"

En kebii to ngoyt-oden "We have got somewhere to
(middle) complain (lit. we have
got somewhere we may complain)"

(vi) After the particle sakko (saka in Fuuta Tooro)

8.17. This particle means "let alone" and is found in both dialects e.g.

Mi anndaa ma sakko mi "I don't know you, let alone
okk-a maa bidde an debbo should I give you my daughter"
(active)

Oŋ jeyaa mo sakko piy-on "You are not his parents
mo (active) let alone hit him"

O yaraa beere sakko o "He did not drink any alcohol,
siwr-a (active) let alone get drunk"

Fuuta Tooro

A jaŋŋaa saka laam-odaa "He was not educated (lit.
(middle) you did not read) let alone
be a king (lit. let alone
you should rule)"

Be ngonaani jul be "They are no Moslems much
saka be naat-a less should they go to heaven"
aljanna (active)

II Without any introductory particle

(i) In a series of clauses

8.18. When the secondary tense is used in a series of clauses it denotes habitual action. It is then found without any introductory particle but it is dependent on a previous clause. This meaning applies both to clauses in consecutive sequences and to main clauses in sentences containing subordinate clauses e.g.

a) Simple clauses in consecutive sequences

Fuuta Jaloo

O huudu be. Be wilit-a
 haa be duuda⁽⁴⁾ buy,
 bade ar-a naat-a e
 maβbe yew-a be⁽⁵⁾
 (active)

"He did curse them.

They grew into a large community an outbreak of smallpox would decimate them (lit. He did curse them. They grow until they are numerous, an outbreak of smallpox comes, gets into them and decimates them)"

(but see also 8.27 for the use of the secondary subjunctive as a subsequent clause in serial sentences)

b) Main clauses containing subordinate clauses, such as the following cases in Fuuta Tooro.

| | |
|---------------------------------------|-------------------------------|
| kaabaaru demal. So | "How we grow rice. When |
| ndunngu arii min kebbinat | the rains fall we fill |
| gese dee ndiyam. So gese | our fields with water. |
| dee keewii ndiyam <u>min</u> | When the fields are full |
| <u>mbad-a</u> juude amen <u>min</u> | of water we sow the rice |
| <u>ngaaw-a</u> maaro koo; <u>min</u> | with our hands (lit. when |
| <u>ngac-a</u> heen ndiyam | the fields are full of |
| dam e mder balde didi; | water we use our hands, we |
| <u>min mbad-a</u> derenaas, ndiyam | sow the rice); We leave |
| dam <u>yalt-a</u> . So ndiyam | it in the water for two days; |
| dam <u>yaltij min kiw-a</u> colli. | we (then) drain it out |
| So maaro koo fuddii e | (when the water has been |
| hudo, <u>min ndar-oo</u> , <u>min</u> | drained out) we scare |
| <u>naat-a</u> e gese hee <u>min</u> | the birds away. If the rice |
| <u>cuft-oo</u> hudo koo ... | grows with weeds we clean it |
| (active) | (lit. if the rice grows with |
| | grass we stand up, we get |
| | into the fields, we pick out |
| | the grass)" |

(ii) Adjunct-clauses

- 8.19. The secondary tense is also found in adjunct clauses where it often indicates a purpose (see also 8.27-28)

Fuuta Jaloo

| | |
|--------------------------------|--|
| -Aree <u>nyaam-on</u> (active) | "Come and eat (i.e. Come in order to eat)" |
|--------------------------------|--|

(4) "haa" requires the secondary tense and this clause is not under consideration here (cf. 8.15)

(5) Adapted from Sow, A.I., 1968, p.40.

-Cernaabe no winndude lekki "The priests are making him
o yar-a (active) some medicine to drink
 (i.e. some medicine for him to
 drink)

Fuuta Tooro

Banndel an, ha^d maa finde "Why don't you wake up and talk
njewt-en (active) to me, sweet love (lit. sweet
 love, why don't you wake up, we
 talk)"

(iii) Object clause

- 8.20. Although the most common usage after the verb yi'ude "to want" is the primary subjunctive (cf. 8.7.), I have encountered some examples in Fuuta Tooro where it is after the secondary tense.

Aali Ndaw yidi njaggondii-on "Aali Ndaw wants you to
 e makko, ligg-odon, ngond-on be united and work hand in
 ngon-on (middle, middle, hand with him (lit.
 middle, active) Aali Ndaw wants -that-
 you hold each other with
 him you work, you stay-
 together, you remain)"

O yidi maay-aa law "He wants you die early"

- 8.21. The following are the few cases where the secondary subjunctive is used on its own.

(iv) Interrogations

- 8.22. It is used in first or third persons, with or without the particle *na* at the end of the clause. It then refers to a request for permission.

| | |
|----------------------------------|---|
| Mi <u>ar-a</u> (na)? (active) | "Shall I come?" |
| o <u>loot-oo</u> (na)? (middle) | "Can he have a wash?" |
| Be <u>nyaam-a</u> (na)? (active) | "Can they eat (are they allowed to eat)?" |
| Mi <u>jood-oo</u> (na)? (active) | "Shall I sit down?" ⁽⁶⁾ |

(v) Direct command, injunction

- 8.23. The second person forms of the secondary tense are often used in Fuuta Jaloo to indicate a direct command with overtones of strong irritation e.g.

| | |
|---|--|
| <u>loot-aa</u> mo jooni jooni (active) | " <u>You</u> wash him right now" |
| <u>artir-on</u> di jooni (active) | " <u>You</u> bring them back right now!" |
| <u>joof-odaa</u> doŋ (middle) | " <u>You</u> sit there!" |

Periphrastic constructions are found in such situations in Fuuta Tooro.

(6) But see general future for other interrogative uses.

Mbiimi loot-aa mbo jooni "I said that you should
wash him now!"

(vi) Invitation

- 8.24. The first person plural inclusive of the secondary tense is used on its own in the active and middle voices. It then refers to an invitation or an exhortation and it is common to the two dialects. It can be regarded as the equivalent of the English construction with "let" e.g.

Fuuta Jaloo

yah-en ka lando on "Let's go the king's"

Nanng-en be (active) "Let's catch them"

Jood-o den/imm-o den/loot-
-o den (middle) "Let's sit down/stand up/
have a wash"

Fuuta Tooro

Yimbe bee mbii laamdo Fuuta "All the people said to
oo: En mbaaw-aa habde e the King of Fuuta Tooro:
Sayku Umaar; duum noon We can't fight Sayku Umaar;
ngopp-en mo (active) So let's leave him alone"

| | |
|---|---|
| <p>Sayku Umaar diisnii yimbe bee; o wii jooni noon en nduttat Jali Musaa to heeferbe walla en ngoppat mo doo e lislamm? Yimbe Fuuta Jaloo bee mbii: <u>ndutt-en</u> mo (active)</p> | <p>"Sayku Umaar addressed the people; he said: Shall I return Jali Musaa to the pagans or shall we leave him here in the midst of Islam. The people of Fuuta Jaloo said: Let's return him"</p> |
|---|---|

(vii) Introductory clauses

- 8.25. The secondary tense occurs in introductory clauses to set the scene in conversations e.g.

Fuuta Jaloo

| | |
|--|--|
| <p>Mi <u>haalan-a</u> maa godduŋ, si a sottii doŋ mi tayay teppere maa ndeŋ (active)</p> | <p>"I'll tell you something, if you move from there I'll chop your foot"</p> |
|--|--|

| | |
|--|---|
| <p>Mi <u>lannd-o</u> maa doo, ko honto wonno-doa haŋki? (middle)</p> | <p>"I'll ask you something, where were you yesterday?"</p> |
|--|---|

Fuuta Tooro

| | |
|---|---|
| <p><u>njaaf-odaa</u> mi won ko njidnoomi naamndaade ma (middle)</p> | <p>"Excuse me, I'd like to ask you something (lit. forgive me, there is something I had to ask you)"</p> |
|---|---|

Mi haal-a goonga, gaynaaka "To tell the truth, cattle
ittataa dewondiral (active) herding does not disunite
people"

(viii) Compound clauses

- 8.26. This tense is also found in compound clauses and the latter play the parts of compound nouns e.g.

Fuuta Jaloo

| | |
|---|--|
| <p>Ko Fulbe Fuuta wi'etee <u>nyaama-yawt-a</u> (active)</p> | <p>"It is the Fulbe of Fuuta Jaloo that are called nomads (lit. Those-who- eat-and-walk-on)"</p> |
|---|--|

Fuuta Tooro

| | |
|---|---|
| <p>Sakke-Toorobbe liggotoo ko <u>tayee-wulee</u>. Tayee-hulee dum woni pade cosaan so gaynaako wadii dum e koyngal so nagge dogii dadataa dum (passive)</p> | <p>"A Tukulor shoemaker makes shoes called ta ee-hulee (the-ones-that-were-cut- and-heated)they are traditional shoes. If a herdsman wears them he will not lose his cattle. (lit. a cow will not run faster than him)"</p> |
|---|---|

- 8.27. Sometimes the use of the secondary tense is prompted by the sequence of tenses. This tense is generally

used in second position in consecutive series,
after non-past tenses, the primary tense,
imperative and infinitive forms e.g.

(i) Subsequent to the general future

Fuuta Jaloo

Mi yahay Mi haalan-a mo "I'll go and tell him"
(active)

Mi yahay Makka mi feeny-a "I'll go to Mecca and
become a saint"

(ii) Vague future

Fuuta Tooro

Ma mi naat suudu makko "I'll go into his hut and
mi jood-oo (middle) sit down"

(iii) Negative future

Fuuta Jaloo

Be ar-ataa be nanng-ee "They will not come to be
be sok-ee (passive) arrested and sent to prison"

Karamokoobe winndantaa mo "The priests will not make
lekki o yar-a (active) any medicine for him to
drink"

Mi dogataa Baaba-gootoobe
an mi ar-a gaa (active)

"I shan't run away from
my half-brothers and come
here"

(iv) Relative future

Fuuta Tooro

Kaŋko jiyaaɗo oo
ko e ngaska
o ummotoo o fay-a e
weendu (active)

"The slave would leave his
cave and head for the
river"

(v) Continuous

Fuuta Jaloo

Awionji no dawa Dakaar
di waaloy-a Pari (active)

"Aeroplanes leave Dakar in
the morning and spend the
night in Paris"

Himo immaade o yaw-a
o itt-a leemmunne
(active)

"He is getting up to climb
and pick some oranges"

gurii ngi^ɗ no weyyiteede
o jooɗ-oo o fewt-a
funmaange (middle/active)

"The sheepskin is being
spread out for him to sit
on and face the East"

(vi) Primary tense

Fuuta Jaloo

yo Alla yurme mo yaaf-oo "May God have pity on him
mo (middle) and forgive him"

O wi'i yo men ar men hawr-a "He said that we should
o okkor-a men jawdi men meet for him to give us
nattor-a (active) some wealth to take back
with us"

(vii) Imperative forms

Ar taw-aa mo doo (active) "Come and find him here"

Yaltee senegaali yah-on "Leave Senegal and go to
Fuuta Jaloo (active) Fuuta Jaloo"

(viii) Infinitive forms

Fuuta Tooro

O Sali yaade o naamnd-oo "He refused to go and
be ko mbiidaa koo (middle) ask them what you said"

Laamdo oo ina yidi "The king wants to get on
jaggondirde e mon, wond-a with you, stay and work
e mon, liggod-a e with you"
mon (active)

- 8.28. Finally it is appropriate at this stage to point out that the use of the secondary tense as a subsequent

clause in serial sentence is very similar to that where it is regarded as an adjunct clause (cf 8.19.). It is interesting to note that the same thing occurs in the Gomba dialect where Arnott believes that "there is no formal difference between this usage, indicating simply a subsequent action, and the use of the subjunctive to indicate a purpose. Ambiguity is thus possible".⁽⁷⁾

- 8.29. The Negative counterpart of the secondary subjunctive is obtained either by periphrastic constructions or by using the negative future/habitual, e.g.

(i) Periphrastic constructions

| Positive | Negative | |
|----------------------------|-----------------------|---------------------|
| (active) Maa mi yah-a | Mi fot-aa yaade | "I must/mustn't go" |
| (middle) Maa njood-o-daa | a foot-aa joo aade | "You " sit down" |
| (passive) Maa be naamnd-ee | .be pot-aa naamndeede | "they " be asked" |

(ii) Negative Future/habitual

It is the counterpart of the habitual meanings of the secondary subjunctive e.g.

Fuuta Tooro (cf 8.18b for corresponding original examples)

(7) Arnott, D.W. 1970 p.314

(active) ...min mbattaa juude amen min ngaawa maaro

"We don't use our hands to sow rice"

(active) ...min ngaccataa maaro koo e ndiyam

"We don't leave the rice in the water"

(active) min kiwataa colli

"We don't scare birds away"

II Forms of the Imperative mood

8.30. These forms have a certain number of features in common with the tenses of the indicative and the subjunctive moods:

- (i) Like the latter two they have suffixes that could be regarded as tense-markers.
- (ii) Their radicals undergo the same patterns of initial consonant alternations wherever appropriate.
- (iii) They all combine with derivative infixes.

8.31. I have however preferred to treat the sets found under the imperative differently from those of the indicative and the subjunctive because my material points to major semantic and grammatical differences, some of which are given below: (cf table 3)

- (i) The forms of the imperative seem to be limited to the active and middle voices only.
- (ii) They do not have any subject pronouns.
- (iii) The forms of the imperative have different suffixes for the singular and the plural.

Table 3. Imperative forms

| Form | | Singular | Plural |
|-------------------------------------|---------|----------|--------|
| General Imperative | Active | - (u) | - ee |
| | Middle | - o | - ee |
| Polite Imperative (Fuuta Jaloo) | Active | - ii | - ee |
| | Middle) | - ii | - ee |
| Iterative imperative Fuuta Jaloo | Active | - atay | - etee |
| | Middle | - oto | - etee |

8.32. This mood comprises three forms, which have been called general imperative, polite imperative and iterative imperative. Each of these forms has a singular and a plural suffix, as shown in table 3.

- 8.33. The shapes of the suffixes are identical in the two voices in the following cases:

Singular suffixes and plural suffixes in the polite imperative. Singular (active and middle) -ii; plural (active and middle): -ee

Plural suffixes in the general and polite imperative; (active and middle) : -ee

The categories are distinguished in the sentences by the syntax even if the verbal forms are identical, e.g.:

Loot-ii nde! (Active) "Wash it"

Loot-ii! (middle) "Wash yourself"

A. The General Imperative

- 8.34. The general imperative indicates a command, an invitation e.g.

Fuuta Jaloo

o wii Musaa: Art-u jooni (active) "He said to Musaa: Come back straightaway"

Naatudo ka moodonj woo nanng-ee mo (active) "Whoever gets into your compound, arrest him"

Wall-ee lanj ko mi nyaama (active) "Give me something to eat please (lit. Give me what I may eat)"

Fuuta Tooro

Bann~~del~~ am ar wonnd-u e um "Sweet Love, stay with me"
(active)

Debbo dewiido ko nanando "A woman with good manners
gorko mum. Gorko oo wi'a is the one that pays attent-
mo nyall-u do, tan o ion to what her husband says.
nyalla doon. Gorko oo She does whatever he tells
wi'a mo jood-o do, ma o her to do. (lit. The
joodo doon. (active, husband would say to her:
middle) spend the day here, and
she spends the day there.
The husband says to her
sit down here, and
she sits there) "

Abdul Bookar wii safalbe "Abdul Bookar said to
bee: on nji'i lekki kiya the Mbors: Can you see
Ko doon Baaba Lii woni. that tree in the distance
Tawoy-ee mo doon; si o That's where Baaba Lii is.
foolii on mi ara; si o Go and find him; if he
foolaani on, si on njehii beats you I'll come; if
mbar-ee mo... (active) you beat him, kill him"

Debbo oo wii yimbe bee: "The woman said to the
Ngannd-ee koy safalbe people: The Mbors are
ngarii e mon (active) attacking you (lit.
Know that the Mbors are
attacking you)"

B. Polite Imperative

- 8.35. As indicated by its names, this form is used for polite requests. It is more tactful than the general imperative which may sound abrupt at times. Furthermore, to use certain forms under certain conditions is normal and to use others could be regarded as rude. A small son can use the general imperative to address his father and as he grows he will use the polite imperative singular and even plural at a later stage; from then on, to use the general imperative can be rude. This is just a simple illustration of a complicated system of address.

| | Singular | Plural | |
|--------|----------|---------|---------------------------------------|
| Active | Ar-ii | Ar-ee | "Please come" |
| | yah-ii | yah-ee | "Please go" |
| | dog-ii | dog-ee | "Please run" |
| | wowl-ii | wowl-ee | "Please talk" |
| Middle | loot-ii | loot-ee | "Please wash yourself/ yourselves" |
| | jood-ii | jood-ee | " ... sit down" |
| | waal-ii | waal-ee | " ... lie down" |
| | imm-ii | imm-ee | " ... stand up" |

- 8.36. It should however be pointed out that, when uttered in a sharp tone, this form may express irritation. On the other hand this form is restricted to Fuuta Jaloo only. Fuuta Tooro uses periphrastic constructions of the kind njafo-daa-mi ngar-aa "Please come".

C. Iterative Imperative

- 8.37. This form seems to occur only in Fuuta Jaloo. Fuuta Tooro uses periphrastic constructions in situations where the iterative imperative is used in Fuuta Jaloo.
- 8.38. The iterative imperative refers to a request to start or keep on doing something. It can be followed by the particle *kene* which then indicates that the action is temporary and also that it is simultaneous with some other action.

| | singular | plural | |
|--------|----------------|---------------|-------------------------------|
| Active | bir-atay nge | bir-eteen nge | "start or keep on milking it" |
| | def-atay ndi | def-eteen ndi | " ... cooking" |
| | pood-atay ngol | pood-eteen | " ... pulling it" |
| | aaw-atay ko | aaw-eteen ko | " ... sowing it" |
| Middle | suud-oto | suud-eteen | "start hiding" |
| | jood-oto | jood-eteen | "keep on sitting" |
| | waal-oto | | " ... lying down" |

Loot-oto kenen haa mi "Wash yourself while I keep on pounding
 gayna unude koo maaro this rice"

Nyaam-eteen kenen, kotoo "Start eating, your brother will
 mo'onj taway onj nde o join you when he finishes working"
 gayni liggaade

jood-ete don hæ o ara "Keep on sitting there till he comes"

D. Prohibitions

8.39. I shall now direct my attention to the way prohibition is rendered. There is no specific form for the negative imperative. Prohibition is obtained by adding the negative particle wota to the positive singular or plural forms. There is one negative counterpart for both the general imperative and the imperative for polite requests, e.g.

| | singular | Negative |
|--------|---------------------------|-------------------------------|
| Active | dog-u "run" | wota dog-u "don't run" |
| | Ar "come" | wota ar "don't come" |
| | dog-ii "please run" | |
| | yah-ee "go or please go" | wota yah-ee "don't go" |
| Middle | jood-o "sit down" | wota jood-o "don't sit down" |
| | waal-o "lie down" | wota waal-ee "don't lie down" |
| | jood-ii "please sit down" | wota imm-o "don't stand up" |
| | | |

8.40. It should be added that degrees of politeness are obtained by either intonation or periphrastic constructions.

8.41. The negative form of the iterative imperative combines

with the particle wota to give its negative counterpart.
e.g.

Fuuta Jaloo

| | |
|---------------|------------------------------|
| wota ar-atay | "Don't start/keep on coming" |
| wota dog-atay | "Don't " running" |
| wota yah-atay | "Don't " going" |
| wota jood-oto | "Don't keep on sitting down" |
| wota waal-oto | "Don't " lying down" |
| wota loot-oto | "Don't " washing" |

CHAPTER 9: DERIVATIVE INFIXES

9.1. The above terms refer to the elements which combine with verbal radicals and affect their meanings. The simple forms consist of what I am calling here the primary radical plus the ending, e.g.

o loot-ii "he has washed"
o suud-ii "he has hidden"

There are derived forms, e.g.

o loot-it-ii "he has washed again"
o suud-it-ii "he has hidden again"

consisting of the primary radicals (loot- and suud-), the derivative infix (-it-) and the ending -ii. I am considering the combination of the primary radicals and the derivative infix as giving a new derived radicals lootit- and suudit-

9.2. Derivative infixes enable speakers of the Pulaar language to render the various shades of their thoughts in an economical way (cf. 6.26)

9.3. The infixes described here are the ones that have been widely illustrated in my material. I believe they are the most commonly used in the two dialects.

I should emphasize that the present list of infixes does, by no means, claim to be exhaustive for the two dialects under consideration, even though it is exhaustive for my material. The limit of illustrations has prevented me from giving full coverage to the infixes listed at the end of the present chapter.

Table 1. Derivative infixes and voice-potentials in the two dialects.

| Voice of Primary Radical | Derivative Infix | Voice of Derived Radicals |
|----------------------------|------------------|----------------------------|
| A, AP, AMP M, MP, (AMP) | -ir- -or- | A, AP, AMP M, MP, (AMP) |
| A, AP, AMP M, MP, (AMP) | -id- -od- | A, AP, AMP M, MP, (AMP) |
| AMP | -an- | AMP |
| AMP | -it- | AMP |
| AMP | -oy- | AMP |
| AMP | -in- | A (MP) |
| AP | -inkin- | M |
| AP | -intin- | M |

Note The letters A, M, P, stand for Active, Middle, Passive

9.4. As indicated in table 1, all major infixes are found equally in the two dialects; the variations between the two dialects will therefore be found in the uses they make of the infixes.

9.5. Derived radicals may belong to the same voice(s) as primary radicals; but of course individual derived radicals may belong to voices that are distinct from those of primary radicals. As a matter of example, radicals which are in the active voice when primary may be in the middle voice when combined with certain infixes to form new derived radicals, e.g.

loot-ude (active)/loot-id-ude (active)
 "to wash/to wash together"

nyaam-ude (active)nyaam-it-ude (active)
 "to eat/to eat again"

ndaar-ude (active)/ndaar-it-aade (middle)
 "to look at/to look at oneself"

nar-ude (active)/nar-it-aade (middle)
 "to hear/to hear oneself"

9.6. An attempt has been made to provide meanings for each individual infix, and, sometimes it has been

judged necessary to give several meanings to one infix (-it-, for instance); these meanings were arrived at by analysing all the derived radicals which share the same infix(es). It should, however, be stressed that they should be treated as general rather than particular meanings. This is the reason why it is quite natural for individual infixes to have instances where the relationship between primary and derived radicals is loose, to say the least.

- 9.7. Derived radicals are used in intransitive and in transitive forms, e.g.

Fuuta Jaloo

O femb-it-ike (middle) "He has had a shave" (intransitive)

O femb-in-ii cukalel "he has had the child's head
ngel (active) shaved" (transitive)

Fuuta Tooro

Di fof di majj-id-ii (active) "They have all been lost"
(intransitive)

Be fof be majj-id-ii (active) "They are all lost"
(intransitive)

O majj-in-ii kaalis oo fof "He has lost all the
(active) money" (transitive)

Table 2. -VC/-C- alternation in the combination of radicals and infixes described in § 9.11

| Type of Combination | -VC- | | -C- | | ILLUSTRATIONS | |
|---------------------|------|----|-----|----|-------------------------|---|
| | FJ | FT | FJ | FT | Fuuta Jaloo/Fuuta Tooro | Meanings |
| -f- + ir- | + | | | + | def-ir-a/def-r-a | to cook with |
| -f- + id- | + | | | + | def-id-a/def-d-a | to cook together |
| -f- + it- | + | | | + | def-it-a/def-t-a | to cook again |
| -f- + in- | + | | | + | def-in-a/def-n-a | to cause to cook |
| -s- + ir- | + | | - | - | res-ir-a/res-d-a | to be able to marry someone with |
| -s- + id- | + | | | + | res-id-a/res-d-a | to marry at the same time as someone else |
| -s- + it- | + | | | + | res-it-a/res-t-a | to marry again |
| -s- + in- | + | | | + | res-in-a/res-n-a | to be made to marry |
| -r- + ir- | + | | - | - | yar-ir-de/yar-d-ude | calabash for drinking (verbal noun) |
| -r- + id- | + | | | + | yar-id-a/yar-d-a | to drink together |
| -r- + it- | + | | | + | yar-it-a/yar-t-a | to drink again |
| -r- + in- | | | + | + | yar-n-a/yar-n-a | to cause to drink |
| -l- + ir- | + | | - | - | haal-ir-a/haal-d-a | to talk in a certain manner |
| -l- + id- | + | | | + | haal-id-a/haal-d-a | to talk together |
| -l- + it- | + | | | + | haal-it-a/haal-t-a | to say again |
| -l- + in- | | | + | + | jal-n-a/jal-n-a | to cause to laugh |

to be continued...

Table 2 continued

| | | | | | |
|-----------|---|---|---|-----------------------|--------------------------------|
| -w- + ir | + | | + | dow-ir-a/dow-r-a | to lead with |
| -w- + id- | + | | + | dow-id-a/dow-d-a | to lead together |
| -w- + it- | | | + | taw-t-a/taw-t-a | to find again |
| -w-t-in | + | | + | sew-in-a/sew-n-a | to cause to be thin |
| | | | | | |
| -m- + ir- | + | | + | nyaam-ir-a/nyaam-ra | to eat with |
| -m- + id- | + | + | | nyaam-id-a/nyaam-d-a | to eat together |
| -m- + it | + | | + | nyaam-it-a/nyaam-t-a | to eat again |
| -n- + in- | + | + | | nyamm-in-a/nyamm-in-a | to cause to eat |
| | | | | | |
| -n- + ir- | + | | - | nan-ir-a/nan-d-a | to hear in a certain manner |
| -n- + id- | + | | + | nan-id-a/nan-d-a | to hear together |
| -n- /-it- | + | | + | nan-it-a/nan-t-a | to hear again |
| -n- + in | + | | + | nan-in-a/nan-n-a | to cause to hear |
| | | | | | |
| -b- + ir- | + | | + | fib-ir-a/fib-r-a | to tie up with |
| -b- + id- | + | | + | fib-id-a/fib-d-a | to tie together |
| -b- /-it- | + | | + | fib-it-a/fib-t-a | to untie |
| -b- + in- | | | | jab-in-a/jab-n-a | to cause to agree |

Notes on Table 2.

+ = positions where the combination occurs normally (cf 9.11 (a))

- = positions where it cannot occur (cf. 9.11 (b))

a) Only regular occurrences (ie. those marked +) have been illustrated in this table. Other occurrences are illustrated in the description of individual infixes.

b) Wherever the infinitive has been used for illustrations the vowel a indicates radicals belonging to the active voice (-ude).

- 9.8. It is possible to use more than one infix to form a new derived radical. This is well illustrated by the following cases provided by Alpha Ibrahim Sow for the Fuuta Jaloo dialect.⁽¹⁾

| | | |
|----------------------------|-------------|--|
| yah- +it- > | yahit | "to go/to go again" |
| yah- +it- +id > | yahitid | "to go again together" |
| yah- +it- +id- +oy- > | yahitidoy | "to go again together in the distant future" |
| yah- +it- +id- +oy- +an- > | yahitidoyan | "to go again together for something in the distant future" |

- 9.9. The order of occurrence of infixes within a sequence is as outlined above. The tendency is, however, to limit such combinations to a maximum of two infixes in ordinary conversation and three in special writings such as poetry. Anything beyond that limit comes across not only as clumsy but also as pedantic. It is worth mentioning that, in all my material from Fuuta Tooro, I have not encountered a single instance of a combination of over two infixes at a time. Ample illustration of the various combinations will be given under individual infixes.

- 9.10. Consideration will also be given to phonological features arising from the combination of individual infixes with

(1) cf Sow, A.I. 1966, p.20 (the English translations are mine)

primary radicals. Some of such features are similar to the ones described for the noun system in § 1.21-1.25. They will be outlined briefly here and relevant illustrations encountered in the present chapter will be referred back to them.

- 9.11. Table 2 outlines the combination of those primary radicals of CVC structure ending with the consonants f, s, r, l, w, n, b with the infixes -ir-, -id-, -it-, -in-.

If primary radicals and derivative infixes are represented by C_1VC_2 , where C_2 is in the range of the above consonants, and $-VC_3-$, the patterns described in table 2 can be summarised as follows:

- a) In the majority of cases, the Fuuta Tooro dialect uses a $-C-$ structure for its infixes whereas Fuuta Jaloo prefers a $-VC-$ structure;

Fuuta Tooro: $C_1VC_2 - + VC_3$ gives $C_1VC_2C_3$

Fuuta Jaloo: $C_1VC_2 - + VC_3$ gives $C_1VC_2VC_3$

- b) Certain combinations do not occur because of phonological rules governing the language. For instance such combinations as r + r, n + r, l + r cause the consonant -r- to change into -d- in

circumstances where a -~~ɛ~~- structure is used for
the infix.

Fuuta Tooro

Mi ar-d-ii gaa "I have come this way"

(ar-d-ii<ar-r-ii<ar-ir-ii; cf 9.31)

so tisubaar yonii "At midday I try to find out
mi yeewa kurkaalam where my cowherds took the
do oor-d-i; cattle grazing"

(oor-d-i<oor-r-i<oor-ir-i cf 9.31)

No mbaal-d-uɗaa? "Good morning" (lit. How did
you spend the night?)

(mbaal-d-uɗaa<mbaal-ir-ɗaa, cf. 9.26)

Haal-d-ude seese-seese "To speak slowly"

(haal-d-ude<haal-ir-de cf 9.37)

Ko noon be nan-d-i ɗum "That is how I heard it"

(nan-d-i<nan-r-i<nan-ir-i cf 9.24)

Ko noon yettoore mabbe "That is how their surname came"
ar-d-i

(ar-d-i<ar-r-i<ar-ir-i cf 9.24)

un-d-ugal "pestle"

(un-d-ugal < un-ir-gal 'what is used for pounding';
cf table 3)

yar-d-ude "spoon!"

(yar-d-ude < yar-ir-de 'what is used for drinking'; cf
table 3)

The alternative is to keep the -VC- structure of the infix, which Fuuta Jaloo prefers anyway, e.g.

| | |
|---------------------------------------|---|
| -be ar-ir-i gaa | "They came this way" |
| -Ko too na'i di _n oor-ir-i | "It is the other way that the cattle went grazing" |

- 9.12. The structure of the remaining infixes with the radical endings mentioned in § 9.11 is of -VC- or -VCVC- nature in both dialects, e.g.

| | |
|--------------------------|-------------------------|
| def- +or > def-or- | "cook at the same time" |
| lel- +od > lel-od- | "sleep together" |
| heβ- +indir > heβ-indir- | "get each other" |

- 9.13. As shown in 9.11, the -VC-/-C- alternation only applies to infixes beginning with the vowel i. It does not affect infixes beginning with the vowel o at all. This vowel is always stable.

- 9.14. Where radical endings are of -CG- structure,
the derivative infixes will be of -VC- structure
e.g.

tacc- + ir- > tacc-ir- "to cut with"
wopp- + id- > wopp-id- "to throw away together"
tedd- + in- > tedd-in- "to make heavy"
majj- + an- > majj-an-de "to be lost for...."

- 9.15. Where the final consonant of the primary radical is h,y,
or a glottal stop, this consonant disappears in the
derived radical and the preceding vowel is lengthened
(see also § 1.24); this occurs in both dialects.

yah- + ir- > yaa-r-ude "to go by"
yah- + id- > yaa-d-ude "to go together"
mah- + ir- > maa-r-ude "to use something for building"
piy- + ir- > pii-r-ude "to hit with"
wi'- + ir- > wii-r-ude "to say something"

- 9.16. There occur certain cases of assimilation between final
consonants of the primary radical and the infix,
which are summarised below.

(i) The final consonants t,d,d harmonize with the
following t,d, or n, (cf 1.25)

t/t loot-t-aade > loot-t-aade "to wash oneself"
t/d loot-d-ude > lood-d-ude "to wash something together"
t/n juwt-n-ude > juun-n-ude "to lengthen"

d/t ɛad-t-aade > ɛat-t-aade "to come close"
 d/d ɛad-d-aade > ɛad-d-aade "to approach together"
 d/n sood-n ude > soon-n-ude "to cause to buy"

ɖ/t huɖ-t-ude > hut-t-ude "to curse again"
 ɖ/d huɖ-d-ude > hud-d-ude "to curse again"
 ɖ/n nyed-n-ude > nyen-n-ude "to cause to dip out"

This case is more common in Fuuta Tooro because it involves infixes of -C- structure, whereas Fuuta Jaloo prefers to use infixes of -VC- structures.

(ii) Where the radical ends with a palatal consonant, the palatalisation continues into the second consonant, (cf. 1.25)

fij-d-a > fij-j-a "to play together"

9.17. In both dialects the introduction of the -in- infix into primary radicals of C_1VC_2 structure, where C_2 is l,m,n,b,d, gives two results:

1) With most examples, the vowel is shortened and the second consonant is geminated, e.g.

l/ll waal-/wall-in "to lie down/lay down"
 m/mm nyaam-/nyaam-in "to eat/to cause to eat"
 (cf. 9.63 for illustrations)

laam-/lamm-in "to be chief/to make chief"
 (cf. 9.63 for illustrations)

n/nɪ ɖaən-/ɖaənɪn "to sleep/to cause to sleep"
 b/bɪ buʊb-/buʊbɪn "to be cool/to cause to be cooled
 down"
 laab-/laabɪn "to be clean/to cause to be clean"
 d/dɪ jooɖ-/jooɖɪn "to sit down/to cause to sit down"
 ɖuʊɖ-/ɖuʊɖɪn "to be numerous/to make numerous"

2) The combination does not affect the primary radical
 in the following cases:

m/m faam-/faamɪn "to understand/to cause to understand"
 n/n haan-/haanɪn "to be appropriate/to cause to be
 appropriate"
 b/b ʔeeɖ-/ʔeeɖɪn "to dry up/to cause to dry up"
 d/d haad-/haadɪn "to be bitter/to cause to be bitter"

9.18. In a limited number of cases there occurs a pattern of
 alternation whereby the fricative final consonant of
 CWVC- radical, alternates with its plosive geminate
 counterpart, with a shortening of the vowel of the
 radical, e.g.

w/bb heew/hebbɪn "to be plenty/to make plenty"
 (cf. 9.63)
 f/pp doof/doppɪt "to pull up/to pull out"

9.19. As indicated in table 1 the following derivative
 infixes have two forms in complementary distribution:

-ir-/-or-

-id-/-od-
-indir-/-ondir-

- 9.20. In all the above cases the o-initial infixes are confined to radicals of the middle and passive voices (applied to one or two voice radicals).
- 9.21. On the other hand the i-initial infixes go with active and passive radicals; never with middle radicals.
- 9.22. It can safely be stated that as far as one or two-voice primary radicals are concerned the occurrence of the initial vowel of the infix is as follows:

O-initial infixes go with middle and middle-
passive radicals

i-initial infixes go with active, passive and active-
passive radicals.

This means that both o and i forms may occur with the same passive radicals but with different meanings.

- 9.23. Matters become a bit more complicated with three-voice primary radicals because not only do they behave in the manner described above for one or two-voice

radicals but also they create further semantic differences whereby they go with all three voices (cf. 9.35, 9.42).

-ir-/-or-

9.24. This infix is used in verb phrases introduced by:

a) Fuuta Jaloo

b) Fuuta Tooro

no

no

nii

nii

noŋ

noon

ko no

ko no

ko nii

ko nii

ko noŋ

ko noon

It then has modal and comparative meanings and is often in non-initial position, e.g.

Fuuta Jaloo

Ko Alla anndi no keefeero
tilf-ir-tee (passive)

"God knows how to deal
with a heathen (lit.
It is God who knows
how a heathen should
be punished)"

Be wi'i yo be walle no be
nyaam-ir-a (active)

"They asked for something
to eat (lit. They said
they should be helped on
how they can eat)"

Ko no be waal-or-noo
non be tawt-ir-aa
 (middle and passive)

"They were found again
 the same way they had
 laid down"

Fuuta Tooro

Sakke ko ko soxlaa, no
 baylo soxl-ir-aa ni
 (passive)

"A shoemaker is as
 useful as a blacksmith.
 (lit. A shoemaker is
 someone that is needed
 in-the-same-way-as a
 blacksmith is needed)"

No Alla hodd-ir-ta
 demngal ngal ina
 feenya kambe bee
 dido be poodondiri (2)
 (active)

"God decided to bring
 out this language by
 causing a disagreement
 between the two young
 men (lit. As to how
 God decided to bring out
 this language, the two
 young men had a disagree-
 ment)"

Modo yidi yewtude no
pudd-or-ii mi komersan (3)
 (middle)

"I should like to talk
 to you about how I
 started my job as a trader"

o tayani mi weer (3) oo
no njid-ir-mi (active)

"He cut the glass for me
 the way I wanted"

- No ngannd-ir-mi canyirgal⁽⁴⁾ "I know about many other
ko noon ngannd-ir-mi things as much as I do
 gede keewde e hooram about weaving. (lit. The
 -way-in-which I know
 about weaving it is that
 way I know of many things
 in my-head)"
- Mi anndaa no paami inn-ir-de "I don't know what I am
 mo (active) going to call him"
- Ko mbo jilotoodo haa no "He is doing research on
fot-ir-a anndirde the Pulaar language (lit.
 demgal haalpulaar'en He is a traveller who is
 trying to learn the
 language of the speakers-
 of-pulaar)"
- Mi tafa kanne oo no "I cast the gold the way
njid-ir-mi wona ni, so tawii I want, If it is a
 kadi ko jawo, no mbii-r- bracelet, it is just as I
unomaami⁽⁵⁾ ni joomam told you before, the owner
 addat wi'a njidmi ko brings his gold and asks
 tafaneede (active) for it to be made into a
 bracelet"
- Ko noon sakkeyaagal "That is how shoemaking
fudf-or-ii (middle) started"
- Ko noon ngopp-ir-taa "That is how you leave
 fado ngoo (active) the shoe"

- | | |
|--|--|
| <p>-O laada, juude makko didi; <u>Ko nii o wad-ir-ta</u> juude makko didi e leydi (active)</p> | <p>"He would crawl, with his two arms; this is how he uses his two arms on the ground"</p> |
| <p>-<u>Ko nii</u> yettoore mabbe <u>ar-d-i</u> ⁽⁶⁾ (active)</p> | <p>"This is how their surname came about"</p> |
| <p>-<u>Ko nii o inn-ir-i</u> mbo Samba Haqqilante (active)</p> | <p>"This is how he called him Samba - The Intelligent"</p> |

9.25. The infix -ir-/-or- is also used for comparative purposes and it is found in verb phrases followed by

a) Fuuta Jaloo

b) Fuuta Tooro

-no
-wano (7)
-wa

-no
-wayma (7)
-wayta (7)

Examples illustrating this usage are found in both dialects, even though the following are from Fuuta Jaloo only,

-
- (2) The informant was talking about the origin of the language; his story can be summarised as follows: God created the Pulaar language; he then made two young men use it by arguing in it.
- (3) These are loans from the French language: Commerçant "trader" verre "glass".
- (4) This verbal noun refers to the "instrumental" meaning of the infix under consideration cf. 9.29.

-Hida dar-or-i wa
soldaato (middle)

"You are standing like a
soldier"

-Himo nyaam-ir-a
wa mo meeɗaa yiide
nyiiri (active)

"He is eating as if he
has never seen food in
his life (lit. He
eating like someone who
has never seen food)"

-O wi'aa yo o aynu
ɓeynguure makko ndeɗ
wano ngayuuri ayn-ir-ta
ngayuhoy mu'urɗ koy ni
(active)

"He was told to look after
his family like a lion its
cubs (lit. He was told
he should look after his
family like the-way-in-which
a lion looks after its cubs)"

- 9.26. This infix is also used in interrogative clauses and indirect questions, with these modal and comparative meanings. Derived radicals are then accompanied by the particles no (in both dialects), honno (Fuuta Jaloo), holno/hono (Fuuta Tooro), translated into English as "how".

(5) cf 9.15

(6) cf 9.11(b)

(7) Perhaps these particles stem from a combination of the verb wa'ude "to be like" and the particles no, ma, etc. (wayta wa'i - ta).

Fuuta Jaloo

-Honno fus-ir-ɗaa
loonde ndeɲ? (active) "How did you break the
drinking pot?"

-No ɲgal dambugal
udit-ir-tee? (passive) "How can this door be
opened?"

-Ko honno o laam-or-too
ndii leydi? (middle) "How will he rule this
country?"

Fuuta Tooro

-Holno be tacc-ir-ta
maayo ɲgoo? (active) "How will they cross the
river?"

-Holno heɓ-ir-tomoo-mi?
(active) "How shall I get her?"

-Holno o waaw-ir-ta
suweer⁽⁸⁾? (active) "How will he be able to do
the job of framing
photographs?"

9.27. The following is an illustration of a combination
between the infixes -ir- and -oy-

(8) This is a loan from the French expression sous-verre
(meaning "under the glass"); it refers to the practice
in West Africa, which consists in using glass and
cardboard to frame photographs.

| | |
|---|---|
| <p>yeewen <u>no njabb-ir-oy-den</u> gese sukaabe men bee (active)</p> | <p>"Let's try and see how we can cultivate the fields of our young men"</p> |
|---|---|

2. Instrumental Meaning (with -ir-/-or-)

9.28. In this case the infix is used in phrases showing an instrument and its purpose, e.g.

a sword and cutting
a rope and tying
soap and washing

The derived radical is generally not accompanied by any particle.

Fuuta Jaloo

| | |
|--|--|
| <p>-Ka'a kaafa wonaa <u>sopp-ir-ka</u> ledde (active)</p> | <p>"This sword is not for cutting wood (lit. This sword is not what-is- used-for cutting wood)"</p> |
|--|--|

| | |
|---|--|
| <p>-Baalii ngin <u>habb-ir-</u> <u>aama</u> boggol (passive)</p> | <p>"The sheep has been tied up with a rope"</p> |
|---|--|

| | |
|--|---|
| <p>-O wi'aa yo o <u>loot-or-o</u> saabunde (middle)</p> | <p>"He was told to wash himself with soap"</p> |
|--|---|

| | |
|--|---|
| <p>-Be wi'aa yo be <u>jogit-or</u>⁽⁹⁾ diina Alla kan deftere (middle)</p> | <p>"They were told to practice Islam by the Coran (lit. They were</p> |
|--|---|

told that they should
use the Coran to
practice God's religion"

- Mido addani maa ko
heyn-or-odaa (middle)

"I brought you something
to mourn with"

-Ehin ko loot-or-aa
(middle)

"Here is something you
can wash yourself with"

Fuuta Tooro

-Banndelam ma mi inn-ir-ma
wonkam (active)

"Sweet Love, I shall name
my heart after you"

-Aawdi ina aaw-r-ee⁽¹⁰⁾
(passive)

"Seeds are used for
sowing"

-jalo ina rem-ir-ee
(passive)

"A hoe is used for hoeing"

-Modo yaara⁽¹¹⁾ konu
kab-r-umi⁽¹¹⁾ bibbe
baabam'en (active)

"I am going to look for
an army to fight my
half-brothers with"

-Saa yehii a wirnoyiima,
pii-r-aa⁽¹²⁾ mi dum,
pii-r-aa⁽¹²⁾ dum minyam,
pii-r-aa⁽¹²⁾ dum banndam
(active)

"When you go back you will
use this knowledge to
beat me up with, and to
beat up my brothers and
sisters"

| | |
|--|--|
| Min njagg-ir-ta kanne oo ko bisgal ⁽¹³⁾ (active) | "We hold the gold with pincer-tongs" |
| -Ko dum min kiw-r-ata ⁽¹⁰⁾ colli (active) | "That is what we scare birds away with" |
| -O wii omo wara kam walla mi <u>soot-t-or-a</u> ⁽¹⁴⁾ jawdi keawndi (active) | "He said he was going to kill me unless I buy myself out with money" |
| -Ndaa ko <u>mballit-or-aa</u> ⁽¹⁵⁾ (active) | "Here's something you can help out with" |

- 9.29. A great many nouns of instruments or means are derived from verbal radicals using the -ir-/-or- infix and terminating in the class ending associated with a relevant noun, e.g.

rem-ir-go, "a hoe", composed of the radical rem- "to hoe", the infix -ir- and the pronoun of reference of the class for Jalo "a hoe" as the suffix. Words of similar structure are given in table 3.

-
- (9) This radical illustrates the combination of the two infixes -it- and -or-
- (10) cf 9.11
- (11) yaara <yah-r-a; cf 9.15
- (12) cf 9.15
- (13) bisgal is a verbal noun which is the contracted form of bis-ir-gal "the one used to hold with".

Table 3: Illustrations of the relationship between verbal nominals and analogical nouns

| Verbal nominals | Verbal radical | Analogical nouns | Nominal class Number |
|--|--------------------------------------|------------------|----------------------|
| Sood-or-dan (16) 'water for washing hands' | soodaade "to wash" | ndiyan 'water' | 17 dan/dam |
| Loot-or-dan 'water for washing oneself' | lootaade "to wash oneself" | ndiyan 'water' | 17 dan/dam |
| femnd-ir-de 'calabash for curdling milk' | femndude "to curdle" | horde 'calabash' | 3 nde |
| hadd-or-de "loin cloth" | haddaade "to tie around one's waist" | wudere "cloth" | 3 nde |
| awɣ-ir-gal "paddle" | awɣude "to paddle" | leggal 'stick' | 10 ngal |
| as-ir-gal "digging-stick" | asude "to dig" | leggal 'stick' | 10 ngal |
| aaw-ir-gal (17) "sowing-stick" | aawde "to sow" | leggal 'stick' | 10 ngal |
| wiind-ir-gol "pen" | wiindude "to write" | karambol 'pen' | 11 ngol |
| wiind-ir-ka "ink" | wiindude "to write" | ndaha 'ink' | 13 ka |
| irt-ir-gal (18) "wooden spoon" | irtude "to dig up" | leggal 'stick' | 10 ngal |
| loow-ir-di (17) "funnel" | loowde "to pour into a container" | jann-di 'iron' | 4 ndi |

(16) All the nouns here ending in the velar nasal η will end in the labial m in Fuuta Jaloo

(17) cf 9.11

(18) cf 9.30 (Fuuta Tooro)

waal-or-du "bedroom" (waalaade "to lie down")

Fuuta Tooro

Be njipp-ii e nokku
ina wi'ee Tonng-ir-de
Bamdi

"They came to a place
called Tonngirde-Bamdi
(lit. The place-where-
donkeys-are-tied-up")

Gorko oo tuggii e hakkunde
fij-ir-de ndee

"The man went to the middle
of the dance floor. (lit.
the-place-where-people-
amuse themselves; cf fijude
"to amuse oneself")

4. Causative meaning

- 9.33. Where the infix -ir-/-or- has causative meaning, the derived radical containing this infix is either used on its own or accompanied by the particle fii "for, because of " .

(i) Without any particle

Fuuta Jaloo

yo fow yonndin-or Alla
(middle; where yonndin-
is a primary radical)

"Let everyone be patient
for the sake of God"

Fuuta Tooro

Njid-ir-maa mi ko dɛwgal,
mi yid-ir-aa ma hay huunde
(active)

"I want to marry you,
I don't want you for
anything else (lit.
the reason for my wanting
you is marriage, I don't
want you for anything else)"

So aduna juutii juut-ir-ta
ko haa ko meedaa wadde
ina wada (active)

"If this world has gone on
for so long it is just
in order to allow what
has never happened to do
so". (lit. The reason
for the world to be long
is.....)"

Mbism-or-maa-mi ko nande
e faamde ko kaal-ɗaa koo
(middle)

"I greeted you because I
understood what you said"

(ii) With the particle fii

Fuuta Jaloo

yaaf-or-ee mo fii Alla
(middle)

"Forgive him for God's
sake"

Ko ɓe nodd-ir-i mi
ko fii yo a nyaamu

"They called you to eat
(lit. what they called you
for for is to eat)"

Fuuta Tooro

O jagg-ir-i mi fii
 Umaar (active)

"He looked after me
 because of Umaar (lit.
 He held me because of
 Umaar)"

Njagg-ir-moo-mi fii
 yo o jannginam mecce
 (active)

"I looked up to him to be
 taught a skill (lit. I
 held him in order for
 him to teach me a skill)"

5. Simultaneous meaning

- 9.34. The derived radical is introduced by the particle no
 "as soon as" and the infix refers to the simultaneous
 nature or the imminence of the action. This usage is
 found more readily in Fuuta Jaloo than in Fuuta Tooro.
 It is almost always in initial positions e.g.

No o udd-it-ir-i ⁽²¹⁾
 hunduko makko kon
 haala-non lan (active)

"As soon as (the moment
 when) he opens his mouth,
 please let me know."

No o nann-ir-aa
 yo o soke (passive)

"As soon as he is arrested
 let him be sent to jail"

No be daan-or-i
 dog-aa (middle)

"As soon as they fall asleep,
 run away"

(21) this radical illustrates the combination of -it- and -ir (udd-it-ir-i).

- 9.35. Further simultaneous meaning is introduced when the middle infix -or- is used in the active with three voice radicals.

loot-ude (active) gives loot-or-de (active)
 "to wash a number of things simultaneously"

suud-ude (active) gives suud-or-de (active)
 "to hide a number of things simultaneously"

loow-de (active) gives loow-or-de (active)
 "to pour into a container simultaneously"

dimmb-ude (active) gives dimmb-or-de (active)
 "to shake a number of things simultaneously"

born-ude (active) gives born-or-de (active)
 "to clothe a number of people"

- 9.36. The difference between the meanings described in § 9.34. and 9.40 is that of emphasis. One looks at the simultaneous nature of the action (§ 9.34) whereas the other concentrates on its joint nature (9.40).

- 9.37. In some cases the infix has less effect on the meaning of the primary radical; sometimes the meaning of the derived radical is almost the same as that of the primary radical, e.g.

Fuuta Jaloo

| | |
|--------------------------------|------------------------|
| Lando on wi'i yo men | "The king said that we |
| accu o <u>okk-or-a</u> men ko | should let him give us |
| men nyaama (active) | something to eat" |
| (okk-or-de = okkude "to give") | |

Fuuta Tooro

| | |
|---------------------------------------|----------------------|
| Tawi o hebii bibbe heewbe; | "She had had several |
| kono ina heddii e <u>jibin-ir-gol</u> | children but she was |
| makko ngol | still to have more" |

(jibin-ir-gol = jibinde "to deliver, to give birth to")

- 9.38. Finally, it might be useful to draw attention to a few examples of radicals which, because of their morphology may mistakenly be thought to contain the infixes under consideration; I have also tried to provide the nearest extended radical, wherever possible.

Fuuta Jaloo

1. o jogorii neebude "It looks as if he is going
to be a long time"
2. Ko nii o jog-or-i "This is how he held the gun"
fiŋkaari ndiŋ.

(The first example stems from a fixed phrase: jogorde + infinitive "to be about to do something; the second example contains the infix -or- in its modal meaning whereas in the first example jogor- is a primary radical).

dee balde himo won-d-ii⁽²²⁾ "He has been poor
e bassal (active) recently (lit. All
these days he has been
with poverty)"

O weld-aa⁽²²⁾ e maŋbe "He does not get on with
(active) them"

Fuuta Tooro

-Ngacc-id-ee men; ma min "Please leave us together;
kaal-d-a⁽²²⁾ min kawra we shall have an agree-
(active) ment after talking"

O wii mo: ko njii-d- "He said to him What do
uden?⁽²³⁾ (active) we have in common"

Ko minen mbaal-d-i⁽²²⁾ "We spent the night together"

(22) cf 9.11 also see table 3

(23) cf 9.15

B. -id-/-od-

9.39. This infix is used:

- a) With associative meaning
- b) To indicate completeness
- c) With simultaneous meaning

9.40. In its associative meaning this infix refers to an action performed jointly or involving another individual or thing. The derived radical is either found on its own or it is followed by an adverbial group introduced by the particle e "with". When used on its own, the derived radical has a plural subject pronoun.

(i) On its own

Be nyaam-id-i "they ate together"

(ii) Followed by an adverbial group

Fuuta Jaloo

Lando nyaam-id-ataa
e maccude mu'uj (active)

"A king will not eat
with his servants"

Mb kala yo acc-id-e
e galle mu'uj (passive)

"Let everyone be left with
his home"

Be hab-id-i e Ngaabu "They fought against Ngaabu"

Ar won-d-aa e aᵛ "Come and stay with me"

- 9.41. The usage in which this infix indicates completeness is mostly found in Fuuta Tooro, as illustrated below.

O nyam-id-ii
maaro koo (active) "He has eaten all the rice"

O loot-od-ii (middle) "He has finished washing
himself"

Ūjjo oo naad-d-ii ⁽²⁴⁾
cuudi amen (active) "The thief has entered
all our huts"

Be kabb-id-ii ⁽²⁵⁾ na'i
dii (active) "They have tied up all
the cows"

O jannng-id-i deftere "He has finished learning
Alla ndee fof the Coran (lit. He has
read all God's book)"

- 9.42. Further semantic differences are introduced by the use of the infix -od- in the active and the passive, with three voice radicals; This feature is commonly used in Fuuta Jaloo. This meaning appears to be similar to the one mentioned in § 9.35 for the infix -or-.

(24) cf 9.16(i)

(25) cf 9.14

(i) Active (-id-/-od-)

loot-id-ude "to wash a number of
things together."

loot-od-ude⁽²⁶⁾ "to wash a number of things
at the same time"

(ii) Passive (-id-/-od-)

loot-id-eeede "to be washed together"

loot-od-eeede "to be washed at the
same time."

9.43. Possible confusions between this meaning and the associative meaning are avoided in three ways:

- a) The transitive nature of the verb under consideration.
- b) The fact that for the completive meaning it is possible to add the particle fof/fow "all", whereas the associative meaning uses the particle -e "with".
- c) The context in which they occur.

9.44. To obtain the meaning of completeness, totality, Fuuta Jaloo prefers to use periphrastic constructions which often involve the combination of the verb indicating the action; it also uses the particle -fow "all".

(26) This radical can also mean to have a wash at the same time; in this case it will be noted that the primary middle radical lootaade "to wash oneself" becomes active after combining with -or: loot-od-ude.

| | |
|---------------------------|-----------------------------------|
| o gayni jalde | "He has finished laughing" |
| o gayni lootaade | "He has finished washing himself" |
| O naatii e cuudi amen din | "He has entered all our huts" |
| fow | |
| o yarii ndiyan dan fow | "He has drunk all the water" |

Finally, the following example illustrates further the combination of this infix with other infixes (-iɔkin- in this case)

Fuuta Jaloo

| | |
|--------------------------|-----------------------------|
| Meneɲ fow meɲ wondi e | "We all pretended to be |
| makko | with him (We were all with |
| <u>won-d-inkin-ago</u> l | him for-the-sake-of- |
| | pretending-to-be-with-him)" |

C. -indir-/-ondir

- 9.45. This infix refers to reciprocal actions; it involves more than one person or thing and it can be accompanied by the particle e 'with' (or again).

Fuuta Jaloo

| | |
|---------------------------|----------------------------|
| O <u>wayn-ondir-i</u> e | "He said good-bye to all |
| mawbe makko beɲ fow, | his relatives and he went |
| o yahi (middle) | off" |
| Meɲ <u>salm-ondir-i</u> e | "We shook hands with them" |
| mabbe (middle) | |
| Be <u>hett-ondir-i</u> e | "They were reunited with |
| lando mabbe oɲ (middle) | their King" |

Be holl-indir-aa e
joŋ-galle oŋ (passive)

"They were shown to the
house-owner"

Fuuta fow fell-indir-i
e sebbe beŋ (active)

"All the peoples of Fuuta
Jaloo fought against the
Mandings"

Fuuta Tooro

Noodi e gabbi cennd-ondir-i
mbo, nyaami mbo haa laabi
(middle)

"Crocodiles and hippopot-
amuses divided him
between them and ate
him all"

jannde ko faamude,
rewbe ina ngany-ondir-a (27)
do, worbe ina ngany-ondir-a
do (middle)

"To study is to understand;
both men and women beat
each other at it (lit
women win each other
at it, men win each
other at it)"

To ummidaa too e doo ina
ngodd-ondir-i (middle)

"The place you came
from is far from here
(lit. Where you come
from and here are far
from each other)"

Be ndaar-indir-i be
ngoni e haaldude.

"They looked at each
other and started talking
to each other"

(27) This is a loan word from the french gagner "to win".

Kanaal (28) oo so jook-
ondir-ii ma won meeteruuji (28)
 ujunere

"The canal is one
 thousand meters long
 (lit. If the canal
 follows itself it
 will be one thousand
 meters long)"

Laamdo oo ko liggotoodo,
 jiddo be o ligg-ondir-i;
 o wii onon fof yo oon
mball-ondir, njagg-ondir-on
 (middle)

"This king is hard-
 working; he likes the
 people he works with;
 he wants all of you to
 help and look after
 each other"

Min ngannd-ondir-i ko
 no ngannd-ondir-mi
 e maa ni (middle)

"We know each other
 as much as I know you
 (lit. We know each other
 just as you and I know
 each other)"

- 9.46. In pointing out further differences between the two forms of this infix in three voice radicals it can be added that -ondir- tends to be more abstract, and -indir- tends to be more physical, as illustrated in the following Fuuta Jaloo instances where the same primary radical and the same active endings are used with both forms.

(28) These are loans from the French Canal "Canal", and metre "meter".

| | |
|--------------------------|-----------------------------|
| Be pood-indir-i (active) | "they pulled each other" |
| Be pood-ondir-i (active) | "they had an argument" |
| Be hett-indir-i (active) | "they cut each other" |
| Be hett-ondir-i (active) | "they were reunited" |
| Be nan-indir-i (active) | "they heard each other" |
| Be nan-ondir-i (active) | "they reached an agreement" |
| Be mett-indir-i (active) | "they licked each other" |
| Be mett-ondir-i (active) | "they argued" |

- an-

- 9.47. This infix is used with one, two or three voice radicals. It indicates an action to the advantage or disadvantage of a particular person or thing. This infix is among the most widely used of all infixes.

Fuuta Jaloo

| | |
|---|--|
| Fulbe Fuuta beŋ <u>janf-an-ii</u> musibbe mabbe beŋ (middle) | "The Fulbe of Fuuta Jaloo plotted for their relatives" |
| O <u>yott-an-ike</u> baaba makko (middle) | "He has revenged his father" |
| Ko nyiiri meŋ <u>add-an-i</u> oŋ (active) | "We brought you some food (lit. It is food that we brought you)" |

| | |
|--|--|
| Sagalle ko fooludo <u>won-an-i</u> (active) | "Income tax belongs to the winner (lit. Taxes are for the winner)" |
| Doole alaa ko <u>waaw-an-ta</u> ngu'u konu (active) | "No force can do anything against this army" |
| Lamaraama wi'i o <u>yarl-an-taako</u> Umaru (active) | "Lamaraana said that he will not forgive Umaru" |
| <u>Fuuta Tooro</u> | |
| So mi amdiino aduna ma ko yidde mi, ma mi <u>par-an-o</u> ma ko feewi (middle) | "If I had known that you would spend your life loving me, I should have got ready for you" |
| Aan, artir haqqille ma, <u>fus-an-am</u> ujunnaaje jeetati de ⁽²⁹⁾ (active) | "Listen, be sensible, reduce a bit from the eight thousand (lit. You bring-back your intelligence, break- for-me those eight thousand)" |
| Ko teddungal tan <u>won-an</u> maa doo (active) | "It is only just respect that is in store for you here" |
| Ma o <u>naw-an</u> ma na'i ma (active) | "He will take your cows for you" |

(29) 'Eight thousand' is the equivalent of 40,000 CFA or 800 French Francs.

| | |
|---|--|
| Mbad-aa feere mi <u>bir-an-ee</u> nagge ngee (passive) | "Please arrange for the cow to be milked for me" |
| Yo o <u>add-an-e</u> nyaamri o nyaama (passive) | "Let him be given something to eat (lit. Let it be brought-for him food that he may eat)" |
| Debbo moyfó sika turwii wupp-an ma (active) | "A good woman washes your dirty clothes for you (lit. A good woman if you are dirty she will wash for you)" |
| Ko miin Malal Cekel wii noon, miin <u>kaab-an-aado</u> , yidaado e rawbe, ganyaado e worbe, nabaado e laamu, ko miin wii noon (passive) | "It is I, Malal Cekel, who said so, I, the Cheeky one, the one who is loved by women but hated by men, the one who was once sent to prison, <u>I</u> said so. (haa anaa o "the one against whom other people are annoyed)" |
| - <u>Sood-an-am</u> saaku maaro (active) | "Please sell me a sack of rice" |

9.48. This infix can combine with a wide range of infixes, e.g.

Fuuta Jaloo

| | |
|---|---|
| <p>-an- +oy- : Dabbee ko <u>ndaar-an-oy-a</u> en konu Fuuta ngon (active)</p> | <p>"Please arrange for someone to fetch us the Fuuta Jaloo army (lit. search what may go-and-see-for us the army of Fuuta Jaloo)"</p> |
| <p>-it- +an- : O <u>ar-t-an-ii</u> be e haala kadi (active)</p> | <p>"He has come back to bother them again (lit. He has come-back-for them in arguments again)"</p> |
| <p>-an- +oy- : O <u>heb-an-oy-ike</u> luumo ngon (middle)</p> | <p>"He has come back to bother them again (lit. He has come-back-for them in arguments again)"</p> |
| <p>-indir- +an- Be <u>jangg-indir-</u> <u>an-i</u> defte den (active)</p> | <p>"They read the books to each other"</p> |
| <p>-it-</p> | |

9.49. This infix denotes various meanings:

- a) repetition
- b) a meaning opposite to that of the simple radical
- c) retaliation
- d) intensity
- e) reflexive meaning

9.50. When it indicates repetition this infix is found in

all the three voices; the derived form is often used in the same sentence after the corresponding primary form; e.g.

Fuuta Jaloo

Mi felli mi fell-it-i
(active)

"I shot and shot again"

O towni hoore ndeŋ
o town-it-i (active)

"He raised his head twice (lit. He raised his head and raised it again)"

Puccu nguŋ dogi ngu
dog-it-i, ngu ronki hewtaade
be (active)

"The horse ran and ran again but it was unable to reach them"

Si nduŋgu arii meŋ remay.
Si meŋ remii dimmal meŋ joot-
t-oo⁽³⁰⁾ seeda, meŋ rutt-it-
oo ka meŋ fuddinoo aranal
ton, meŋ fudf-it-oo ton
(middle)

"When the rains come we cultivate the land. After cultivating for the second time we wait for a while again. (lit. we sit again for a while) we go back to the parts we cultivated at first and start there again)"

Fuuta Tooro

o daan-t-iima (middle)

"He has gone to sleep again"

(30) joottaade jood-t-aade jood-it-aade /"to sit again".

| | |
|--|--|
| o <u>faa-t-i</u> to ndiyam dam wonno to (active) | "He headed again towards <i>the water</i> " |
| Puccu nguulaaraa <u>laar-t-aa</u> , ngu <u>yii-t-aaka</u> (passive) | "They repeatedly looked for the horse but they were unable to find it (lit. the horse was looked-for and looked-for again but it was not found)" |

9.51. Further examples illustrating this infix are:

| | |
|---|----------------------------------|
| naamndaade/naamd-it-aade (middle) | "ask/ask again" (Fuuta Tooro) |
| ndaarde/ndaar-(i)t ⁽³¹⁾ -ude (active) | "look/look again" |
| nande/nan-(i) t-ude (active) | "hear/hear again" |
| nyamude/nyaan-(i) t-ude (active) | "eat/eat again" |
| piide ⁽³²⁾ /pii-t-ude (active) | "hit/hit again" |
| weeleede/weel-it-eede (passive) | "be hungry/be hungry again" |

Mi bor-t-ike wutte an on
 (middle; bornaade/bor-t-aade
 "to put on/to take off")

"I have taken my
 shirt off"

Yo bii Almaami on
jonn-it-e laamu ngun
 (passive)

"Let the kingdom be
 returned to the
 prince"

Fuuta Tooro

O Seki haa o sek-it-i
 (active; sekde/sekidde
 "to be angry/to stop
 being angry")

"He was angry to
 such an extent that
 he regained his calm
 (lit. he was angry
 until he stopped-
 being-angry)"

Saa tammpii a wammb-it-ii
 biye, a haɓɓat koyngal
 mum e lekki (active)
 (wammbude/wammb-it-ude)
 wammb-id-de⁽³⁴⁾ "to carry
 a baby on one's back/to
 take a baby off one's back)

"When you are tired
 and take your child
 off your back, you
 tie its leg to a
 tree"

Be ndogi, be ngar-t-i⁽³⁵⁾
 leydi maɓɓe (active; arde/ar-t-
 ude "to come/to come back")

"They ran away and
 came back to their
 country"

(34) cf 9.16(i)

(35) This meaning is not to be confused with that of the repetitive one; it refers to the restoration of the status quo.

| | |
|-------------------------------|-------------------|
| <u>Min ndef-t-ii</u> (active) | "We have finished |
| (defde/def-t-ude | cooking" |
| "to cook/to uncook, ie | |
| to finish cooking") | |

- 9.53. Combinations between this usage and other infixes may be illustrated by the following sets of examples:

Fuuta Jaloo

| | |
|----------------------------------|----------------------|
| -it- +ir-; <u>won-t-ir-en</u> no | "Let's be again as |
| wonirnoden | we were before" |
| -An, <u>ar-t-ir</u> haqqille | "Listen, be sensible |
| maada (active) | (lit. you bring back |
| | your senses)" |

(the derived radical becomes transitive)

| | |
|-----------------------------------|---------------------|
| -o <u>yii-t-ir-aani</u> | "He did not find me |
| lan jawdi makko (active) | with his property" |
| (yiide/yii-t-ude "to | |
| see/to see again after | |
| losing)" | |
| -it- +in-: o <u>hol-t-in-i</u> be | "He gave them some |
| (active; holude/hol-t-ude | clothes" |
| "to lack clothes/get clothes | |
| again") | |

Fuuta Tooro

| | |
|-----------------------------------|-------------------------|
| -it- +oy-: Yimbe bee ndewi e | "The men followed the |
| debbo oo haa be <u>keb-t-oy-i</u> | woman until they |
| jawdi ndii (active; hebde/ | recovered the property" |
| heb-t-ude "receive, get/ | |
| get back, recover") | |

- 9.54. When it indicates some retaliatory action this infix is mostly used in the middle voice commonly found in Fuuta Tooro but, as will be illustrated soon, Fuuta Jaloo prefers periphrastic constructions for this purpose. On the other hand, as will be seen in the following examples, derived radicals are often used alongside their primary counterparts.

Fuuta Tooro

| | |
|-----------------------------------|---------------------|
| Be kabi mbo, o <u>hab-t-ii</u> be | "They fought them |
| (middle) | and he fought back" |
| So o fiyii kam ma mi | "If he hits me I'll |
| <u>fii-t-o</u> mbo (middle) | hit him back" |
| O jalam, nde <u>njal-t-ii</u> | "He laughed at me, |
| o fiyi kam (middle) | when I laughed |
| | back at him, he hit |
| | me" |

In Fuuta Jaloo the above sentences will be:-

Be habi mo, o yottii be
 Si o piyii laṅ mi yottoto
 O jalaṅ, nde yotti-mi o piyimmi

In all these instances retaliatory meaning is contained in the verb yottaade "to revenge" itself.

- 9.55. As indicated earlier, this infix can also occur with an intensive meaning when it not only refers to intensity but also to severity, totality. It should however be emphasized that, even though this usage is found in both dialects, it is not very popular. My material points to very limited instances of this usage.

sadude/sat-t-ude⁽³⁶⁾ "be hard, difficult/be very hard, very difficult"

- 9.56. I shall now devote some space to the reflexive meaning of this infix. In this case it is always used in the middle voice even if the primary radical is in the active voice. In many cases this infix indicates an action that an individual does on himself or for his own benefit.

(36) cf 9.16(i)

Fuuta Jaloo (middle voice)

| | |
|------------------------|--------------------------------|
| mettude/mett-it-aade | "lick/to lick oneself" |
| fellude/fell-it-aade | "shoot/to shoot oneself" |
| nanude/nan-it-aade | "to hear/to hear oneself" |
| ndaarude/ndaar-it-aade | "to look/to look at oneself" |
| ɲátude/ɲát-it-aade | "to bite/to bite oneself" |
| yi' ude/yii-t-aade | "to see/to see oneself" |
| jalude/jal-it-aade | "to laugh/to laugh at oneself" |
| fembude/femb-it-aade | "to shave/to shave oneself" |

- 9.57. Further instances of this usage will be shown through its combination with such infixes as -or, e.g.

Fuuta Tooro

| | |
|---|--|
| Ma mi waaw <u>naf-t-or-aade</u> ngal meccal (middle) | "This skill is going to be of great use to me (lit. I shall be able to assist-myself-with this job)" |
| O wii omo wara kam so wona mi <u>soot-t-or-a</u> jawdi keewndi (middle) | "He said he would kill me unless I buy myself out with a lot of money" |

- 9.58. In some instances the derived radical and its primary counterpart have got the same basic meaning, e.g.

Fuuta Jaloo

| | |
|--|---|
| o <u>nodd-it-i</u> bibbe makko beɲ fow, o | "He called all his children and gave them the presents" |
|--|---|

sennd-it-i ko o he had brought them"
 neldi be kon (active) (It will be noted that
 both nodd-it-i and
 sennd-it-i have got the
 same meaning as noddude
 "to call and senndude
 "to divide")

Debbo gooto yedd-it-ii "One woman disagreed
 ko be wiinoo kon with what they had
 (middle; yeddude/yedd-it-aade said"
 "to disagree")

Fuuta Tooro

To ngon-daa too ina "The place where you are
wodf-it-ii (middle; is far off"
 wodfaade/wodf-it-aade
 "to be far off")

- 9.59. Because of their morphology, certain primary radicals may give the impression of being derived radicals containing the infix -it- (cf. 9.38. for the same thing with the infix -ir-/-or-); a few examples of such cases are as follows:

ruttude "to take back"
 toppitaade "to look after"
 yejjitude "to forget"

These would appear to be primary radicals themselves and cannot be further analysed.

Supplementary notes on the -it- infix

- 9.60. Because of its wide range of meanings this infix may lead to a certain amount of confusion. This is the reason why reasonable attempts are generally made to lessen the chances of such confusion, either by way of an explanatory particle (such as kadi "again" for the repetitive infix) with the appropriate infix or the deliberate use of alternative simple radicals containing such meanings (cf. 9.54 Fuuta Jaloo)

-oy-

- 9.61. This infix occurs regularly with a great number of radicals, in all three voices. It is used with reference to distance, both in space and in time; it is sometimes translated by the English phrase "go and...."

Active Voice

Fuuta Jaloo

| | |
|---|--|
| o taw-oy-i Almaami on funnaange | "He went and found the King in the east" |
| Ndaaree ko dab-b-an-oy-a ⁽³⁷⁾ en ko nyaamen | "Please find somebody to go and get us something to eat" |

(37) This radical illustrates a combination between -an- and -oy-

o yeey-oy-i na'i makko
 diŋ fow (active)

"He went and sold all his
 cows"

Fuuta Tooro

Ngayn-oy-mi

"I went and tended the cattle"

O wii baaba oo:
Sood-oy-am kadi

"He said to his father: Go
 and sell me again"

Min ngadd-oy-i dum

"We went and brought it"

Middle Voice

Be fow be sakk-oy-ii
 mo ka kene saare

"They all went and waited
 for him at the outskirts
 of the village"

Mi loot-oy-to woni

"I am going to have a wash"

O femb-oy-ike

"He has gone to have a shave"

Yahee moor-oy-on be

"Go and dress their hair
 for them"

Fuuta Tooro

Kirt-oy-oden

"Let's go and have supper"

ngott-oy-ee

"Go and have lunch"

Passive Voice

-Yo heeferbe beŋ
fell-oy-e (fuuta Jaloo)

"Let the pagans be shot"

Fuuta Jaloo/Fuuta Tooro

Be nodd-oy-aa

"They were called"

The verbal radical containing this infix is also used.

(i) Hypothetical situations (in Fuuta Jaloo)

Mi anndaa si o
dad-oy-ay (active)

"I don't know whether he
will escape"

Ko maa Alla si be
yiid-oy-a (active)

"They have very little chance
of meeting"

Mi sikkaa o yiit-oy-te
(passive)

"I don't think he will be
found"

- (ii) In cases where the execution of a particular action is dependent upon the prior fulfilment of an earlier action. This usage is common to the two dialects, even though the following illustrations are from Fuuta Tooro.

Active Voice

| | |
|--|---|
| O jaggi mo omo <u>war-oy-a</u> mo | "He arrested him and was going to kill him" |
| So be njehii ma be <u>mbaal-oy</u> toon | "If they go they are bound to spend the night there" |
| Siko tawii mi artii mi <u>naat-oy-a</u> mi <u>sars-oy-a</u> | "If I come back I'll go in to load the lorry" |

Middle Voice

| | |
|------------------------|-----------------------------------|
| Modo <u>hirt-oy-oo</u> | "I am going to have my supper" |
|------------------------|-----------------------------------|

Passive Voice

| | |
|---|---|
| <u>Wi</u> 'aa yo be mbaad feere debbo oo <u>add-oy-ee</u> | "They were told to arrange for the woman to be brought over (lit. It was said that they should arrange for the woman to be brought over)" |
|---|---|

- in -

- 9.62. In many cases it is possible to assign to this infix a causative meaning which is ~~different~~ from the one described in 9.33. As a matter of fact the latter refers to the reason why an action occurred, whereas

the infix under consideration has got the meaning of "making/arranging for/causing someone or something to do something". It is the equivalent of the French language faire + infinitive ("faire fondre" melt-in-de, "faire chanter" yim-in-de etc.).

Fuuta Jaloo

- | | |
|--|---|
| <p>Mido faalaa <u>tuub-in-de</u> be</p> | <p>"I should like to convert them to Islam. (lit. I want to cause-them-to convert-themselves)"</p> |
| <p>Nɔ wondaani e waawdo, hisataa, <u>his-in-taa</u> (active)</p> | <p>"Whoever is not on the winning side will neither be saved nor save anyone. (his-in-de "to cause to be saved")"</p> |
| <p>Heege ngen <u>tamp-in-ii</u> men (active)</p> | <p>"We are suffering a lot from hunger (tampin-de "to cause to be tired")"</p> |
| <p>Diina no <u>moyy-in-a</u> laakara</p> | <p>"Religion is a good preparation for heaven" (mo -in-de to make good, to cause to be good)</p> |
| <p>Fii laamu no <u>haaw-n-ii</u> (middle)</p> | <p>"Power is amazing (haw-n-ude to cause to be surprised)"</p> |

Be fow be am-in-aa (passive) "They were all made to dance"

Puccu ngun dog-in-aa "The horse was made to run"
(passive)

Fuuta Tooro

Siko tawii weetii "When morning comes and the
haa naange ngee sun rises I take the cattle
wulii, mi oor-n-a out to graze. (oor-n-ude
(active) "to cause, to go out, to
graze)"

Ko lel-n-u-maa doo? "What made you spend the
(active) night here?"

Gorko oo jol-n-i mo "The man made him get into
e nder laana hee the boat"
(active)

O yalt-in-i na'i dii "He took the cows out (yal-
(active) t-in-de "to cause to go
out")"

Miimi yo aynaabe "I said to the shepherds
bee njar-n-am heen to give me some of their
(active) drinks"

Tedd-in jom suudu
ma (active)

"Respect your
husband (tedd-
in-de "to cause
to be heavy,
to respect")"

- 9.63. The following two examples are of verbs which show consonant and vowel change from primary to derived forms (see 9.17).

Fuuta Jaloo

Be wi'i mo Mej arii
laam-in-de ma (active;
cf. laam- "to rule")

"They said to him: We
have come to make
you a chief."

Fuuta Tooro

Omo danyi jawdi kono
o nyaamataa, o nyamm-
in-taa (active),
(cf. nyaamde
"to eat")

"He is wealthy but he
is tight-fisted (lit.
He has some wealth but
he does not eat or
make-other people-eat-it)."

-in̄kin-, -intin-

- 9.64. These two infixes have been grouped together because they refer almost exactly to the same meaning. They are both always found in the middle voice, even if the corresponding primary radicals are in the Active.

Basically, these two infixes can be said to refer to simulation or pretence.

The -in̄kin- infix seems to be more common in Fuuta Jaloo. Its shortened version, -kin-, is also found in Fuuta Tooro (kanko ko maccudo o wonnoo, kono noon o won-kin-iima wõnde di mo "He was a slave, but he pretends to be a free man")

Fuuta Jaloo/Fuuta Tooro

| | |
|---|---|
| loot-ude/loot-in̄kin-aade; loot-intin-aade | "to wash/to pretend to wash" |
| naʒude/naʒ-in̄kin-aade; naʒ-intin-aade | "to carry/to pretend to carry" |
| hul-de/hul-in̄kin-aade; hul-intin-aade | "to be afraid/to pretend to be afraid" |
| am-ude/am-in̄kin-aade; am-intin-aade | "to dance/to pretend to dance" |

| | |
|--|---|
| jal-de/jal-in _ɲ kin-aade; jal-intin-aade | "to laugh/to pretend to laugh" |
| nyaam-ude/nyaam-in _ɲ kin-aade nyaam-intin-aade | "to eat/to pretend to eat" |
| dar-aade/dar-in _ɲ kin-aade; dar-intin-aade | "to stand/to pretend to stand" |
| jooɗ-aade/jooɗ-in _ɲ kin-aade; jooɗ-intin-aade | "to sit down/to pretend to sit down" |
| waal-aade/waal-in _ɲ kin-aade; waal-intin-aade | "to lie down/to pretend to lie down" |
| imm-aade/imm-in _ɲ kin-aade; imm-intin-aade | "to stand/up to pretend to stand up" |
| laam-aade/laam-in _ɲ kin-aade; laam-intin-aade | "to be chief/to pretend to be chief" |

Infixes used on very rare occasions

9.65. There exists a number of infixes in both dialects which seem to be either dead or used with a very limited number of primary radicals. I have listed below a number of such instances.

1) -iɗ-

Fuuta Jaloo/Fuuta Tooro

fur-de/fur-d-ude "to be grey/to become grey"

rim-de/rim-d-ude "to be born/to be free"

Some of such infixes are based upon nominal stems e.g.

barke/bark-id-ude "good fortune/be fortunate,
blessed"

As illustrated by the above examples, this infix seems to draw attention to the change of state of the person or thing under consideration. It can be most appropriately translated into English as "to become..."

2) -ib-

hul-de/hul-b-inde "to be afraid/to scare"

The derived radical hul-b-in seems, at first sight, to be analysable as containing an infix -b- +in, but only the latter seems to modify the meaning of the primary radical (hul-in-de*/to cause to be afraid, to scare/-cf 9.62); I am unable to attempt any description of this infix since I only encountered one derived radical containing it.

3) -l- (Futa Tooro)

heb-aade/heb-l-aade "to get ready/to get
ready quickly"

moom-de/moom-l-aade "to caress/to rub something
over one's own body"

According to Gaden, this infix has some intensive meaning: "Il ajoute une nuance d'intensité au sens exprimé par la racine. (38)"

(38) Gaden, H, 1913, p.66

CHAPTER 10: THE PAST ANTERIOR AFFIX

- 10.1. This chapter deals with the phenomenon whereby a particular tense combines with what I⁽¹⁾ call the past anterior affix, -no(-)/-noo, to take a particular action further back in time. It often implies a change of situation from the time when the action took place. The following example will give an indication of the use of past anterior tenses relative to the past tenses. There is a relation between the sequence of events in the situation and the tense sequence in the story:

Fuuta Tooro

| | |
|---|---|
| Baaba Lii ummii hodi e Benke. Abdul Bookar anndi ko doon o woni ina <u>soxl-u-noo</u> mo, ina yidi yiide mo | "Baaba Lii went and settled at Benke. Abdul Bookar discovered where he was; he had <i>needed</i> to see Baaba Lii, he <i>wanted</i> him" |
|---|---|

In the above example, the sequence of events is as follows:

- 1) ina soxl-u-noo "had needed"
- 2) ummii "got up", Relative past middle
- 3) hodi "settled" Relative past active
- 4) anndi, woni "knew, dwelt", Relative past active
- 5) yidi yiide mo "wanted to see him", Relative past active

This means that the action in 1) is anterior to all the others.

10.2. This affix combines with all the tenses of the indicative mood except for the vague future in Fuuta Tooro. On the other hand it combines neither with the tenses of the subjunctive nor with the forms of the imperative.⁽²⁾

10.3. The past anterior affix sub-divides the relevant tenses of the indicative into two major parts:

- Those with it
- Those without it

For the sake of clarity I have maintained the same tense-names for both situations, since there is no danger of creating any confusion.

10.4. The affix under consideration is found at two positions:

- (i) Final
- (ii) Non-final

(1) Arnott calls it the preterite element (cf. Arnott D.W., 1970, p.217)

(2) Perhaps because the meanings associated with these moods are incompatible with those of the past anterior affix.

1) Final position

This occurs with both general and relative tenses,
positive and negative:

General past:

Active voice: -ii + -no gives -ii-no, e.g.

Fuuta Jaloo

O haal-ii-no "He had said so"

O daw-ii-no "He had left early in
the morning"

Fuuta Tooro

~~Wad-ii-no~~ kadi "It had happened again
ndeen e Fuuta in Fuuta Tooro"

Emphatic past

Active voice: -u +no gives -u-no, e.g.

Fuuta Jaloo

O haal-u-no "He had said so"

O daw-u-no "He did leave early in
the morning"

General Future

Active Voice: -ay+ no gives ay-no, e.g.

Fuuta Jaloo

O haal-ay-no "He was going to say it"

be majj-ay-no "They were going to be lost"

Fuuta Tooro -at +no gives at -no* which gives an-no

mi loot-an-no dum "I was going to wash it"

-Emphatic negative active

-aa +no gives -aa-no

Fuuta Jaloo

Mi wi'-aa-no dum "I insist that I did not
say so"

Negative Future

Active Voice: -ataa+ -no gives -ataa-no e.g.

Fuuta Jaloo

Mi ar-ataa-no "I was not going to come"

Mi majj-ataa-no "I was not going to be lost"

Relative past

Middle Voice: -ii + -noo gives -i-noo, e.g.

Fuuta Tooro

Ndi o jog-i-noo ndii "The one (i.e. the bull,
buri ndiidoo doole etc.) that he used to
have is stronger than
this one"

Relative future

Passive Voice: -ete + -noo gives -ete-noo, e.g.

Fuuta Tooro

To puccu nguɔ tonng-ete-noo too "(The place) where
the horse used to be hobbled"

(please see table 2 for further details on the relevant voices of the latter two tenses).

(ii) Non-final position

- 10.5. The past anterior affix can also be inserted within the suffixes of certain tenses:

General past, negative past, negative future.
In all these instances the suffix under consideration splits up tense suffixes into two. It involves the middle and the passive voices only, in all instances⁽²⁾.

Fuuta Tooro

be loot-i-noo-ma "They had washed"

(General past middle)

Ndi war-a-noo-ka "It (i.e. the bull etc.)
had not been killed"

(Negative past passive)

- 10.6. The past anterior affix is also found between the tense suffix and the inverted subject pronouns of relative tenses⁽³⁾, e.g.

(2) Please see table 2 and 10.10 where all the cases mentioned here are fully outlined and illustrated.

(3) For further details see table 2 and 10.13.

a) Active VoiceRelative past

1 sg -u-noo-mi Ko kaŋko nodd-u-noo-mi
 "He is the one I had called"

2 sg -u-no-ɖaa Ko kaŋko nodd-u-no-ɖaa
 "He is the one you had called"

Relative future

1 pl incl ay-no-ɖeŋ Ko kaŋko nodd-ay-no-ɖeŋ
 "He is the one we were going to call"

b) Middle voiceRelative past

2 sg -i-no-ɖaa Nde waal-i-noo-ɖaa to?
 "When did you spend the
 night there?"

2 pl oto-no-ɖoŋ Nde sakk-oto-no-ɖoŋ be ndeŋ
 "The one (i.e. the calabash etc.)
 that you were going to give them"

- 10.7. The past anterior affix has two forms: -no(-) and -noo(-), the distribution of which can best be described by taking general tenses separately from relative tenses.

Table 1. The past anterior affix and general tenses

| TENSE | ACTIVE VOICE | | MIDDLE VOICE | | PASSIVE VOICE |
|-------------------|--------------|---------|--------------|-------------|--------------------------|
| | FJ/FT | FJ | FT | FJ | |
| General Past | -ii-no | | | -i-no-ke | -i-noo-ma -i-no-maama |
| Emphatic Past | (-u)-no | | | -i-no | -a-no |
| General Future | | -ay-no | -an-no | -oto-no | -ete-no |
| Negative Past | -aa-no | | | -a-noo-ki | -a-noo-ka |
| Emphatic Negative | | -aa-no | Non-Existant | | |
| Negative Future | -ataa-no | | | -ata-noo-ko | -ata-noo-ke |
| Stative | (u)-noo | | | -i-noo | -a-noo |
| Continuous 1 & 2 | | -ay-noo | -an-noo | -oto-noo | -ete-noo |

Notes and abbreviations: The forms of the general future and the continuous are obtained from the harmonisation between the consonants t and n: -at-no > an-no; at-noo > an-noo. The brackets refer to the optional nature of the vowel u in front of certain radicals, e.g. Emphatic past active: o hul-u-no/hul-no "he had been afraid" (cf. table 1 chapter 7, note).

FJ: Fuuta Jaloo

FT: Fuuta Tooro

Table 2. The past anterior suffix and relative tenses

| TENSE | COMBINATIONS | | | |
|-----------------|-------------------------------|-------------|-------------|---------------------------|
| | Non-Inverted Subject Pronouns | 1 Singular | 2 singular | Inverted Subject Pronouns |
| | | 1 pl. incl. | 2 pl. | |
| Relative Past | | | | |
| Active | (-u)-noo | (-u)-noo-mi | (-u)-no-daa | (-u)-no-don |
| Middle | -a-noo | -i-noo-mi | -i-no-daa | -i-no-don |
| Passive | -a-noo | -a-noo-mi | -a-no-daa | -a-no-don |
| Relative Future | | | | |
| Active | FJ ay-noo | -ay-noo-mi | -ay-no-daa | -ay-no-don |
| Middle | FT ar-noo | -ar-noo-mi | -ar-no-daa | -ar-no-don |
| Passive | -oto-noo | -oto-noo-mi | -oto-no-daa | -oto-no-don |
| | -ete-noo | -ete-noo-mi | -ete-no-daa | -ete-no-don |

General Tenses

- 10.8. In this case the distribution of the two forms depends upon the position of the past anterior affix, i.e. whether it is final or not.
- 10.9. When in final position, the form is -no except for the stative and the continuous, where it is -noo, (but see also 10.14. for the combination with the 2 sing. maa)

General Past ActiveFuuta Jaloo

O nang-ii-no be ko booyi "He had arrested them a
long time ago"

Be ar-ii-no gila hecci "They had come since the
han̄ki day before"

Fuuta Tooro

-Wad-ii-no e Fuuta "It had happened in Fuuta
Tooro"

-Ada an̄ndi a wopp-ii-no "You know that you had
min njaa-daa to bibbe given us up and you had
yumma'en joined your half-brothers"

Negative past active and General future middleFuuta Jaloo

| | |
|----------------------------|--------------------------|
| si <u>won-aa-no</u> Alla e | "Had it not been for God |
| Nelaado muudun on, | and his Messenger you |
| <u>taw-ay-no</u> a maayii | would have been dead a |
| (cf table 1 for further | long time ago" |
| details) | |

Exceptionsa) StativeActive VoiceFuuta Jaloo

| | |
|------------------------|------------------------------|
| himo <u>suud-u-noo</u> | "He had hidden the calabash" |
| horde nden | |

Middle VoiceFuuta Jaloo

| | |
|----------------------------|--------------------------------|
| Mido <u>jood-i-noo</u> doo | "I had been sitting down here" |
|----------------------------|--------------------------------|

| | |
|---------------------------------|----------------------------------|
| himo <u>suud-i-noo</u> ko ladde | "He had been hiding in the bush" |
|---------------------------------|----------------------------------|

b) Continuous Active

Fuuta Tooro

safalbe bee lummbi, ina e
 nder ndiyam hee ina njuwa.
 Debbo gooto ina yoogar-noo ⁽⁴⁾
 nani kolce pucci dii ina
 njaha e ndiyam.

"The Moors were crossing
 the river, they were
 swimming in the water.
 A woman who had been
 drawing water heard the
 noise made by their
 horses"

- 10.10. When non-final within another ending the form is -noo
 except for the Fuuta Jaloo general past middle -i-no-ke
 (but see also 10.14 for the cases with the second and
 third persons singular object pronouns -maa- and -moo-)

a) General PastGeneral Past Middle (Fuuta Tooro)

-iima > i-noo-ma

o suud-i-noo-ma

"He had hidden"

be mbaal-i-noo-ma

"They had gone to bed"

General Past Passive (in both dialects)

-aama > a-noo-ma

Fuuta Jaloo

Na'i diŋ hirs-a-noo-ma

"The cows had been
 slaughtered"

Men wall-a-noo-ma

"We had been helped"

b) Negative Past

(i) Middle Voice

Fuuta Jaloo/Fuuta Tooro:

-aaki gives a-noo-ki

o suuf-a-noo-ki

"He had not hidden"

be loot-a-noo-ki

"They had not washed"

(ii) Passive Voice

Fuuta Jaloo/Fuuta Tooro:

-aaka gives a-noo-ka

be nood-a-noo-ka

"They had not been called"

o loot-a-noo-ka

"He had not been washed"

c) Negative Future

(i) Middle Voice

Fuuta Jaloo/Fuuta Tooro:

-ataako gives -ata-noo-ko

O suuf-ata-noo-ko

"He was not going to hide"

(4) yoogan-noo < yoogat-noo

O loot-ata-noo-ko "He was not goint to wash"

(ii) Passive Voice

Fuuta Jaloo/Fuuta Tooro: -ataake gives ata-noo-ke

O naang-ata-noo-ke "He was not going to be caught"

Be loot-ata-noo-ke "They were not going to be washed"

Exception

General Past middle in Fuuta Jaloo: -ike gives -i-no-ke

O loot-i-no-ke "He had washed"

O jood-i-no-ke "He had sat down"

Relative Tenses

- 10.11. In the case of relative tenses the use of either form will depend upon the arrangement of the subject pronoun, i.e. whether it is inverted or not.
- 10.12. In the non-inverted forms, the affix is final and is -noo in all cases except where the sentence is followed by the second person singular object pronoun maa (cf. 10.14)

Relative Future:Fuuta Jaloo:

-gertogal ngal o
sood-ay-noo ngal
 (3 singular, active)

"The chicken that he
 was going to buy"

-Ko saabunde men
loot-or-to-noo
 (1 plural exclusive,
 middle)

"We were going to wash
 with soap"

-Hay gooto anndaano⁽⁵⁾ nde
 na'i diŋ nanng-ete-noo
 (3 plural, passive)

"No one knew when the cows
 were going to be caught"

Relative pastFuuta Jaloo

Neddo mo o diis-u-noo on
 (3 singular, active)

"The person whom he had
 talked to about it"

Fuuta Tooro

-Pucci di men mbadd-i-noo dii
 (1 plural exclusive, middle)

"The horses we had mounted"

(5) This is a combination between the emphatic negative and the past anterior suffix (cf table 1).

-boggol ŋgol be kabbir-a-noo "The rope they had been
 ŋgol tied up with"

- 10.13. In the inverted forms the infix is -no- where the subject pronoun has a long syllable CVW or CVC, and -noo where the pronoun is CV (but see also 10.14 for the cases with the 2 and 3 sing. object pronouns -maa- and -moo-)

Relative past active

2 sg -u-no-daa Ko han̄ki majj-u-no-daa
 "You were lost yesterday"

1 pl incl -u-ne-den Ko han̄ki majj-u-no-den
 "We were lost yesterday"

2 pl -u-no-don Ko han̄ki majj-u-no-don
 "You were lost yesterday"

but

1 sg -u-noo-mi Ko han̄ki majj-u-noo-mi
 "I was lost yesterday"

Relative past middle

2 sg -i-no-daa Ko han̄ki suuf-i-no-daa
 "You hid yesterday"

1 pl incl -i-no-den Ko haŋki suuɬ-i-no-den
 "We hid yesterday"

2 pl -i-no-don Ko haŋki suuɬ-i-no-don
 "You hid yesterday"

but

1 sg -i-noo-mi Ko haŋki suuɬ-i-noo-mi
 "I hid yesterday"

Relative Future Passive

2 sg -ete-no-daa Ko haŋki suuɬ-ete-no-daa
 "You were going to be hidden
 yesterday"

1 pl incl -ete-no-den Ko haŋki suuɬ-ete-no-den
 "We were going to be
 hidden yesterday"

2 pl -ete-no-don Ko haŋki suuɬ-ete-no-don
 "You were going to be hidden
 yesterday"

but

1 sg -ete-noo-mi Ko haŋki suuɬ-ete-noo-mi
 "I was going to be
 hidden yesterday"

- 10.14. On the other hand, the long-vowelled infix -noo is shortened before the item maa 'you' (2 singular object pronoun) in final positions and the items -maa- 'you' (singular) and -moo- in non-final positions, e.g.

Final positions:

Continuous 1 active

Fuuta Jaloo

mido loot-ay-noo ngel "I was washing it" (a little one)

but

mido loot-ay-no maa "I was washing you"

Stative middle

Fuuta Tooro

Omo yaaf-i-noo ngal "He has forgiven it" (a hen)

but

Oma yaaf-i-no maa "He has forgiven you"

Relative future middle

Fuuta Jaloo

Ko janngo o lannd-oto-no
duŋ

"It was tomorrow that
he was goint to ask
for that"

but

Ko janngo o lannd-oto-no maa

"It was yesterday that
he was going to ask you"

Non-final positions

Relative past active

Fuuta Jaloo

Ko haal-u-noo-mi kon

"What I had said"

but

Ko haalan-no-maa-mi kon

"What I had told you"

Ko haalam-no-moo-mi

"What I had told him"

Relative Future middle

Fuuta Jaloo

-Ko janngo o yaaf-oto-noo be

"He was going to forgive
them tomorrow"

but

Ko jaŋŋgo yaaf-oto-no-maa-mi "I was going to forgive
you tomorrow"

Ko jaŋŋgo yaaf-oto-no-moo-mi "I was going to forgive
him tomorrow"

10.15 I shall now devote some space to supplementary notes
on the past anterior affix.

10.16. The insertion of the affix under consideration with
the tense-suffix causes a shift of the stress to the
former e.g.

General past middle

Fuuta Jaloo

o joodike⁽⁶⁾ "He has sat down"

but

o joodi noke "He had sat down"

Fuuta Tooro

o joo diima "He has sat down"

but

o joodi nooma "He had sat down"

(6) The salient syllable is underlined.

Negative past middleFuuta Jaloo/Fuuta Tooro

O joo_daaki "He has not sat down"

but

O jooda_nooki "He had not sat down"

(This applies to all the cases mentioned in 10.10)

- 10.17. The negative past active drops part of its suffix when it combines with the past anterior suffix. The result of such combination is similar in shape with that of the emphatic past. It is only the presence or the absence of emphasis within the past anterior clause which will help us to determine the corresponding original tense.

It may be said that in this case the negative past active suffixes of both dialects consist of two parts, -aa-li/-ni the latter part of which is dropped here, i.e.

Fuuta Jaloo

3 -aa-li gives -aa-no,

Fuuta Tooro

-aani gives -aa-ni gives aa-no

o ar-aa-no

"He did not come"

o nood-aa-no mo

"He did not call him"

but (emphatic past active)

Alla e Annabiijo on no
anndi, mi wi'aa-no mo,
mi wad-aa-no; ko o
toony-an naange e hoore

"I swear by God and his
Messenger (lit. God and
his Messenger know it);
I emphatically deny
doing or saying anything
to him. (lit. I did
not do or say anything
to him); He did
bully me in broad
day-light.

CHAPTER 11: SUBJECT AND OBJECT PRONOUNS

- 11.1. In the ~~Pulaar~~/Fulfulde language both subject and object pronouns are part of the verbal piece, this is taken to mean that they can better be dealt with in the wider context of the verbal system as a whole, rather than described on their own.
- 11.2. Subject and object pronouns are sub-divided into concordant and non-concordant forms.⁽¹⁾
- 11.3. Concordant forms are identical in shape with the corresponding nominal class forms.⁽²⁾ They cannot be inverted nor can they be inserted within the verbal *word*. On the other hand, for both subject and object pronouns there is not more than one concordant form. In the following illustrations subject and object pronouns are respectively found before and after the verb in the general past active.

| | | | |
|------------|---------|------------|----------------------------------|
| <u>Nde</u> | nyaamii | <u>nde</u> | "It has eaten it" (cf. cl 3 nde) |
| <u>Ndi</u> | ... | <u>ndi</u> | (... 4 ndi) |
| <u>Ndu</u> | ... | <u>ndu</u> | (... 5 ndu) |
| <u>nge</u> | ... | <u>nge</u> | (... 6 nge) |
| <u>ngo</u> | ... | <u>ngo</u> | (... 7 ngo) |
| <u>ngu</u> | ... | <u>ngu</u> | (... 8 ngu) |

| | | | |
|-------------|---------|-------------|---------------------------------------|
| <u>ngel</u> | nyaamii | <u>ngel</u> | "It has eaten it" (cf. cl 9 ngel) |
| <u>kal</u> | ... | <u>kal</u> | ... (... 22 kal) |
| <u>ngal</u> | ... | <u>ngal</u> | ... (... 25 ngal) |
| <u>be</u> | ... | <u>be</u> | "They have eaten (... 2 be) them" |

Exception

O loot-i mo "He has washed him" (cf. cl. 3.0)

- 11.4. Non-concordant forms do not have a concord marker. They can be both inverted and non-inverted. Some space will now be devoted to the distribution and behaviour of non-concordant subject forms in subject and object pronouns.

I Subject pronouns

a) Non-inverted (and non-concordant) forms

- 11.5. In general tenses, non-concordant forms are found in the following instances.

1. Singular mi nyaamii "I have eaten"
2. Singular a ... "You ... "
1. Plural incl. en/en nyaamii "We have eaten"
1. plur. excl. men/men ... "We ... "
2. plur. on/on ... "You ... "

-
- (1) The terms concordant and non-concordant have already been used by Arnott to describe the same situation for the Combe dialect (cf. Arnott, D.W., 1970, p.)
- (2) With the exception of the third person singular the concordant form of which is mo.

- 11.6. As far as relative tenses are concerned, the only non-concordant and non-inverted subject pronoun is the first person plural exclusive (men/men), since the third person singular and plural, which are also non-inverted, are part of concordant forms:

Relative past active

men/men nyaami "We ate" (1 pl. excl.)

Relative future middle

men/men laamotoo "We will rule" (1 pl. excl.)

- 11.7. In the tenses of the subjunctive mood, non-concordant and non-inverted forms are found in the first and second persons singular and plural for the primary tense.

Active Voice

- | | | |
|----------------|---------------------|-------------------|
| 1. sing. | yo <u>mi</u> loot-u | "Let me wash(it)" |
| 2. sing. | yo <u>a</u> loot-u | "Wash (it)" |
| 1. plur. incl. | yo men/men loot-u | "Let us wash(it)" |
| 1. plur. excl. | yo en/en loot-u | "Let us wash(it)" |
| 2. plur. | yo on/on loot-u | "Wash (it)" |

In the secondary tense, non-concordant and non-inverted forms are found in the first and second persons singular and plural for the primary tense.
e.g.

Maa mi loota "I must wash (it)"

Maa men/men loota "We must wash (it)"

b) Inverted forms

- 11.8. Inverted subject pronouns are only found in relative tenses and in the secondary tense of the subjunctive. They are as follows:

- 1 singular (4)
- 2 singular
- 1 plural inclusive
- 2 plural

Examples

(i) 1 singular

Relative past active

Fuuta Jaloo

Ko an nodd-u-mi "It is you that I called"

Ko kanke dog-u-mi "It is from him that I ran away"

(4) except for the secondary tense of the subjunctive which has a non-inverted first person singular, as shown in the previous paragraph (cf. § 11.7)

Fuuta Tooro

Nde nanng -u-mi ndee "The one that I caught"

(ii) 2 SingularRelative Future ActiveFuuta Jaloo

Ko kanke nodd-at-aa "It is him that you are calling"

Fuuta Tooro

Kaal-at-aa ko pulaar? "Are you speaking Pulaar?"

Nde ngart-at-aa? "When will you be back?"

(iii) 1 plural inclusiveSecondary tense of the subjunctive, activeFuuta Jaloo

Juul-en, nanng-en Alla "Let's do our prayers and
e Nulaado muudun on trust ourselves to God
and his Messenger"

- (ii) The forms starting with the glottalised consonant *d* occur in the relative past active, middle and passive, in the relative future middle and passive and in the secondary tense of the subjunctive, middle and passive. (For illustrations, cf table 3 of this chapter, table 4 of chapter 7 and table 2 of chapter 8).

- 11.10. It should be pointed out that both stative and continuous tenses have separate sets of concordant and non-concordant subject pronouns which have already been dealt with in chapter 7 (cf tables 2 and 3 of the same chapter), e.g.

Stative

Fuuta Jaloo

mido dog-i (active) "I have run away"

hida loot-ii (middle) "You have had a wash"

himo nanngaa (passive) "He is under arrest"

hinde/hindi/hindu/nanngaa (passive) "It is impounded"
(i.e. a hare/ a bull/a dog)

Continuous

Fuuta Tooro

| | |
|------------------------------|-------------------|
| <u>emin</u> nganndi (active) | "We know" |
| odon njoodii (middle) | "You are seated" |
| <u>ebe</u> lootaa (passive) | "They are washed" |

Table 1. Non-concordant forms of subject pronouns

| Category | Non-Inverted | Inverted | Meaning |
|--------------|--------------|-----------|---------|
| 1 singular | mi | -mi | I |
| 2 " | a | -aa | you |
| | | -daa | you |
| 1 plur incl. | en/en | -en/-en | we |
| | | -den/-den | we |
| 1 plur excl. | RJ men | | |
| | FT men/min | | |
| 2 plur | on/on | -on/-on | you |
| | | -don/-don | you |

Table 2: Concordant forms of subject pronouns in the two dialects

| Category | Subject pronouns (Fuuta Jaloo/Fuuta Tooro) | Meaning |
|------------|--|--|
| 3 singular | o nde ndi ndu nge ngo ngu ngii ngal ngol mba/ba ka ki ko kol dan/dam dun/dum Diminutive ngel kal kun Augmentative ngal ngii | he it it |
| 3 plural | be de di Diminutive koy/kon | they |

Object pronouns

- 11.11. As in the case of subject pronouns the use of a particular form of object pronoun is dependent upon the following factors:
- General & Relative Tenses
 - Individual Tenses
 - Individual Dialects
- 11.12. Non-concordant object pronouns will be dealt with under the above categories.
- 11.13. In the first person singular the general forms are lan in Fuuta Jaloo and kam/mi in Fuuta Tooro, these being in free variation. All these three forms are found in general relative and subjunctive tenses.

General past activeFuuta Jaloo

- o noddii lan "He has called me"
- o lootii lan "He has washed me"

Fuuta Tooro

- saa accii kam, mi "If you let me go home,
hootii ma ɓe njeddu they will not believe it"

General past middleFuuta Jaloo

- o janfike lan "He has deceived me"

be lanndike lan "They have asked me"

Fuuta Tooro

o yaafimaama kam/mi "He has forgiven me"

o naamndiima mi/kam "He has asked me"

General future passive

Fuuta Jaloo

o halfinete lan "He will be entrusted to me"

Be jonnitete lan "They will be given back
to me"

Fuuta Tooro

Ngu hollete kam/mi "It will be shown to me"

Vague future middle

Fuuta Tooro

Ma be namndo kam/mi "They will ask me"

- 11.14. On the other hand, in the following tenses the verbal piece combines directly with the first person singular form -an/-am found in both dialects.

- 11.15. Both dialects have a form -mi which is suffixed to the verbal piece of the relative past active, the relative future active, continuous 1 active, the stative active⁽⁵⁾ and the secondary tense of the subjunctive, active. There then occurs a gemination of the nasal initial consonant m of -mi resulting in the following forms:

(i) Continuous 1 active -a-m-mi

Fuuta Jaloo

himo nodda-m-mi "He is calling me"
 hi^hbe ndaara-m-mi "They are looking at me"

(ii) Stative active -i-m-mi

Fuuta Jaloo

hi^hbe noddi-m-mi "They have called me"
 hi^hda am^hndi-m-mi "You know me"

(iii) Relative past active -i-m-mi

Fuuta Jaloo/Fuuta Tooro

o noddi-m-mi "He called me"

(5) The latter two occur mainly in Fuuta Jaloo, as illustrated by (i) and (ii); Fuuta Tooro generally uses the forms kam or mi which are not suffixed to the verbal form.

(iv) Relative future active ata-m-mi

Fuuta Jaloo

Ko janngo o noddata-m-mi "It is tomorrow that he
will call me"

(v) Secondary tense of the subjunctive active.

Fuuta Jaloo/Fuuta Tooro a-m-mi

Ma o nodda-m-mi "He must call me"

It should be emphasised that all the above forms are alternatives to laŋ in Fuuta Jaloo and kam/mi in Fuuta Tooro, e.g.

(i) Himo nodda laŋ "He is calling me" (Fuuta Jaloo)

(ii) O noddi kam/mi "He called me" (Fuuta Tooro)

- 11.16. The second and third persons singular each have two forms ma/(-)maa(-), mo⁽⁶⁾/-moo-, the distribution of which will be examined in relation to general and relative tenses on the one hand and imperative forms and tenses of the subjunctive mood on the other hand.

A. General Tenses

The distribution of ma and maa is different from that mo and moo.

11.17. The short-vowelled forms *ma* and *mo* are found in the following cases:

- (i) General past active, middle and passive
- (ii) Emphatic past, middle and passive
- (iii) General future, middle and passive
- (iv) Vague future middle and passive
- (v) Negative past active, middle and passive
- (vi) Negative future active, middle and passive
- (vii) Emphatic Negative active
- (viii) Continuous 2 active, middle and passive

The ensuing illustrations are given for some of these cases:

Vague future passive (Fuuta Tooro)

Ma o totte ma/mo "He will be given to you/him"

Negative past active

Fuuta Jaloo

Mi innaali ma "I did not name you"
 be lootaali mo "They did not wash him"

Fuuta Tooro

be noddaani ma/mo "They did not call you/him"

(6) Fuuta Tooro has a further form *mbo* which is always found in final position.

Negative past middleFuuta Jaloo/Fuuta Tooro

Mi yaafaaki ma/mo "I have not forgiven
you/him"

Mi janfaaki ma/mo "I have not deceived
you/him"

Negative past passiveFuuta Jaloo/Fuuta Tooro

Mi suufaaka ma/mo "I have not been hidden
from you/him"

Negative future activeFuuta Jaloo/Fuuta Tooro

o lootataa ma/mo "He will not wash you/him"

Negative future middleFuuta Jaloo/Fuuta Tooro

o yaafotaako ma/mo "He will not forgive
you/him"

Negative future passive

Fuuta Jaloo/Fuuta Tooro

Ndi tottetaake ma/mo "It will not be given
to you/him" (a bull etc.)

Emphatic Negative active (Fuuta Jaloo)

Mi anndaa ma/mo "I do not know you/him"

Continuous 2 active (Fuuta Jaloo)

himo suudude ma/mo "He is hiding you/him"

Continuous 2 middle (Fuuta Jaloo)

mido suudaade ma/mo "I am hiding from you/him"

Continuous 2 passive (Fuuta Jaloo)

hibe suudeede ma/mo "They are being hidden
from you/him"

- 11.18. The long vowelled form maa is used in final position in Continuous 1 and in the stative; but mo is also used in the same circumstances.

Continuous 1 activeFuuta Jaloo

Mido loota maa "I am washing you"

but

Mido loota mo "I am washing him"

Fuuta Tooro

Modo nannga maa "I am arresting you"

but

Modo nannga mo "I am arresting him"

Continuous 1 middle

Fuuta Jaloo

Mido yaafo maa "I am forgiving you"

but

Mido yaafo mo "I am forgiving him"

Stative Active

Fuuta Tooro

Omo nanngu maa "He is holding you"

but

Omo nanngi mo "He is holding him"

b) Relative tenses

- 11.19. The long vowelised form maa is used in final position in all non-inverted cases of relative tenses. The short vowelised form mo is used in all the similar circumstances, e.g.

Relative past activeFuuta Jaloo/Fuuta Tooro

O nanngu maa
but "He got hold of you/him"
 O nanngi mo

O lootu maa
but "He washed you/him"
 O looti mo

Relative past middleFuuta Jaloo/Fuuta Tooro

O janfi maa
but "He decided you/him"
 O janfii mo

O suudi maa
but "He hid from you/him"
 O suudii mo

Relative future middleFuuta Jaloo/Fuuta TooroKo kaŋko janfoto maabut

"He is the one who will

Ko kaŋko janfotoo mo

deceive you"

- 11.20. The forms -maa- and -moo- are also inserted between the verbal suffix and the inverted first person singular subject pronoun -mi of relative tenses, e.g.

2 singularRelative past activeFuuta Jaloo

lootu-maa-mi

"I washed you"

okku-maa-mi

"I gave you"

Fuuta Tooro

naŋgu-maa-mi

"I got hold of you"

cuudu-maa-mi

"I hid you"

Relative past middleFuuta Jaloo

| | |
|--------------|------------------|
| yaafi-maa-mi | "I forgave you" |
| janfi-maa-mi | "I deceived you" |

Fuuta Tooro

| | |
|----------------|------------------|
| cuudi-maa-mi | "I hid from you" |
| naamndi-maa-mi | "I asked you" |

Relative future middle

Fuuta Jaloo

| | |
|--------------------|-------------------------------------|
| Nde yaafoto-maa-mi | "When I am about to forgive you" |
| Nde janfoto-maa-mi | "When I am about to deceive you" |

Fuuta Tooro

| | |
|----------------------|-------------------------|
| Nde naamndoto-maa-mi | "When shall I ask you?" |
|----------------------|-------------------------|

3 Singular

Relative past active

Fuuta Jaloo

| | |
|--------------|----------------|
| Yobu-moo-mi | "I paid him" |
| lootu-moo-mi | "I washed him" |

Fuuta Tooro

Ngar-mi e Jolfo oo "I came to the Jolof man
mbii-moo-mi holno and asked him how this
duumdoo wadirtee is made"

Ko duum taki "That's the reason why I
naw-moo-mi gallam took him home"

Relative past middleFuuta Jaloo

Ko non suudor-moo-mi "That is how I hid from him"

Fuuta Tooro

Mismori-moo-mi ko "I have welcomed him
nande e anndude ko o because I understood what
haali koo firti he meant"

Relative future activeFuuta Jaloo

Mi anndaa ko lootinay- "I don't know what I am
-moo-mi going to wash him with"

Fuuta Tooro

Mi anndaa nde "I don't know when I
nanngam-moo-mi am going to catch him"

C) Imperative forms and tenses of the subjunctive mood:

- 11.21. The short-vowelled form mo is found in final position with imperative forms, e.g.

General Imperative

sing. Wallu mo "help him!"

plur. Nangee mo "catch him!"

- 11.22. The forms ma and mo are used in the primary tense of the subjunctive middle and passive e.g.

Fuuta Jaloo

yo o janfo ma/mo "Let him deceive/forgive you/him"
yo o yaafo ma/mo

Fuuta Tooro

yo o totte ma/mo "Let him be given to you/him"

- 11.23. The long vowelled form maa is used in the secondary tense of the subjunctive middle and passive, whereas the short form mo is found in all such circumstances, e.g.

Fuuta Jaloo/Fuuta Tooro

Middle

Maa o yaafo maa
but "He must forgive you/him"
 Maa o yaafoo mo

Passive

Maa o totte maa
but "He must be given to you/him"
 Maa tottee mo

- 11.24. On the hand, the following tenses prefer to use the second person singular form -e which is directly suffixed to the verbal piece.

(i) Emphatic past activeFuuta Jaloo/Fuuta Tooro

O wall-e "He did help you"

(ii) General future active⁽⁷⁾Fuuta Jaloo/Fuuta Tooro

O wall-et-e "He will help you"

(7) It will be noted that the usual active tense-suffixes -ay and -at in Fuuta Jaloo and Fuuta Tooro respectively, are -et before the suffix -e.

(iii) Vague future activeFuuta Tooro

Ma o wall-e "He will help you"

(iv) Primary tense of the subjunctive, activeFuuta Jaloo/Fuuta Tooro

Yo o wall-e "Let him help you"

(v) Secondary tense of the subjunctive, activeFuuta Jaloo/Fuuta Tooro

Maa o wall-e "He must help you"

- 11.24. All the plural object pronouns have one form each in Fuuta Jaloo. (1 plural inclusive: en; 1 plural exclusive: men; 2 plural: on)
In Fuuta Tooro, there is one form for the first person plural inclusive, i.e. en, but two forms each for the first person plural exclusive and the second person plural.

1 plural exclusive: min/men

2 plural: on/mon

Illustrations are provided for these cases below:

Mbar ko on arbe e
kamion⁽⁸⁾ min naw
mon hedde ga?

"Have you come by lorry?
We will take you this way"

Debbo oo addana mon
ndiyam, addana mon
coodordam

"The woman would bring
you drinking water and
water to wash your hands
with (lit. the woman
would bring you water,
bring you water- to-wash-
your-hands-with)"

(The forms men/min, on/mon are used indifferently
by the various speakers)

Notes on the difference between the third persons
singular mo and dun/dum

- 11.25. The third person singular has two forms, mo and
dun/dum, which are kept apart as shown below.
The main difference between the two forms is
that mo refers to a noun that is not in the same
sentence whereas dun/dum is used in contexts
where the noun it refers to is in the same
sentence. This applies to both dialects even
though the following illustrations are from
Fuuta Tooro only.

(8) This is a loan from the French camion "lorry".

Cukalel gorel ne'irtee ko
 saa⁽⁹⁾ jibinii dum, so
 yehii haa wadii hakkille,
 ittaa dum tottaa cerno ina
 haalana dum no Alla rewirtee,
 haalana dum wata toony
 Janngina dum. So ummiima
 artii e baammum, baammum
 ina waajoo dum

"How to bring up a little
 boy. When he grows (lit.
 When you beget him, when he
 goes until he gets intelli-
 gence), you give him to a
 teacher; the latter would
 teach him how to perform
 his religious duties,
 tell him to avoid bully-
 ing other people and
 educate him. When he
 is finally given back to
 his father, the latter
 would be his adviser (lit.
 would advise him)"

(9) Contraction of so + a "if you".

Abbreviations used in tables 3 and 4

A: Active M: Middle P: Passive

Note (s)

Table 4 note (1): This applies to situations where the first person singular subject pronoun is inverted (c. 1120)

PART IV: VERBO-NOMINALSCHAPTER 12: VERBO-NOMINALS⁽¹⁾

12.1. Verbo-nominals in the Pulaar/Fulfulde language are the infinitives and the participles. A verb has up to three infinitives according to its voice, e.g. loot-ude/loot-ugol "to wash" (active); loot-aade/loot-agol "to have a wash" (middle); loot-eede "to be washed" (passive). The participles are past and future/habitual for each voice.

12.2. Infinitives and participles behave both like nominals and verbs. As nominals, their endings correspond to those of the nominal class system, e.g.

a) Infinitives: These have endings like nouns of class 3 nde and, in the case of Fuuta Jaloo, also of class 11 ngol.

ar-de ndeŋ/ar-gol ngol "The act of coming"
(cf. cl. 3 nde/11 ngol)

aaw-de ndeŋ/aaw-ngol ngol "The act of sowing"
(cf. cl. 3 nde/11 ngol)

(1) This term has already been used by Arnott to describe the same situation in the Gambia dialect (cf. Arnott, D.W. 1970, p. 371).

egg-ude nden/egg-ugol "The act of emigrating"
 ngol (cf. cl. 3 nde/11 ngol)

bad-aade nden/bad-agol "The act of approaching"
 ngol (cf. cl. 3 nde/11 ngol)

loot-aade nden/loot-agol "The act of washing"
 ngol (cf. cl. 3 nde/11 ngol)

Fuuta Tooro

daan-aade ndee "The act of sleeping"
 (cf. cl. 3 nde)

fooft-aade ndee "The act of resting"
 (cf. cl. 3 nde)

hed-aade ndee "The act of listening"
 (cf. cl. 3 nde)

bamt-eede ndee "The act of being raised"
 (cf. cl. 3 nde)

foof-eede ndee "The act of being pulled"
 (cf. cl. 3 nde)

had-eede ndee "The act of being prevented"
 (cf. cl. 3 nde)

b) Participles: They may have forms in all classes, rather like adjectives, according to the noun they refer to, or to the semantic correlation (cf. table 1).

(i) Past participles

Fuuta Jaloo/Fuuta Tooro

| | | |
|-------------|--------------------------|-------------------|
| ar-do | "The one who came" | (cf. cl. 1 o) |
| bir-be | "The ones who milked" | (cf. cl. 2 be) |
| egg-u-nde | "The one that emigrated" | (cf. cl. 3 nde) |
| egg-u-ndi " | ... | " (cf. cl. 4 ndi) |
| egg-u-ndu " | ... | " (... 5 ndu) |
| egg-u-nge " | ... | " (... 6 nge) |
| egg-u-ngu " | ... | " (... 8 ngu) |

(cf table 1 for further details)

(ii) *Future*/habitual participles

Fuuta Jaloo

| | | |
|--------------|------------------------------|--|
| egg-oo-wo | "The one who will emigrate" | (or the one who emigrates; class 1, o) |
| egg-oo-be | "The ones who will emigrate" | (cf. cl. 2 be) |
| egg-oo-nde | "The one that will emigrate" | (cf. cl. 3 nde) |
| egg-oo-ndi " | ... | " (... 4 ndi) |

egg-oo-ndu "The one that will emigrate" (cf. cl. 5 ndu)

egg-oo-nge " ... " (... 6 nge)

Fuuta Tooro

laat-otoo-do "The one who will become" (cf. cl. 1, o)

laat-otoo-be "The ones who will become" (cf. cl. 2 be)

laat-otoo-nde "The one that will become" (cf. cl. 3 nde)

laat-otoo-ndi "The ... " (... 4 ndi)

laat-otoo-ndu "The ... " (... 5 ndu)

- 12.3. Furthermore, both infinitives and participles have a pattern of initial consonant alternation that is similar to that of the nominal system; such a pattern applies almost entirely to Fuuta Tooro, since the system of initial consonant alternation does not operate fully in the Fuuta Jaloo dialect (cf. chapter 1, section B).

Past participles (Fuuta Tooro)

Singular/plural

p/f paamdo/faam-be "The one/ones who understand"
(cf. cl. 1 o; cl. 2 be)

| | |
|--------------------------------|--|
| k/h kiir-ndi/hiir-ɗi | "The one/the ones that spent the night" (cf. cl. 4 ndi/cl. 20 ɗi) |
| d/r don-ndu/ron-ɗi | "The one/the ones that inherited" (cf. cl. 5 ndu/cl. 20 ɗi) |
| d/nd dar-iiŋgel/ndar- iikon | "The one/the ones that is/ are standing" (cf. cl. 21 ŋgel/cl. 24 .kon) |

- 12.4. As verbs, they consist of verbal radicals and suffixes which can be assigned to the three voices of the verbal system, e.g.

Active voice

(i) Infinitives

Fuuta Jaloo

fagg-ude/fagg-ugol "To feed"

Fuuta Tooro: fagg-ude "To feed"

(ii) Future/habitual participles

Fuuta Jaloo: fagg-ooɔo

"The one who will feed"

Fuuta Tooro: fagg-ooɔo

(iii) Past participle

Fuuta Jaloo/Fuuta Tooro: fagg-udo "The one who fed"

Middle Voice(i) Infinitives

Fuuta Jaloo: fagg-aade/fagg-agol
"To feed oneself"

Fuuta Tooro: fagg-aade

(ii) Future/habitual participle

Fuuta Jaloo/Fuuta Tooro: fagg-otoodo
"The one who feed himself"

(iii) Past participle

Fuuta Jaloo/Fuuta Tooro: fagg-iido
"The one who fed himself"

Passive Voice(i) Infinitive

Fuuta Jaloo/Fuuta Tooro: fagg-eeede "To be fed"

(ii) Future/habitual participles

Fuuta Jaloo fagg-eteedo "The one who will be fed"
pagg-eteedo

(iii) Past participle

Fuuta Jaloo: fagg-aado

"The one who was fed"

Fuuta Tooro: pagg-aado

Further illustrations from Fuuta Tooro

Sayku Umaar,
oon sa'a, ina woni e
fell-ude diine hedde
funnaange (infinitive,
active)

"At that time, Sayku Umaar
was waging a religious
war towards the east (lit.
Sayku Umaar, at that time,
is dwelling in shooting
for religion towards the
east)"

-Mbeewa suusa waal-de
e ladde (infinitive,
active)

"A goat will not dare to
spend the night in the
bush"

-Ngar-daa ko jann-ude
Pulaar? (infinitive,
active)

"Did you come to learn
Pulaar?"

-Ko dumdo miin
njinno-mi yottin-de
(infinitive, active)

"This is what I wanted
to talk about"

-Nagge no waawi lel-aade
e ladde haaa fina oora
(infinitive, middle)

"A cow can spend the night in
the bush and go grazing in
the morning"

- so tawii ko pulaar ngar-
daa naamr-aade naamno-daa
doo ko woowi e ko anndaa
do. (infinitive, middle) "If you came to do
research on the Pulaar
language you should pay
attention to people's
habits and to what
they know (naammaade
"to ask")"
- Ko doo bur-be e
bur-aabe paɗi yoolare
(past participle, active,
middle) "This is where the
powerful and the weak
wait for their loss (lit.
This is where those-who-
exceeded and those-
who-were-exceeded await
their perdition)"

- 12.5. On the other hand, as in the verbal system, radicals
of verbo-nominals can be both simple or derived.
They can combine with the various radical infixes
described in chapter 9, e.g.

Fuuta Jaloo

- Mɗen fuddi hiwr-
ondir-de (cf -ondir-) "We started greeting
each other"
- Be jabaani
yaaf-ondir-de
(cf chapter 9 -ondir-) "They refused to forgive
each other"
- o yahi lannd-it-aade be "He went to ask them

| | |
|--|--|
| ko ʃe wi'unoo koŋ | again what they had said" |
| -Be joottii e <u>haal-an-</u> <u>de</u> mo ko o faalaa nande koŋ (cf. chapter 9, -an-) | "They went back to telling him what he wanted to hear" |
| -Be heʃaali feere dog- iŋ-gol mo fii yo ʃe suudu mo (cf Chapter 9, -in-) | "They did not have time to make him run and hide" |
| -Kambe <u>art-id-uʃe</u> doo ʃeŋ, wota Alla waɗu barke e maʃʃe (cf chapter 9, -id-) | "May God curse those who come back here together (lit. Those-who-come- back-together here, may God not bless them) |
| -Loot-or-do saabunde woo nyawndagal mu'uŋ bonay | "Whoever washes with soap will spoil his juju" |

- 12.6. Past and future/habitual participles combine with the past anterior affix. In all such cases the long-vowelled form -noo- is inserted within the participial suffix, e.g.

a) Past participle

Active Voice

Fuuta Jaloo/Fuuta Tooro

-ufo gives -u-noo-do
 -unde gives -u-noo-nde
 -undi gives -u-noo-ndi

nanng-u-noo-do
 nanng-u-noo-nde "The one that caught"
 nanng-u-noo-ndi (cf classes 1 o, 3 nde, 4 ndi)

Middle Voice

Fuuta Jaloo/Fuuta Tooro

-ii-do/-ii-nde/-ii-ndi > -i-noo-do/-i-noo-nde/
 -i-noo-ndi

loot-i-noo-do }
 loot-i-noo-nde } "The one that had a wash"
 loot-i-noo-ndi } (cf classes 1 o, 3 nde, 4 ndi)

Passive Voice

Fuuta Jaloo/Fuuta Tooro

-aa-do/-aa-nde/-aa-ndi > -a-noo-do/-a-noo-nde/
 -a-noo-ndi

nanng-a-noo-do }
 nanng-a-noo-nde } "The one that was caught"
 nanng-a-noo-ndi }

b) Future/habitual participlesActiveFuuta Jaloo: -ay-do > -ay-noo-do

loot-ay-noo-do "The one that was washing something"

nayaam-ay-noo-nde "The one that was eating"

Fuuta Tooro

-at-do > -an-noo-do

-at-nde > -an-noo-nde

| | | |
|-----------------|---|---------------------------|
| nyaam-an-noo-do | } | "The one that was eating" |
| nyaam-a-noo-nde | | |

Middle VoiceFuuta Jaloo/Fuuta Tooro

-otoo-do gives -oto-noo-do

-otoo-nde gives -oto-noo-nde

-otoo-ndi gives -oto-noo-ndi

| | | | |
|------------------|---|----------------------------------|---------------------------------|
| loot-oto-noo-do | } | "The one that was having a wash" | |
| loot-oto-noo-nde | | | (cf. classes 1 o, 3 nde, 4 ndi) |
| loot-oto-noo-ndi | | | |

Passive VoiceFuuta Jaloo/Fuuta Tooro

- etee- do > - ete- noo- do
 - etee- nde > - ete- noo- nde
 - etee- ndi > - ete- noo- ndi

loot- ete- noo- do }
 loot- ete- noo- nde } "The one that was going to
 loot- ete- noo- ndi } be washed" (cf classes 1 o,
 3 nde; 4 ndi)

Variations between the two dialectsInfinitives

- 12.7. In Fuuta Jaloo there are two forms of infinitive
 which are used indifferently by the various
 speakers, e.g.

(i) Infinitive 1

Active: -ude
 Middle: -aade
 Passive: -eede

(ii) Infinitive 2

Active: -ugol
 Middle: -agol
 Passive: -eede

It will be noted that the passive form of infinitive 1 is common to the two dialects. Only infinitive 1 is found in Fuuta Tooro and is, therefore, common to the two dialects.

Participles

- 12.8. There is a phonological variation in the singular of the future/habitual participle active of the two dialects: The Fuuta Jaloo personal singular affix -wo- is -do- in Fuuta Tooro, e.g.

| | |
|-----------|--------------------------|
| dog-oo-wo | } "The one who will run" |
| dog-oo-do | |

Variations within individual dialects

- 12.9. There is one case worth mentioning, and it occurs in the Fuuta Tooro dialect. Some speakers in the Eastern part of Fuuta Tooro (in the department of Podor) have tended to replace the normal endings -ude, -aade, -eede, of the infinitive with the suffixes -u, -o, -e respectively in the active, middle and passive voices, e.g.

| | |
|---|---------------------------|
| Kabaaru demal nyebbe, so min | "How to grow beans; |
| tottaama nyebbe dee min | When we have been given |
| leppina gese dee; ndiyam | the beans we soak them, |
| dam no yaara no foti | we then soak the fields |
| yaar ⁽²⁾ , gori dii ma mbadi | thoroughly (lit. we |
| tan do poti haadde <u>lepp-u</u> | wet the fields, the water |

flows just as it
ought to flow, the
furrows carry water
just as they ought to)"

Aan, mi haaytii ma natt-u
wuro amen, sabu saa⁽³⁾
arii a ittat nyebbe amen
nawaa. Kono noon saa
anndii e nder ganndal
maa ada waawi jagg-u
nyebbe, ada waawi acc-u
nyebbe dee, njid-mi ko
ngaraa wuro amen.

"I have changed my mind
about inviting you back
to our village because
when you come you will steal
all our beans, But if you
can satisfy me that, once
you are there, you can
control yourself and
refrain from taking the
beans away, I shall
still invite you over"

Middle Voice

Kabaaru ligge gese: So maaro
koo fudii, min ngona e
ligg-o gese dee, min ngona
e toppit-o gese dee

"How to grow rice: When
the rice grows we start work-
ing again in the fields
and we keep looking after
them"

Passive Voice

-Hade mbii-daa kaa feeraa
fiy-e salamburu, heblano
fiy-e salamburu hannde.

"Since you said you have
never been beaten with a
stick, get ready to be

beaten with one
 today (lit. since
 you said you never
 to be beaten with a stick
 get-ready-to be beaten
 with a stick today)"

The -e, i.e. the passive form, was found in the
 above instance only, whereas there are many
 instances where the forms -u and -o are used in
 the active and the middle.

-
- (2) jaar < yah-ir < yah-ir-de
 (3) saa < so + a "if you".

Table 1. Past participial paradigm in the two dialects

| Class no. | tedd-u "The one(s) that is heavy" | laat-ii "The one(s) that has become" | bil-aa "The one(s) that is hung up" |
|-----------|--------------------------------------|---|--|

| 17 | tedd-udan/-udam | laat-iidan/-iidam | bil-aadan/-aadam |
| 18 | tedd-udun/-udum | laat-iidun/-iidum | bil-aadun/-aadum |
| 19 | tedd-ude | laat-iide | bil-aade |
| 20 | tedd-udi | laat-iidi | bil-aadi |
| 21 | tedd-ungel | laat-iingel | bil-aangel |
| 22 | tedd-ukal | laat-iikal | bil-aakal |
| XXIII | tedd-ukun | laat-iikun | bil-aakun |
| 24 | tedd-ukoy/-ukon | laat-iikoy/iikon | bil-aakoy/-aakon |
| 25 | tedd-ungal | laat-iingal | bil-iingal |
| XXVI | tedd-ungii | laat-iingii | bil-iingii |

| | |
|------------------------------|---|
| Himo <u>faawo</u> mabb e | "He is behind them" (prepositional function) |
| Himo gaanyii ka <u>yeeso</u> | "He is injured on the face" (noun) |
| o yehii <u>yeeso</u> | "he has gone in front" (adverbial function) |
| <u>Fuuta Tooro</u> | |
| En kawrat <u>yeeso</u> | "We'll meet in front" (adverbial function) |
| Aan, a sanii <u>yeeso</u> | "you've got a nice ^{face} (noun)" |
| ---yeeso makko | "In front of him" |

In these examples of prepositional and adverbial functions, the meaning of the verb is modified either by the item alone (adverbial function) or by the item plus a noun or a pronoun (prepositional phrase).

Adverbs

- 13.3. The modifications mentioned above occur in the semantic areas of time, place (here, there, over-there) manner, degree etc. and the various items will be dealt with under this classification. On the other

hand, items with adverbial functions are of two syntactic types:

1) Those which have no pronouns of reference, e.g. jooni "now", law "early", fo'o/foo "here". These are the items which may appropriately be classified as adverbs.

2) Those which have pronouns of reference, e.g. baawo "back", yeeso "face". These are the items which can be said to have adverbial function (as well as functioning as nouns in other circumstances).

(i) Adverbs of time

13.4. The following is a list of common adverbs of time, together with examples of their uses.

Fuuta Jaloo

| | |
|----------------------------|----------------------------|
| jooni | "now" |
| abada | "never" |
| law | "early" |
| hannde | "today" |
| naane | "a while ago" |
| hikka | "this year" |
| hanke | "yesterday" |
| hecci-hanke ⁽¹⁾ | "the day before yesterday" |
| janngo | "tomorrow" |
| faddi-janngo | "the day after tomorrow" |

| | | |
|-------------------------------|-----------------------------------|--|
| funnaange | "east" | (compound of fud- "to rise and naange "sun") |
| hirnaange | "west" | (compound of hiir - "to spend the evening + naange "sun") |
| nduungu | "in the rainy season" | |
| ceefu | "in the dry season" | |
| wenndoogo | "in the early morning" | (also a noun) |
| subaka | "at day-break" | (also a noun) |
| bimbi | "in the morning" | (...) |
| pufal | "at sunrise" | (...) |
| walluhaa | "in the middle of the morning" | (...) |
| naange e hoore ⁽²⁾ | "at the noon" | (...) |
| fanaa | "in the early afternoon" | (...) |
| alansaraa | "in the late afternoon" | (...) |
| mutal | "at sunset" | (...) |
| futuroo | "at dusk" | (...) |
| jemma | "at night" | (...) |
| nyalorma | "in the day time" | (...) |
| rowani | "last year" | |
| rowani ndeya | "two years ago" | |
| Ko arata ⁽³⁾ | "next year" | |

Examples of their use

Ko jooni o ari "he has just arrived"
(lit. it is now that he came)

(1) This adverbial phrase is a compound of heccude "to be older than" and hayki "yesterday"; thus hecci-hayki means "(the day which is) older than yesterday", literally.

| | |
|------------------------------------|--|
| o aray <u>hannde</u> | "he will come today" |
| Fado <u>janngo</u> mi yoba maa | "Wait (till) tomorrow and I'll pay you" |
| suka on dawi <u>bimbi</u> | "the young man left early in the morning" |
| men yiidaali gila <u>rowani</u> | "We have not seen each other since last year" |
| Maaro hebike <u>hikka</u> | "We have plenty of rice this year" |

13.5. The above terms are roughly encountered in Fuuta Tooro, with the following differences.

| | |
|---------------------------|----------------------------|
| naane | "a while ago" |
| heccanki | "the day before yesterday" |
| fabbi-janngo/baawo-janngo | "the day after tomorrow" |
| tisubaar/sallifanaa | "in the early afternoon" |
| takkusaan | "in the late afternoon" |
| nyalawma | "in the day time" |
| jamma | "at night" |

-
- (2) This adverbial phrase literally means "sun on head"; it refers to the fact that at noon, bodies coincide with their shadows, under the sun.
- (3) This too is an adverbial phrase and it means "what will come", literally.

Examples are

ngartir-mi nagge ngee, "I brought back the cow
mbad-mi no mbannoo- and I did as I did a while
mi naane mi ago"

Ko mi biido samba "I told Samba to come and
yo o aranam fabbi- collect me the day after tomorrow"
janngo

Modo ara e takkusaan "I am coming in the late
afternoon"

Gorko oo maayi jamma "the man died at night"

(ii) Adverbs of place

13.6. The list of adverbs modifying the meanings of verbs in terms of place are as follows:

| <u>Fuuta Jaloo</u> | <u>Fuuta Tooro</u> | <u>Meanings</u> |
|--------------------|--------------------|---|
| Ga | ga/Gaay | "over here" |
| do'o | doo | "here" |
| da | da | "there" (but not too far) |
| to'o | too | "over there" (further than da)... |
| doŋ | doon | "there, at the place in question" |
| toŋ | toon | "there, at the place in question" (but further than doŋ/doon) |

| | | |
|----------|----------|---------------------------|
| nder | nder | "in", "inside" |
| hey | heen | "in" (no verbs of motion) |
| yaasi | yaasi | "out, outside" |
| yeeso | yeeso | "in front" |
| ɓaawo | ɓaawo | "behind" |
| hakkunde | hakkunde | "in the middle" |
| dow | dow | "above" |
| ley | les | "below" |

13.7. It may be useful to make a detailed analysis of some of the above adverbs.

13.8. The main difference between the sets *ɗo'o/ɗoo* and *ga/gaay* is that the latter tends to be preferred when an idea of movement is implied, e.g.

Fuuta Jaloo

Ar joodo-ɗaa ga! "Come and sit over here!"

but

Ko ɗo'o ɓe hodi "they live here" (lit. it is here that they live)

Fuuta Tooro

Miin, mi yaltinaama e "I have been sacked from

ligge dee. Aduna am fof
bonii. Jooni noon ngar-
mi ga

my job. All my career
has been wasted. I
have now decided to
come over here"

Laamdo oo wii: suka,
ar gaay!

"The King said: Come
here, young man"

but

oo Gorke na ni "
doo ina wujja mi
na'i

"The man is here just
to steal my cows"

- 13.9. The distinction between da/to'o and da/too can be made in terms of distance; da often refers to a location that is nearer to the speaker than to'o/too.

Fuuta Jaloo

saare ndeⁿ ko da
woni. Nde wo^ddaa hay
see^{da}

"The village is just
there it is not far at all"

Fuuta Tooro

Gorke oo wii ina hodi
too, to wi'etee Gede

"The man said he lives
over there, at a village
called Gede"

Jale dee ina too, min
mofti dum'en too, e ngesa
hee

"The hoes are over there,
we kept them over there, in
the field"

- 13.10. Doŋ/ɗoon and toŋ/toon are in contrast to do'o/ɗoo and to'o/too. They are encountered in written materials and in conversation; they refer to a place that has been mentioned previously.

Fuuta Jaloo

Wi'-aa mo yo o "Tell him to stay there"
 wonu toŋ (lit. you-should-tell-him to
 stay there-at-the-place-in-
 question)

si di hewtii toŋ, di "When they get there, some
 woocanee haako di leaves are cut for them to chew"
 y'akka

Fuuta Tooro

Mbeɗe wondi toon "I am there with many people"
 e yimbe kew be

Hade be njaata toon "Before they go there
 tawata ko be njannannoo (to that place) they
 fof be njannanii would have learnt
 everything they ought
 to learn"

- 13.11. The adverb heŋ/heen "in the one referred to" also indicates a place mentioned previously. On the other hand, it is used in its abstract sense

whereby it refers to a part, as opposed to the whole, of the matter in question.

Fuuta Jaloo

si aaden heɓii jawdi,
o nyaamaali ndi, o
nyamminali hen
yimbe moyyube, taway
ndin jawdi moyyaali

"If a person gets wealthy
and he or she does not
make any use of the
wealth or help the
needy with it, that
wealth is useless (o
nyamminali hen : lit.
he has-not-made good
people eat in it)

Gorko on liggaaki hen,
tampaali hen

"The man has neither worked
nor suffered over there"
(lit. Man the has-not-worked-
in-it, has-not-toiled in-
it, the place in question)

Fuuta Tooro

so debbo oo defii
gawri wada heen liddi

"The woman cooks guinea-corn
she adds fish to it"

ngon-mi poliis⁽⁴⁾ haa
janngo heen

"I remained at the police
station until the following
day"

(4) Loan from the French language "police"

Heen o waali, heen o nyalli "He spent a night and
a day there" (lit.
there he spent a night,
there he spent a day)

- 13.12. Illustrations of nder "inside" and yaasi "outside"
are as follows.

Fuuta Jaloo

Naatu nder! "Go in"

Himo nder "He is inside"

Himo darii yaasi "He is standing outside"

Fuuta Tooro

So hiirii, mi yaha, "When the night falls,
mifa'a nder, mi biroya I go in and milk my cow"
naggelam

- 13.13. Below are examples of the adverbial function
of certain nouns.

Fuuta Jaloo

Cukaloy koy no ara "The children are coming
baawo behind"

| | |
|--|---|
| Mi accii kaalisi an on fow <u>baawo</u> | "I left all my money behind" |
| Yo Alla nawru leydi ndin <u>yeeso</u> | "May God advance the country" (lit. May God take the country forward) |

Fuuta Tooro

| | |
|--|--|
| O yaari <u>yeeso</u> , Hammadi- Baleejo tappi mbo loowande | "He went in front, Hammadi- The-Black hit him with a bullet" |
| Na'i makko dii na ni <u>yeeso</u> | "His cows are in front" |
| Omo to <u>hakkunde</u> | "He is in the middle" |

13.14. Examples of dow "above" and ley/les "below" are as follows.

Fuuta Jaloo

| | |
|---------------------------------|---|
| O yawii <u>dow</u> | "He has climbed up" |
| O ferike labi kin <u>dow</u> | "He threw the knife up" (in the air) |

Fuuta Tooro

Bojel yehi sudoyii les "The hare went to hide
below"

Omo waalii les, e nder "He is lying below, in the
lesdi hee ground"

(iii) Adverbs of manner

- 13.15. The following items can modify the meaning of the verb in terms of manner, in both dialects:

Fuuta Jaloo/Fuuta Tooro

nii "like this"
noŋ/noon "like that"

Fuuta Jaloo

o wuttiri nii "He whistled like this"

Be woniri noŋ gila "They remained like that from the
bimbi haa jemma morning to the night"

Fuuta Tooro

Ko sebbe mba'i noon "It is the Mandings who
Pullo waawataa waade are like that, a Pullo
no mbii-ɗaa nii cannot be the way you
said"

Be njoodori noon haa "They remained like
booyi that for a long time"

(iv) Adverbs of degree

- 13.16. These adverbs and items functioning as adverbial intensifiers play a heightening or a lowering part on the verbs they modify. Many of such items are periphrastic constructions which function adverbially, as will be noted in the following list.

Fuuta Jaloo

| | |
|-----------------------------------|---|
| fota/moyya/komoyyi ⁽⁵⁾ | "very much" |
| haa feyyiti/haa laabi | "superlatives" (lit. until it exceeded/ until it was clean) |
| seeda | "a little" |
| buy | "a lot" |

(5) literally these items mean:

| | |
|--------------------------|---|
| fota "that-may-be-good" | (from fotude "to be good", and the secondary subjunctive) |
| moyya "that-may-be-good" | (from moyyude "to be good" and the secondary subjunctive active) |
| ko moyyi "what is good" | (from moyyude and the relative past active) |

Fuuta Tooro

| | | |
|-----------|---------------|-------------------------|
| no feewi | "very much" | (lit. "it is straight") |
| haa laabi | "superlative" | |
| seeḍa | "a little" | |
| ko heewi | "a lot" | (lit. "what is a lot") |

IllustrationsFuuta Jaloo

| | |
|----------------------------|---|
| O nawyii <u>fota</u> | "He has grown very old" (lit. "he has grown old very much") |
| O waadi haa <u>feyviti</u> | "He put too much" (lit. "He put until-it- exceeded") |
| O yaari <u>haa laabi</u> | "He drank to the last drop" (lit. he drank until it became clean" |
| Beydu <u>seeḍa</u> | "Add a little" |

Fuuta Tooro

| | |
|---|--|
| Be pelli ḍum'en, be liggii ḍum'en ligge na boni <u>no feewi</u> | "They shot them, they inflicted on them very heavy casualties" (lit. |
|---|--|

shot them, they worked them
work-which is-very bad)

Laamdo oo noddi suka
gorko oo. Tawi ko
giidiiko no feewi wonnoo

"The king called the
young man. The latter hap-
pened to be a very good
friend of the king"

yehi haa juuti seeda,
maayo ngoo heewi ndiyam

"After a little while
the river was full of
water"

(v) Adverbs of interrogation

- 13.17. In non-interrogative sentences the same items function as conjunctions joining the two parts together, e.g. Mi amndaa nde o arata "I don't know when he will come"
- 13.18. The following is a list of most common adverbs of interrogation.

Fuuta Jaloo: nde, honnde tuma,
ko honnde tuma

"When?"

Fuuta Tooro: nde, honde, holnde

Fuuta Jaloo: honto, ko honto

"Where?"

Fuuta Toorò: to, hoto, holdo, hofo

Fuuta Jaloo: no, honno, ko honno "How?"

Fuuta Tooro: no, holno, hono

Fuuta Jaloo: ko wafi "Why?"

Fuuta Tooro: ko wafi, ko taki

Illustrations:

Fuuta Jaloo:

Nde arat-aa? "When will you come?"
Ko honnde tuma o ari? "When did he come?"
Ko honto o hofi? "Where does he live?"
Ko honno wi'ete-daa? "What is your name?"
 (lit. How are you called?)

Fuuta Tooro

Debbo oo naamndii mbo: "The woman inquired: You there,
hodo ummi-daa, aan? where do you come from?"

wi'aa: Bambaado "They shouted: A griot has
arii! Bambaado arii! come! A griot has come! Where
Holdo o ummii? does he come from?"

Hono mbadduno-don e "How did you deal with them?"
mabbe?

Ko taki ngar-daa ga? "Why did you come here?"

Prepositions (cf. § 13.1.-2.)

13.19. The following is a list of some of the most commonly used prepositions in the two dialects:

ka "at, to" (Fuuta Jaloo) (omitted with proper names of places)

to "at, to" (Fuuta Tooro) (...)

gila "from"

heede/telen "towards" (Fuuta Jaloo)

hedde/banne "towards" (Fuuta Tooro)

hakkunde "between, amongst" (also a noun)

baawo "behind, after" (also a noun)

caggal "behind" (Fuuta Tooro only) (also a noun)

yeeso "in front of" (also a noun)

nder "in, into, among"

dow "on, over"

les "under" (Fuuta Tooro)

Ley "under" (Fuuta Jaloo)

takko "near" (Fuuta Jaloo)

sera "near" (Fuuta Tooro)

Examples of their useFuuta Jaloo

| | |
|---|--|
| Neene an no <u>ka</u> luumo | "My mother is at the market" |
| o salii nyaamude <u>gila</u> subaka haa nibbi | "He refused to eat from the morning till it got dark" |
| --- heede/teleŋ Funnaage | "towards the east" |
| --- <u>hakkunde</u> Koldaa e Ndakaaru | "between Kolda and Dakar" |
| Haalaa wadataa <u>hakkunde</u> meeden | "There can't be any argument between us" (lit. an argument will not happen between us) |
| bonooru nduŋ immori <u>baawo</u> cukaleel ŋgel | "The hyena came from behind the child" |
| wata daro <u>yeeso</u> an | "Don't stop in front of me" |
| --- <u>nder</u> suudu | "in a hut" |
| --- <u>dow</u> leggal | "on top of a tree" |
| Miɗo fowtoyaade ka <u>ley</u> mangohi | "I am going to have some rest under the mango-tree" |
| --- takko Labe | "Near Labe" |

Fuuta Tooro

| | |
|--|---|
| Gorko oo ummii, yahi <u>to</u> satigi | "The man got up and went to the king's" |
| Min njaadi <u>to</u> sumaare | "We went together to Sumaare's" |
| Hammadi naatoyi <u>to</u> huɓeere | "Hammadi went into the building" |
| Kaŋko e jom-galle makko ɓe ngasi <u>gila</u> subaka haa kiikiide | "He and his wife they dug (the ground) from sun-rise to sun-set)" |
| Modo wada batu <u>hakkunde</u> doo e balde tati | "I am going to convene a meeting between now and three days" |
| Baawo duum, satigi wii mbo: Aan, accu! | "After that, the king said to him = you, stop it!" |
| Caggal duum, o artaani | "He did not come back after that" |
| Modo joodii e <u>les</u> lekki | "I am seated under a tree" |

CHAPTER 14. IDEOPHONES AND ONOMATOPESES

- 14.1. Both dialects are rich in words of the type normally called ideophones and onomatopes. They occur fairly commonly in my texts and in general conversation.
- 14.2. The main differences between ideophones and onomatopes in the two dialects in question are as follows:
- (i) Ideophones refer to an abstract nature whereas onomatopes attempt to imitate the sound they are supposed to describe;
 - (ii) Ideophones cannot be verbalised whereas onomatopes can;
 - (iii) Ideophones have to accompany the verbs they modify whereas onomatopes can be used on their own.
 - (iv) Onomatopes can be repeated whereas ideophones cannot.

(all the above features will be dealt with and illustrated sufficiently during the course of the present chapter)

Ideophones

- 14.3. Ideophones emphasise the intensity of certain states and are generally used with non-dynamic verbs. Nearly all ideophones encountered so far are of CVC structure. In general these items are restricted to use with particular verbs, as shown below.

Fuuta Jaloo (CVC structures)

| | |
|----------------------------|-----------------------------|
| feewude <u>foc</u> | "to be perfectly straight" |
| rabbidude <u>pot</u> | "to be extremely short" |
| haafude <u>tak</u> | "to be very sour, peppery" |
| lammude <u>tar/car</u> | "to be very bitter" |
| yoorude <u>kos</u> | "to be very dry" |
| buubude <u>mel</u> | "to be very cool" |
| wulude <u>kuy</u> | "to be very hot" |
| mettude <u>cep</u> | "to be very insipid" |
| luubude <u>dus</u> | "to be very smelly" |
| hewde <u>tef</u> | "to be full to the brim" |
| diggude <u>for</u> | "to be perfectly ground" |
| laabude <u>cer/poy/pos</u> | "to be immaculately clean" |
| rawnude <u>tal/pe</u> | "to be dazzlingly white" |
| wojjude <u>coy</u> | "to be as red as a lobster" |

Other structures

ɓawlude kirom/kurum "to be pitch black"

Fuuta Tooro

| | |
|------------------------|--------------------------|
| so yehii haa gerte dee | "When the ground nuts |
| mawrii seeda min | grow up a little. we go |
| nduttoo kadi min | over them again and pick |
| doofa kudi haa | out every weed" |
| laaba <u>cer</u> | |

| | |
|----------------------|----------------------|
| Moddi ndii modi mbo, | "The snake swallowed |
| watti mbo baleejo | him and turned him |
| <u>kurum</u> | pitch black" |

14.4. The position of ideophones in the sentence is as follows:

1) Immediately following verb(s) they modify
(this is the most common position)

2) Found after the verbs wi'ude "to say",
wadude/wadde "to do" which are inserted
between the modified verbs and the modifying
ideophones.

14.5. The following Fuuta Jaloo examples illustrate
these two occurrences:

Conci an diŋ no rawni tal "My clothes are immediately
white"

but also

Conci an diŋ no rawni wi'i (lit. my clothes are
tal white-and-said tal)

Nde'e kaccuure no "This lemon is awfully
lammi tar bitter"

but also

Nde'e kaccuure no (lit. this lemon is
lammi wadi tar bitter-and-said tar)

- 14.6. Ideophones alter the intonation patterns of a sentence. They always contain the highest pitch, in both dialects, e.g.

Fuuta Jaloo

Himo rabbidi (_ _ - _ _)
"He is short"

but

Himo rabbidi pot (_ _ - _ _ -)
"He is very short"

Hindi luubi
"It smells" (_ _ - _)

but

Hindi luubi dus (_ _ - _ -)
"It smells very much"

Fuuta Tooro

Endi diggi (_ _ - _)
 "It is ground" (i.e. flour etc.)

but

Endi diggi dor (_ _ - _ -)
 "It is ground perfectly"

Eɗum metti (_ _ - _)
 "It is sour"

but

Eɗum metti cep (_ _ - _ -)
 "It is very sour"

Onomatopes

- 14.7. Unlike ideophones, these items can be used without a specific verb e.g.

be nani kos, kos, kos lit. They heard kos, ko, kos, (i.e. they heard the noise of a match being struck)

Like ideophones, they are also used with the verbs wi'ude "to say" and waɗude/wadde "to do, but ideophones require an additional verb as well.

when the wind of the
rainy season comes it is only
- the noise - put, put that
is heard under the mango
trees)

Gookiiru ndu^o wadi mo
bup ka baawo

"The chimpanze hit him on
the back" (lit. the
chimpanze did him bup on
the back)

Fuuta Tooro

Almeet⁽¹⁾ oo wii kos,
hubbi

"The match grated and it
caught fire" (lit.
The match said kos and
caught fire)

Ndiyam dam wadi
jur e nder horde hee

"The water dribbled into
the calabash" (lit. the
water did jur into the
calabash)

Group B

- 14.9. Group B is for onomatopes of CVCVC structure;
groups A and B are the primary structures of
onomatopes:-

(1) loan from the French allumette - match.

Fuuta Jaloo

curuk: Refers to the sound made by the movement of someone who suddenly enters something.

buret: Referring to the sound made by the movement of someone who runs suddenly from his hiding place.

puruk: Sound heard when something is being suddenly punctured.

pafet: Referring to the sound made by the movement of someone who suddenly breaks free from something that was holding him prisoner.

Ø wi'i curuk "He dashed into the hut"
ka nder suudu (lit. He said curuk into
the hut)

sariire ndeŋ waŋi buret "The hare rushed suddenly
e ley baape deŋ out of the leaves" (lit.
the hare did buret from under
the leaves)

Group C:

14.10. In order to lengthen or emphasize the duration of a

particular sound, it is possible to duplicate the vowel of group A structures or the second vowel of group B structures; this rule can be interpreted in the following manner:

(i) CVC gives CVVC, e.g.

put gives puut
 bup gives buup
 jur gives juur
 kos gives koos
 kat gives kaat
 cor gives coor
 nek gives neek

(please refer to group A for the interpretation of these onomatopes)

(ii) CVCVC gives CVCWVC, e.g.

curuk gives curuuk
 buret gives bureet
 puruk gives puruuk
 pafet gives pafeet

(please see Group B for the interpretation of these onomatopes)

Group D:

- 14.11 This group is syntactically similar to group C, but it is semantically different. Its aim is more to try and set the cadence of a particular sound than to emphasize its duration. It involves the

entire duplication of groups A and B, i.e.

(i) CVC gives CVC-CVC, e.g.

cor-cor, cor-cor: Continuous sound made by milk
that is dropping into a calabash

kat-kat, kat-kat: sound by a click that is ticking

tuᵛ-tuᵛ, tuᵛ-tuᵛ: continuous sound of 'pounding

Group E:

- 14.12. This group refers to instances whereby, instead of individual words, as we have seen so far, whole clauses or sentences are used as onomatopoeias; This is illustrated by the following text taken from Fuuta Tooro.

| | |
|---|---|
| <p>Sada⁽²⁾ una gawri ko 'a <u>jogi-mi jogi, a jogi- mi jogi!</u>" duum unugal ngal wi'ata, Tame⁽³⁾ dee noon mbi'ata ko <u>"seḏe wence mbicc-aa car! yo conndi e ceṅle ceer!"</u> So barme ina fata watta ko "<u>faturu wayaay, faturu waay</u>"; saḏa⁽²⁾ itta e barme hee aḏa waḏa e lahal</p> | <p>"The sound made two women pounding guinea-corn "A jogi-mijogi, a jogi-mi jog⁽⁴⁾", that is the sound made by the pestles. The noise made by the win- nowing is "seḏe wence mbicc-aa car! yo conndi e ceṅle ceer!" When the pot is boiling it sounds like: " faturu-waay! faturu-waay!" The noise made by the act of removing</p> |
|---|---|

ada totta, nyaamoobe,
 duum wi'etee "jiku-
baku, jiku-baku"
 so tawii ada lanca
 haa butba, duum
 woni: "yooy-aa dow!
yooy-aa dow!" Nyorgo
 inawifa haa nguleeki kii
 natta, duum woni "jam-
haan, jam-haan!"
 Nyiiri ndii butba
 njaltin-aa fedande kosam
 ndee ada wada "toko-toko
baadel!", Woni "toko-toko
baadel!" ko tumbude
 heen pedeeli ada irta
 ada wada nii. Burgal
 kanyum ligge mum ko
 "ndurye! Ndurye!"
 haa digga dor. Suukara
 wadee heen. so yimbe
 na nyaama ko "werec-
wembec! Werec-
wembec!"; duum woni
 nyaamndu ndun.

the food from the pot dishing
 it out onto a plate sounds
 like: "jiku-baku! jiku-baku!"
 When the food is being spread
 out in the plate, in order for
 it to cool down, the movement
 sounds like: "yooy-aa dow!
 yooy-aa dow!" The noise
 made by the fan that is used to
 cool it down is like: "jam-haan!
 jam-haan!" when the food has
 cooled down you take out the
 calabash of curdled milk
 and do "toko-toko baadel". The
 latter refers to the sound made
 by the act of plunging one's
 finger into the milk and
 stirring it. The sound made by
 the wooden spoon that stirs
 it is like: "ndurye! Ndurye!",
 until it becomes completely
 liquefied; when the food
 is being eaten, it sounds
 like: "werec-wembec! werec-
 wembec!"

-
- (2) Sada so "if" + ada "you"
 (3) loan from the French *tamis* - sieve
 (4) I have left onomatopoeic clauses as they are because I
 believe it is the sound they make that is more relevant
 than the translations. They have however been translated
 and commented upon below.

Running commentary on the various onomatopoeias
encountered in this text.

- (i) a jogi-mi jogi Lit. "you have - I have"
There are two women pounding
guinea-corn with pestles.
A jogi "you have" refers
to the sound of one of
the women's pestle whereas
mi jogi "I have" refers
to the other.

- (ii) sede wence mbicc-aa lit. "Winnow the grains
car! and spread them car!"

sed-ude "to winnow"

wence is an onomatopoe referring to
grains.

mbicc-aa: The verb wicc-ude "to spread", is
used in the second person singular
of the secondary tense of the
subjunctive.

car: is an onomatopoeic expression of
wicc-ude "to spread".

- (iii) yo conndi e ceñle "Let flour and grains
ceer! be separated!"

This sentence is in the primary tense of the subjunctive.

yo: tied particle
conndi: flour
e: and
ceŋle: grains
ceer (from) seer-de "to be separated"

(iv) Faturu waay:

Faturu: Act of boiling

waay: Donomatopoeic expression used after faturu.

(v) Jiku-baku: These are two clauses used in the general imperative.

jiku: collect! (singular)

baku: Dish out! (...)

(vi) yooy-aa dow:

Lit. "Melt into thin air"
 This clause is used in the second person singular of the secondary tense of the subjunctive. It refers to the steam that comes out of hot food and melts into thin air"

yooy-de:

"to melt, disappear"

dow:

"above, in the air"

(vii) jam haan: (This is the way the usual jam
tan "peace only" is rendered in
the text)

(viii) Toko-toko baadel

Toko-toko: onomatopoeic expression referring to
the sound of a finger that dips into
curdled milk and stirs it.

baadel: "A little drop"

(ix) Ndurye-Ndurye: This onomatopoeic expression
refers to the cadence of a wooden
spoon being used to stir
curdled milk.

(x) Werec-wemmbec: This onomatopoeic expression
refers to a sequence of
actions whereby the person
scoops up (werec) some
porridge with a wooden spoon
or a little calabash and
takes it to his mouth (wemmbec).

PART VI: GENERAL CONCLUSIONCHAPTER 15. CONCLUSIONS

- 15.1. The first five chapters of this thesis are devoted to a description of the phonology and the nominal system in the two dialects. Particular attention has been paid, to the nominal class system, numerals, noun substitutes and specifiers. It has been found that the similarities in the nominal class system of the two dialects outweigh by far their differences.
- 15.2. An attempt has been made to set out here a summary of the similarities and differences between the nominal systems of the two dialects.
- 15.3. The two dialects have the same number of vowels and consonants; the pattern of initial consonant alternation is the same in the two dialects, even though it operates only partially in Fuuta Jaloo.
- 15.4. Of the twenty-six nominal classes, twenty-two are common to the two dialects.
- 15.5. The major differences between the two dialects are as follows:

- 15.7. Firstly the initial consonant alternation operates fully in Fuuta Tooro, but it operates only partially in Fuuta Jaloo.
- 15.8. There are four classes in Fuuta Jaloo that do not seem to occur in Fuuta Tooro.
- 15.9. Possessive suffixes do not seem to occur in Fuuta Jaloo whereas they do so in Fuuta Tooro.
- 15.10. Fuuta Jaloo commonly velarizes nasal consonants in final positions, whereas Fuuta Tooro uses the bi-labial m or the alveolar n. On the other hand, final glottality is observed much more in Fuuta Jaloo than in Fuuta Tooro, where it is hardly noticeable in the speech of many of my informants.
- 15.11. Chapters 6 to 11 have been concerned with the verbal system of the two dialects, with particular reference to the tense-suffixes of the indicative and subjunctive moods, the forms of the imperative mood, derivative infixes, past anterior affix and subject and object pronouns. Verbo-nominals have been dealt with in part IV (chapter 12).
- 15.12. Just as occurred in the nominal system the present description has served to highlight the great

similarity between the verbal systems of the two dialects. Here too, I shall try to provide a brief outline of such similarities and differences.

- 15.13. The two dialects share the same categories of transitivity and mood. They both have transitive and intransitive forms and share active, middle and passive moods.
- 15.14. Of the eleven tenses of the indicative mood, nine are found in both dialects.
- 15.15. The two tenses of the subjunctive occur in both dialects.
- 15.16. The general form of the imperative is found in both dialects.
- 15.17. All major derivative infixes are found equally in the two dialects.
- 15.18. The basis of formation of the past anterior affix and its usage is also similar in the two dialects.
- 15.19. It has also been pointed out that subject and

object pronouns and verbo-nominals behave the same way in both Fuuta Jaloo and Fuuta Tooro.

- 15.20. Among the differences between the two dialects, one could point out the fact that the alternation of initial consonants does not operate in Fuuta Jaloo, that it operates fully in Fuuta Tooro; that the vague future and continuous 2nd forms are respectively restricted to Fuuta Tooro and Fuuta Jaloo only; that the polite and iterative forms of the imperative occur only in Fuuta Jaloo.
- 15.21. In the fifth section, adverbs and prepositions share the same syntactic structures in the two dialects. The main differences between the two dialects in this area are differences of vocabulary.
- 15.22. The uses of ideophones and onomatopoeias bear a greater difference between the two dialects; but one point worth noting here, of course, is that such uses are very much individual. This is taken to mean that there will be differences even between individuals belonging to the same dialects.
- 15.23. The foregoing chapters have served to show the close relationships between the dialects of Fuuta Jaloo and Fuuta Tooro. These links are both syntactic and semantic, as shown in the foregoing sections.
